User Questionnaire

ASTM E 1527-13 User Questionnaire

In order to qualify for the protection offered under the EPA All Appropriate Inquiry (AAI) Standard, the **User** (entities seeking to use the ASTM E1527-13 Practice to complete an environmental site assessment of the property; i.e. Lenders and/or Borrowers) must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that AAI is not complete. This information should be the collective knowledge of the entities relying on the Phase I. **Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the property.**

Site Name/Address: _____

Person Interviewed/Title: _____ Date: _____

If known, when was the property initially developed? _____

If different, when were the current building(s) on the property constructed? _____

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Did a search of *recorded land title records* (or judicial records where appropriate, see note 1 below) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law?

Yes ___ No ___ If you answer yes, please include an explanation in the space provided below:

2. Activity and land use limitations that are in place on the *property* or that have been filed or recorded in a registry (40 CFR 312.26).

Did a search of *recorded land title records* (or judicial records where appropriate, see note 1 below) identify AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed against the *property* under federal, tribal, state, or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). *Institutional Controls* are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Yes ___ No ___ If you answer yes, please include an explanation in the space provided below:

Note 1 - In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the *property* or nearby properties?

For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes ___ No ___ If you answer yes, please include an explanation in the space provided below:

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

a) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?

Yes ___ No ___ If you answer no, please include an explanation in the space provided below, including whether the lower purchase price is because contamination is known or believed to be present at the *property*?

5. Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *User*:

a. Do you know the past uses of the *property*?

Yes ___ No ___

b. Do you know of specific chemicals that are present or once were present at the *property*?

Yes ___ No ___

c. Do you know of spills or other chemical releases that have taken place at the *property*?

Yes ___ No ___

d. Do you know of any environmental cleanups that have taken place at the *property*?

Yes ___ No ___

If you answered yes to any of the questions above, please include an explanation in the space provided below:

6. The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

Yes ___ No ___ If you answer yes, please include an explanation in the space provided below:

Please provide the following property contact information:

Property Owner: _____

Phone Number: _____

Key Site Personnel: _____

Phone Number: _____

Past Owner: _____

EXECUTIVE SUMMARY

ERM-West, Inc. (ERM) conducted a Phase II Limited Subsurface Investigation on behalf of Pacific Gas and Electric Company (PG&E) at the site located at 1919 Webster Street in Oakland, Alameda County, California (the “site” or “subject property,”). The site is located in a commercial area of downtown Oakland, approximately two blocks from Lake Merritt. According to the Alameda County Recorder, the assessor’s parcel number of the site is 8-637-8-8. The site is currently owned by PG&E, which purchased the property in October 1975 (office building) and January 1977 (parking lot). This document summarizes the results of the work completed as outlined in the *Proposal for PG&E Webster Street Site, Phase II Limited Subsurface Investigation* [Proposal (ERM, 2016)]. This soil investigation was performed on behalf of PG&E to assess potential environmental liabilities associated with surface and/or subsurface impacts from past and current operations at the site in anticipation of sale of the subject property. This report provides a background summary, describes the scope of work, and presents the sampling results.

The site is in a mixed use commercial and residential area of downtown Oakland. The site is developed with a single structure that was constructed in 1950 and extensively renovated in 2000. The southern portion of the site included a gasoline service station from at least 1928 to 1952. Following demolition of the gasoline station in 1952, this portion of the site was redeveloped as a parking lot. There was no indication that the underground storage tanks (USTs) associated with the gasoline station had been removed or that subsurface investigations were ever performed.

PG&E purchased the property in 1975 for use as office space. In 1978, PG&E installed one 500-gallon waste oil UST and one 6,000-gallon UST in the parking lot portion of the property for fleet vehicle servicing. The waste oil tank UST was removed in 1988, and the gasoline UST was removed in 1994. On 26 January 1995, the Alameda County Environmental Health Department issued a closure letter related to the former gasoline UST; however, no such closure letter has ever been obtained for the 500-gallon waste oil UST. The site has only recently been vacated by PG&E.

Given the past usage of the site as a gasoline station and fleet vehicle servicing activities, and the potential for USTs to still be onsite, a Phase II investigation was completed. ERM performed the Phase II investigation on 13-15 April 2016. The investigation included a geophysical survey at the site to determine if evidence of the former USTs and/or associated piping still existed in the subsurface, installation of three soil borings for soil and groundwater sample collection, and installation of three soil vapor probes. Subsurface sample collection and geophysical investigations generally targeted areas of

environmental concern identified at the site through review of historical documentation and knowledge of typical historical operations. The following conclusions were made based on the Phase II investigation:

- Based on the GPR survey, there was no evidence of former USTs or associated piping remaining at the site.
- No visual or other evidence of impacts was observed during the field investigation.
- Total petroleum hydrocarbons as diesel, motor oil, and gasoline (TPH-d, TPH-mo, TPH-g, respectfully), and volatile organic compounds (VOCs) were not detected at concentrations greater than the commercial/industrial environmental screening levels (ESLs) in site soil or groundwater samples.
- Metals that were detected in site soil and groundwater samples were at relatively consistent concentrations in all the samples and were at concentrations below their commercial/industrial ESLs.
- Several VOCs were detected in site soil vapor samples collected; however, they were at relatively consistent concentrations in all the samples and were at concentrations below their commercial/industrial ESLs and California Human Health Screening Levels (CHHSLs).

Screening levels for the industrial land use scenario are considered to be the most appropriate basis for evaluating the results based on current and projected land use. Concentrations reported below the screening levels are generally not considered threats to human health or the environment under the relevant land use. The results of this limited subsurface investigation do not indicate obvious releases of hazardous substances onto the subject property and nor indicate that site soils and/or groundwater have been significantly impacted by historical site operations.

1.0 INTRODUCTION

ERM-West, Inc. (ERM) was retained by Pacific Gas and Electric Company (PG&E) to complete a Phase II Limited Subsurface Investigation at the site located at 1919 Webster Street in Oakland, Alameda County, California (the “site” or “subject property,” Figure 1). This document summarizes the results of the work completed as outlined in the *Proposal for PG&E Webster Street Site, Phase II Limited Subsurface Investigation* [Proposal (ERM, 2016)]. This soil investigation was performed on behalf of PG&E to assess potential environmental liabilities associated with surface and/or subsurface impacts from past and current operations at the site in anticipation of sale of the subject property, currently owned by PG&E. This report provides a background summary, describes the scope of work, and presents the sampling results.

1.1 DOCUMENT ORGANIZATION

This report presents the following information:

- Section 1.0 presents the project background;
- Section 2.0 describes the field activities;
- Section 3.0 presents the results of the investigation; and
- Section 4.0 lists documents referenced in this report.

Figures and analytical results tables follow the main text. Boring logs are provided in Appendix A and laboratory analytical reports and quality assurance/quality control (QA/QC) reviews of the analytical results are provided in Appendix B. A ground penetrating radar (GPR) survey report is included as Appendix C.

1.2 SITE BACKGROUND

The site is at 1919 Webster Street, Oakland, California, and is located in a commercial area of downtown Oakland, approximately two blocks from Lake Merritt. According to the Alameda County Recorder, the assessor’s parcel number of the site is 8-637-8-8. The site is currently owned by PG&E, which purchased the property in October 1975 (office building) and January 1977 (parking lot).

The site is in a mixed use commercial and residential area of downtown Oakland. The site is developed with a single structure that was constructed in 1950 and extensively renovated in 2000.

Access to the asphalt-surfaced parking lot on the southern portion of the site is provided from 19th Street to the south. The parking lot at the south side of the site is secured with chain link fencing along the east, west, and south sides. An automobile gate is located at the south side of the parking lot and a pedestrian gate is located at the east side.

A Phase I Environmental Site Assessment (Phase I) was performed by Nova Consulting in 2016. As noted in the Phase I, the site was historically developed with residential buildings from at least 1889 through 1911. The southern portion of the site included a gasoline service station from at least 1928 to 1952. The approximate location of the former gasoline station is presented on Figure 2. Following demolition of the gasoline station in 1952, this portion of the site was redeveloped as a parking lot. There was no indication that the underground storage tanks (USTs) associated with the gasoline station had been removed or that subsurface investigations were ever performed. The Phase I identified the potential that USTs may remain present in this portion of the site as a recognized environmental condition.

The current structure on the site is an office building which was constructed in 1950. Historical owners and/or occupants included Hospital Services of California, Kaiser Co. and Blue Cross Hospital, Blue Cross Health Plan Home Office. The building was originally three stories in height and circa 1966 three additional stories were added to the structure. PG&E purchased the property in 1975 for use as office space. In 1978, PG&E installed one 500-gallon waste oil UST and one 6,000-gallon UST in the parking lot portion of the property for fleet vehicle servicing. The approximate locations of these USTs are presented on Figure 2. The waste oil tank UST was removed in 1988, and the gasoline UST was removed in 1994. On 26 January 1995, the Alameda County Environmental Health Department issued a closure letter related to the former gasoline UST; however, no such closure letter has ever been obtained for the 500-gallon waste oil UST. The site has only recently been vacated by PG&E.

Given the past usage of the site as a gasoline station and fleet vehicle servicing activities, and the recognized environmental condition represented by the potential USTs, a Phase II investigation was proposed for the site. The purpose of the Phase II was to assess potential environmental liabilities associated with surface and/or subsurface impacts from past and current operations in anticipation of sale of the subject property, and to assess whether the site contains any environmental impact in excess of applicable regulatory screening levels.

2.0

FIELD ACTIVITIES

To complete the subsurface characterization, ERM performed a geophysical survey at the site to determine if evidence of the former USTs and/or associated piping still existed in the subsurface. In addition, ERM installed three soil borings (SB-1 through SB-3) and three soil vapor probes (SVPs) (SVP-1 through SVP-3). The boring and SVP locations were proposed based on the approximate locations of the former gas station and former USTs, and were placed in the presumed downgradient groundwater flow direction of these locations. Groundwater generally flows northeast towards Lake Merritt in the area of the site. Boring location SB-1 and SVP-1 were proposed to be installed near the former 500-gallon waste oil tank. Borings SB-2 and SB-3, and vapor probe locations SVP-2 and SVP-3 were proposed to be installed near the former gas station and the former 6,000-gallon UST. The locations of the borings and SVPs are presented on Figure 2.

Soil and groundwater sampling activities were performed from 13 April through 14 April 2016. Soil vapor sampling activities were performed on 15 April 2016. Soil and groundwater samples were collected from each boring. Soil vapor samples were collected from all three SVPs.

The following subsections describe the field investigation activities and procedures.

2.1

PREPARATION AND PERMITTING

A project-specific Health and Safety Plan (HASP) was prepared prior to implementing the field activities. The HASP summarized current site conditions and activities planned during the site investigation. All field staff reviewed the HASP prior to conducting work on site, and ERM's health and safety requirements were discussed with all ERM employees, ERM subcontractors, site personnel, and visitors during the morning tailgate meeting.

ERM implemented internal subsurface utility clearance procedures prior to initiation of field activities. Proposed boring locations were marked in the field prior to initiating the fieldwork. In accordance with the ERM subsurface clearance policy, ERM contacted Underground Services Alert, a service that notifies public utilities of the location and scope of proposed subsurface investigations and if in conflict, requires them to mark their utilities.

As required, ERM obtained a drilling permit from the Alameda County Public Works Agency.

2.2

PRIVATE UTILITY LOCATE AND GEOPHYSICAL SURVEY

Prior to ground disturbance activities at the site, a geophysical survey was conducted by Ground Penetrating Radar Systems, Inc. (GPRS). The purpose of the survey was to mark the locations of any subsurface utilities on site, and to determine whether any USTs and/or associated piping remained on the property. GPRS used two separate detection equipment to assist in the survey. Ground Penetrating Radar (GPR) was used by sending pulses of energy into a material and recording the strength and the time required for the return of the reflected signal. Reflections are produced when the energy pulses enter into a material with different electrical conduction properties from the material it left. This GPR unit, which used a 40 megahertz (mhz) antenna, achieved a total depth of as much as 8 feet below ground surface (bgs). An RD7000 pipe locator was used to detect electromagnetic fields from line power or radio frequency signals. It is also used in conjunction with a transmitter to connect directly to accessible, metallic, pipes, risers or tracer wires. Based on the utility clearance and GPR survey activities, drilling locations were modified, as necessary, to avoid utilities and anomalies. The GPRS survey report is included as Appendix C.

2.3

SOIL AND GROUNDWATER SAMPLING

ERM installed three soil borings (SB-1 through SB-3) during the investigation. Soil borings were hand-cleared using a hand auger to a minimum of 5 feet below ground surface (bgs), as required by ERM's internal subsurface utility clearance protocol. At the completion of hand augering, soil borings were continuously cored to total depths ranging from 20 to 28 feet bgs using direct-push drilling techniques. The boring locations are provided on Figure 2.

During drilling activities, ERM field personnel logged the soils in accordance with the Unified Soil Classification System guidelines. Soil cores were screened in the field for the presence of volatile organic compounds (VOCs) using an organic vapor analyzer with a photoionization detector, and the results were noted on the boring logs. In addition, physical observations such as staining and odor were also recorded on the boring logs. Copies of boring logs are included in Appendix A.

Soil samples were collected in 8-ounce jars or 6-inch (length) acetate sleeves, capped on both ends, and sealed with Teflon tape. Soil samples were collected at 5, 10, and 15 feet bgs at each boring location.

Once groundwater was encountered at each boring, a temporary groundwater monitoring point consisting of dedicated polyvinyl chloride casing with a slotted-screen was installed in each of the soil borings. A grab groundwater

sample was collected from each temporary groundwater monitoring point using dedicated polyethylene tubing and a peristaltic pump by utilizing low-flow sampling techniques. Grab groundwater samples were collected in laboratory-provided sample containers as specified below. In addition, one field duplicate groundwater sample and one trip blank were collected for QA/QC purposes. Groundwater samples for metals analysis were field-filtered prior to preservation to provide dissolved metals concentrations.

Soil and groundwater samples were labeled, placed in sealed plastic bags, stored in an iced cooler, and transported to Curtis & Tompkins Ltd., a California state-certified laboratory in Berkeley, California. All samples were recorded on a chain-of-custody form that accompanied the samples to the laboratory. Soil and groundwater samples were analyzed for the following:

- Total petroleum hydrocarbons (TPH) as gasoline (TPH-g) and VOCs by U.S. Environmental Protection Agency (USEPA) Method 8260B;
- TPH as diesel and motor oil (TPH-d and -mo) by USEPA Method 8015M with silica gel cleanup; and
- Leaking Underground Fuel Tank (LUFT) 5 Metals by USEPA Methods 200.7 and 6010 series.

Upon completion of soil and groundwater sampling, each borehole was backfilled with neat cement grout. For boring locations on concrete or asphalt, boreholes were patched using like material at the surface.

2.4

SOIL VAPOR SAMPLING

Three temporary SVPs (SVP-1 through SVP-3) were installed to assess shallow soil gas conditions at the site. The locations of these probes are shown on Figure 2. The SVPs were installed in accordance with the *Advisory – Active Soil Gas Investigations* (DTSC, 2015). At each SVP location, a hand auger was used to advance the boring to a depth of 5.5 feet bgs. Observations of the subsurface materials were described by an ERM geologist as recorded on the boring logs (Appendix A). Once the total depth of the boring was reached, the SVP construction materials were installed as follows:

- Each probe was constructed with 0.125-inch inner-diameter Teflon tubing equipped with a stainless-steel coupler and vapor point. The vapor points were installed at a depth of 5.0 feet bgs.
- A 1-foot-thick annular filter pack was installed around the vapor point. The filter pack consisted of clean, washed, well-graded, silica sand, and was installed from the bottom of the borehole to 0.5 foot above the vapor point.

- Dry granular bentonite was installed in the annular space to 1 foot above the sand pack.
- Hydrated bentonite was installed from the top of the dry granular bentonite to ground surface.

Consistent with the DTSC Advisory, samples were collected at least 48 hours after probe installation and at least 5 days after any significant rain event. Soil vapor sampling was conducted on 15 April 2016. Samples were shipped under standard chain-of-custody documentation to Eurofins Air Toxics, a certified analytical laboratory in Folsom, California, for analysis of VOCs by USEPA Method TO-15.

Following sample collection, the temporary SVPs and associated construction materials were removed, and the boreholes were backfilled with neat cement.

2.5 *INVESTIGATION-DERIVED WASTE*

All wastes generated during the sampling work were containerized in 55-gallon drums and placed in a designated location on site pending analysis prior to disposal. ERM will use the analytical data from soil and groundwater samples collected to characterize the investigation-derived waste. The soil and decontamination water will be properly disposed of at a licensed disposal facility in accordance with local, state, and federal regulations based on the analytical results.

2.6 *DATA ANALYSIS AND REVIEW*

ERM performed a data QA/QC review of the analytical results in accordance with the *USEPA Contract Laboratory Program National Functional Guidelines for Organic Data Review*, October 1999, and *USEPA Contract Laboratory Program National Functional Guidelines for Inorganic Data Review*, July 2004. The data quality review evaluated holding times, preservation methods, method blank sample results, laboratory control sample recoveries, and matrix and surrogate spike recoveries. Based on ERM's data quality review, the quality of the data generated during this investigation is acceptable for the preparation of technically defensible documents. The laboratory data packages and the QA/QC review are provided in Appendix B.

3.0 INVESTIGATION RESULTS

This section summarizes ERM's observations regarding site-specific geologic and hydrologic conditions, and presents the results of the laboratory analyses.

3.1 GEOPHYSICAL SURVEY RESULTS

GPRS's report indicated that no apparent USTs were detected at the site. GPRS detected several anomalies while conducting the GPR survey, including what appeared to be a reinforced concrete slab under the asphalt, but complete determination of the slab may have been inhibited due to the close spacing of rebar detected. In addition, the survey outlined a possible excavation area and a few other detected anomalies, but did not suggest the current presence of a UST or residual piping. Appendix C outlines the areas of detected materials onsite, as well as the underground scans of each specified area.

3.2 GEOLOGY AND HYDROGEOLOGY

Shallow soils that were observed during the limited investigation consisted of moist fine silty sands and sands, with occasional sandy clays and clays. Detailed descriptions of site soils are included on the boring logs in Appendix A. Wet soil was encountered between 15 and 16 feet bgs in each of the soil borings. Initial water levels measured in the boreholes ranged between 15.85 and 18.20 feet bgs.

3.3 SOIL ANALYTICAL RESULTS

Soil analytical results are summarized in Tables 1 and 2 for each chemical class. Detectable concentrations are compared to the following compound-specific, risk-based screening levels:

- Tier 1 Environmental Screening Levels (ESLs) from *ESL Workbook, Tier 1 Summary Table* (San Francisco Bay RWQCB, February 2016);
- Commercial/Industrial ESLs for Shallow Soils, from *ESL Workbook, Table S-1*, (San Francisco Bay RWQCB, February 2016); and
- Commercial/Industrial California Human Health Screening Levels (CHHSLs), from *Use of California Human Health Screening Levels (CHHSLs) in Evaluation of Contaminated Properties*, Table 1 (Cal/EPA September 2010).

Concentrations below the commercial/industrial CHSSLs and ESLs are generally not considered threats to human health or the environment under the relevant land use.

3.3.1 *TPH and VOCs in Site Soils*

As shown in Table 1, TPH-d was detected at concentrations above laboratory limits in all soil samples collected except for SB-1 at a depth of 10.5 feet bgs. All TPH-d concentrations were below the commercial/industrial screening levels and Tier 1 ESLs set for this compound (Table 1). All concentrations of TPH-d in site soils were either estimated values or the diesel chromatograms displayed patterns that were inconsistent with the reference standards for the corresponding compound. Therefore, the detection could be related to residue from an unknown petroleum source.

TPH-mo was detected in borings SB-2 and SB-3 at concentrations of 19 and 5.98 milligrams per kilogram (mg/kg), respectively. Both detections were at depths of 5.5 feet bgs. These TPH-mo concentrations were below the commercial/industrial screening levels and Tier 1 ESLs set for this compound (Table 1).

TPH-g was not detected in the soil samples collected from the subject property at concentrations above laboratory reporting limits. Reporting limits are less than the commercial/industrial ESLs for this compound.

There were two detections of acetone in soil samples analyzed: SB-1 at 10.5 feet bgs at a concentration of 0.0040 mg/kg and SB-2 at 10.5 feet bgs at a concentration of 0.0054 mg/kg. Both were qualified by the laboratory as estimated values. No other VOCs were detected above laboratory reporting limits in the soil samples collected from the subject property. Reporting limits for VOCs that were not detected were below the associated screening levels.

3.3.2 *Metals in Site Soils*

As shown in Table 2, all five of the metals analyzed were detected above laboratory reporting limits in the collected soil samples. Reporting limits for these five metals were below the associated CHHSLs and ESLs. The concentrations of metals detected were generally consistent in all the samples and were below the commercial/industrial CHHSLs and ESLs.

3.4

GROUNDWATER ANALYTICAL RESULTS

Groundwater analytical results are summarized in Tables 3 and 4 for each chemical class. Detectable concentrations are compared to the following compound-specific, risk-based screening levels:

- Tier 1 ESLs from *ESL Workbook, Tier 1 Summary Table* (San Francisco Bay RWQCB, February 2016);
- Commercial/industrial ESLs where groundwater is not a current or potential drinking water source from *Screening for Environmental Concerns at Sites with Contaminated Soil and Groundwater* (San Francisco Bay RWQCB, February 2016); and
- Drinking Water Standards - Primary Maximum Contaminant Levels from Regional Screening Level Summary Table (USEPA 2015).

Concentrations below the screening levels are generally not considered threats to human health with respect to sources of municipal and domestic supply.

As summarized in Section 2.2, groundwater samples were collected at all three soil boring locations across the subject property. The complete laboratory reports are provided in Appendix B. The results for each chemical class are summarized below.

3.4.1

TPH in Site Groundwater

As shown in Table 3, TPH-d was detected in all groundwater samples collected at concentrations above laboratory reporting limits. Detected concentrations ranged between 39 and 41 micrograms per liter ($\mu\text{g}/\text{L}$). All concentrations were qualified as estimated values by the laboratory, and were below the commercial/industrial ESLs.

TPH-g was detected in the groundwater sample collected from SB-1 at a concentration of 17 $\mu\text{g}/\text{L}$, which is below the commercial/industrial ESLs set for this compound. TPH-mo was not detected above laboratory reporting limits in the groundwater samples collected from the subject property.

As shown in Table 3, several VOCs including acetone, carbon disulfide, chloroform, toluene, tetrachloroethene, and m/p-xylenes were detected in groundwater samples collected at the subject property. All concentrations were at low levels and below commercial/industrial ESLs set for these compounds. Reporting limits for all VOCs not detected were below their associated screening level concentrations.

3.4.2 *Metals in Site Groundwater*

As shown in Table 4, three of the five metals analyzed for (chromium, lead, and nickel) were detected in one or more of the site groundwater samples. The concentrations of metals detected were generally consistent in all samples and all were below their respective screening levels.

3.5 *SOIL VAPOR ANALYTICAL RESULTS*

Soil vapor analytical results are summarized in Table 5, along with the commercial/industrial CHHSLs and ESLs for comparison purposes.

As shown in Table 5, multiple VOCs were detected in site soil vapor samples, however, all concentrations were low levels and below the ESLs and CHHSLs set for these compounds.

The Phase II investigation was completed to assess potential environmental liabilities at the site from past or current operations. Subsurface sample collection and geophysical investigations generally targeted areas of environmental concern identified at the site through review of historical documentation and knowledge of typical historical operations. The Phase II concludes the following:

- Based on the GPR survey, there was no evidence of former USTs or associated piping remaining at the site.
- No visual or other evidence of impacts was observed during the field investigation.
- TPH-d, TPH-mo, TPH-g, and VOCs were not detected at concentrations greater than the commercial/industrial screening levels in site soil or groundwater samples.
- Metals that were detected in site soil and groundwater samples were at relatively consistent concentrations in all the samples and were at concentrations below their commercial/industrial ESLs.
- Several VOCs were detected in site soil vapor samples collected; however, they were at relatively consistent concentrations in all the samples and were at concentrations below their commercial/industrial ESLs and CHHSLs.

Screening levels for the industrial land use scenario are considered to be the most appropriate basis for evaluating the results based on current and projected land use. Concentrations reported below the screening levels are generally not considered threats to human health or the environment under the relevant land use. The results of this limited subsurface investigation do not indicate obvious releases of hazardous substances onto the subject property and nor indicate that site soils and/or groundwater have been significantly impacted by historical site operations.

Legend:

ft bgs = feet below ground surface

C/I = Commercial/Industrial

ESL = Environmental Screening Level

CHHSL = California Human Health Screening Level

--- = No screening level established

SVP.# = Soil Vapor Probe Location

< = Analyte not detected at or above the stated laboratory reporting limit

Qualifiers:

J = Lab qualifier. Estimated value.

Notes:

All concentrations reported in micrograms per cubic meter ($\mu\text{g}/\text{m}^3$).

Samples were analyzed by United States Environmental Protection Agency (USEPA) Method TO-15.

Tier 1 ESL = Tier 1 Environmental Screening Level for Soil Gas Screening Levels, San Francisco Bay Regional Water Quality Control Board, *ESL Workbook*, Tier 1 ESL Summary Table, February 2016.

Human Health Risk ESL = Subslab soil gas vapor intrusion: Human Health Risk Levels, San Francisco Bay Regional Water Quality Control Board, *ESL Workbook*, Table SG-1, February 2016.

CHHSL = Commercial/Industrial California Human Health Screening Level, Cal/EPA, *Use of CHHSLs in Evaluation of Contaminated Properties*, Table 2, September 2010.

Bold values indicate detections at or above the laboratory reporting limit.

Values shaded gray indicate concentrations detected above the ESLs.

ERM®

The quality of the data was assessed and any necessary qualifiers were applied following the *USEPA National Functional Guidelines for Superfund Organic Methods Data Review, August 2014* and *USEPA National Functional Guidelines for Inorganic Superfund Data Review, August 2014*.

HOLDING TIME AND PRESERVATION EVALUATION

The samples were prepared and analyzed within the method-prescribed time period from the date of collection. The sample shipments were received at the laboratory within the method-prescribed temperature and preservation requirements. None of the data were qualified based on holding time or preservation exceedances.

BLANK EVALUATION

The method blank and trip blank sample results were nondetected for each of the target analytes with several exceptions. If associated sample results were within five times the blank concentration for organics, the result was qualified as non-detect (U). The blank contaminants and qualified data are listed in Table 1.

BLANK SPIKE EVALUATION

The laboratory control sample (LCS) recoveries were within the laboratory's limits of acceptance. The LCS recoveries indicate acceptable laboratory accuracy and precision.

MATRIX SPIKE EVALUATION

The matrix spike (MS) and matrix spike duplicate (MSD) recoveries were within the laboratory's limits of acceptance.

SURROGATE SPIKE EVALUATION

The surrogate recoveries were within acceptable limits.

FIELD DUPLICATE EVALUATION

One sample was collected and submitted in duplicate. ERM calculated the RPD between detected results. The USEPA has not established control criteria for field duplicate samples; therefore, sample data are not qualified on the basis of field duplicate imprecision. A list of the field duplicate detections and the calculated RPDs is provided in Table 2.

TPH EVALUATION

The laboratory noted that the diesel patterns for several sample did not match the representative standard. Associated results were qualified as tentatively identified and estimated (NJ). The affected samples are presented in Table 3.

INITIAL CALIBRATION VERIFICATION EVALUATION

The laboratory noted that initial calibration verification (ICV) recovery for acetone was high. Detections in associated samples were qualified as estimated with a high bias (J+). The affected samples are presented in Table 4.

OVERALL ASSESSMENT

No data were determined to be unusable. All of the data, including qualified data, can be used for decision-making purposes. The quality of the data generated during this investigation is acceptable for the preparation of technically-defensible documents.

CASE NARRATIVE

Laboratory number: 275997
Client: ERM
Project: 0337941
Location: Webster St.
Request Date: 04/13/16
Samples Received: 04/13/16

This data package contains sample and QC results for nine soil samples and five water samples, requested for the above referenced project on 04/13/16. The samples were received on ice and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):

Gasoline C7-C12 was detected between the MDL and the RL in the method blank for batch 234095; this analyte was not detected in samples at or above the RL. Gasoline C7-C12 was detected between the MDL and the RL in the method blank for batch 234223; this analyte was not detected in samples at or above the RL. No other analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B) Water:

No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B) Soil:

No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B) Water:

No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B) Soil:

High response was observed for acetone in the ICV analyzed 01/19/16 16:35; this analyte was not detected at or above the RL in the associated samples, and affected data was qualified with "b". High response was observed for acetone in the CCV analyzed 04/14/16 14:27; this analyte was not detected at or above the RL in the associated samples, and affected data was qualified with "b". No other analytical problems were encountered.

Metals (EPA 6010B) Soil:

No analytical problems were encountered.

Metals (EPA 6010B) Filtrate:

No analytical problems were encountered.

COOLER RECEIPT CHECKLIST

Curtis & Tompkins, Ltd.

Login # 275997 Date Received 4/13/16 Number of coolers 2
 Client ERMW Project Webster St.
 Date Opened 4/13 By (print) CB (sign) [Signature]
 Date Logged in 4 By (print) CJN (sign) [Signature]

1. Did cooler come with a shipping slip (airbill, etc) _____ YES NO

2A. Were custody seals present? YES (circle) on cooler on samples NO
 How many _____ Name _____ Date _____

2B. Were custody seals intact upon arrival? _____ YES NO N/A

3. Were custody papers dry and intact when received? _____ YES NO

4. Were custody papers filled out properly (ink, signed, etc)? _____ YES NO

5. Is the project identifiable from custody papers? (If so fill out top of form) _____ YES NO

6. Indicate the packing in cooler: (if other, describe) _____

- Bubble Wrap Foam blocks Bags None
- Cloth material Cardboard Styrofoam Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: Wet Blue/Gel None Temp(°C) 3.1

Temperature blank(s) included? Thermometer# _____ IR Gun# A

Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? _____ YES NO
 If YES, what time were they transferred to freezer? _____

9. Did all bottles arrive unbroken/unopened? _____ YES NO

10. Are there any missing / extra samples? _____ YES NO

11. Are samples in the appropriate containers for indicated tests? _____ YES NO

12. Are sample labels present, in good condition and complete? _____ YES NO

13. Do the sample labels agree with custody papers? _____ YES NO

14. Was sufficient amount of sample sent for tests requested? _____ YES NO

15. Are the samples appropriately preserved? _____ YES NO N/A } CJN

16. Did you check preservatives for all bottles for each sample? _____ YES NO N/A

17. Did you document your preservative check? (pH strip lot# HC 258444) _____ YES NO N/A

18. Did you change the hold time in LIMS for unpreserved VOAs? _____ YES NO N/A

19. Did you change the hold time in LIMS for preserved terracores? _____ YES NO N/A

20. Are bubbles > 6mm absent in VOA samples? _____ YES NO N/A

21. Was the client contacted concerning this sample delivery? _____ YES NO
 If YES, Who was called? _____ By _____ Date: _____

Subject: FW: 0337941 - C&T Login Summary (275997)
From: Doug Moberg <Doug.Moberg@erm.com>
Date: 4/15/2016 2:41 PM
To: "Dina Ali (dina.ali@ctberk.com)" <dina.ali@ctberk.com>

Hi Dina:

Can you run the following soil samples for all the analyses on the COC from this shipment:

- SB-1-15.5
- SB-2-15.5
- SB-3-15.5

Let me know if you have any questions.

Mr. Doug Moberg

ERM-West

1277 Treat Blvd

Suite 500

Walnut Creek CA 94597

Project Name:

Project #:

Workorder #: 1604373

Dear Mr. Doug Moberg

The following report includes the data for the above referenced project for sample(s) received on 4/16/2016 at Air Toxics Ltd.

The data and associated QC analyzed by TO-15 are compliant with the project requirements or laboratory criteria with the exception of the deviations noted in the attached case narrative.

Thank you for choosing Eurofins Air Toxics Inc. for your air analysis needs. Eurofins Air Toxics Inc. is committed to providing accurate data of the highest quality. Please feel free the Project Manager: Kelly Buettner at 916-985-1000 if you have any questions regarding the data in this report.

Regards,

Kelly Buettner

Project Manager

ERM-West
Workorder# 1604373

Three 1 Liter Summa Canister samples were received on April 16, 2016. The laboratory performed analysis via EPA Method TO-15 using GC/MS in the full scan mode.

This workorder was independently validated prior to submittal using 'USEPA National Functional Guidelines' as generally applied to the analysis of volatile organic compounds in air. A rules-based, logic driven, independent validation engine was employed to assess completeness, evaluate pass/fail of relevant project quality control requirements and verification of all quantified amounts.

Receiving Notes

There were no receiving discrepancies.

Analytical Notes

There were no analytical discrepancies.

Definition of Data Qualifying Flags

Eight qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction not performed).

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the reporting limit, LOD, or MDL value. See data page for project specific U-flag definition.

UJ- Non-detected compound associated with low bias in the CCV

N - The identification is based on presumptive evidence.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

Summary of Detected Compounds

Re: GPR Investigation to Locate UST's

We appreciate the opportunity to provide this report for our work completed on 3/22/16 at the above address in Oakland, CA.

Purpose

The purpose of the survey was to determine whether any underground storage tanks (UST's) remained on the property.

Equipment

- **Ground Penetrating Radar (GPR), Manufacturer: GSSI, Model: SIR-3000 processing unit with 400 MHz antenna.** GPR works by sending pulses of energy into a material and recording the strength and the time required for the return of the reflected signal. Reflections are produced when the energy pulses enter into a material with different electrical conduction properties from the material it left. The strength of the reflection is determined by the contrast in conductivity between the two materials. The total depth achieved can be as much as 8' with this antenna but can vary widely depending on the dielectric properties of the materials. For more information, please visit: <http://www.geophysical.com/Documentation/Brochures/GSSI-UtilityScanBrochure.pdf>
- **RD7000 pipe locator, Manufacturer: Radiodetection.** The RD7000 can detect the electromagnetic fields from live power or radio frequency signals. It can also be used in conjunction with a transmitter to connect directly to accessible, metallic pipes, risers, or tracer wires. A tone is sent through the pipe or tracer wire at a specific frequency which can then be detected by the receiver. For more information, please visit: <http://www.spx.com/en/radiodetection/pd-rd7000/>

Process

Our process begins with collecting scans with GPR across the areas in a grid pattern. Scans are typically spaced 2' apart depending on the size of the targets being searched for. The GPR data is interpreted in real time and anomalies in the data are located and marked on the surface with spray paint, pin flags, etc.

The RD7000 is used to locate pipes or utilities at the soil boring locations. We first sweep all areas with the receiver to detect live power or radio frequency signals followed by connecting to any visible risers or tracer wires that may be in the area.

Findings

We found that the soil allowed for GPR depth penetration of 4.5' in most areas. There appeared to be quite a few anomalies that appeared to dead end or otherwise lose signal. Possibly retired utilities that had been cut up. No apparent UST's were able to be found at the site. In one area there appeared to be a reinforced concrete slab under the asphalt. The rebar was so closely spaced it inhibited GPR from penetrating much below it. Another area appeared to have been a possible excavation, it was outlined accordingly and you will see data shots as well.

Limitations

Please keep in mind that there are limitations to any subsurface investigation. The equipment may not achieve maximum effectiveness due to soil conditions, above ground obstructions, reinforced concrete, and a variety of other factors. No subsurface investigation or equipment can provide a complete image of what lies below. Our results should always be used in conjunction with as many methods as possible including consulting existing plans and drawings, exploratory excavation or potholing, visual inspection of above ground features, and utilization of services such as Dig Alert/Underground Service Alert.

At this site, our scan was limited by a few garbage dumpsters along the fence.

The following pages will further explain the findings.

If you have any questions or feel I omitted anything please feel free to ask.

Signed,

RE: PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT
1901-1919 WEBSTER STREET
OAKLAND, CALIFORNIA 94612
NOVA PROJECT NO. F15-7110

In accordance with our agreement, Nova Consulting Group, Inc. (Nova) has performed a Phase I Environmental Site Assessment (ESA) of the above referenced property in accordance with ASTM E 1527-2013 ESA scope of work. Please find a copy of the report enclosed.

We declare that to the best of our knowledge and belief, we meet the definition of Environmental professional as defined in §312.10 of 40 CFR and, we have the specific qualifications based on education, training, and experience to assess the Property, as described herein. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR, Part 312.

Respectfully submitted,

NOVA CONSULTING GROUP, INC.

EXECUTIVE SUMMARY

Nova was authorized by Pacific Gas & Electric to conduct a Phase I Environmental Site Assessment (ESA) of Office Building located at 1901-1919 Webster Street, Oakland, California ("the Property"). Nova has conducted this ESA in general accordance with the scope and limitations of ASTM Designation E 1527-2013, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process". There are no exceptions to, or deletions from the ASTM E 1527-2013 standard practice and authorized Scope of Services, unless otherwise stated herein.

The Property consists of a 0.6-acre, nearly rectangular-shaped parcel developed with one, six-story office building with a basement totaling approximately 74,435 square feet and a paved parking area to the southwest of the building. The office building was developed with the existing improvements in 1950 and extensively renovated in 2000. The building has been occupied by Pacific Gas and Electric (PG&E) since the 1975. The building was in the process of being vacated at the time of the Property assessment. Vehicular access to the Property parking lot is provided to the south from 19th Street. No other structures or significant surface features were noted on the Property at the time of Nova's reconnaissance.

The Property is situated within an urban area in downtown Oakland. The Property is bound to the north by Torrey Pines Bank (1951 Webster Street); to the east by Webster Street, beyond which are mixed use residential and commercial office buildings including Ricoh (1900 Webster Street), Physical Therapy Innovations (1922 Webster Street) and BBCN Bank (1940 Webster Street); to the south by 19th Street beyond which are mixed use residential and commercial office buildings (339-351 19th Street) including Davan Thai Cuisine, Burger Gourmet, East Bay Alliance for A Sustainable Economy, Modern Coffee, Kerry's Office Supplies and 19th Street Station (cocktail bar); and to the west by several retail businesses including Aroma Café, Downtown Oakland Association, Bay Fung Tong Tea House, Coco Café, and Manna Corporate Food Services (382 19th Street and 1900-1950 Franklin Street). Based upon a review of nearby regulatory sources, groundwater flow beneath the Property is in a north-northeasterly direction toward Lake Merritt.

Based on available historical information, the existing office building was constructed in 1950. The building was originally three stories in height. Historical owners and/or occupants included Hospital Services of California, Kaiser Co. and Blue Cross Hospital, Blue Cross Health Plan Home Office. Circa 1966 the additional three stories were added to the building. PG&E purchased the Property in 1975 for use as office space and it has only recently been vacated by PG&E. The Property was historically developed with residential buildings from at least 1889 through 1911. The southern portion of the Property was formerly developed as a gasoline service station from at least 1928 to 1952. Following demolition of the gasoline station in 1952, this portion of the Property was redeveloped as a parking lot. There is no indication that the underground storage tanks (USTs) associated with the gasoline station had been removed or that subsurface investigations were ever performed. As a result, there is a potential that USTs may remain present in this portion of the Property which constitutes a recognized environmental condition (REC).

In 1978, PG&E installed one 500-gallon waste oil UST and one 6,000-gallon gasoline UST in the parking lot portion of the Property for fleet vehicle servicing. The waste oil UST was removed in 1988 and the gasoline UST was removed in 1994. On January 26, 1995, the Alameda County Environmental Health Department issued a closure letter related to the former gasoline UST; however, no such closure letter has ever been obtained for the 500-gallon waste oil UST. Further, based on Nova's review of the tank removal report prepared in 1988, it is Nova's opinion that adequate testing for groundwater was not conducted at that time. Based on this information, the former waste oil UST constitutes a REC. Refer to Section 3.3.3 for further discussion.

The Blue Cross Building/Kaiser Foundation Health Plan addressed as 1935 Webster Street is listed on the HIST UST, SWEEPS UST and FID UST regulatory databases. The EDR report notes that a 5,000-gallon diesel UST was installed in 1972. There is no further information related to this tank. Based on Nova's review of the available Sanborn Maps, the existing Property building is depicted as the Blue Cross Building and a potential sidewalk UST is depicted to the east of this building. Further, a prior report references a 'heater oil' release reported in 1988. Although Nova did not uncover similar documentation, based on our review of the Sanborn maps, regulatory records and knowledge of the area, it is possible that a fuel oil UST could have been located in the sidewalk area adjacent to the Property building. Given the absence of further investigations related to this feature, there is a potential that a heating oil UST remains present which constitutes a REC.

CONCLUSIONS

Nova has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 of 1901-1919 Webster Street, Oakland, California, the Property. Any exceptions to or deletions from this practice are described in Section 1.4 of this report.

This assessment has revealed no evidence of Recognized Environmental Conditions (REC), Controlled Recognized Environmental Conditions (CREC) in connection with the Property, except for the following:

- Past use of the southern portion of the Property included a gasoline service station from at least 1933 through 1952. There is no indication that the USTs associated with the gasoline station had been removed or that subsurface investigations were ever performed. As a result, there is a potential that USTs may remain present in this portion of the Property which constitutes a REC.
- A 500-gallon waste oil UST was installed by PG&E in 1978 and removed in 1988. Based upon Nova's review of the tank removal report, subsurface investigations performed at that time did not adequately assess groundwater conditions. Further, this listing has not received regulatory closure. As a result, the former 500-gallon waste oil UST constitutes a REC.
- Based on a review of available regulatory and historical sources, a sidewalk UST may have been located to the east of the Property building. There is no indication that this area has been further investigated; as a result, the suspected sidewalk UST constitutes a REC.

Additionally, while not considered to be REC, CREC, or HREC by ASTM definition, the following environmental issues were noted and warrant mention:

- Based on the age of the building (1950), asbestos containing materials (ACM) may be present. Suspect materials observed were generally in good condition including: wallboard systems, suspended ceiling tiles, vinyl flooring, spray-on fireproofing and roofing materials.
- Evidence of water intrusion and/or microbial growth was observed in the 5th floor janitorial closet. The source of the water intrusion appeared to be poor ventilation in this area.

RECOMMENDATIONS

Based on the findings of this ESA, Nova recommends the following:

- Subsurface investigation, including a geophysical survey, to determine if the former gasoline service station, 500-gallon waste oil UST and suspected sidewalk UST may have impacted the Property.
- Suspect ACM should be managed in-place in good condition under an Asbestos Operations & Maintenance Program.
- The source of moisture must be eliminated as a first step in reducing the potential for microbial growth. The area appears to be impacted as a result of inadequate ventilation. The impacted materials (wallboard) should be removed and/or treated with a bleach solution to prevent future microbial growth.

The following table summarizes the findings of the significant elements of this assessment.

ASSESSMENT COMPONENT	Acceptable	Routine Solution	Further Assessment	Estimated Cost	Reference Section
Historical Review			X – Phase II	\$12-15k	3.3
On-Property Operations	X				2.4

1.0 INTRODUCTION

Nova was authorized by Pacific Gas & Electric to conduct a Phase I Environmental Site Assessment (ESA) of Office Building located at 1901-1919 Webster Street, Oakland, California ("the Property"). Nova has conducted this ESA in general accordance with the scope and limitations of ASTM Designation E 1527-2013, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process". There are no exceptions to, or deletions from the ASTM E 1527-2013 standard practice and the authorized Scope of Services, unless otherwise stated herein.

On December 22, 2015, Elizabeth French, Nova Project Manager, conducted a Property reconnaissance to assess the possible presence of recognized environmental conditions (REC) and non-ASTM environmental issues, as prescribed by the scope of work, at the Property. Nova's assessment included review of ASTM-defined sources of historical information, reconnaissance of adjoining properties, background research, and review of available local, state, and federal regulatory records.

Nova contracted Environmental Data Resources, Inc. (EDR) to perform a computer database search for local, state, and federal regulatory records pertaining to environmental concerns for the Property and properties in the vicinity of the Property (see Section 3.0).

1.1 Purpose

The purpose of this Phase I ESA was to identify existing or potential recognized environmental conditions (as defined by ASTM Standard E-1527-13) in connection with the Property. Nova understands that the findings of this study will be used by Pacific Gas & Electric to assist in evaluating RECs in connection with the Property.

1.2 Scope of Services

Nova's Scope of Services for this Phase I ESA conforms with the American Society for Testing and Materials (ASTM) due diligence standards detailed in the ASTM document "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM designation E1527-2013) and Pacific Gas & Electric. Services provided for this project included:

- A review of readily available topographic, geologic, and hydrogeologic information pertaining to the Property and surrounding area;
- A review of readily available information regarding historical land use activities at the Property, and interviews with people that have knowledge regarding the past or present uses of the Property, and with present and past owners, operators, and occupants of the Property, where feasible;
- A reconnaissance of the Property to visually and physically observe the Property for evidence of potential recognized environmental conditions;

- A limited review of federal, state, and local regulatory information records for reported potential environmental hazards on or in the vicinity of the Property;
- Review of previous environmental reports, if available.

The potential for a vapor migration condition to exist in the subsurface at the Property was included in the Scope of this ESA. No sampling or analytical testing was conducted as part of this Phase I ESA. This Phase I ESA does not constitute a regulatory compliance audit of the Property. Copies of resumes of Nova staff involved in the preparation of this report are included as Appendix G.

1.3 Assumptions

There is a possibility that even with the proper application of these methodologies there may exist on the Property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Nova believes that the information obtained from the record review and the interviews concerning the Property is reliable. However, Nova cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete.

1.4 Limitations and Exceptions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM 1527-13. Specific limitations and exceptions to this ESA are more specifically set forth below:

- The absence of earlier published historical information prior to 1889 constitutes historical data failure as defined by ASTM E 1527-13 as the Property was still developed at that time for residential purposes. Given the nature of use at that time, this limitation is not considered significant.
- Data gaps in excess of the recommended five-year interval were encountered. However, based on the available information reviewed, this data failure is not considered to be a significant data gap and is not expected to alter the conclusions or recommendations of this assessment.
- Nova encountered data limitations by not interviewing current or past Property owners or tenants, or adjoining property owners, as none were available for comment, did not respond to requests to information, or did not exist. Given that portions of the Property were utilized as a gasoline service station, for which no records regarding removal of the associated tanks were documented, this data gap is considered significant.

1.5 Special Terms and Conditions

Authorization to perform this work was given by a directive from Pacific Gas & Electric.

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the

services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No subsurface exploratory drilling or sampling was done under the scope of this work. Unless specifically stated otherwise in the report, no chemical analyses have been performed during the course of this ESA.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This is subject to the limitations of historical documentation, availability, and accuracy of pertinent records and the personal recollections of those persons contacted.

The content and conclusions provided by Nova in this report are based solely on the information collected during our investigation and activities at the Property, our present understanding of the Property conditions, and our professional judgment in light of such information at the time this report was prepared. Part of the findings in this investigation is based on data provided by others. This report presents Nova's professional opinion, and no warranty, expressed or implied, is made.

1.6 User Reliance

Pacific Gas & Electric and its affiliates (collectively, "Client") may use and rely upon this Report in connection with a planned financial transaction involving the Property.

2.0 PROPERTY DESCRIPTION

2.1 User Provided Information

Pursuant to ASTM E 1527-13, Nova requested the following Property information from Pacific Gas & Electric (*User* of this report) and from the Property contact.

ITEM	Provided By User	Not Provided By User	Discussed Below	Does Not Apply/User Not Aware Of Item
2.1.1 Environmental Pre-survey Questionnaire		X		
2.1.2 Title Records	X		X	
2.1.3 Environmental Liens or Activity and Use Limitation		X		
2.1.4 Specialized Knowledge		X		
2.1.5 Valuation Reduction for Environmental Issues		X		
2.1.6 Identification of Key Property Manager	X			
2.1.7 Reason for Performing Phase I ESA	See Section 1.1			
2.1.8 Prior Environmental Reports	X		X	
2.1.9 Other				X

The Client provided Nova a copy of a 1996 Phase I ESA prepared for the Property. This report is further discussed in Section 3.3.3. In addition, the Client provided Nova copies of deed records recorded for the Property at the time of purchase in 1975, as a well as a preliminary title report.

2.2 Location and Legal Description

The Property is located at 1919 Webster Street, Oakland, California. The Property is located in a commercial area of the City of Oakland. According to the Alameda County Recorder, the assessor's parcel number (APN) of the Property is 8-637-8-8. The legal description is included in the appendices.

According to the Alameda Tax Assessor's office, the Property is currently owned by PG&E who purchased the Property in October 1975 (office building) and January 1977 (parking lot). According to available deed records, the Property was previously owned by Yuba River Lumber Company (office building) and Erickson Lumber Company (parking lot).

2.3 Property and Vicinity General Characteristics

The Property is in a mixed use commercial and residential area of the City of Oakland. The Property is designated Zone CBD (Central Business District) for commercial development by City of Oakland Planning and Zoning. The Property is developed with a single structure that was constructed in 1950 and extensively renovated in 2000.

Access to the asphalt-surfaced Property parking lot on the southern portion of the Property is provided from 19th Street to the south. The parking lot at the south side of the Property is provided with chain link fencing along the east, west, and south sides. An automobile gate is provided at the south side of the parking lot and a pedestrian gate is provided at the east side.

Lake Merritt is located approximately 350 feet east of the eastern-most Property boundary, and no apparent routes of direct discharge from the Property were observed.

2.4 Current Use of the Property

Based on the information reviewed during the preparation of this ESA, including the observations made during the reconnaissance of the Property, the tenant spaces are currently occupied by PG&E which was in the process of vacating the building.

2.5 Description of Property Improvements

The Property is developed with one, single tenant, six-story office building with a basement totaling approximately 74,435 square feet. The building is constructed with steel framing and brick masonry walls. Painted stucco was noted at the balconies at the east elevation and at the roof level. The building appears to be constructed on a reinforced concrete foundation system. The roof is a corrugated steel deck covered with a built-up membrane with mineral-surfaced capsheet. The interior walls and ceilings are comprised in the office areas are typically suspended ceiling tiles with painted wallboard/drywall walls. Floors are covered with a combination of ceramic tile, vinyl tile, commercial grade carpet, and exposed concrete.

Air-conditioning building is provided by a cooling tower system providing chilled water to roof-mounted Variable Air Volume (VAV) units. The two, roof-mounted cooling towers are manufactured by Ceramic Cooling Tower Company and are 36-tons and 75 tons each. The VAV units are also roof-mounted and manufactured by McQuay. During the winter months, the same piping is switched over to two low pressure, gas-fired boilers. The boilers are roof-mounted and reported to be Laars Mighty Therm 715 MBH units. Common area toilet rooms are provided hot water from a central, gas-fired water heater located in the basement. In-line, electric, tankless water heaters are provided for the kitchenettes on each floor.

Seismic retrofit was reportedly performed in the early-1990s. Extensive renovations were performed in 2000 including replacement of the HVAC system, roof membrane, and interior finishes. No other significant renovations have been reported by Property management.

Vehicular access to the Property parking lot is provided to the south from 19th Street. Landscaping is limited to concrete planters at the main entrance to the building.

The East Bay Municipal District supplies drinking water to the Property from the municipal distribution system. Sanitary discharges on the Property are discharged into the municipal sanitary sewer system that is owned and maintained by East Bay Municipal District. Stormwater surface drainage on the Property is accomplished via sheet flow to interconnected stormwater catchbasins along the adjacent city streets, which eventually drain

to the City of Oakland’s municipal stormwater system. There are no on-site retention or detention basins.

Electricity and natural gas is provided to the Property by Pacific Gas & Electric (PG&E).

2.6 Current Use of Adjoining Properties

During the vicinity reconnaissance, Nova observed the following land use on properties in the immediate vicinity of the Property.

North:	Land to the north includes Torrey Pines Bank at 1951 Webster Street.
South:	Land to the south includes 19 th Street beyond which are mixed use residential and commercial office buildings (339-351 19 th Street) including Davan Thai Cuisine, Burger Gourmet, East Bay Alliance for A Sustainable Economy, Modern Coffee, Kerry’s Office Supplies and 19 th Street Station (cocktail bar)
East:	Land to the east includes Webster Street, beyond which are mixed use residential and commercial office buildings including Ricoh (1900 Webster Street), Physical Therapy Innovations (1922 Webster Street) and BBCN Bank (1940 Webster Street)
West:	Land to the west includes several retail businesses along 19 th Street and the 1900 (even numbered) block of Franklin Street including; Aroma Café, Downtown Oakland Association, Bay Fung Tong Tea House, Coco Café, and Manna Corporate Food Services.

3.0 RECORDS REVIEW

3.1 Standard Environmental Record Sources

3.1.1 State and Federal Regulatory Review

Information from standard federal and state environmental record sources was provided through Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. This integrated database also contains postal service data in order to enhance address matching. Records from one government source are compared to records from another to clarify any address ambiguities. The demographic and geographic information available provides assistance in identifying and managing risk. The accuracy of the geocoded locations is approximately +/-300 feet.

In some cases, location information supplied by the regulatory agencies is insufficient to allow the database companies to geocode facility locations. These facilities are listed under the unmappable section within the database report.

A review of the unmappable facilities indicated that one of these facilities are within the ASTM minimum search distance from the Property. This facility is further discussed under the applicable subheadings below.

Regulatory information from the following database sources regarding possible recognized environmental conditions, within the ASTM minimum search distance from the Property, was reviewed. Specific facilities are discussed below if determined likely that a potential recognized environmental condition has resulted at the Property from the listed facilities. Please refer to Appendix C-1 for a complete listing.

The Property, as Pacific Gas and Electric, is identified on the following databases: EMI, FINDS, Recorded Government Archive (RGA) LUST, FTTS, HIST FTTS, HAZNET (three listings), SWEEPS UST, CA FID UST, HIST CORTESE, EDR Historical Auto Stations and HIST UST databases reviewed for this ESA. These listings are further discussed below.

- The Property is identified in 1986 on the **FINDS, Historical FTTS** and **FTTS** databases related to the use/storage of PCBs. This listing is likely related to the fact that the Property was a mailing address for PG&E which deals with hydraulic fluids associated with transformers. There is no indication that hazardous materials were ever used or stored at the Property. As a result, these listings do not constitute a REC.
- The Property is identified on the **FID UST, SWEEPS UST, HIST UST** and **Historical CORTESE** databases for the removal of a 6,000-gallon gasoline UST. Based on documentation provided by the Client, the 6,000 gallon tank was removed in 1994 that included subsurface characterization and received a letter of No Further Action (NFA) in January 1995 from the county (refer to Section 3.3.3). The gasoline UST does not constitute a REC.
- The Property is identified in 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012 and 2013 on the **Emissions Material Inventory (EMI)** database related to air emissions reporting for the emergency generator. Based on the nature of the listing, this does not constitute a REC.

- The Property is identified multiple times on the **HAZNET** database related to the removal of hazardous waste including the following: (1994) 3.0 tons of waste oil and mixed oil waste; (1997) 0.25 tons of inorganic waste and 2.5 tons of asbestos containing waste; (2008) 5.1 tons of oil/water sludge. There are no violations on file related to these listings which may be administrative tracking listings related to the removal of the gasoline UST, hydraulic fluids associated with PG&E administrative operations or renovations. Based on this information, this does not constitute a REC.
- The Property is identified in 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001 and 2002 on the **RGA-LUST** database as PG&E. While the Property is not currently listed on any active leaking underground storage tank (LUST) databases (local, state, or federal) documentation related to the removal of at least two USTs were provided to Nova for review. It is Nova's opinion that the active RGA LUST listing may be related to the fact that the 500-gallon waste oil UST has not received regulatory closure. Refer to Section 3.3.3 for further discussion.
- The Property is identified at 1901 Webster Street in the **EDR Historic Auto Stations** database. In 1928 it is listed as Frank Burrington Service Station; in 1933 as Arthur Kapler Service Station, in 1933 as Fred Hildebrand Service Station, in 1943 as Craig Oil Oakland Station, and in 1943 as S. R. Douglas Service Station.
- In addition, the Blue Cross Building/Kaiser Foundation Health Plan addressed as 1935 Webster Street is listed on the **HIST UST, SWEEPS UST** and **FID UST** databases. The EDR report notes that a 5,000-gallon diesel UST was installed in 1972. There is no further information related to this tank. Based on Nova's review of the Sanborn Map, the existing Property building is depicted as the Blue Cross Building, and a potential sidewalk UST is depicted to the east of the building. Further, a prior report references a 'heater oil' release reported in 1988. There is no further documentation related to this feature which constitutes a REC. Refer to Section 3.3 for further discussion.

Three (3) *Resource Conservation and Recovery Act – Large Quantity Generator (RCRA-LQG)*; thirteen (13) *RCRA Small Quantity Generator (RCRA-SQG)*; and one (1) *RCRA Non Generator (RCRA-NonGen)* facilities were identified within a one-quarter mile radius of the Property. All but one of these facilities are located adjacent to the Property and based on separation distance considerations, hydrologic gradient, and regulatory status these listings do not constitute a REC. The remaining adjacent listing is discussed as follows:

- **Kaiser Foundation Health Plan** (1950 Franklin Street) is located adjacent to the northwest of the Property in a cross- to down-gradient direction. It is listed on the **RCRA-SQG and UST, SWEEPS UST** databases. Based on available information, the facility was listed as a SQG in 1987 with no violations. The UST listing indicates that the facility maintains an active UST; however, there are no other details regarding this listing. Given that the site has no reported releases, this does not constitute a REC.

Three (3) **RESPONSE** facilities were identified within a one-mile radius of the Property. The closest facility is located at least 0.34-miles from the Property and is listed as 'closed'. The nearest active facility is located over 0.7 miles from the Property. Based on separation

distance considerations, hydrologic gradient, and regulatory status these listings do not constitute a REC.

Fifteen (15) **ENVIROSTOR** facilities were identified within a one-mile radius of the Property. With the exception of one facility, all listed sites are at least 0.34 miles from the Property. Based on the separation distance and with some of the facilities hydrologic gradient considerations these listings are not expected to impact subsurface conditions at the Property at this time. The remaining site is discussed below.

- **Oakland Dock & Warehouse** facility is also identified as a FUDS database facility, for historic impacted to 52 acres of land regionally. A latitude and longitude coordinates map search was used to identify the regulatory center of the facility listings placing the facility 600 feet to the west of the Property and up-gradient. According to the Department of Toxic Substances Control (DTSC) and the Regional Water Quality Control Board (RWQCB) division branch of Cleanup Sacramento, no further action is recommended for this facility listing. Based on regulatory status, this listing does not appear to present a REC to the Property at this time.

One (1) *Historic California Sites (CAL-SITES)* facility was identified within a one-mile radius of the Property. The database is no longer active and has been replaced by the ENVIROSTOR database tracking system. The facility is 0.7 miles from the Property in a down-gradient direction. Based on separating distance, gradient, and regulatory status considerations, this facility does not constitute a REC.

Seventy-seven (77) *Leaking Underground Storage Tank (LUST)* facilities were identified within a one-half mile radius of the Property. Seventy-two (72) of these facilities are located 400 feet from the Property and/or with a closed regulatory status. Based on distance, gradient and/or regulatory status considerations, they are not considered a REC. The remaining five (5) facilities are discussed below:

- **The Buttner Property**, at 1900 Webster Street is located adjacent to the east of the Property in a cross-gradient direction. It is also listed on the **Alameda County CS** and the **EDR UST Historical Auto Station** databases. Based on Nova's review of available historical information, it was occupied as a gasoline service station from at least 1950 to 1966 when it was demolished. It has since been redeveloped with the existing commercial building in the mid-2000s. The facility is currently occupied by the Lake Merritt Dental and Ikon Office Solutions, located on the northeast corner of Webster Street and 19th Street in Oakland. According to information on file with the DTSC, the site was historically occupied by a gasoline service station from approximately 1940 to 1966. Subsurface sampling conducted in 2011 indicated that total petroleum hydrocarbons as gasoline (TPH-g) and as diesel (TPH-d) were reported in groundwater up to 59,000 micrograms per liter (ug/L) and 200,000 ug/L respectively. In March 2015 a Vapor Intrusion, Soil and Groundwater Investigation Report was conducted. At that time, four soil vapor probes were advanced and additional soil and groundwater samples were collected. The findings of the investigation indicated that contamination was localized to the site boundary with minor migration to the east, away from the subject Property. Based on recent subsurface sampling between the facility and the Property that indicates that groundwater flow and

contamination plume is away from the Property. Although the facility remains in active status, given the most recent sampling results, this facility does not appear to be impacting the subject Property and therefore does not constitute a REC.

- **Kaiser Regional Parking** (1901 Franklin Street) is located approximately 200 feet to the west and cross-gradient to the Property. It is also listed on the ***Alameda County CS*** and ***Historic Cortese*** databases for a release of gasoline in 1985. A copy of the 1985 sampling letter and 1995 closure correspondence for the facility was available DTSC and Alameda County Environmental Health Department (ACEHD). The limited information available indicates that sampling was conducted 1985 during the removal of two USTs. The facility received conditional closure in December 1995. Conditions of the closure include residential/day car/elderly/hospital use, prohibition of groundwater extraction, prohibition of excavation without approval, and maintenance of the asphalt cap. Given that the facility has been granted closure and based on separating distance and hydrologic gradient, this facility does not constitute a REC.
- **Mobil #10-077** (1975 Webster Street) is located downgradient and approximately 300 feet north to the Property. The facility is also identified on the ***Alameda County CS*** and ***Historical Cortese*** databases for a release of gasoline from at least one of three USTs reportedly removed in 1970. Based on available information, the facility operated as a gasoline station from at least 1937 until the 1990s. It is currently developed as a paved parking lot. In 1997, the facility received an unconditional No Further Action (NFA) determination. Based on the regulatory status, separating distance, and hydrologic gradient relative to the Property, this facility does not constitute a REC.
- **Douglas Parking Co.** (1721 Webster Street) is located approximately 400 feet south of the Property in an up-gradient direction. The facility is also identified on the ***Alameda County CS*** and ***Historical Cortese*** databases for a release of associated with former USTs at the site. Based on available information, one 1,000-gallon gasoline UST was removed on August 3, 1992, and two 500-gallon USTs were removed on August 6, 1992. The tanks were previously located in the sidewalk. Initial samples collected beneath the tanks indicate maximum concentrations at 1,500 milligrams per kilogram (mg/kg) of TPHg and 12 mg/kg benzene. Nine soil borings were advanced in July 1994 to investigate the extent of the release. Three of the borings were converted into groundwater monitoring wells. Monitoring operations remain underway at this site and based on a report from January of 2014, contamination does not appear to have migrated offsite. A monitoring well and soil boring located approximately halfway between this site and the subject Property indicated non-detect levels. Although this facility remains in active status, given distance and the findings of the most recent groundwater investigations, this facility does not appear to be impacting the subject Property and therefore is not considered a REC.
- **Toothman Development** (1736 Franklin Street) is located approximately 200 feet southwest and up-gradient of the Property. The facility is also identified on the ***Alameda County CS*** and ***Historical Cortese*** databases for a release to soil of gasoline from at least one of the two previously present USTs. The facility received an unconditional NFA determination in 1996. Based on the regulatory status, separating distance, and hydrologic gradient relative to the Property, this facility does not constitute a REC.

Nineteen (19) *Spills, Leaking, Investigations and Cleanup (SLIC)* facilities were identified within a one-half mile radius of the Property including one facility listed on the Orphan Summary section. The nearest active facility is located over one-quarter mile from the Property. The remaining listings have been granted closure and/or or located over 750 feet from the Property. Based on the regulatory status, separating distance, and hydrologic gradient relative to the Property, these facilities do not constitute a REC.

Six (6) *Underground Storage Tank (UST)* facilities were identified within a one-quarter mile radius of the Property. Five of the facilities are located beyond adjacent and based on distance considerations, are not a REC. The one adjacent site (Kaiser Foundation Health, 1950 Franklin Street) has been discussed above under the RCRA subheading.

Twelve (12) *Statewide Environmental Evaluation and Planning System UST (SWEEPS UST)* facilities were identified within a one-quarter mile radius of the Property. One of these listings is believed to be associated with the subject Property noted as the Kaiser Foundation Health Plan at 1935 Webster Street. This listing is further discussed above. Of the remaining 11 sites, 10 are located beyond adjacent and based on distance considerations are not a REC. The remaining adjacent site, Blue Cross Building (1950 Franklin Street) is located adjacent to the northwest and is further discussed under the RCRA subheading.

Fourteen (14) *Historic Underground Storage Tank (HIST UST)* facilities were identified within a one-quarter mile radius of the Property. One of these listings is believed to be associated with the subject Property noted as the Blue Cross Building at 1935 Webster Street. This listing is further discussed above. Of the remaining 13 sites, 12 are located beyond adjacent and based on distance considerations are not a REC. The remaining adjacent site, Blue Cross Building (1950 Franklin Street) is located adjacent to the northwest and is further discussed under the RCRA subheading.

Twelve (12) *Facility Inventory Database Underground Storage Tank (FID UST)* facilities were identified within a one-quarter mile radius of the Property. One of these listings is believed to be associated with the subject Property noted as the Kaiser Foundation Health at 1935 Webster Street. This listing is further discussed above. Of the remaining 11 sites, 10 are located beyond adjacent and based on distance considerations are not a REC. The remaining adjacent site, Blue Cross Building (1950 Franklin Street) is located adjacent to the northwest and is further discussed under the RCRA subheading.

One (1) *Voluntary Cleanup Project (VCP)* facility was identified within a one-half mile radius of the Property and downgradient. The facility is located approximately 1,700 feet north and down-gradient of the Property. Based on separating distance, gradient, and regulatory status considerations, this facility does not constitute a REC.

Two (2) *California Brownfields* facilities were identified within a one-half mile radius of the Property. These facilities are located over one-quarter mile from the Property. Based on separating distance, gradient, and regulatory status considerations, this facility does not constitute a REC.

Fifty-four (54) **US Brownfields** facilities were identified within a one-half mile radius of the Property. These facilities are located over 750 feet from the Property. Based on separating distance, gradient, and regulatory status considerations, this facility does not constitute a REC.

Sixty-one (61) **Historical Cortese** facilities were identified within a one-half mile radius of the Property. Fifty-seven (57) of these facilities are located 400 feet from the Property and/or with a closed regulatory status. Based on distance, gradient and/or regulatory status considerations, they are not considered a REC. The remaining four (4) facilities have been discussed on the LUST subheading.

Twenty-six (22) **EDR US Historical Auto Station** facilities were identified within one-quarter mile of the Property. Four of these listings are for the subject Property at 1901 Webster Street and these listings are further discussed above. Sixteen of the 22 facilities are located beyond adjacent and based on distance considerations, are not considered a REC. The remaining adjacent sites are located at 1900 Webster Street which is further discussed under the LUST subheading.

Ten (10) **EDR US Historical Cleaner** facilities were identified within one-quarter mile of the Property. None of these listings are for the subject Property or adjacent sites. Further there is no record of historical releases associated with dry cleaning tenants in proximity to the Property. Based on this information, these listings do not constitute a REC.

In addition to the databases identified above, the following surrounding listings were identified within the specified search radii: one (1) *CORRACTS*; sixty-nine (69) *Alameda County CS*; one (1) *AST*; one (1) *WMUDS/SWAT*; one (2) *DEED*; one (1) *FUDS*; one (1) *HWP*; thirteen (13) *Notify 65* and one (1) *EDR MGP* facilities. In some cases, these listings were previously discussed above wherein they were determined to not represent a REC. Those facilities not identified previously were determined to not represent a REC based upon any or all of the following considerations: distance, gradient, and/or regulatory status.

3.1.2 Local Regulatory Review

3.1.2.1 County Recorder/ Assessor

According to the Alameda County Assessor's office, no environmentally-related liens or deed restrictions or activity or use limitations (AUL) have been recorded against the Property.

3.1.2.2 Health Department

Records from Alameda County Environmental Health Department (ACEHD) Certified Unified Program Agency (CUPA) and the Alameda County Local Oversight Program (LOP) were reviewed for evidence indicating the presence of USTs, ASTs or hazardous materials on the Property. No records pertaining to hazardous materials or underground storage tanks were on file for the addresses of 1901 Webster Street.

Permits on file with the ACEHD include those related to the use and operation of a 500-gallon waste oil and 6,000-gallon gasoline UST in the parking lot portion of the Property. The tanks

were installed in by PG&E in 1978 and removed in 1988 and 1995, respectively. Documentation related to the tank removal is further discussed in Section 3.3.3.

3.1.2.3 Fire Officials

A written request for information regarding petroleum bulk storage tanks and other records of potential environmental concern at the Property was submitted to the Oakland Fire Department. According to a response received February 2, 2016 the City of Oakland is no longer the CUPA agency for the area. Rather records pertaining to underground/aboveground storage tanks and hazardous materials are maintained with the ACEHD. Records on file with the ACEHD were reviewed in person and are discussed in Section 3.1.2.2.

3.1.2.4 Building Department

Records from Oakland Building Services Department were reviewed for evidence indicating the developmental history of the Property, and for the presence of documentation relative to environmental matters including USTs. The records indicate the current office building constructed with three stories in 1950 and originally addressed as 1925 Webster Street. On February 1, 1951, the occupant was noted as Hospital Services of California and the Property address was listed as 1919 Webster Street. It should be noted that there are no other related references for the historical address as 1925 Webster Street. In 1952, an alteration permit was issued to Blue Cross. In 1955, alteration permits were issued to both Kaiser Co. and Blue Cross Hospital. In 1966 a sign permit was issued for Blue Cross and at that same time, a permit to add three additional stories to the building was approved. The emergency generator in the parking lot area was installed on May 25, 1990. On July 26, 1991, two old water towers were also noted as replaced.

A permit to remove a UST at 1919 Webster Street was submitted by PG&E on October 7, 1988. This permit corresponds to the 500-gallon waste oil UST removed in 1998 (refer to Section 3.3.3 for further discussion).

In addition, a permit to demolish a gasoline service station at 1901 Webster Street was on record. A permit for the construction of the gasoline service station was also on record; however, the date of the permit was not legible. Prior land use was not indicated.

3.1.2.5 Bay Area Air Quality Management Department

Records from Bay Area Air Quality Management Department (BAAQMD) were reviewed for the Property. According to these records, Pacific Gas & Electric (PG&E) was listed as a new facility/ generator in 2002. PG&E was also listed as maintaining an air quality permit in 2014 for the release of nitrogen oxides and carbon monoxide (1919 Webster Street) related to the operation of an emergency generator.

3.1.2.6 State Environmental Agencies

Records from State Water Resources Control Board (RWQCB) GeoTracker and Department of Toxic Substances Control (DTSC) EnviroStor databases were reviewed for evidence indicating

the presence of USTs, the use or storage of hazardous materials, the presence of drywells or the presence of air quality issues at the Property. No records were found for the Property.

3.1.3 Activity Use Limitations and Environmental Liens

Inquiry related to activity use limitations (AUL) and environmental liens (EL) were included on the Pre-Survey Questionnaire provided to the Key Property Manager during the preparation of this ESA. No reference to AUL or EL were included in the written or verbal responses to Nova during the preparation of this ESA.

3.2 Physical Setting Sources

3.2.1 Topography

The United States Geological Survey (USGS), Oakland West, California Quadrangle 7.5 minute series topographic map was reviewed for this ESA. This map was published by the USGS in 1993. According to the contour lines on the topographic map, the Property is located approximately 20 to 30 feet above mean sea level (MSL). The contour lines in the area of the Property indicate the area is sloping gently downward toward the east. Roadways, contour lines and a flood zone (200 feet to the east) are the only significant features depicted.

The Property is shaded gray, indicating dense urban development. No structures are depicted. No surface waters are depicted as present on or adjoining to the Property, nor are production wells or other significant surface features depicted on the USGS map.

3.2.2 Soils/Geology

Topographic Property Elevation	20 to 30 feet above mean sea level
Surficial Materials	Urban Land and Baywood Complex
First Bedrock Beneath the Property, Physiographic Province / Geologic Age	The Alameda Formation
Estimated depth to Bedrock beneath Property	Greater than 50 feet below the ground surface

Based on the soil survey maps published by the United States Department of Agriculture (USDA) Soil Conservation Service WebSoil Survey, the Property is mapped as Urban Land – Baywood Complex. The Urban Land designation indicates that greater than 85 percent of the soils in this area have been graded or disturbed, and covered by paved surfaces, buildings or other structures. Urban Land soil is highly variable in nature and the specific soil composition identification at the Property cannot be determined within the scope of work performed. The Baywood Complex consists of loamy sand derived from Eolian deposits.

Information concerning the geology of the Property was obtained from the USGS Ground Water Atlas of the United States, California region (1995). The Property is located within the Pacific Border physiographic province, which is characterized by steep rolling hills and mountains and consists of severely folded, faulted, commonly metamorphosed marine and continental sediments. Depth to bedrock is anticipated to be greater than 50 feet below grade.

Based on previous subsurface investigations on the Property, subgrade conditions generally consist of silty sands and gravels grading to silty clay and sandy silt up to 12 feet below grade. Refer to Section 3.3.3 for further discussion.

3.2.3 Hydrology

Depth to groundwater beneath Property	13-21 feet below the ground surface
Regional groundwater flow direction	North-northeast towards Merritt Lake, which is 800 feet east of the Property
Sole source aquifer (if present)	The Property does not overlie a sole source aquifer.

(Groundwater flow direction is estimated based on a review of published maps. Property specific groundwater flow conditions may be impacted by a variety of factors including, but not limited to, local topography, geologic anomalies, utilities, nearby wells or sumps, and local drainage patterns. Property specific groundwater information would require a groundwater investigation, which is beyond the scope of this ESA.)

Groundwater monitoring reports for the east adjacent site note groundwater at 13 to 21 feet below grade and flowing in a north-northeasterly direction toward Lake Merritt which is tidally influenced by the Oakland Inner Harbor Channel.

The nearest surface water in the vicinity of the Property is Merritt Lake, approximately 800 feet to the east of the Property. No settling ponds, lagoons, surface impoundments, or natural catchbasins were observed at the Property during this investigation. No On-Property water wells or springs were observed during the Property reconnaissance.

The EPA defines a sole or principal source aquifer as an aquifer that supplies at least 50 percent of the drinking water consumed in the area overlying the aquifer. These areas may have no alternative drinking water source(s) that could physically, legally and economically supply all those who depend on the aquifer for drinking water. For convenience, all designated sole or principal source aquifers are referred to as "sole source aquifers" (SSA). This designation was made under Section 1424(e) of the Safe Drinking Water Act.

The Property is not situated above a SSA.

3.2.4 Flood Zone Information

A review of the Flood Insurance Rate Maps, published by the Federal Emergency Management Agency, was performed. According to Panel Number 06001C0067G, dated August 3, 2009, the Property is located in Flood Zone X. Flood Zone X regions consist of areas determined to be outside the 100- and 500-year floodplains.

3.2.5 Oil and Gas Exploration

According to web-based information available from the State of California, Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR), the Property is mapped in an area where there is no indication of current or historical exploration or production of oil, gas, or geothermal resources.

3.2.6 Records of Water Wells

In June of 2015, the State of California amended the restriction of information access to public and private water well systems. However, due to the large volume of well systems in the state (estimated at over 800,000) information for individual systems is still extremely limited and searches by property owner and name are still restricted through the 1977 Information Practices Act and in June of 2015. A search of the Groundwater Information Center Interactive Map Application for the Property (and nearby land) did not provide any records.

3.3 Historical Use Information

The historical uses of the Property and adjoining/adjacent properties were reviewed utilizing fire insurance maps, aerial photographs, city directories, historic topographic maps available from the USGS, municipal records and prior reports. Available historical information did not allow maintenance of five year intervals between all data sources.

The absence of earlier published historical information prior to 1889 constitutes historical data failure as defined by ASTM E 1527-13 as the Property was still developed at that time. Review of additional historical sources of information outlined in ASTM E 1527-13 would not likely provide additional useful information regarding the past use of the Property based on the established pattern of land use for residential homes.

Data gaps in excess of the recommended five-year interval were encountered. However, based on the available information reviewed, this data failure is not considered to be a significant data gap and is not expected to alter the conclusions or recommendations of this assessment.

3.3.1 Historical Property & Historical Adjoining/Adjacent Land Uses

A chronological listing of all available historical Property and adjoining/adjacent site data is described in the following table.

Copies of pertinent sources reviewed, such that establish Property uses or changes in use, are included in the Appendix of this report.

YEAR	SOURCE	DESCRIPTION/USE
1889	Sanborn Fire Insurance Map	Property: The Property is developed with a small residential dwelling (1905 Webster Street) at the south end closest to 19 th Street, (also identified as Durant Street). The northern half of the Property is undeveloped.
		North: A vacant lot, beyond which is a residence.
		East: Webster Street, beyond which are vacant lots, Croquet Grounds and residential dwellings.
		South: 19 th Street, beyond which are a mix of vacant lots and residential dwellings.
		West: Land to the west appears to be residential dwellings.

YEAR	SOURCE	DESCRIPTION/USE
1903, 1911	Sanborn Fire Insurance Maps	Property: The Property's south half appears similar to the earlier map with the addition of a carriage house and residential loft at 1905 ½ Webster Street. The north half of the Property has been developed with a residential dwelling and associated outbuilding at 1909 Webster Street.
		North: Land to the north appears similar to the earlier map.
		East: Land to the east appears similar to the earlier map.
		South: Land to the south appears similar to the earlier map.
		West: Land to the west appears similar to the earlier map.
1939, 1946	Aerial Photographs	Property: The southern portion of the Property is improved with a "V-shaped" structure consistent with the gasoline service station noted in the 1950 Sanborn map. The Northern portion appears to be undeveloped.
		North: A residential-type structure consistent with the previous Sanborn maps.
		East: Webster Street, beyond which are residential-type structures.
		South: 19 th Street, beyond which are commercial-type structures.
		West: Commercial-type structures.
1950	Sanborn Fire Insurance Maps	Property: A " gas and oil " station is present on the southern portion of the Property addressed as 1901 Webster Street. The northern portion is a paved parking lot.
		North: The residential building previously present but is now identified with mix use occupants (warehouse space, music studio, and residential spaces, 1935 Webster Street)
		East: Land to the east has transitioned to predominately commercial uses, including a gas station to adjacent to the Property across Webster Street (1900 Webster Street).
		South: Land to the south has been substantially redeveloped with row-style adjoined retail spaces and hotels.
		West: Land to the west has been substantially redeveloped with row-style adjoined retail spaces that include restaurants and movie theatres.
1950	Building Department Records	Property: The Property building was constructed in 1950 with three-stories.
1952	Building Department Records	Property: Permit to demolish a Signal Oil gasoline service station.
1952	Sanborn Fire Insurance Maps	Property: The existing building which is noted as being constructed in 1950 and identified as the Blue Cross Building. A possible storage tank is depicted at the northeastern corner of the office building within the sidewalk area. The gasoline station remains present on the southern portion.
		North: Land to the north appears similar to the earlier map.
		East: Land to the east appears similar to the earlier map.
		South: Land to the south appears similar to the earlier map.
		West: Land to the west appears similar to the earlier map.
1958	Aerial Photograph	Property: The gasoline service station on the southern portion is no longer depicted. The existing commercial building is present on the northern portion.
		North: The former structure is no longer present and has been replaced by a paved parking lot.
		East: An additional commercial-type structure is present.
		South: No apparent changes from the aerial photographs
		West: No apparent changes from the aerial photographs

YEAR	SOURCE	DESCRIPTION/USE
1953, 1957, 1959, 1960, 1964, 1965	Sanborn Fire Insurance Maps	Property: The gas station formerly present on the southern portion is no longer depicted. No other changes were noted.
		North: Land to the north appears similar to the earlier map until 1959 when the building was demolished and replaced by a parking lot.
		East: Land to the east appears similar to the earlier map.
		South: Land to the south appears similar to the earlier map.
		West: Land to the west appears similar to the earlier map.
1967	City Directory	Property: Blue Cross Hospital Service of California
		North: Various offices
		East: Various offices
		South: Cactus Room Tavern; Leslies Men's Closet; Leamington Florists; No Listing
		West: Ruppert's Auto Park, various offices (1900 Franklin Street) Offices and medical buildings (1904-1950 Franklin Street); Exclusive Hair Stylists (382 19 th Street)
1967, 1969	Sanborn Fire Insurance Maps	Property: The Property appears similar to the earlier map.
		North: Land to the north appears similar to the earlier map.
		East: The gasoline service station beyond Webster Street is no longer depicted.
		South: Land to the south appears similar to the earlier map.
		West: Land to the west appears similar to the earlier map.
1968, 1974, 1982, 1993, 1998	Aerial Photographs	Property: No apparent changes from the earlier photograph.
		North: No apparent changes from the earlier photograph except by 1974 the existing commercial building to the north was constructed.
		East: The gasoline service station to the east is no longer present.
		South: No apparent changes from the earlier photograph.
		West: No apparent changes from the earlier photograph except that by 1974 the existing commercial building to the northwest is present.
1969	City Directory	Property: Blue Cross Plan Inc
		North: Blue Cross
		East: Various offices including Kaiser
		South: Cactus Room Tavern; Leslies Men's Closet; Leamington Florists; Leamington Garage Parking
		West: Kaiser Auto Park, various offices (1900 Franklin Street) Offices and medical buildings (1904-1950 Franklin Street); Exclusive Hair Stylists (382 19 th Street)
1973	City Directory	Property: Blue Cross Plan Hospital
		North: No listing
		East: Various offices
		South: Big Als Cactus Room; Leslies Mens Shop; Leamington Florists; No Listing
		West: Ruppert's Auto Parks (1900 Franklin Street) Offices and medical buildings (1904-1950 Franklin Street); Exclusive HR Stylists (382 19 th Street)
1976	City Directory	Property: No Listing
		North: No listing
		East: Insurance offices
		South: Big Als Cactus Room; Leslies Mens Shop; Leamington Florists
		West: Offices and medical buildings (1900-1950 Franklin Street); Montclair Oakland Club (382 19 th Street)

YEAR	SOURCE	DESCRIPTION/USE
1978	SCI, 1996 (see Section 3.3.3)	Property: Permits related to the installation of one 6,000 gallon gasoline UST and one 500 gallon waste oil UST in the parking lot area for PG&E.
1981	City Directory	Property: Pacific Gas Elec
		North: Drexl Burnham & Co, Luso American Educational, United National Life Insurance
		East: Founders Title Co, Diversified Electric (1900 Webster Street); Compath Customer Service (1940 Webster Street)
		South: Big Als Cactus Room; Leslies Mens Shop; Leamington Florists

		South: Burger Gourmet; Bar 355; The Rotisserie; Mama's
		West: Offices, restaurants, and medical buildings (1900-1950 Franklin Street); No listing (382 19 th Street)

Based on available historical information, the existing office building was constructed in 1950. The building was originally three stories. Historical owners and/or occupants included Hospital Services of California, Kaiser Co. and Blue Cross Hospital, Blue Cross Health Plan Home Office. Circa 1966 the additional three stories were added to the building. PG&E purchased the Property in 1975 for use as office space and it has only recently been vacated by PG&E. The Property was historically developed with residential buildings from at least 1889 through 1911. The southern portion of the Property was formerly developed as a gasoline service station from at least 1928 to 1952. Following demolition of the gasoline station in 1952, this portion of the Property was redeveloped as a parking lot. There is no indication that the UST(s) associated with the gasoline station had been removed or that subsurface investigations were ever performed. As a result, there is a potential that USTs may remain present in this portion of the Property which constitutes a REC.

In 1978, PG&E installed one 500-gallon waste oil UST and one 6,000-gallon gasoline UST in the parking lot portion of the Property for fleet vehicle servicing. The waste oil UST was

removed in 1988 and the gasoline UST was removed in 1994. On January 26, 1995, the Alameda County Environmental Health Department issued a closure letter related to the former gasoline UST; however, no such closure letter has ever been obtained for the 500-gallon waste oil UST. Additional information regarding the removal of these two tanks is further discussed in Sections 3.1.1 and 3.3.3.

The Blue Cross Building/Kaiser Foundation Health Plan addressed as 1935 Webster Street is listed on the HIST UST, SWEEPS UST, and FID UST regulatory databases. The EDR report notes that a 5,000-gallon diesel UST was installed in 1972. There is no further information related to this tank. Based on Nova's review of the available Sanborn Maps, the existing Property building is depicted as the Blue Cross Building and a potential sidewalk UST is depicted to the east of this building. Further, a prior report references a 'heater oil' release reported in 1988. Although Nova did not uncover similar documentation, based on our review of the Sanborn maps, regulatory records and knowledge of the area, it is possible that a fuel oil UST could have been located in the sidewalk area adjacent to the Property building. Given the absence of further investigations related to this feature, there is a potential that a heating oil UST remains present which constitutes a REC.

Based on the information reviewed above, the north and northwest adjacent commercial office buildings were constructed in the 1970s and 1980s. Prior land use included residential homes and vacant lots from at least 1889 to sometime after 1911 when smaller commercial buildings replaced residential homes. Land to the south, east and west appears to have been developed sometime between 1911 and 1950 with the current commercial buildings. Land to the east, beyond Webster Street, included a gasoline station from at least 1950 to 1966 after which time it was utilized as a parking lot until construction of the existing office building in the mid-2000s. This facility is listed on the regulatory records reviewed. Based on current regulatory status, does not constitute a REC (refer to Section 3.1.1). Based on the information discussed above, the historical research has not identified prior adjacent/adjoining property uses such that are expected to have resulted in RECs to the Property.

3.3.2 Chain of Title

A 50-year chain-of-title summary was not requested by the Client for this ESA. Historical use of the Property was researched using other standard historical sources.

However, it should be noted that Nova was provided deed records for the Property when it was purchased by PG&E in 1975 (office building) and 1977 (parking lot). At the time of purchase, the Property was formerly owned by the Yuba River Lumber Company (office building) and Erickson Lumber Company (parking lot). Based on a review of the deed records for the parking lot portion of the Property, PG&E indicated that they intended to use the parking lot "...for parking of vehicles, dispensing of fuel and performing minor maintenance work on the vehicles." They further indicated that "Pacific intends to install certain improvements on its property to facilitate the uses in paragraph 2.b." This intended use specified in the deed records is consistent with Nova's review of the prior report which indicates that a 500-gallon waste oil UST and a 6,000-gallon gasoline UST were installed in the parking lot portion of the Property in 1978. Refer to Section 3.3.3 for further discussion.

A copy of the deed records is included in Appendix B-4.

3.3.3 Additional Environmental Record Sources

Nova was provided the following report for review:

Phase I Environmental Site Assessment 1901-1919 Webster Street, Oakland, California, produced by Subsurface Consultants Incorporated (SCI) and dated January 1996. Below is a list pertinent findings from the SCI report.

- The Property was developed with the existing improvements at the time of the site visit. The office building was occupied exclusively by PG&E for administrative/office purposes. An emergency generator fueled by diesel stored in an aboveground storage tank (AST) was observed in the parking lot area, northwestern side.
- The report indicated that according to deed records, the northern portion of the Property (office building) was owned by Blue Cross of California (formerly Hospital Services of California) who conveyed the Property to Yuba River Lumber Company Inc. who in turn conveyed the Property to PG&E on the same date (October 21, 1975).
- The SCI report indicated that the southern portion of the Property (currently the parking lot) operated as gasoline service station from at least 1928 to 1952 when the station was demolished. A copy of the station plan at the time of demolition was included as an appendix to the report. Title records reviewed as part of the ESA indicated that this portion of the Property was conveyed to Oakland Parking Company Inc. in 1952 and then to PG&E in 1977. There are no records pertaining to the removal and/or investigation of UST(s) in association with this past use which was identified as a REC.
- The SCI report indicated that records were found for the installation of a 6,000 gallon gasoline UST and 500 gallon oil UST in 1978 by PG&E at the northwest corner of the parking lot area. The 500-gallon oil tank was reportedly removed in 1988 under Oakland Fire Department observation; however, no records of regulatory closure for the 500 gallon tank were reported. A copy of the tank closure report prepared by Paradiso Construction Company was appended to the Phase I ESA. This report is further discussed below. The Phase I ESA indicates that PG&E employees stated that the waste oil tank was never used; however, detectable levels of ethylbenzene, toluene and xylenes were reported in soil. The source of these compounds was reported by SCI as “unclear”.
- The 6,000 gallon tank was removed in 1994 and received a NFA determination in 1995. A copy of the No Further Action (NFA) letter was appended to the report. SCI indicated that no closure documentation was provided for the 500-gallon waste oil UST which was identified as a REC.
- Regulatory records reviewed at the time of the report reference a “Heater fuel” UST tank release in 1988. SCI noted that it was unclear if this tank was the waste oil UST removed in 1988; however, PG&E representatives at the time indicated that they were not aware of any other tanks removed during this time period. SCI indicated that the Regional Water

Quality Control Board (RWQCB) should be petitioned to have this tank listing removed as there was no indication that such a tank ever existed on the Property.

- The Property is located within an urban area of Oakland. SCI notes that shallow soils within Oakland have been determined to be impacted with lead above background levels. The source of lead is believed to be associated with the past use of lead-based paints and/or air emissions. SCI identified this as a REC.

It should be noted that Figure 2 of the SCI report depicts a sidewalk UST located northwest of the Property in association with the northern-adjacent building. However, based on Nova's review of the available Sanborn Maps, this feature may actually be located directly adjacent to the west of the Property building. Further, the regulatory database report reviewed by Nova references a 5,000-gallon diesel UST installed in 1972 in association with Blue Cross Building. The Sanborn Maps note that the subject Property building was historically known as the Blue Cross Building. SCI indicates that a 1988 RWQCB regulatory listing references a "Heater fuel" UST release in 1988. Although Nova did not uncover similar documentation as noted by SCI, based on our review of the Sanborn maps, the regulatory records, and knowledge of the area, it is possible that a fuel oil UST could have been located in the sidewalk area adjacent to the Property building. Given the absence of further investigations related to this feature, there is a potential that a heating oil UST remains present which constitutes a REC.

Final report for Existing Underground Fuel Storage Tank Monitoring Retrofit and Removal of Waste Oil Tank, Pacific Gas and Electric, 1919 Webster Street, Oakland, CA, produced by Paradiso Construction Company and dated November 28, 1988. Below is a list pertinent findings from the tank removal report:

- The 500-gallon waste oil UST was removed from the northwestern corner of the parking lot in October 1988. The tank was noted as "never used".
- Soil and water samples were analyzed for volatile organic compounds [(VOCs) via Method 8010 and 8240] and total petroleum hydrocarbons (TPH), specifically waste oil and oil/grease.
- Laboratory analytical data was appended to the report which indicated that constituents of concern including TPH and VOCs in soil were not detected above laboratory method detection limits with the exception of ethylbenzene, toluene and xylenes. Concentrations were below applicable cleanup levels.
- Groundwater analytical data also indicated that constituents of concern were not detected above laboratory method detection limits; however, the laboratory detection limits for groundwater were extremely high and in most cases are above the regulatory action levels. The method detection limit for TPH-oil and grease was reported at 40,000 parts per billion (ppb) which exceeds the cleanup level (for commercial use) of 640 ppb. In the two groundwater samples analyzed for VOCs, the method detection limits were reported as 200 ppb and 1,300 ppb. Cleanup levels of petroleum-related constituents of concern including benzene, toluene, ethylbenzene and xylene (BTEX) range from 43 to 130 ppb for commercial use sites.

Given this information, it is Nova’s opinion that adequate testing for groundwater was not conducted on the Property during the 1988 investigation.

Tank Closure Report, Pacific Gas and Electric Company, Division Office, 1919 Webster Street, Oakland, CA, produced by RAMCON Engineering and Environmental Contracting, Inc. and dated January 11, 1995. Below is a list pertinent findings from the tank removal report:

- The 6,000-gallon gasoline UST, dispenser and associated piping was removed from the central portion of the parking lot in in November 1994. The tank was in good condition at the time of the removal, with no indication of holes or corrosion.
- The tank pit was excavated to 12 feet below grade. Groundwater was not encountered in the tank pit.
- Two sidewall confirmation soil samples were collected from the tank pit and one sample was collected from beneath the dispenser island. No confirmation samples were collected from the bottom of the tank pit; however, three samples of the soil stockpile. Samples were analyzed for TPH as gasoline (TPH-G) and BTEX. Results of the laboratory tested were reported as below method detection limits for all five samples submitted for analysis. It should be noted that laboratory data was not appended to the report for Nova’s review.
- No further action was recommended following the tank removal.

No Further Action letter prepared by Alameda County Health Care Services Agency for PG&E Site, 1919 Webster Street, Oakland, CA dated January 26, 1995

- The agency concurred with the findings of the tank removal report for the 6,000-gallon gasoline UST and recommended no further action.

3.3.4 Historical Use Information on Adjoining Properties

During Nova’s review of the standard historical sources referenced above, the historical uses of the adjoining properties are summarized below:

North:	The north adjacent commercial office building was constructed in the 1970s. It was previously developed with a paved parking lot following demolition of a residential building sometime between 1957 and 1959. The residential structure had been present from at least 1889. The northwest adjacent commercial office building was constructed by the early-1980s. The northwest adjacent office building was identified on several regulatory records reviewed; however, based on current status does not constitute a REC (refer to Section 3.1.1).
South:	Land to the south, beyond 19 th Street, appears to have been developed sometime between 1911 and 1950 with the current commercial buildings. Prior to that time the area was developed with residences from at least 1889. The commercial structures were utilized as various storefronts, offices and restaurants. No tenants of environmental significance were noted.
East:	Land to the east, beyond Webster Street, appears to have been developed sometime between 1911 and 1950 with the current commercial buildings. Prior to that time the area was developed with residences from at least 1889. The commercial structures were utilized as various storefronts, offices and restaurants. Additionally, a gasoline service station was present from at least 1940 to 1966. This facility has since been redeveloped with the existing office building in the mid-2000s. The gasoline service station site is listed on the regulatory records reviewed; however, based on current status does not constitute a REC (refer to Section 3.1.1).

West:	Land to the west appears to have been developed sometime between 1911 and 1950 with the current commercial buildings. Prior to that time the area was developed with residences from at least 1889. The commercial structures were utilized as various storefronts, offices and restaurants. No tenants of environmental significance were noted.
--------------	---

4.0 PROPERTY RECONNAISSANCE

4.1 General Property Characteristics

Nova conducted a reconnaissance visit to the Property on December 22, 2015. The visit was performed by Elizabeth French, Nova Project Manager. Nova was escorted during the Property visit by Mr. Michael Spears with Cushman and Wakefield, the Property broker.

The Property consists of a 0.6-acre, nearly rectangular-shaped parcel developed with one, six-story office building with a basement totaling approximately 74,435 square feet and a paved parking area to the southwest of the building. The office building was developed with the existing improvements in 1950 and extensively renovated in 2000. The building has been occupied by Pacific Gas and Electric (PG&E) since the 1975. The building was in the process of being vacated at the time of the Property assessment. Vehicular access to the Property parking lot is provided to the south from 19th Street. No other structures or significant surface features were noted on the Property at the time of Nova's reconnaissance.

The Property is situated within an urban area in downtown Oakland. The Property is bound to the north by Torrey Pines Bank (1951 Webster Street); to the east by Webster Street, beyond which are mixed use residential and commercial office buildings including Ricoh (1900 Webster Street), Physical Therapy Innovations (1922 Webster Street) and BBCN Bank (1940 Webster Street); to the south by 19th Street beyond which are mixed use residential and commercial office buildings (339-351 19th Street) including Davan Thai Cuisine, Burger Gourmet, East Bay Alliance for A Sustainable Economy, Modern Coffee, Kerry's Office Supplies and 19th Street Station (cocktail bar); and to the west by several retail businesses including Aroma Café, Downtown Oakland Association, Bay Fung Tong Tea House, Coco Café, and Manna Corporate Food Services (382 19th Street and 1900-1950 Franklin Street). Based upon a review of nearby regulatory sources, groundwater flow beneath the Property is in a north-northeasterly direction toward Lake Merritt.

4.1.1 Solid Waste Disposal

Solid waste on the Property is collected in three cubic yard bins situated in the parking lot area on the southern portion of the Property. The solid waste is collected once a week by the City of Oakland. These containers were noted to contain miscellaneous cardboard at the time of the Property reconnaissance, and no indication of potentially hazardous material disposal was noted during Nova's reconnaissance.

4.1.2 Surface Water Drainage

Stormwater surface drainage on the Property is accomplished via sheet flow to interconnected stormwater catchbasins along the adjacent city streets, which eventually drain to the municipal stormwater system.

4.1.3 Wells and Cisterns

No visible evidence of groundwater monitoring or production wells or collection cisterns was observed during the Property reconnaissance or reported to Nova.

4.1.4 Wastewater

No indication of industrial wastewater disposal or treatment systems were observed during the Property reconnaissance or reported to Nova.

4.1.5 Additional Property Observations

No additional relevant general Property characteristics were observed.

4.2 Potential Environmental Conditions

4.2.1 Hazardous Materials / Wastes

4.2.1.1 Hazardous Materials

No evidence of the use of hazardous materials, petroleum products or hazardous wastes was observed on the Property.

4.2.1.2 Hazardous Waste

No obvious indications of hazardous waste generation, storage or disposal were observed on the Property or were indicated during interviews with the exception of minor quantities of janitorial cleaners.

4.2.1.3 Unlabeled Containers and Drums

No unlabeled containers or drums were observed during the Property reconnaissance.

4.2.2 Evidence of Releases

No obvious indication of hazardous material or petroleum product or hazardous waste releases, such as stained areas or stressed vegetation, was observed during the Property reconnaissance or reported to Nova during interviews.

4.2.3 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain polychlorinated biphenyls (PCBs) at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified:

- Less than 50 parts per million (ppm) of PCBs – “*Non-PCB*” unit
- 50 ppm-500 ppm – “*PCB-Contaminated*” unit
- Greater than 500 ppm – “*PCB*” unit

Electrical service enters the building below ground from a vault-mounted transformer located in the city sidewalk adjacent to the Property. Since the transformer is utility-owned and adjacent to the Property, it does not constitute a REC.

A hydraulic service elevator/lift is provided from the sidewalk to the basement to facilitate moving garbage or other equipment from the basement level to ground level. The equipment located in the basement area. The equipment was labeled as containing hydraulic fluid. No staining or other indication of a release was observed in the equipment room.

The building is equipped with two overhead traction passenger elevators. Traction-type elevators do not contain hydraulic fluids and as such are not expected to contain PCBs.

4.2.4 Landfills

No evidence of landfilling was observed on the Property or reported during the Property reconnaissance.

4.2.5 Pits, Ponds, Lagoons, Sumps, and Catch Basins

A sump pump was observed in the freight elevator equipment room in the basement level. The sump is reported to be connected to the sanitary sewer line. No indication of staining or a release was observed.

No other evidence of On-Property pits, ponds, lagoons, sumps, or retention/catch basins was observed or reported during the Property reconnaissance.

4.2.6 On-Property ASTs and USTs

A diesel-powered emergency generator is provided at the northwest corner of the parking lot. The generator has an associated 500-gallon, above-ground storage tank (AST) located adjacent. The tank is double-walled and both the generator and tank are surrounded by chain link fencing. Based on visual observations through the fencing, no indication of leaks or staining was observed around the base of the AST. Given this information, the AST does not constitute a REC.

Based on available historical information, the southern portion of the Property was formerly developed as a gasoline service station circa 1920s to 1952. Following demolition of the gasoline station, this portion of the Property was redeveloped as a parking lot. There is no indication that the UST(s) associated with the gasoline station have been removed or that subsurface investigations were ever performed. As a result, there is a potential that USTs may remain present in this portion of the Property which constitutes a REC.

PG&E installed one 500-gallon waste oil UST and one 6,000-gallon gasoline UST in the parking lot portion of the Property for fleet vehicle servicing. The waste oil UST was removed in 1988 and the gasoline UST was removed in 1994. On January 26, 1995, the ACEHD issued a closure letter related to the former gasoline UST; however, no such closure letter has ever been obtained for the 500-gallon waste oil UST. Refer to Section 3.3.3 for further discussion.

Additionally, Figure 2 of the 1996 SCI report depicts a sidewalk UST located northwest of the Property in association with the northern-adjacent building. However, based on Nova’s review of the available Sanborn Maps, this feature may actually be located directly adjacent to the west of the Property building. Further, the regulatory database report reviewed by Nova references a 5,000-gallon diesel UST installed in 1972 in association with Blue Cross Building. The Sanborn Maps note that the subject Property building was historically known as the Blue Cross Building. SCI indicates that a 1988 RWQCB regulatory listing references a “Heater fuel” UST release in 1988. Although Nova did not uncover similar documentation as noted by SCI, based on our review of the Sanborn maps, the regulatory records, and knowledge of the area, it is possible that a fuel oil UST could have been located in the sidewalk area adjacent to the Property building. Given the absence of further investigations related to this feature, there is a potential that a heating oil UST remains present which constitutes a REC. Refer to Sections 3.3 and 3.1.1 for further discussion.

No other evidence of aboveground or underground storage tanks was observed during the Property reconnaissance or reported during interviews.

4.2.7 Radiological Hazards

No radiological substances or equipment was observed or reported stored on the Property.

4.2.8 Additional Hazard Observations

No additional hazards were observed on the Property.

4.2.9 Lead in Drinking Water / Overall Drinking Water Quality

The Property is connected to the municipal potable water supply provided by East Bay Municipal Utility District. According to the 2014 Annual Water Quality Report, the drinking water supplied to the Property is compliant with state and federal standards, including those for lead and copper. Nova did not conduct sampling of drinking water at the Property for the presence of total lead content.

4.2.10 Asbestos-Containing Materials (ACM)

No sampling was performed during the preparation of this ESA. However, suspect materials observed by Nova are listed in the table below:

SUSPECT ACM OBSERVED				
Material / Location	Estimated Quantity of ACM (SF/LF)	Friable Yes/No	PACM?	Physical Condition
Spray Applied Fireproofing / Throughout	Not quantified	No	Yes	Good where observed

SUSPECT ACM OBSERVED				
Material / Location	Estimated Quantity of ACM (SF/LF)	Friable Yes/No	PACM?	Physical Condition
Roofing Materials	Not quantified	No	Yes	Good where observed
Gypsum Wallboard Materials / Throughout	Not quantified	No	Yes	Good where observed
Vinyl Flooring / basement, Kitchen and bathroom areas	Not quantified	No	Yes	Minor damage
Suspended ceiling tiles / throughout	Not quantified	Yes	Yes	Some water staining

The objective of this visual survey was to note the presence and condition of suspect ACM observed. Based on the 1950 year of construction there is a potential that ACM was used in construction materials. In addition, the Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101, requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are presumed asbestos containing material (PACM).

Notwithstanding, non-friable materials may contain asbestos, since they were not covered by the phase-out. These materials include floor tile, wallboard systems, and some roofing components. These materials were observed to be in generally good condition, and represent no hazard unless cut, sawn, or broken. Prior to conducting demolition, renovations, or building repairs that may damage the suspect materials, a comprehensive survey should be conducted to verify the presence or absence of asbestos. Nova recommends that an Asbestos O&M Plan be prepared for the Property.

4.2.11 Radon

The U.S. EPA has prepared a map to assist national, state, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4.0 picoCuries per liter of air (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends Property-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Review of the EPA Map of Radon Zones places the Property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L. Based on the non-residential use of the Property, radon is not considered to be a significant concern and no sampling was performed or warranted.

4.2.12 Lead-Based Paint

Due to the 1950 construction, lead-based paint may be present. However, since the current regulations regarding lead-based paint are generally for residential properties, lead-based paint is not considered a significant environmental concern to the non-residential Property,

and no screening for the presence of lead-based paint was warranted or performed as part of this ESA.

4.2.13 Mold

As part of this assessment, Nova performed a limited visual inspection for the significant presence of mold. A class of fungi, molds have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials, and thrive in humid environments, and produce tiny spores to reproduce, just as plants produce seeds. When mold spores land on a damp spot indoors, they may begin growing and digesting whatever they are growing on in order to survive. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation and carpeting often play host to such growth.

Nova observed interior areas of the Property for the presence of significant presence of mold. Nova observed visible suspect mold growth or water intrusion in the areas identified below:

- Janitorial closet, 5th Floor Office, wallboard, approximately 25 square feet. The source appears to be poor ventilation in this area.
- It was raining prior to and on the day of the site assessment and no active roof leaks were noted. However, Nova did observe some stained ceiling tiles throughout building; however, these stains did not appear to be recent. Areas of past repair were noted on the roof surface.

This screening was not designed to discover all areas which may have been affected by mold growth on the Property. Rather, it is intended to give the Client an indication if significant (based on observed areas) mold growth is present at the Property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, HVAC systems and behind enclosed walls and ceilings, may be present on the Property. Nova does not draw dose-response relationship from these findings; however, as the presence of mold has been identified at the Property, it is recommended that quantification and speciation of molds in the Property be performed by a Certified Industrial Hygienist if additional characterization is required.

4.2.14 Vapor Migration

During the performance of this Phase I ESA, the potential for a vapor migration condition to exist in the subsurface at the Property was evaluated. Based on a review of available historical and regulatory sources, the Property was previously developed with a gasoline service station on the southern portion of the Property. There is no indication in the resources reviewed that the USTs associated with the gasoline service station have been removed. In addition, PG&E formerly operated one 500-gallon waste oil and 6,000-gallon gasoline UST in the parking lot area for fleet vehicle fueling services. There is also potential that a heating oil UST was

located in the sidewalk located adjacent to the Property building (along Webster Street). There is no indication that subsurface conditions have been evaluated in relation to this potential tank.

Given this information, it is Nova's opinion that there is a potential for a vapor migration to the Property as a result of past use, which constitutes a REC. See Sections 3.1.1 and 3.3 for further details regarding past use.

5.0 INTERVIEWS

Interviews were conducted with the following individuals. Findings from these interviews are discussed in the appropriate sections in this report.

Name	Affiliation	Tel. No.	Date Interviewed	Comments
Michael Spears	Cushman and Wakefield	415.677.0467	December 22, 2015	Mr. Spears indicated that PG&E has occupied the Property since 1975 when it was purchased from a lumber company. Mr. Spears also mentioned that the building was originally four stories in height and the upper two stories were added on at some point.

6.0 FINDINGS AND CONCLUSIONS

6.1 Findings

6.1.1 *On-Property Environmental Conditions and Concerns*

This assessment has revealed no evidence of Recognized Environmental Conditions (REC) or Controlled Recognized Environmental Conditions (CREC), or other environmental issues in connection with the Property, except for the following:

- Past use of the southern portion of the Property included a gasoline service station from at least 1933 through 1952. There is no indication that the USTs associated with the gasoline station had been removed or that subsurface investigations were ever performed. As a result, there is a potential that USTs may remain present in this portion of the Property which constitutes a REC.
- A 500-gallon waste oil UST was installed by PG&E in 1978 and removed in 1988. Based upon Nova's review of the tank removal report, subsurface investigations performed at that time did not adequately assess groundwater conditions. Further, this listing has not received regulatory closure. As a result, the former 500-gallon waste oil UST constitutes a REC.
- Based on a review of available regulatory and historical sources, a sidewalk UST may have been located to the east of the Property building. There is no indication that this area has been further investigated; as a result, the suspected sidewalk UST constitutes a REC.

6.1.2 *Off-Site Environmental Issues*

No off-Property environmental conditions were identified that were considered likely to have affected conditions at the Property.

6.1.3 *Historic Recognized Environmental Conditions*

No historical recognized environmental conditions (HREC) were identified on the Property during the course of this assessment.

6.1.4 *De Minimis Environmental Conditions*

No *de minimis* environmental conditions were identified in connection with the Property during the course of this assessment.

6.2 Conclusions

Nova has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 of 1901-1919 Webster Street, Oakland, California. Any exceptions to or deletions from this practice are described in Section 1.4 of this report.

This assessment has revealed no evidence of Recognized Environmental Conditions (REC), Controlled Recognized Environmental Conditions (CREC) in connection with the Property, except for the following:

- Past use of the southern portion of the Property included a gasoline service station from at least 1933 through 1952. There is no indication that the USTs associated with the gasoline station had been removed or that subsurface investigations were ever performed. As a result, there is a potential that USTs may remain present in this portion of the Property which constitutes a REC.
- A 500-gallon waste oil UST was installed by PG&E in 1978 and removed in 1988. Based upon Nova's review of the tank removal report, subsurface investigations performed at that time did not adequately assess groundwater conditions. Further, this listing has not received regulatory closure. As a result, the former 500-gallon waste oil UST constitutes a REC.
- Based on a review of available regulatory and historical sources, a sidewalk UST may have been located to the east of the Property building. There is no indication that this area has been further investigated; as a result, the suspected sidewalk UST constitutes a REC.

Additionally, while not considered to be REC, CREC, or HREC by ASTM definition, the following environmental issues were noted and warrant mention:

- Based on the age of the building (1950), asbestos containing materials (ACM) may be present. Suspect materials observed were generally in good condition including: wallboard systems, suspended ceiling tiles, vinyl flooring, spray-on fireproofing and roofing materials.
- Evidence of water intrusion and/or microbial growth was observed in the 5th floor janitorial closet. The source of the water intrusion appeared to be poor ventilation in this area.

6.3 Recommendations

Based on the findings of this ESA, Nova recommends the following:

- Subsurface investigation, including a geophysical survey, to determine if the former gasoline service station, 500-gallon waste oil UST and suspected sidewalk UST may have impacted the Property.
- Suspect ACM should be managed in-place in good condition under an Asbestos Operations & Maintenance Program.
- The source of moisture must be eliminated as a first step in reducing the potential for microbial growth. The area appears to be impacted as a result of inadequate ventilation. The impacted materials (wallboard) should be removed and/or treated with a bleach solution to prevent future microbial growth.

6.4 Deviations

This Phase I ESA substantially complies with the scope of services and ASTM 1527-13, as amended, except for exceptions and/or limiting conditions as discussed in Section 1.4.

First party further grants to second party the right to maintain, reconstruct, replace, and use an automatic sprinkler system and windows, with all necessary appurtenant fixtures, on the northerly face of the building erected on said real property, together with a right of way, within the areas situate in said City of Oakland, described as follows:

(APN 8-637-8-4)

1. An area of the uniform width of 6 feet lying contiguous to and northerly of the northerly face of said building and extending from the westerly face of the smoke tower westerly 20.5 feet and lying above a plane which is 57 feet above the floor of the street level floor of said building.
2. An area of the uniform width of 6 feet lying contiguous to and northerly of the northerly face of said building and extending from the westerly boundary line of the area hereinbefore described and designated 1 westerly 76 feet and lying above a plane which is 17 feet above the floor of the street level floor of said building.
3. An area of the uniform width of 6 feet lying contiguous to and northerly of the northerly face of said building and extending from the westerly boundary line of the area hereinbefore described and designated 2 westerly approximately 32 feet to the northerly prolongation of the westerly face of said building and lying above a plane which is 57 feet above the floor of the street level floor of said building.

First party shall have the right to use said areas for purposes which will not interfere with second party's full enjoyment of the rights hereby granted.

The provisions hereof shall inure to the benefit of and bind the successors and assigns of the respective parties hereto, and shall apply to and run with the land.

Mr. Robert Campini
PACIFIC GAS AND ELECTRIC COMPANY
77 Beale Street, Room 1893
San Francisco, California 94106

Dear Mr. Campini:

This letter represents an understanding between Blue Cross of Northern California, 1950 Franklin Street, Oakland, California and Pacific Gas and Electric Company, 1919 Webster Street, Oakland, California. Should necessity arise, the authorized agents of Pacific Gas and Electric will be permitted access to the light well located on the roof of the Blue Cross building at 1935 Webster Street for the purpose of servicing or repairing the windows or fire extinguishers on the north wall of the 1919 Webster Street building.

It is further understood that 1) access to the building will be confined to the hours of 8:00 AM to 5:00 PM Monday through Friday unless an emergency exists, 2) Pacific Gas and Electric will advise Blue Cross of Northern California, in writing and at least 24 hours in advance, of the names of the individuals and the names of the company they represent authorizing access to the location involved, 3) Pacific Gas and Electric will assume all responsibility for damages to the Blue Cross building caused by such service or repair work and 4) this understanding exists between Blue Cross of Northern California and Pacific Gas and Electric Company and no other organization.

Very truly yours,

Edward F. Zwolenkiewicz, Director
Building Management Division

POLICY OF TITLE INSURANCE

ISSUED BY

First American Title Insurance Company

SUBJECT TO SCHEDULE B AND THE CONDITIONS AND STIPULATIONS HEREOF, FIRST AMERICAN TITLE INSURANCE COMPANY, a California corporation, herein called the Company, insures the insured, as of Date of Policy shown in Schedule A, against loss or damage, not exceeding the amount of insurance stated in Schedule A, and costs, attorneys' fees and expenses which the Company may become obligated to pay hereunder, sustained or incurred by said insured by reason of:

1. Title to the estate or interest described in Schedule A being vested other than as stated therein;
2. Any defect in or lien or encumbrance on such title;
3. *Unmarketability of such title; or*
4. Any lack of the ordinary right of an abutting owner for access to at least one physically open street or highway if the land, in fact, abuts upon one or more such streets or highways;

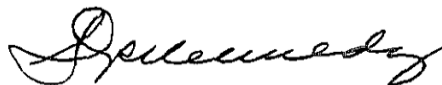

and in addition, as to an insured lender only:

5. Invalidity of the lien of the insured mortgage upon said estate or interest except to the extent that such invalidity, or claim thereof, arises out of the transaction evidenced by the insured mortgage and is based upon
 - a. usury, or
 - b. any consumer credit protection or truth in lending law;
6. *Priority of any lien or encumbrance over the lien of the insured mortgage, said mortgage being shown in Schedule B in the order of its priority; or*
7. *Invalidity of any assignment of the insured mortgage, provided such assignment is shown in Schedule B.*

IN WITNESS WHEREOF, First American Title Insurance Company has caused this policy to be signed and sealed by its duly authorized officers as of Date of Policy shown in Schedule A.

Total Fee for Title Search, Examination
and Title Insurance \$ 3,220.75

Amount of Insurance: \$ 1,522,000.00

Policy No. 107911

Date of Policy: October 21, 1975 at 10:30 A.M.

1. Name of Insured:

PACIFIC GAS AND ELECTRIC COMPANY, A CALIFORNIA CORPORATION

2. The estate or interest referred to herein is at Date of Policy vested in:

PACIFIC GAS AND ELECTRIC COMPANY, A CALIFORNIA CORPORATION

3. The estate or interest in the land described in Schedule C and which is covered by this policy is:

A FEE

SCHEDULE B

This policy does not insure against loss or damage, nor against costs, attorneys' fees or expenses, any or all of what arise by reason of the following:

Part One:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or by making inquiry of persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water.
6. Any right, title, interest, estate or easement in land beyond the lines of the area specifically described or referred to in Schedule C, or in abutting streets, roads, avenues, alleys, lanes, ways or waterways, but nothing in this paragraph shall modify or limit the extent to which the ordinary right of an abutting owner for access to a physically open street or highway is insured by this policy.
7. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions or area of the land, or the effect of any violation of any such law, ordinance or governmental regulation.
8. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records.
9. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant; (b) not shown by the public records and not otherwise excluded from coverage but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy or acquired the insured mortgage and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder; (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy; or (e) resulting in loss or damage which would not have been sustained if the insured claimant had been a purchaser or encumbrancer for value without knowledge.

Part Two:

- A. Taxes for the fiscal year 1975-76, a lien not yet due or payable.
- B. City of Oakland Street Lighting Assessment #58 for the year 1974-75, all paid. Amounts furnished upon request. The herein described property is located in Lighting Maintenance District #22, and as such is subject to annual maintenance charges. Next charges will be delinquent May 6, 1976 for the year 1975-76.

AFFECTS: a major portion of the premises

City of Oakland Street Lighting Assessment #57 for the year 1974-75, all paid. Amounts furnished upon request. The herein described property is located in Lighting Maintenance District #22, and as such is subject to annual maintenance charges. Next charges will be delinquent May 6, 1976 for the year 1975-76.

AFFECTS: the remainder and other property

SCHEDULE C

Gentlemen:

The agreement between our companies dated January 6, 1977, provides for your repurchase of the subject parking lot in the event sale of your adjacent property should be contingent upon inclusion of the parking lot in the sale.

Since you have now concluded a sale of the medical building property, (deed to Leslie M. Hills dated March 30, 1978, and recorded April 3, 1978, Reel 5328, Official Record, Image 222), exclusive of the parking lot, the agreement should be terminated. If you agree, please sign and date the enclosed copy of this letter and return it to this office.

Very truly yours,

J. W. PAGE

Foregoing agreed to:

FRANKLIN STREET PROPERTIES

By Andrew J. Lewis
Its

Date: Aug 15, 1978

AGREEMENT

THIS AGREEMENT made this 6th day of January, 1977 by and between FRANKLIN STREET PROPERTIES, a limited partnership, hereinafter called "Franklin", and PACIFIC GAS AND ELECTRIC COMPANY, a California corporation hereinafter called "Pacific",

WITNESSETH:

WHEREAS, Pacific is the owner of certain real property which is now being used as a parking lot in the City of Oakland, as outlined in red on the attached "Exhibit A"; and

WHEREAS, Franklin is the owner of the contiguous real property which is improved with buildings, as outlined in blue on "Exhibit A"; and

WHEREAS, Franklin wishes to have the right to purchase Pacific's lot in the event Franklin receives an acceptable offer for its property contingent on inclusion of the parking lot; and

WHEREAS, Pacific wishes to have the right of first refusal to purchase Franklin's property in the event its sale is dependent upon including Pacific's parking lot;

NOW, THEREFORE, in connection with Franklin's property it is agreed:

1. In the event an offer acceptable to Franklin to purchase Franklin's property is contingent upon the parking lot's being included, Pacific will have the Right of First Refusal to purchase Franklin's property for a period of 30 days after Pacific's receipt of Franklin's written notice of such offer.

FURTHER, in connection with Pacific's property it is agreed:

2. In the event Franklin receives an acceptable offer for its property contingent upon inclusion of Pacific's parking lot and Pacific does not exercise the Right of First Refusal as outlined in paragraph 1 of this agreement, Pacific will convey the parking lot to Franklin under the following conditions:

P. G. & E. CO.
COPY

- a. Consideration. The consideration to be paid by Franklin for Pacific's property will be:

\$485,750 if purchased during the calendar year 1977
\$510,040 if purchased during the calendar year 1978
\$535,540 if purchased during the calendar year 1979
\$562,320 if purchased during the calendar year 1980
\$590,440 if purchased during the calendar year 1981

- b. Use. The use of Pacific's property for the term of this agreement will be for parking vehicles, dispensing fuel and performing minor maintenance work on the vehicles.
- c. Improvements. Pacific intends to install certain improvements on its property to facilitate the uses in paragraph 2. b. Franklin will reimburse Pacific for the actual cost of these improvements, not to exceed \$30,000, if Franklin purchases the lot. Such reimbursement will be for the remaining unamortized portion of the actual cost at the time of purchase. The amortization of such actual cost will be computed on a monthly basis over a 5 year period. Pacific will furnish satisfactory evidence of the actual costs of these improvements.
- d. Escrow Costs. Franklin will pay all escrow costs in the Purchase of Pacific's property except the documentary transfer tax, and the Oakland City tax.
- e. Title. Title will be free and clear of all liens and encumbrances except for property taxes and assessments then a lien but not due or payable.

AND FURTHER, it is agreed:

3. Term. This Agreement will automatically expire December 31, 1981, unless it is terminated earlier by the sale of Franklin's property; by mutual agreement; or provisions of this Agreement are exercised by either Franklin or Pacific. Until expiration or termination, this Agreement shall be deemed a covenant running with the land for the benefit of the respective properties.

4. Notice. All notices in connection with this transaction will be in writing. Franklin will give at least 60 days notice of its intention to purchase Pacific's property. A notice will be considered as given upon mailing such notice by registered or certified U. S. mail to:

c/o Bechtel Corporation
50 Beale Street
San Francisco, CA. 94119

Pacific Gas and Electric Company
77 Beale Street
San Francisco, CA. 94106
Attention: Manager, Land Department

5. Assignment. This Agreement may not be assigned by either Franklin or Pacific without the written consent of the other.

POLICY OF TITLE INSURANCE

Erickson Lumber Company - Prop.

WESTERN TITLE INSURANCE COMPANY

SUBJECT TO SCHEDULE B AND THE CONDITIONS AND STIPULATIONS HEREOF, WESTERN TITLE INSURANCE COMPANY, a California corporation, herein called the Company, insures the insured, as of Date of Policy shown in Schedule A, against loss or damage, not exceeding the amount of insurance stated in Schedule A, and costs, attorneys' fees and expenses which the Company may become obligated to pay hereunder, sustained or incurred by said insured by reason of:

1. Title to the estate or interest described in Schedule A being vested other than as stated therein;
2. Any defect in or lien or encumbrance on such title;
3. Unmarketability of such title; or
4. Any lack of the ordinary right of an abutting owner for access to at least one physically open street or highway if the land, in fact, abuts upon one or more such streets or highways;

and in addition, as to an insured lender only:

5. Invalidity of the lien of the insured mortgage upon said estate or interest except to the extent that such invalidity, or claim thereof, arises out of the transaction evidenced by the insured mortgage and is based upon
 - a. usury, or
 - b. any consumer credit protection or truth in lending law;
6. Priority of any lien or encumbrance over the lien of the insured mortgage, said mortgage being shown in Schedule B in the order of its priority; or
7. Invalidity of any assignment of the insured mortgage, provided such assignment is shown in Schedule B.

IN WITNESS WHEREOF, WESTERN TITLE INSURANCE COMPANY has caused this policy to be signed and sealed by its duly authorized officers as of Date of Policy shown in Schedule A.

Date of Policy January 6, 1977

at 3:30

o'clock p. m.

1. Name of Insured:

PACIFIC GAS AND ELECTRIC COMPANY

2. The estate or interest in the land described in Schedule C and which is covered by this policy is:

A FEE

3. The estate or interest referred to herein is at Date of Policy vested in:

PACIFIC GAS AND ELECTRIC COMPANY, a California corporation

SCHEDULE B

This policy does not insure against loss or damage, nor against costs, attorneys' fees or expenses, any or all of which arise by reason of the following:

PART ONE

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or by making inquiry of persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water.
6. Any right, title, interest, estate or easement in land beyond the lines of the area specifically described or referred to in Schedule C, or in abutting streets, roads, avenues, alleys, lanes, ways or waterways, but nothing in this paragraph shall modify or limit the extent to which the ordinary right of an abutting owner for access to a physically open street or highway is insured by this policy.
7. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions or area of the land, or the effect of any violation of any such law, ordinance or governmental regulation.
8. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records.
9. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant; (b) not shown by the public records and not otherwise excluded from coverage but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy or acquired the insured mortgage and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder; (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy; or (e) resulting in loss or damage which would not have been sustained if the insured claimant had been a purchaser or encumbrancer for value without knowledge.

INFLATION INDORSEMENT

Attached to Policy No. S 169299

Order Number
819316

Issued by

WESTERN TITLE INSURANCE COMPANY
a corporation

The Company, recognizing the current effect of inflation on real property valuation and intending to provide additional monetary protection to the insured owner, hereby modifies said Policy, as follows:

1. Notwithstanding anything contained in said Policy to the contrary, the amount of insurance provided by said Policy, as stated in Schedule A thereof, is subject to cumulative annual upward adjustments in the manner and to the extent hereinafter specified.
2. "Adjustment Date" is defined, for the purpose of this Indorsement, to be 12:01 a.m. on the first January 1 which occurs more than six months after the Date of Policy, as shown in Schedule A of the Policy to which this Indorsement is attached, and on each succeeding January 1.
3. An upward adjustment will be made on each of the Adjustment Dates, as defined above, by increasing the maximum amount of insurance provided by said Policy (as said amount may have been increased theretofore under the terms of this Indorsement) by the same percentage, if any, by which the United States Department of Commerce Composite Construction Cost Index (base period 1967) for the month of September immediately preceding exceeds such Index for the month of September one year earlier; provided, however, that the maximum amount of insurance in force shall never exceed 150% of the amount of insurance stated in Schedule A of said Policy, less the amount of any claim paid under said Policy which, under the terms of the Conditions and Stipulations, reduces the amount of insurance in force. There shall be no annual adjustment in the amount of insurance for years in which there is no increase in said Construction Cost Index.
4. In the settlement of any claim against the Company under said Policy, the amount of insurance in force shall be deemed to be the amount which is in force as of the date on which the insured claimant first learned of the assertion or possible assertion of such claim, or as of the date of receipt by the Company of the first notice of such claim, whichever shall first occur.

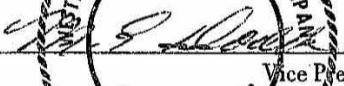

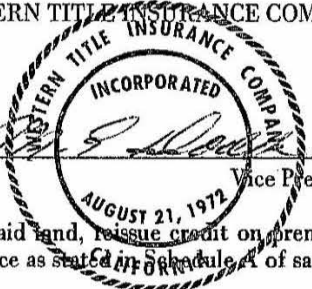

For the purpose of this Indorsement the term "insured owner" is defined as any insured described in paragraph 3. of Schedule A and, subject to any rights or defenses the Company may have had under said Policy and all indorsements, such insured's heirs, distributees, devisees, survivors, personal representatives or next of kin.

Nothing herein contained shall be construed as extending or changing the effective date of said Policy.

This Indorsement is made a part of said Policy and is subject to the schedules, conditions and stipulations therein, except as modified by the provisions hereof.

Dated: **January 6, 1977**
At: **3:30 p.m.**

WESTERN TITLE INSURANCE COMPANY

By  Vice President

NOTE: In connection with a future application for title insurance covering said land, issue credit on premium charges (if applicable at all) will be allowed only upon the original face amount of insurance as stated in Schedule A of said Policy.

At the bottom, it says 'MEMBER' above a circular logo for the 'CALIFORNIA LAND TITLE ASSOCIATION' which depicts a figure with a pickaxe and a shield.

PRELIMINARY REPORT

*In response to the application for a policy of title insurance referenced herein, **Chicago Title Company** hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.*

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(ies) of title insurance to be issued hereunder will be policy(ies) of Chicago Title Insurance Company, a Nebraska corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

2nd Installment: \$0.00 No Taxes Due
Bill No.: 02003900

2. Prior to close of escrow, please contact the Tax Collector's Office to confirm all amounts owing, including current fiscal year taxes, supplemental taxes, escaped assessments and any delinquencies.
3. The lien of supplemental or escaped assessments of property taxes, if any, made pursuant to the provisions of Chapter 3.5 (commencing with Section 75) or Part 2, Chapter 3, Articles 3 and 4, respectively, of the Revenue and Taxation Code of the State of California as a result of the transfer of title to the vestee named in Schedule A or as a result of changes in ownership or new construction occurring prior to Date of Policy.
4. Matters contained in that certain document

Entitled: Automatic Sprinkler System Maintenance, Reconstruction, and Replacement
Dated: October 17, 1975
Executed by: Blue Cross of Northern California, a California Corporation and Yuba River Lumber Co. Inc., a California Corporation
Recording Date: October 21, 1975
Recording No.: Reel 4138, Image 375, of Official Records

Reference is hereby made to said document for full particulars.

5. A notice that said Land is included within a project area of the Redevelopment Agency shown below, and that proceedings for the redevelopment of said project have been instituted under the Redevelopment Law (such redevelopment to proceed only after the adoption of the redevelopment plan) as disclosed by a document

Recording Date: December 3, 2007
Recording No.: 2007-409569, of Official Records
Redevelopment Agency: Revised Statement of Institution of Redevelopment for the Central District Redevelopment Project

6. Please be advised that our search did not disclose any open Deeds of Trust of record. If you should have knowledge of any outstanding obligation, please contact the Title Department immediately for further review prior to closing.
7. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other matters which a correct survey would disclose and which are not shown by the public records.

EXCEPTIONS

(continued)

8. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

9. If extended coverage title insurance will be requested, or if this report has been issued to facilitate a request for extended coverage title insurance, then the following would also be exceptions to coverage:

Any facts, rights, interests or claims which are not disclosed by the public records but which could be ascertained by making inquiry of the parties or persons in possession of the herein described land.

Any easements, liens (including but not limited to any Statutory Liens for labor or materials arising from any on-going or recently completed works of improvement), encumbrances, facts, rights, interest or claims which are not shown by the public records but which could be ascertained by an inspection of the herein described land.

Discrepancies, conflicts in boundary lines, shortages in area, encroachments or any other facts which a correct survey of the herein described land would disclose which are not shown by the public records and the requirement that said survey meets with the minimum standards for ALTA/ACSM land title surveys.

10. The Company will require that an Owner's Affidavit be completed by the party(s) named below before the issuance of any policy of title insurance.

Party(ies): Pacific Gas and Electric Company, a California Corporation

The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit.

END OF EXCEPTIONS

NOTES

- Note 1.** Note: The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land a Commercial Property, known as 1919 Webster Street, Oakland, CA, to an Extended Coverage Loan Policy.
- Note 2.** Note: The name(s) of the proposed insured(s) furnished with this application for title insurance is/are:

No names were furnished with the application. Please provide the name(s) of the buyers as soon as possible.
- Note 3.** Note: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.
- Note 4.** Note: The City of Oakland imposes a transfer tax of \$15.00 per thousand, based on the full value of the property at the time a deed or other transfer is recorded. This is in addition to the \$1.10 per thousand County transfer tax.
- Note 5.** Your application for title insurance was placed by reference to only a street address or tax identification number. Based on our records, we believe that the legal description in this report covers the parcel(s) of Land that you requested. If the legal description is incorrect, the seller/borrower must notify the Company and/or the settlement company in order to prevent errors and to be certain that the correct parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.
- Note 6.** *** IMPORTANT RECORDING NOTE ***

Please send all original documents for Chicago Title Company Alameda Co. recording to the following office:

Concord Title Group
2150 John Glenn Drive Suite 400
Concord, CA. 94520
Attn: Recording Desk
Telephone: (925) 288-8000

Please direct all other title communication and copies of documents, including recording release instructions, policy write up instructions, lenders instructions and settlement statements, to the Title Only Department at the issuing office.
- Note 7.** If a county recorder, title insurance company, escrow company, real estate broker, real estate agent or association provides a copy of a declaration, governing document or deed to any person, California law requires that the document provided shall include a statement regarding any unlawful restrictions. Said statement is to be in at least 14-point bold face type and may be stamped on the first page of any document provided or included as a cover page attached to the requested document. Should a party to this transaction request a copy of any document reported herein that fits this category, the statement is to be included in the manner described.
- Note 8.** Any documents being executed in conjunction with this transaction must be signed in the presence of an authorized Company employee, an authorized employee of an agent, an authorized employee of the insured lender, or by using Bancserv or other approved third-party service. If the above requirements cannot be met, please call the company at the number provided in this report.

NOTES

END OF NOTES

**FIDELITY NATIONAL FINANCIAL
PRIVACY NOTICE
Effective: May 1, 2015**

Order No.: FWAC-TO15004049-

Fidelity National Financial, Inc. and its majority-owned subsidiary companies providing real estate- and loan-related services (collectively, "FNF", "our" or "we") respect and are committed to protecting your privacy. This Privacy Notice lets you know how and for what purposes your Personal Information (as defined herein) is being collected, processed and used by FNF. We pledge that we will take reasonable steps to ensure that your Personal Information will only be used in ways that are in compliance with this Privacy Notice. The provision of this Privacy Notice to you does not create any express or implied relationship, or create any express or implied duty or other obligation, between Fidelity National Financial, Inc. and you. See also **No Representations or Warranties** below.

This Privacy Notice is only in effect for any generic information and Personal Information collected and/or owned by FNF, including collection through any FNF website and any online features, services and/or programs offered by FNF (collectively, the "Website"). This Privacy Notice is not applicable to any other web pages, mobile applications, social media sites, email lists, generic information or Personal Information collected and/or owned by any entity other than FNF.

How Information is Collected

The types of personal information FNF collects may include, among other things (collectively, "Personal Information"): (1) contact information (e.g., name, address, phone number, email address); (2) demographic information (e.g., date of birth, gender marital status); (3) Internet protocol (or IP) address or device ID/UDID; (4) social security number (SSN), student ID (SIN), driver's license, passport, and other government ID numbers; (5) financial account information; and (6) information related to offenses or criminal convictions.

In the course of our business, we may collect Personal Information about you from the following sources:

- Applications or other forms we receive from you or your authorized representative;
- Information we receive from you through the Website;
- Information about your transactions with or services performed by us, our affiliates, or others; and
- From consumer or other reporting agencies and public records maintained by governmental entities that we either obtain directly from those entities, or from our affiliates or others.

Additional Ways Information is Collected Through the Website

Browser Log Files. Our servers automatically log each visitor to the Website and collect and record certain information about each visitor. This information may include IP address, browser language, browser type, operating system, domain names, browsing history (including time spent at a domain, time and date of your visit), referring/exit web pages and URLs, and number of clicks. The domain name and IP address reveal nothing personal about the user other than the IP address from which the user has accessed the Website.

Cookies. From time to time, FNF or other third parties may send a "cookie" to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive and that can be re-sent to the serving website on subsequent visits. A cookie, by itself, cannot read other data from your hard disk or read other cookie files already on your computer. A cookie, by itself, does not damage your system. We, our advertisers and other third parties may use cookies to identify and keep track of, among other things, those areas of the Website

and third party websites that you have visited in the past in order to enhance your next visit to the Website. You can choose whether or not to accept cookies by changing the settings of your Internet browser, but some functionality of the Website may be impaired or not function as intended. See the Third Party Opt Out section below.

Web Beacons. Some of our web pages and electronic communications may contain images, which may or may not be visible to you, known as Web Beacons (sometimes referred to as "clear gifs"). Web Beacons collect only limited information that includes a cookie number; time and date of a page view; and a description of the page on which the Web Beacon resides. We may also carry Web Beacons placed by third party advertisers. These Web Beacons do not carry any Personal Information and are only used to track usage of the Website and activities associated with the Website. See the Third Party Opt Out section below.

Unique Identifier. We may assign you a unique internal identifier to help keep track of your future visits. We may use this information to gather aggregate demographic information about our visitors, and we may use it to personalize the information you see on the Website and some of the electronic communications you receive from us. We keep this information for our internal use, and this information is not shared with others.

Third Party Opt Out. Although we do not presently, in the future we may allow third-party companies to serve advertisements and/or collect certain anonymous information when you visit the Website. These companies may use non-personally identifiable information (e.g., click stream information, browser type, time and date, subject of advertisements clicked or scrolled over) during your visits to the Website in order to provide advertisements about products and services likely to be of greater interest to you. These companies typically use a cookie or third party Web Beacon to collect this information, as further described above. Through these technologies, the third party may have access to and use non-personalized information about your online usage activity.

You can opt-out of certain online behavioral services through any one of the ways described below. After you opt-out, you may continue to receive advertisements, but those advertisements will no longer be as relevant to you.

- You can opt-out via the Network Advertising Initiative industry opt-out at <http://www.networkadvertising.org/>.
- You can opt-out via the Consumer Choice Page at www.aboutads.info.
- For those in the U.K., you can opt-out via the IAB UK's industry opt-out at www.youronlinechoices.com.
- You can configure your web browser (Chrome, Firefox, Internet Explorer, Safari, etc.) to delete and/or control the use of cookies.

More information can be found in the Help system of your browser. Note: If you opt-out as described above, you should not delete your cookies. If you delete your cookies, you will need to opt-out again.

Use of Personal Information

Information collected by FNF is used for three main purposes:

- To provide products and services to you or one or more third party service providers (collectively, "Third Parties") who are obtaining services on your behalf or in connection with a transaction involving you.
- To improve our products and services that we perform for you or for Third Parties.
- To communicate with you and to inform you about FNF's, FNF's affiliates and third parties' products and services.

When Information Is Disclosed By FNF

We may provide your Personal Information (excluding information we receive from consumer or other credit reporting agencies) to various individuals and companies, as permitted by law, without obtaining your prior authorization. Such laws do not allow consumers to restrict these disclosures. Disclosures may include, without limitation, the following:

- To agents, brokers, representatives, or others to provide you with services you have requested, and to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure in connection with an insurance transaction;
- To third-party contractors or service providers who provide services or perform marketing services or other functions on our behalf;
- To law enforcement or other governmental authority in connection with an investigation, or civil or criminal subpoenas or court orders; and/or
- To lenders, lien holders, judgment creditors, or other parties claiming an encumbrance or an interest in title whose claim or interest must be determined, settled, paid or released prior to a title or escrow closing.

In addition to the other times when we might disclose information about you, we might also disclose information when required by law or in the good-faith belief that such disclosure is necessary to: (1) comply with a legal process or applicable laws; (2) enforce this Privacy Notice; (3) respond to claims that any materials, documents, images, graphics, logos, designs, audio, video and any other information provided by you violates the rights of third parties; or (4) protect the rights, property or personal safety of FNF, its users or the public.

We maintain reasonable safeguards to keep the Personal Information that is disclosed to us secure. We provide Personal Information and non-Personal Information to our subsidiaries, affiliated companies, and other businesses or persons for the purposes of processing such information on our behalf and promoting the services of our trusted business partners, some or all of which may store your information on servers outside of the United States. We require that these parties agree to process such information in compliance with our Privacy Notice or in a similar, industry-standard manner, and we use reasonable efforts to limit their use of such information and to use other appropriate confidentiality and security measures. The use of your information by one of our trusted business partners may be subject to that party's own Privacy Notice. We do not, however, disclose information we collect from consumer or credit reporting agencies with our affiliates or others without your consent, in conformity with applicable law, unless such disclosure is otherwise permitted by law.

We also reserve the right to disclose Personal Information and/or non-Personal Information to take precautions against liability, investigate and defend against any third-party claims or allegations, assist government enforcement agencies, protect the security or integrity of the Website, and protect the rights, property, or personal safety of FNF, our users or others.

We reserve the right to transfer your Personal Information, as well as any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets. We also cannot make any representations regarding the use or transfer of your Personal Information or other information that we may have in the event of our bankruptcy, reorganization, insolvency, receivership or an assignment for the benefit of creditors, and you expressly agree and consent to the use and/or transfer of your Personal Information or other information in connection with a sale or transfer of some or all of our assets in any of the above described proceedings. Furthermore, we cannot and will not be responsible for

any breach of security by any third parties or for any actions of any third parties that receive any of the information that is disclosed to us.

Information From Children

We do not collect Personal Information from any person that we know to be under the age of thirteen (13). Specifically, the Website is not intended or designed to attract children under the age of thirteen (13). You affirm that you are either more than 18 years of age, or an emancipated minor, or possess legal parental or guardian consent, and are fully able and competent to enter into the terms, conditions, obligations, affirmations, representations, and warranties set forth in this Privacy Notice, and to abide by and comply with this Privacy Notice. In any case, you affirm that you are over the age of 13, as **THE WEBSITE IS NOT INTENDED FOR CHILDREN UNDER 13 THAT ARE UNACCOMPANIED BY HIS OR HER PARENT OR LEGAL GUARDIAN.**

Parents should be aware that FNF's Privacy Notice will govern our use of Personal Information, but also that information that is voluntarily given by children – or others – in email exchanges, bulletin boards or the like may be used by other parties to generate unsolicited communications. FNF encourages all parents to instruct their children in the safe and responsible use of their Personal Information while using the Internet.

Privacy Outside the Website

The Website may contain various links to other websites, including links to various third party service providers. FNF is not and cannot be responsible for the privacy practices or the content of any of those other websites. Other than under agreements with certain reputable organizations and companies, and except for third party service providers whose services either we use or you voluntarily elect to utilize, we do not share any of the Personal Information that you provide to us with any of the websites to which the Website links, although we may share aggregate, non-Personal Information with those other third parties. Please check with those websites in order to determine their privacy policies and your rights under them.

European Union Users

If you are a citizen of the European Union, please note that we may transfer your Personal Information outside the European Union for use for any of the purposes described in this Privacy Notice. By providing FNF with your Personal Information, you consent to both our collection and such transfer of your Personal Information in accordance with this Privacy Notice.

Choices With Your Personal Information

Whether you submit Personal Information to FNF is entirely up to you. You may decide not to submit Personal Information, in which case FNF may not be able to provide certain services or products to you.

You may choose to prevent FNF from disclosing or using your Personal Information under certain circumstances ("opt out"). You may opt out of any disclosure or use of your Personal Information for purposes that are incompatible with the purpose(s) for which it was originally collected or for which you subsequently gave authorization by notifying us by one of the methods at the end of this Privacy Notice. Furthermore, even where your Personal Information is to be disclosed and used in accordance with the stated purposes in this Privacy Notice, you may elect to opt out of such disclosure to and use by a third party that is not acting as an agent of FNF. As described above, there are some uses from which you cannot opt-out.

Please note that opting out of the disclosure and use of your Personal Information as a prospective employee may prevent you from being hired as an employee by FNF to the extent that provision of your Personal Information is required to apply for an open position.

If FNF collects Personal Information from you, such information will not be disclosed or used by FNF for purposes that are incompatible with the purpose(s) for which it was originally collected or for which you subsequently gave authorization unless you affirmatively consent to such disclosure and use.

You may opt out of online behavioral advertising by following the instructions set forth above under the above section "Additional Ways That Information Is Collected Through the Website," subsection "Third Party Opt Out."

Access and Correction

To access your Personal Information in the possession of FNF and correct inaccuracies of that information in our records, please contact us in the manner specified at the end of this Privacy Notice. We ask individuals to identify themselves and the information requested to be accessed and amended before processing such requests, and we may decline to process requests in limited circumstances as permitted by applicable privacy legislation.

Your California Privacy Rights

Under California's "Shine the Light" law, California residents who provide certain personally identifiable information in connection with obtaining products or services for personal, family or household use are entitled to request and obtain from us once a calendar year information about the customer information we shared, if any, with other businesses for their own direct marketing uses. If applicable, this information would include the categories of customer information and the names and addresses of those businesses with which we shared customer information for the immediately prior calendar year (e.g., requests made in 2015 will receive information regarding 2014 sharing activities).

To obtain this information on behalf of FNF, please send an email message to privacy@fnf.com with "Request for California Privacy Information" in the subject line and in the body of your message. We will provide the requested information to you at your email address in response.

Please be aware that not all information sharing is covered by the "Shine the Light" requirements and only information on covered sharing will be included in our response.

Additionally, because we may collect your Personal Information from time to time, California's Online Privacy Protection Act requires us to disclose how we respond to "do not track" requests and other similar mechanisms. Currently, our policy is that we do not recognize "do not track" requests from Internet browsers and similar devices.

FNF Compliance with California Online Privacy Protection Act

For some websites which FNF or one of its companies owns, such as the Customer CareNet ("CCN"), FNF is acting as a third party service provider to a mortgage loan servicer. In those instances, we may collect certain information on behalf of that mortgage loan servicer for fulfilling a service to that mortgage loan servicer. For example, you may access CCN to complete a transaction with your mortgage loan servicer. During this transaction, the information which we may collect on behalf of the mortgage loan servicer is as follows:

- First and Last Name
- Property Address
- User Name
- Password
- Loan Number
- Social Security Number - masked upon entry
- Email Address
- Three Security Questions and Answers
- IP Address

The information you submit is then transferred to your mortgage loan servicer by way of CCN.

The mortgage loan servicer is responsible for taking action or making changes to any consumer information submitted through this website. For example, if you believe that your payment or user information is incorrect, you must contact your mortgage loan servicer.

CCN does not share consumer information with third parties, other than those with which the mortgage loan servicer has contracted to interface with the CCN application.

All sections of the FNF Privacy Notice apply to your interaction with CCN, except for the sections titled Choices with Your Personal Information and Access and Correction. If you have questions regarding the choices you have with regard to your personal information or how to access or correct your personal information, you should contact your mortgage loan servicer.

No Representations or Warranties

By providing this Privacy Notice, Fidelity National Financial, Inc. does not make any representations or warranties whatsoever concerning any products or services provided to you by its majority-owned subsidiaries. In addition, you also expressly agree that your use of the Website is at your own risk. Any services provided to you by Fidelity National Financial, Inc. and/or the Website are provided "as is" and "as available" for your use, without representations or warranties of any kind, either express or implied, unless such warranties are legally incapable of exclusion. Fidelity National Financial, Inc. makes no representations or warranties that any services provided to you by it or the Website, or any services offered in connection with the Website are or will remain uninterrupted or error-free, that defects will be corrected, or that the web pages on or accessed through the Website, or the servers used in connection with the Website, are or will remain free from any viruses, worms, time bombs, drop dead devices, Trojan horses or other harmful components. Any liability of Fidelity National Financial, Inc. and your exclusive remedy with respect to the use of any product or service provided by Fidelity National Financial, Inc. including on or accessed through the Website, will be the re-performance of such service found to be inadequate.

Your Consent To This Privacy Notice

By submitting Personal Information to FNF, you consent to the collection and use of information by us as specified above or as we otherwise see fit, in compliance with this Privacy Notice, unless you inform us otherwise by means of the procedure identified below. If we decide to change this Privacy Notice, we will make an effort to post those changes on the Website. Each time we collect information from you following any amendment of this Privacy Notice will signify your assent to and acceptance of its revised terms for all previously collected information and information collected from you in the future. We may use comments, information or feedback that you may submit in any manner that we may choose without notice or compensation to you.

If you have additional questions or comments, please let us know by sending your comments or requests to:

CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
- (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
 - (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
 - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
 - (c) resulting in no loss or damage to the insured claimant;
 - (d) attaching or created subsequent to Date of Policy; or
 - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

**CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)**

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
 - a. building;
 - b. zoning;
 - c. land use;
 - d. improvements on the Land;
 - e. land division; and
 - f. environmental protection.

This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
 - a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
 - b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
 - c. that result in no loss to You; or
 - d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
 - a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
 - b. in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19 and 21, Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	<u>Your Deductible Amount</u>	<u>Our Maximum Dollar Limit of Liability</u>
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or \$2,500.00 (whichever is less)	\$10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or \$5,000.00 (whichever is less)	\$25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or \$5,000.00 (whichever is less)	\$25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or \$2,500.00 (whichever is less)	\$5,000.00

**AMERICAN LAND TITLE ASSOCIATION
RESIDENTIAL TITLE INSURANCE POLICY (6-1-87)**

EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:

- land use
- improvements on the land
- land division
- environmental protection

This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at policy date.

This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.

2. The right to take the land by condemning it, unless:

- a notice of exercising the right appears in the public records on the Policy Date
- the taking happened prior to the Policy Date and is binding on you if you bought the land without knowledge of the taking

3. Title Risks:

- that are created, allowed, or agreed to by you
- that are known to you, but not to us, on the Policy Date-unless they appeared in the public records
- that result in no loss to you
- that first affect your title after the Policy Date - this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks

4. Failure to pay value for your title.

5. Lack of a right:

- to any land outside the area specifically described and referred to in Item 3 of Schedule A

or

- in streets, alleys, or waterways that touch your land

This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - (a) a fraudulent conveyance or fraudulent transfer, or
 - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

ATTACHMENT ONE (CONTINUED)

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
 - (a) a fraudulent conveyance or fraudulent transfer; or
 - (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured mortgage, is
 - (a) a fraudulent conveyance or fraudulent transfer, or
 - (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

Not all discounts are offered by every FNF Company. The discount will only be applicable to the FNF Company as indicated by the named discount.

FNF Underwritten Title Companies

CTC – Chicago Title Company
CLTC – Commonwealth Land Title Company
FNTC – Fidelity National Title Company
FNTCCA – Fidelity National Title Company of California

CLTIC – Commonwealth Land Title Insurance Company

Available Discounts

CREDIT FOR PRELIMINARY TITLE REPORTS AND/OR COMMITMENTS ON SUBSEQUENT POLICIES (CTIC, FNTIC)

Where no major change in the title has occurred since the issuance of the original report or commitment, the order may be reopened within twelve (12) to thirty-six (36) months and all or a portion of the charge previously paid for the report or commitment may be credited on a subsequent policy charge.

DISASTER LOANS (CTIC, CLTIC, FNTIC)

The charge for a Lender's Policy (Standard or Extended coverage) covering the financing or refinancing by an owner of record, within twenty-four (24) months of the date of a declaration of a disaster area by the government of the United States or the State of California on any land located in said area, which was partially or totally destroyed in the disaster, will be fifty percent (50%) of the appropriate title insurance rate.

CHURCHES OR CHARITABLE NON-PROFIT ORGANIZATIONS (CTIC, FNTIC)

On properties used as a church or for charitable purposes within the scope of the normal activities of such entities, provided said charge is normally the church's obligation the charge for an owner's policy shall be fifty percent (50%) to seventy percent (70%) of the appropriate title insurance rate, depending on the type of coverage selected. The charge for a lender's policy shall be thirty-two percent (32%) to fifty percent (50%) of the appropriate title insurance rate, depending on the type of coverage selected.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 13 RCRA-SQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 11/07/2015 has revealed that there are 3 RESPONSE sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/07/2015 has revealed that there are 15 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 10/21/2015 has revealed that there are 77 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 10/21/2015 has revealed that there are 6 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 12 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 08/04/2015 has revealed that there are 13 Notify 65 sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

PG AND E GAS PLANT O	FIRST AND WASHINGTON	SW 1/2 - 1 (0.947 mi.)	267	581

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk

EXECUTIVE SUMMARY

Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 22 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 10 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

totals approximately 0.138 acre and the building is constructed slab-on grade with no evidence of a basement or other sub-grade areas. The Site is located in a commercial area along Webster Street in central Oakland and is approximately 0.17-mile west of Lake Merrit. To the north of the Site is a Physical Therapy Innovations company and to the east of the property is an open parking lot that separates the Site from Copymat Oakland. On May 2, 2011 AEI conducted a Phase I Environmental Site Assessment and according to their review the Site was historically occupied by a gasoline service station from approximately 1940 to 1966. The former gasoline service station was demolished and cleared in 1966, but no records were on file with the Oakland Building Department, Alameda County Environmental Health Services Department or Oakland Fire Department regarding removal of the underground storage tanks (USTs). Additionally, no documentation was found whether soil samples were collected and analyzed for presence of petroleum hydrocarbon contamination following the demolition of the station. On July 20, 2011, AEI advanced three soil borings (SB-1 through SB-3) and collected five soil and three groundwater samples from all three locations. Total Petroleum Hydrocarbons as Gasoline (TPH-g) in soil was reported in samples SB-3-16 and SB-3-20 at concentrations of 8.3 milligrams per kilograms (mg/kg) and 42 mg/kg, respectively. Total Petroleum Hydrocarbons as Diesel (TPH-d) in soil was reported in SB-2-16, SB-3-16, SB-3-20 at concentrations of 7.7 mg/kg, 6.5 mg/kg and 8.7 mg/kg, respectively. Total Petroleum Hydrocarbons as Motor Oil (TPH-mo) in soil was reported above laboratory reporting limit in SB-2-16 at a concentration of 25 mg/kg. TPH-g and TPH-d in groundwater samples were reported at 59,000 micrograms per liter (ug/L) and 200,000 ug/L respectively in SB-3. On August 22, 2012, SCHUTZE & Associates, Inc. (SCHUTZE) performed a Limited Phase II Subsurface Investigation by advancing two soil borings to 16.5 and 18 ft bgs in the interior of the south tenant space. TPH-g was detected in groundwater samples B1-18-W and B2-16.5-W at respective concentrations of 400 and 6,000 ug/L. TPH-d was detected in groundwater samples B1-18-W and B-2-16.5-W at respective concentrations of 1,100 and 3,800 ug/L. Ethylbenzene and Xylenes were detected in the groundwater sample from B2-16.5-W at concentrations of 210 and 680 ug/L, respectively. Benzene, toluene and MTBE were not detected in soil and groundwater samples. The results from this Limited Phase II Subsurface Investigation can be found in Appendix B. ACEH has approved a workplan for vapor intrusion assessment and groundwater investigation. Not reported

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Status: Open - Remediation
 Status Date: 10/03/2007
 Lead Agency: ALAMEDA COUNTY LOP
 Case Worker: KLD
 Local Agency: ALAMEDA COUNTY LOP
 RB Case Number: 01-0151
 LOC Case Number: RO0000129
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
 Potential Contaminants of Concern: Benzene, Gasoline
 Site History: One 1,000-gallon gasoline UST was removed on August 3, 1992 and two 500-gallon USTs were removed on August 6, 1992. The tanks had been located in the sidewalk. Samples collected beneath the tanks. The maximum concentrations were detected near the USTs at 1,500 mg/kg TPHg and 12 mg/kg benzene. Nine soil borings were installed in July 1994 to investigate the extent of the release. Three were converted to monitoring wells.

Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>. The subject site was used as a service station until 1972 when the site was demolished and the tanks removed. The station building, two dispenser islands, one waste oil UST, and two gasoline USTs were removed. An earlier generation of USTs had previously been removed. Since 1975 it has been used as a parking lot. A soil vapor survey was conducted in 1988 to determine if the site had been impacted, three wells were installed in October 1988, four wells were installed in 1989, four wells were installed offsite in June 1990, two offsite wells were installed in October 1991, and another two wells were installed offsite in late 1992, for a total of 16 wells. Limited soil excavation was conducted in January 1992. An SVE system operated onsite in 1993, but showed minimal effectiveness. In June 2004 the first generation UST pit was investigated and impacts were discovered. In April 2007 four bores were installed to investigate the extent of contamination associated with the first generation USTs. In June 2007 a vapor survey was conducted and elevated concentrations were detected in all vapor points. In early 2008 105 bucket auger bores were installed to remove impacted soil associated with the first generation USTs. A report on the installation of a post-remediation groundwater monitoring well and the installation of several soil bores to infill a data gap in the downgradient extent of the groundwater plume was generated. Well MW-17 was installed in October 2010. Additional excavation of soil impacted by the second generation USTs and the waste oil UST was conducted between January and June 2011 as part of the redevelopment project for the subject site.

Description:	PER NRC FAX: The caller is reporting that maintenance people were using toxic cleaner to clean carpets at an office. The caller had to go to the hospital because the chemicals gave her chest pains and trouble breathing. It also made three other people sick. The caller stated that she found out that gasoline was in the chemicals that they were using to clean.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Local Agency: Not reported
RB Case Number: NA
LOC Case Number: RO0002984
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Heating Oil / Fuel Oil, Lead
Site History: In 2006, the site was being redeveloped with a multi-story office building. During construction activities, an UST was discovered and subsequently removed. Elevated concentrations of petroleum hydrocarbons were detected at the site. Several borings were installed to delineate the extent of the groundwater contaminant plume.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110038711007

Environmental Interest/Information System

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

October 1996. In December 1993, two 1,000-gallon gasoline underground storage tanks were removed from beneath the sidewalk along Harrison Street. In addition, three hydraulic lifts, one vault, one wash rack sump, and associated piping were reportedly excavated and removed from the site. A total of approximately 240 cubic yards of hydrocarbon-impacted soil was reportedly removed from these areas. Soil vapor extraction and air sparging remediation was conducted from December 2001 through April 2005. Not all historic documents for the fuel leak case are available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

Case Type: LUST Cleanup Site
Status: Open - Site Assessment
Status Date: 07/07/1995
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Case Worker: MYM
Local Agency: Not reported
RB Case Number: 01-3613
LOC Case Number: RO0002992
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Two underground fuel tanks were closed in place beneath the sidewalk at 1424 Harrison Street in 1982. The tanks were filled with cement slurry. Site investigation activities conducted for a release from a UST system at the adjacent property at 1432 Harrison Street, detected petroleum hydrocarbons in soil adjacent to and beneath the USTs closed in place at 1424 Harrison Street. Further investigation of the site was requested. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

Treat To Water: Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

A complete case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp . In 1986 tank basin soil and a groundwater sample were collected during the replacement of USTs in a pre-existing tank basin; hydrocarbon concentrations were encountered. Sixteen soil vapor wells are reported to have been installed in 1986 and 1987 over the BART tube, located directly below the site; however, no data has been submitted. In 1992 a groundwater sample was collected from a former vadose zone well (VW-2) and concentrations of concern were encountered; however, the location of VW-2-1 is unknown. In July 1994 product lines were removed and upgraded and low hydrocarbon concentrations were encountered. In March 2000 eight hand-augered bores were installed at the site; most bore depths were limited to 10 feet by the presence of the BART tube. In Mach 2002 wells MW-1 to MW-3 were installed on either side of the BART tube and right-of-way. In April 2012 soil bores B-9 to B-12 were installed to define the downgradient extent of the dissolved-phase groundwater plume. Groundwater was collected; however, appeared to define a deeper non-impacted groundwater zone. The groundwater plume was defined using the LTCP groundwater technical justification paper 90th percentile plume length, and conducting a downgradient sensitive receptor survey for water supply wells and potential basements that might encounter the impacted groundwater.

Recipient name:	Oakland Redevelopment Agency
Grant type:	Cleanup
Property name:	FOX COURTS SITE
Property #:	0080642017-00
Parcel size:	1.1
Property Description:	The subject site is located adjacent to the historic Fox Theater in downtown Oakland. The site was used for housing in the early 1900s, but from 1928 onwards, it was used for various commercial uses such as auto parking and garage, paint & wallpaper store, furniture store, sign painting, art glass works, and metal/machine works. The site had been occupied by an art school for the past few years. Based on the site investigations, the soils are contaminated with petroleum hydrocarbons and lead. As part of the redevelopment, the contaminated soils will be removed and disposed off at a landfill.

Recipient name: Oakland Redevelopment Agency
Grant type: Cleanup
Property name: FOX COURTS SITE
Property #: 0080642017-00
Parcel size: 1.1
Property Description: The subject site is located adjacent to the historic Fox Theater in downtown Oakland. The site was used for housing in the early 1900s, but from 1928 onwards, it was used for various commercial uses such as auto parking and garage, paint & wallpaper store, furniture store, sign painting, art glass works, and metal/machine works. The site had been occupied by an art school for the past few years. Based on the site investigations, the soils are contaminated with petroleum hydrocarbons and lead. As part of the redevelopment, the contaminated soils will be removed and disposed off at a landfill.

 Lead Agency: ALAMEDA COUNTY LOP
 Case Worker: KEN
 Local Agency: ALAMEDA COUNTY LOP
 RB Case Number: 01-1466
 LOC Case Number: RO0000358
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Benzene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
 Site History: A site assessment conducted in 1989 detected 11,000 mg/kg TPHg and 40 mg/kg benzene in soil; 9,500 a%/L TPHg in groundwater; and 6,100 a%/L TPHg and 10 a%/L benzene in soil vapor indicating that a release from the underground storage tanks had occurred. Two gasoline USTs, one diesel UST and one waste-oil UST were replaced in November and December 1991. Soil samples reported up to 10,000 mg/kg TPHg and 130 mg/kg benzene. Groundwater remediation occurred from 1990 to 1993. A 1,000-gallon waste-oil UST was removed on September 22, 1997. Soil samples collected beneath the waste-oil tank were below the detection limits for many constituents with TEPH at 32 mg/kg, TRPH at 120 mg/kg and TTLC lead at 7.2 mg/kg. A P&T groundwater remediation system operated at the site from 1991 until 1996. A dual-phase extraction pilot test was performed 19/11/2001 and found that DPE would be an effective remediation method for the site. An AS/DPE feasibility test was performed in January 2014. The test results indicates focused DPE and/or AS/DPE may be an effective remedial option. Based on the data ACEH suggests preparation and implementation of a CAP using DPE. supplemented by AS if sufficient water is present beneath the site. Groundwater monitoring continues to date.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: In August 1990, two gasoline USTs, one waste-oil UST and four dispensers were removed. Maximum soil concentrations detected were 310 mg/kg TPHg, 100 mg/kg TPHd and 0.820 mg/kg benzene from the gasoline USTs and dispensers. However, free product was observed in groundwater in the waste-oil UST excavation. Subsequent excavation in the waste-oil tank area could not remove the contaminated soil from

beneath the building so this was left in place. Monitoring wells were installed in 1994 and were monitored sporadically until 2005 when semi-annual monitoring began. The recent investigation in 2009 indicated groundwater concentrations up to 41,000 a%/L TPHg, 240,000 a%/L TPHd, 110,000 a%/L TPHmo, and 2,800 a%/L benzene.

Description: The 4.259-acre site is located in Alameda County, CA within the city of Oakland. The Hotel Oakland (former Army Hospital building) has been renovated several times since Department of Defense (DoD) activity was terminated. Current owners of the associated parcels include Hotel Oakland Associates, ICH Associates, and four private owners.
 History: In 1943, the U.S. acquired 12 leases for a total of 4.259 acres. The site was used as a station hospital by the U.S. Army Medical Corps. In 1946, 1.377 acres were transferred to the Veterans Administration (VA). In 1947, the remaining acres were transferred to the VA. No potential hazards have been identified at this site.

three gasoline underground storage tanks (USTs) were removed from the Site and a suspect unauthorized release was confirmed. Two USTs had a capacity of 1,000 gallons and one UST held 550 gallons of gasoline. Soil was reportedly excavated to 9 feet bgs, aerated onsite for one month to acceptable levels (no confirmation samples were analyzed), and used as fill material to backfill the UST excavation. Groundwater monitoring wells MW-1 through MW-3 were installed in June 1987 and well MW-1 initially contained 30 inches of free phase floating product. Free product also detected in monitoring well at off-site down-gradient property. Free phase has not been seen recently in site or vicinity wells; however, groundwater concentrations in onsite well MW-1 and off-site well MW-5 are substantially above concentrations that the LTCP Soil Vapor Technical Justification paper states is indirect evidence of free phase. At a minimum substantial residual soil contamination appears to reside at or below the depth of the UST excavation to groundwater, generally encountered at a depth of approximately 22 to 23 feet below surface grade. Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at:
<http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

**Actual:
34 ft.**

Potential Contaminants of Concern: Arsenic, Diesel, Heating Oil / Fuel Oil, Kerosene, Stoddard solvent / Mineral Spirits / Distillates, Waste Oil / Motor / Hydraulic / Lubricating

Site History: As described in the Limited Phase II Environmental Site Sampling Report dated August 5, 2010, prepared by Basics Environmental, it appears that soil and groundwater contamination at the site consists of petroleum hydrocarbons and heavy metals. The sampling results indicate that diesel, kerosene, motor oil and bunker oil were detected in one grab groundwater sample at concentrations exceeding their respective environmental screening levels (ESLs) for groundwater. Arsenic was detected in two shallow soil samples at concentrations exceeding the ESL for arsenic in shallow soil (0-10 feet).

Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Dichloroethane (DCA), Dichloroethene (DCE), Other Chlorinated Hydrocarbons, Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Arsenic, Lead, Diesel, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Waste Oil / Motor / Hydraulic / Lubricating

Site History:

Project is city block bounded by Broadway, 23rd, 24th & Valley Streets. Includes 2301-2345 Broadway; 421-455 24th St.; 444 23rd St.; and 2320-2354 Valley St. The site includes 5 parcels (APN 8-739-2, 8-739-4, 8-739-5, 8-739-7) that have historically been used as commercial facilities including auto dealerships/repair facilities. Associated potential chemical uses, storage, and handling included bulk waste oil in an above ground tanks, hydraulic oil related to lifts, and use of various types of cleaners and lubricants. The site is being redeveloped by Signature Redevelopment Group and will include

commercial and residential land uses. Phase I and II Environmental Site Assessments have been conducted on different parcels within the redevelopment site since 2001. Soil and groundwater impacts have been identified on four of the five parcels located within the boundaries of the redevelopment project. Chlorinated and non-chlorinated volatile organic compounds (VOCs) and petroleum hydrocarbons as gasoline, diesel and motor oil have been detected in groundwater. Data indicates that a 1,1-dichloroethane plume exists under the majority of the site. Lead has been detected in shallow soil and at depths up to 13 feet below ground surface. Parcel 8-739-7 is listed as a closed underground storage tank (UST) site (ACEH Fuel Leak Case No. RO0001190 and Geotracker Global ID T06001000957). Two USTs (one 1,000 gallon leaded gasoline UST and one 550 gallon waste oil UST) were removed from the northern portion of the parcel in 1991. Petroleum hydrocarbons and VOCs were detected in confirmation soil samples collected from the UST pit. One groundwater monitoring well (MW-1) was installed in the tank pit and groundwater monitoring was conducted from 1992 until 1993. The case was closed after four consecutive quarters of non-detects for petroleum hydrocarbons. At the time of closure, low levels of chlorinated VOCs were detected in groundwater. Limiting conditions at the site at the time of the UST removals prevented the over excavation of all impacted soil and thus there may be areas of contaminated soil remaining beneath the building and the sidewalk in the vicinity of the former tanks. Data collected during field investigations conducted in 2006 and 2011 indicate that another source of petroleum hydrocarbons likely exists at the site on parcel 8-739-7. Additional investigation is required to characterize the site including determination of groundwater flow direction, vertical and lateral delineation of contaminants of concern in soil and groundwater, plume stability, and identification of sources of petroleum hydrocarbons and chlorinated VOCs. Electronic submittal of data and documents requested for completeness of database.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affect: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
 Potential Contaminants of Concern: Heating Oil / Fuel Oil
 Site History: An underground storage tank (UST) was discovered during excavation on the property near the sidewalk along 21st Street. At the time of discovery, the UST was filled with oily water and low viscosity petroleum hydrocarbons. The approximately 500-gallon UST was removed from the site on May 20, 2014. Multiple corrosion holes were observed in the middle and bottom of the UST. The soil underneath the UST exhibited a strong petroleum odor. Soil samples collected from the tank pit contained up to 1,100 parts per million (ppm) of total petroleum hydrocarbons (TPH) as diesel (TPHg) and 1,100 ppm TPH as bunker oil. A groundwater sample collected from the tank pit contained 4,600 parts per billion (ppb) of TPH as diesel and 4,700 ppb as bunker oil. Additional soil and groundwater sampling that was completed at the site in July and August 2014 indicated that the residual contamination was generally limited to the area of the former tank pit. The site was evaluated for case closure under the State Water Resources Control Board Low-Threat Underground Storage Tank Closure Policy and was closed on November 25, 2014. Based upon the information available in our files to date, no further investigation or cleanup for the fuel leak case is necessary at this time.

Case Worker: KLD
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: NA
LOC Case Number: RO0002931
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: June 23, 2006 a phase II environmental assessment was performed. Petroleum hydrocarbons and oxygenates were observed in soil samples. Groundwater samples were not collected. Additional investigation was proposed and approved however, this was not performed. In August 2009, three 12,000-gallon USTs, dispensers and piping were removed from the site. Confirmation samples indicated elevated petroleum hydrocarbon concentrations in soil and groundwater.

 RB Case Number: 01-0341
 LOC Case Number: RO0000137
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Gasoline
 Site History: In July 1988 an ATT manhole 300 feet west of the site was found to have gasoline leaking into it, and a request to test the USTs was made. In February 1989 a soil vapor survey (VP-1 to VP-19) was conducted at the site; concentrations indicated a release. In March 1989 wells MW-1 to MW-5 were installed. In June 1990 wells MW-6 to MW-9 were installed offsite. In June 1990 the station was demolished and three 10,000-gallon gasoline USTs and one 1,000-gallon waste oil UST were removed. Well MW-2 was destroyed in the process of overexcavating impacted soil in 1990 and 1991; approximately 1,500 cubic yards were excavated. Of that total approximately 800 cubic yards were aerated and reused onsite. In December 1992 the City of Oakland purchased the property. A parking lot and landscaping was constructed over the western portion of the site and Bay Place was expanded over the eastern portion. In January 1993 a groundwater extraction system was installed in well MW-5. The system was shut down in January 1995 due to low production rates. On December 1, 1995 wells MW-1 and MW-3 were decommissioned. In November 1996 an additional 200 cubic yards of soil was excavated due to the installation of a new storm drain on Montecito Avenue. A one week long two-phase extraction pilot test was conducted on well MW-5 in September 2005. In August 2008 periodic injection of oxygen into well MW-5 was proposed; work was implemented in February 2009.

RB Case Number: NA
LOC Case Number: RO0002922
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Gasoline
Site History: The three underground storage tanks (USTs) were removed from operation in May 1986. Four soil samples collected at the time of removal were below the detection limits. However, no groundwater samples were collected at the time. Subsequent sampling beginning in 2001 detected elevated petroleum hydrocarbons in soil and groundwater. In addition, PCE, TCE, cis-1,2-DCE and a%g/L vinyl chloride were detected in water samples collected at the site The site was converted to a condominium building with parking and commercial on the lower floor. SOil vapor sampling and downgradient extent of groundwater contamination sampling requested.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Application
Completed Date: 10/30/2012
Comments: Confirmation letter of submittal receipt, dated October 30, 2012.
DTSC received Request for Oversight of a Brownfield Site application for Negherbon Site. Under Memorandum of Agreement, agencies determined that DTSC is appropriate oversight agency for project.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/02/2013
Comments: Phase I Environmental Site Assessment Report and All Appropriate Inquires Report dated November 8, 2012, approved by DTSC letter dated January 1, 2013. Per report recommendation, given Clients plans to redevelop the property for residential and commercial uses, limited additional assessment consistent with the proposed land use appears warranted and will be proposed in a separate document. DTSC reviewed the report for compliance with the All Appropriate Inquiries Final Rule at 40 CFR Part 312.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 06/06/2013
Comments: Community Profile dated April 2013, describes the community and potential community concerns regarding the potential health risks associated with the development of the Negherbon Project Site and the anticipated public participation activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 01/23/2013
Comments: Workplan which identifies locations of samples to be collected for CPT, soil, shallow and deep gw and chemical analyses which will be conducted. Sampling revisions approved on 1/30/2013, see revised figure 10

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 03/04/2015
Comments: Operation and maintenance plan for groundwater monitoring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 03/06/2014
Comments: Work Notice of Negherbon Soil Excavation and Removal Work to Begin March 17, 2014. DTSC will oversee this work to ensure that the activities take place in accordance with the DTSC-approved Response Plan and Implementation Plan dated June 2013 and October 2013, respectively.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 11/14/2013
Comments: Final Implementation Plan dated November 2013, approved by DTSC letter dated November 14, 2013. The objectives of the plan are to (1) describe elements of the response actions, and (2) provide details of the work to be conducted. The plan includes detailed plans as appendices that describe procedures required to implement the proposed response actions: Excavation and Backfill Plan, Transportation plan, Decontamination Plan, Air Monitoring Plan, Health and Safety Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Workplan
Completed Date: 10/14/2013
Comments: Request to Destroy Monitoring Wells at the Negherbon Property, dated October 11, 2013, approved by DTSC email dated October 14, 2013. Request includes tables/figures/attachments, Groundwater Monitoring Well Construction Details, Groundwater Monitoring Well Locations, and Monitoring Well Construction Logs. Well abandonment activities will be conducted in accordance with Alameda County Department of Public Works Agency (ACPWA) Well Standards Program requirements and any specific conditions of the ACPWA permit. A well closure report will be submitted to DTSC within 30 days of abandonment of each well. The report(s) will include copies of the well completion reports for the destroyed wells that are sent to the State of California Department of Water Resources.

Completed Document Type: Land Use Restriction
Completed Date: 08/19/2015
Comments: Land Use Covenant (LUC) and Agreement for Environmental Restrictions recorded at County of Alameda on 8/19/2015. LUC made by and between Hive Development Group, LLC, a California limited liability company, current owner of property, and DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 03/28/2013
Comments: Letter dated March 27, 2013, notifying agencies of DTSC's intent to enter into an agreement under the California Land Reuse and Revitalization Act of 2004 (CLRRA) with the Hive Development Group, LLC, for the property located at 2345 and 2333 Broadway and 421 24th Street in Oakland, Alameda County, California. Entry into this agreement provides Hive Development Group, LLC with immunity from liability for certain hazardous materials response costs and damage claims. Under the agreement, Hive Development Group, LLC will perform a site assessment and prepare and implement a response plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 07/23/2013
Comments: CQEA Notice of Exemption by General Rule [CCR, Sec. 15061(b)(3)]: It can be seen with certainty that there is no possibility that the activities in question will result in a significant effect on the environment. The project is exempt because it is for a small cleanup of less than 100 cubic yards, and air impacts would be minimal and not exceed Bay Area Air Quality Management District thresholds. Therefore it will not result in a "substantial, or potentially substantial, adverse change in any of the physical conditions within the area affected by the project, including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance".

Local Agency: ALAMEDA COUNTY LOP
RB Case Number: 01-2428
LOC Case Number: RO0000505
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern: Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History: The site is a small triangular commercial property located at the intersection of Harrison Street and Bay Place in Oakland, CA. The site was previously a Shell gas station and auto repair facility equipped with three underground storage tanks (USTs), one 550-gallon waste oil tank UST, three dispenser islands, a drive-on hoist, and a station building. The USTs were removed from the center of the property in March 1977, but no records are available that document their removal. Three dispenser islands existed to the west, north, and east of the former USTs. Currently, the site is occupied by a 7-Eleven convenience store and the surrounding area is predominantly a mix of commercial and residential use. During a light pole installation at the site, petroleum impacted soil was observed. Composite stockpile soil samples were collected on November 2, 1992

SHELL / 7-ELEVEN #20009 (Continued)

S102423476

from the soil generated during the light pole removal and analyzed for Total Petroleum Hydrocarbons as gasoline (TPHg), Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX), lubricating oil, and other heavier petroleum hydrocarbons. The soil sample collected from Soil Pile 1 contained the highest concentrations of 3,200 parts per million (ppm) lubricating oil and 35 ppm Oil and grease (O&G). On March 4, 1993, four soil borings (#1 through #4) were advanced at locations across the site. One soil sample from each boring was analyzed for TPHg, TPHd, BTEX, O&G, Total Petroleum Hydrocarbons as kerosene (TPHk), Total Petroleum Hydrocarbons as mineral spirits (TPHms), and lubricating oil. The maximum concentrations of 7,900 ppm TPHmo and 620 ppm TPHg were detected in the soil sample from boring #4, in the east portion of the site. Six monitoring wells (S-1 through S-6) were installed throughout the site on June 2 through 5, 2008. Soil samples were collected from each boring between 5.5 and 15.5 fbg, along with one groundwater sample. Groundwater was first encountered at the site between 8.2 and 19 fbg. The soil samples indicated that the highest concentration of petroleum hydrocarbons occurred in shallow soils between 7 and 10 fbg. Shallow soils in the southeast portion of the site contained up to 2,300 ppm TPHg, 22,000 ppm TPHd, and 8,600 ppm O&G. Shallow soils near the western-most dispenser contained up to 2,700 ppm TPHg and 270 ppm TPHd. Groundwater samples collected from the former UST area and southeast corner of the site contained TPHg concentrations of 6,500 parts per billion (ppb) and 1,300 ppb, respectively. To investigate the potential for the petroleum plume to extend off-site, two grab groundwater samples (HP-1 and HP-2) were collected down gradient along Harrison Street on May 19 through 21, 2009. The grab groundwater sample collected furthest from the site (HP-2) contained 715,000 ppb O & G, 14,000 ppb TPHg, and 58,000 ppb TPHd, while the closer groundwater sample (HP-1) contained 111,000 ppb O&G, 11,000 ppb TPHg and 36,000 ppb TPHd. The grab groundwater samples indicated the potential for an offsite plume of heavier hydrocarbons. In addition to the off-site samples, four soil borings (B-1 through B-4) were advanced in the former waste oil tank area. The shallow soil sample collected from boring B-1 at 5.5 fbg contained the highest concentration of O&G at 3,000 ppm. TPHg and TPHd were detected in all borings at maximum concentrations of 920 ppm and 700 ppm, respectively. Three soil vapor probes (SVP-1 through SVP-3) were also installed near the former USTs and waste oil UST and sampled on May 28, 2009. The vapor probes contained up to 530,000 micrograms per cubic meter (a%g/m3) benzene. On February 27, 2010, one soil vapor probe (SVP-2a) and two near sub-slab vapor probes (SVP-4 and SVP-5) were installed. Sampling of the vapor probes on occurred on March 23, 2010. TPHg and benzene were detected in soil vapor near the former USTs at concentrations up to 75,000,000 a%g/m3 and 160,000 a%g/m3, respectively. Soil vapor samples from the two near sub-slab probes did not contain TPHg, benzene, toluene, ethylbenzene, or xylenes (BTEX) at concentrations above the reporting limit. On June 25, 2010, six soil borings (B-5 through B-10) were advanced off-site to investigate contamination south of the site. The investigation revealed a large plume of petroleum hydrocarbons south of the site consisting of O&G, TPHd, and TPHg at maximum groundwater concentrations of 715,000 ppb, 58,000 ppb, and 14,000 ppb, respectively. The highest concentrations were detected along Harrison Street approximately 175 feet southwest of the site. The plume does not contain BTEX or other VOCs at concentrations above reporting

S102423476

limits. Since the maximum concentrations within the plume were detected approximately 175 feet downgradient from the site and the types of petroleum hydrocarbons are not consistent with the dissolved phase hydrocarbons detected on site, the plume is most likely from an off-site source. In 2011, a review of historical aerial photos and Sanborn maps identified five potential sources for the off-site heavy petroleum hydrocarbon plume. On March 30, 2011, soil vapor probes SVP-3 through SVP-5 were sampled. Soil vapor probes SVP-1, SVP-2, and SVP-2a could not be sampled due to water in the sampling tubing. Due to anomalous results of up to 190,000 a%/m3 TPHg in near sub-slab vapor probes SVP-4 and SVP-5, the probes were re-sampled on June 8, 2011. The re-sampling of probes SVP-4 and SVP-5 indicated non-detectable concentrations of TPHg and 2.2 a%/m3 benzene were present in the near sub-slab wells. Probe SVP-3, located less than five feet north of near sub-slab probe SVP-5, contained 26,000,000 a%/m3 TPHg, 1,400 a%/m3 benzene, and 1,700 a%/m3 xylenes. An air exchange rate test was performed on the existing convenience store building on December 19, 2011. The initial measurements of the air exchange rate indicated an overall average of 3.11 exchanges per hour. Due to a relatively low air exchange rate, the test was followed by system maintenance which increased the HVAC performance to an air exchange rate of 11.49 exchanges per hour. The minimum required air exchange rate was calculated to determine the potential for intrusion of benzene from soil vapor to indoor air to exceed the commercial indoor air Environmental Screening Level (ESL). Using site data and assumptions from EPA and RWQCB documents, the calculated necessary air exchange rate to prevent benzene vapor intrusion at concentrations exceeding the indoor air ESL is 2.3 exchanges per hour. The current air exchange rate is greater than the calculated minimum air exchange rate by a factor of 5.

Case Type: LUST Cleanup Site
Status: Completed - Case Closed
Status Date: 01/31/2012
Lead Agency: ALAMEDA COUNTY LOP
Case Worker: JTW
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: 01-0207
LOC Case Number: RO0000148
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: The site was redeveloped in 2007 and is currently the site of a Whole Foods Market at the intersections of Bay Place, Harrison Street, and Vernon Street in Oakland, California. The site is approximately 1,000 feet north of Lake Merritt. Surrounding land use is mixed commercial and residential. Two underground storage tanks (USTs) were present at the Site as part of the automobile service facility. The two USTs consisted of a 3,000-gallon waste oil tank, which was removed in December 1988, and a 10,000-gallon gasoline UST, which was removed in January 1994. During the excavation and removal of the 10,000-gallon gasoline UST in January 1994, a hole was observed in the product piping that lead from the UST to the fuel dispenser. Free-phase product was observed on the groundwater surface in the gasoline UST excavation. In June 1994, approximately 100 cubic yards of total petroleum hydrocarbon (TPH) affected soil adjacent to the former gasoline UST and along the western portion of the former product piping route, was excavated and removed. Several soil and groundwater investigations have been conducted at the Site since 1992. The investigations found petroleum contamination in soil and groundwater within the areas of the former USTs and former hydraulic lifts and tanks. Two areas with elevated concentrations of lead were also identified beneath the building. A total of eleven hydraulic lifts along with nine floor drains and associated piping were excavated and removed between June 2005 and November 2005. Approximately 1,010 tons of soil adjacent to the hydraulic lifts was excavated and transported to Waste Managements Altamont Landfill in Livermore, CA for disposal. A total of approximately 285 tons of lead-affected soil was transported to Clean Harbors Class I landfill in Button Willow, CA for disposal. During the period from September 16 to December 16, 2005, a total of approximately 5,000 tons of TPH-affected soil was excavated from the area of the former USTs and transported to Allied Wastes Forward Landfill located in Manteca, CA for disposal. Quarterly and later semiannual groundwater monitoring was conducted at the site between March 1993 and April 2010. The groundwater monitoring data indicate that a plume containing dissolved petroleum hydrocarbons is present in the area of the former USTs and extends beneath Bay Place. The highest concentration of MTBE detected during the most recent sampling event in April 2010 was 1,400 parts per billion. No water supply wells or other potential receptors are expected to be affected by the plume. Site investigation and cleanup activities have been completed and it does not appear that the fuel release presents a risk to human health for nearby residents or site workers. Therefore, Alameda County Environmental Health is considering potential closure of the fuel leak case.

 Case Worker: REL
 Local Agency: Not reported
 RB Case Number: 01-2416
 LOC Case Number: Not reported
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Benzene, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
 Site History: On July 28, 1994, one 295-gallon waste-oil UST, one 575-gallon gasoline UST and two hydraulic lifts were removed from the site. Holes were observed in the gasoline UST upon removal. Maximum concentrations of 1,500 ppm TPHg, 1,800 ppm TPHd and 7.4 ppm benzene were detected in soil. Subsequently, a work plan was submitted but has not been implemented. Soil vapor and groundwater sampling must occur to evaluate the elevate benzene and extent of contamination in groundwater. On the Project Information screen, add this phrase to the Staff Notes and Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historical case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

Potential Contaminants of Concern: Gasoline
Site History: Four USTs, located under the sidewalk on 11th Street near the Webster Street intersection were removed from the site in April 1987. Significantly elevated concentrations of soil and groundwater contamination was present at the site. In 1987, borings and monitoring wells were installed at the site. In 1988, a groundwater extraction system began operation. The site was later redeveloped to an multi-story office complex with three floors of sub-grade parking.

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Benzene, Diesel, Gasoline, Naphthalene
Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>. In June 1989, a preliminary subsurface investigation, consisting of boring installations, detected hydrocarbon contamination in soil samples. Six out of service USTs were removed from the site in April 1990. Free product /groundwater recovery system began operating in November 1992 and ceased operating in January 1997.

Status Date: 10/14/2014
Lead Agency: ALAMEDA COUNTY LOP
Case Worker: KEN
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: Not reported
LOC Case Number: RO0003148
File Location: Not reported
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Gasoline
Site History: Petroleum hydrocarbons were detected in a soil sample collected during removal of an underground storage tank from beneath the sidewalk along 15th Street. Further investigation of the extent of contamination will be required. On December 3, 2013, one 1,000 gallon underground storage tank (UST) and related product piping was removed from the site. The UST historically contained gasoline. During tank excavation, reported concentrations included up to 906 milligrams per kilogram (mg/kg) Total Petroleum Hydrocarbons as gasoline (TPHg), 15.1 mg/kg toluene, 27.2 mg/kg ethylbenzene, 222 mg/kg total xylenes, 20.1 mg/kg naphthalene, and 0.560 mg/kg methyl ethyl ketone (MEK) were detected in soil taken from beneath the UST at a depth of eight (8) feet below ground surface.

File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: During a UST system upgrade in February 1997 to install under dispenser pans a release was noted. In February 1997 hand augured bores CB-1 to CB-12 were installed to further investigate the release. In May 1997 wells MW-1 to MW-3 were installed. In March 1999 wells MW-4 to MW-6 were installed. In March 2001 well MW-7 was installed. In March 2004 bores B1 to B4 were installed to recharacterize soil for the installation of a new UST complex for a station remodel. Additional work is proposed for delineation of the downgradient extent of the dissolved plume. Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at:
<http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

Case Worker: Not reported
Local Agency: Not reported
RB Case Number: 01-1070
LOC Case Number: RO0002456
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Soil
Potential Contaminants of Concern: Tetrachloroethylene (PCE), * Chloroform, * Chloroform, Gasoline
Site History: Two USTs were removed from the site in November 1987. In 1990, a preliminary site assessment was performed which discovered that contaminated soil had been left in place following the initial UST removals. Approximately 430 cubic yards of soil was excavated to depths of 25 ft bgs and removed from the site in 1991. Groundwater monitoring wells were installed and quarterly groundwater sampling followed during 1991 and 1992. The site had three groundwater monitoring wells and a 6-inch diameter water supply well prior to redevelopment. The closure condition of the three monitoring wells is not known, but presumed to be lost or destroyed during redevelopment. The 6-inch water supply well was destroyed per Zone 7 criteria.

RB Case Number: Not reported
LOC Case Number: RO0003143
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Soil
Potential Contaminants of Concern: Heating Oil / Fuel Oil
Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: <http://www.acgov.org/MAPS/DEH/InspectionResults/>. An approximately 350-gallon underground storage tank (USST) was removed from the site on December 16, 2013. The tank was found to be in poor condition with at least one visible hole. Soil discoloration and petroleum hydrocarbon odors were observed in the stockpiled soil and soil underlying the tank. Soil samples collected from the tank pit contained up to 9,290 ppm of total petroleum hydrocarbons (C10-C28). The tank pit was overexcavated to a depth of approximately 12 feet bgs to remove petroleum hydrocarbon contaminated soils. Following the overexcavation, two soil samples were collected from the bottom of the excavation at a depth of approximately 12 feet bgs. The soil sample from the western end of the tank pit contained 3,960 ppm of TPH (C10-C28).

Description: This site is currently occupied by two buildings and a garage. One building, a two-story fourplex, was used as apartments. The other building is three-stories, with three commercial units on the ground floor and apartments on the upper floors. Harris Dry Cleaners and later Telegraph Dry Cleaners operated in a ground floor commercial unit. Dates of operation and site occupancy for the dry cleaning operations are unknown, but all dry cleaning operations on-site ceased in 1996.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Latitude: 37.80227
Longitude: -122.28173
Case Type: Cleanup Program Site
Case Worker: JTW
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium VI
Site History: This case was formerly part of Alameda County Environmental health case RO0002586 (GeoTracker Global ID SL0600130797). This case applies to the APN parcel 1-223-7, which includes the site building and eastern portion of the former Francis Plating facility. The site was operated as a plating facility from approximately 1957 to 1998. In

1998, the property was found to be abandoned with chemicals and equipment on site. As part of an emergency response action, the U.S. Environmental Protection Agency removed abandoned chemicals and equipment and excavated shallow soil in areas without asphalt or concrete coverings. The site building is currently occupied by a circus and fitness facility. Vapor intrusion evaluations were conducted within the site building in 2013. The property owner has submitted a Site Management Plan and draft Covenant and Environmental Restriction with the intent of obtaining case closure. This case (RO0003174) is under evaluation for closure. Case RO0002586 which applies to the western portion of the former plating facility will require additional investigation and remediation.

Potential Contaminants of Concern: Gasoline
Site History: Three USTs removed in December 1989. Following UST removals, borings, which detected free product, were installed at the site. Additional site investigations were conducted in 1992. An SVE system operated from October 1996 to March 1998. In November 2004, DPE was proposed at the site, which was approved in March 2006. Corrective action implemented April 2011 & is in current operation.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

the Site PEA investigation report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 11/25/2009
Comments: SSI Field work implemented from Nov 25 through Nov 29, 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 11/23/2009
Comments: Eight hour indoor air monitoring completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/10/2010
Comments: DTSC approved the PEA with a further action determination

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Tech Memo
Completed Date: 12/30/2009
Comments: DTSC approved the SSI Technical Memorandum

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 04/22/2010
Comments: DTSC approved the SSI report and concurred with the recommendation that a release has occurred and that the response action will be completed in two phases.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 02/01/2010
Comments: PEA public review and comment period ran from December 23, 2009 through February 1, 2010. The Public Hearing was held on January 27, 2010. Based on notice from district, no comments were received from the public during the public review period or at the public hearing. Notice of compliance was provided in the final PEA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 06/28/2010
Comments: DTSC approved for implementation the RAW for the Phase I area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 05/13/2010
Comments: DTSC finalized the Community Profile Report (CPR). A copy of the CPR is to be placed in the information repositories along with Draft RAW, Draft NOE, Site Fact Sheet, and other related documents.

Completed Document Type: Public Notice
Completed Date: 05/05/2010
Comments: Draft RAW Phase I published. Draft RAW Phase I public review period will run from May 3, 2010 through June 2, 2010.

Completed Area Name: Phase II OU
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Tech Memo
Completed Date: 05/04/2010
Comments: DTSC approved the SSI Workplan for the Phase II area

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/19/2010
Comments: DTSC provided field oversight of Phase I RAW excavation activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/10/2010
Comments: SSI fieldwork for Phase II area was completed on July 10 and 11, 2010 (Sat. and Sun).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 01/25/2011
Comments: DTSC approved the SSI-II report for the Phase II area of the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 09/08/2010
Comments: Received additional TEM analytical results for NOA. Additional samples results show non-detect (0.01%) NOA fibers. Fill material from the proposed Doyle Drive borrow source area between Doyle Drive and the Golden Gate Bridge in San Francisco is suitable for fill material. Additionally, DTSC was informed that a second proposed borrow source area, from a quarry in Brisbane, may be used. Additional information and analytical data to be submitted for proposed A/B source area in Brisbane.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/19/2011
Comments: DTSC approved the RACR for Phase 1

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Tech Memo
Completed Date: 11/17/2009
Comments: DTSC approved the PEA Technical Memo - Indoor Air Monitoring. Results of the PEA Technical Memo - Indoor Air Monitoring will be reported in the Site PEA investigation report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 11/25/2009
Comments: SSI Field work implemented from Nov 25 through Nov 29, 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 11/23/2009
Comments: Eight hour indoor air monitoring completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/10/2010
Comments: DTSC approved the PEA with a further action determination

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Tech Memo
Completed Date: 12/30/2009
Comments: DTSC approved the SSI Technical Memorandum

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 04/22/2010
Comments: DTSC approved the SSI report and concurred with the recommendation that a release has occurred and that the response action will be completed in two phases.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 02/01/2010
Comments: PEA public review and comment period ran from December 23, 2009 through February 1, 2010. The Public Hearing was held on January 27, 2010. Based on notice from district, no comments were received from the public during the public review period or at the public hearing. Notice of compliance was provided in the final PEA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 06/28/2010
Comments: DTSC approved for implementation the RAW for the Phase I area.

Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 05/13/2010
Comments: DTSC finalized the Community Profile Report (CPR). A copy of the CPR is to be placed in the information repositories along with Draft RAW, Draft NOE, Site Fact Sheet, and other related documents.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 05/05/2010
Comments: Not reported

Completed Area Name: Phase I OU
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 05/05/2010
Comments: Draft RAW Phase I published. Draft RAW Phase I public review period will run from May 3, 2010 through June 2, 2010.

Completed Area Name: Phase II OU
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Tech Memo
Completed Date: 05/04/2010
Comments: DTSC approved the SSI Workplan for the Phase II area

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/19/2010
Comments: DTSC provided field oversight of Phase I RAW excavation activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/10/2010
Comments: SSI fieldwork for Phase II area was completed on July 10 and 11, 2010 (Sat. and Sun).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 01/25/2011
Comments: DTSC approved the SSI-II report for the Phase II area of the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 09/08/2010
Comments: Received additional TEM analytical results for NOA. Additional samples results show non-detect (0.01%) NOA fibers. Fill material from the proposed Doyle Drive borrow source area between Doyle Drive and the Golden Gate Bridge in San Francisco is suitable for fill material. Additionally, DTSC was informed that a second proposed borrow source area, from a quarry in Brisbane, may be used. Additional information and analytical data to be submitted for proposed A/B source area in Brisbane.

containing materials.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 04/21/1989
Comments: The report was prepared prior to DTSC's involvement with the site. The report documented soil sampling and/or inspection of drainage ditches, an underground vault, underground pipes, other areas with potential environmental concerns.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 03/13/1990
Comments: This report was prepared prior to DTSC's involvement with the site. The report is an abbreviated Environmental Site Assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 01/28/2015
Comments: The investigation was conducted prior to DTSC's involvement with the site. The report documented investigation of soils for metals and polynuclear aromatic hydrocarbons (PAHs).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 01/05/1995
Comments: The assessment was conducted prior to DTSC's involvement with the site. The report recommended additional characterization of shallow soils for hydrocarbons, asbestos, creosote-related compounds, and lead.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 12/30/1994
Comments: The report was prepared prior to DTSC's involvement with the site. The report documented environmental conditions related to historical operations of environmental concern including a lumber yard, asbestos factory, and a fuel dispenser. Surface soil samples were collected for lead and asbestos analysis. Subsurface soil samples were collected in the area of the suspected former underground storage tank (UST).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 07/25/1995
Comments: The report was prepared prior to DTSC's involvement with the site. The report documented shallow soil testing results for hydrocarbons, polynuclear aromatic hydrocarbons (PAHs), asbestos and lead.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/26/2015	Source: EPA
Date Data Arrived at EDR: 04/08/2015	Telephone: N/A
Date Made Active in Reports: 06/22/2015	Last EDR Contact: 11/07/2015
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/18/2016
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2015	Source: EPA
Date Data Arrived at EDR: 04/08/2015	Telephone: N/A
Date Made Active in Reports: 06/22/2015	Last EDR Contact: 11/07/2015
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/18/2016
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015	Source: EPA
Date Data Arrived at EDR: 04/08/2015	Telephone: N/A
Date Made Active in Reports: 06/22/2015	Last EDR Contact: 11/07/2015
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/18/2016
	Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/08/2015	Telephone: 703-603-8704
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 10/09/2015
Number of Days to Update: 64	Next Scheduled EDR Contact: 01/18/2016
	Data Release Frequency: Varies

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 11/23/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 03/07/2016
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 11/07/2015	Source: Department of Toxic Substances Control

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

To: Charlotte Berghoffer
Subject: RE: 1901 Webster Street, Oakland CA
Importance: High

Thank you for contacting Alameda County Department of Environmental Health (ACDEH) Certified Unified Program Agency (CUPA) File Review Request:

We show no CUPA Hazmat records for the addresses you requested.

*Some LOP, LUFT/SLIC information may be available online.

<http://www.acgov.org/aceh/lop/ust.htm>
<http://www.acgov.org/MAPS/deh/InspectionResults/?SITE=LOP>
<http://geotracker.waterboards.ca.gov/>

Consider the following in making your request:

1. Make sure you have a Physical Site Address. (i.e. 1234 Burch Lane Oakland, CA 94603)
2. Only having directional information will limit the ability to locate the file you are looking for. (i.e. The location is by or on Burch Lane in Oakland CA)
3. None of the following are needed, and they do not assist in locating your file.
 - APN
 - Parcel Number
 - Longitude and Latitude information

A physical site address is needed to administer a search.

**Please note that ACDEH only has files for sites within its jurisdiction. Many cities within Alameda County are not part of ACDEH CUPA jurisdiction.

In those cases we advise that you try contacting that cities Fire or Planning Departments for any records.

Please view our Jurisdiction List:

<http://www.acgov.org/aceh/documents/CUPA-jurisdictions.pdf>

Our office makes files available by appointment only for review on Thursdays and Fridays from 9:00 AM until 12:00 noon.

If you have any other questions please call 510-567-6809

Best regards,

Alicia Foott

Subject: Record Request

Hello!

We (Nova Consulting) recently reached out to your office to inquire about 1901 and 1919 Webster Street, in Oakland, California. It has come to our attention that the addresses at the location should have included several historical addresses that would include; 1405, 1405 ½, 1409 and 1419 Webster as these prior to the 1930s were actually where our records request is located. We are writing to ask if any archived material is present for the location with your office. Any assistance you can provide is more than appreciated.

To: Charlotte Berghoffer
Subject: RE: PG&E 1919 Webster, Oakland - Nova inspection requirements
Attachments: ePre FWAC-TO15004049 dtd 10.14.15.pdf; SBE Map 135-01-084A.PDF; Oakland Office - Ericson Lumber (2301-04-1054).pdf; Oakland Office - Yuba City Lumber (2301-04-1027).pdf; 1919 Webster - Basement.pdf; 1919 Webster - 1st Floor.pdf; 1919 Webster - 2nd Floor.pdf; 1919 Webster - 3rd Floor.pdf; 1919 Webster - 4th Floor.pdf; 1919 Webster - 5th Floor.pdf; 1919 Webster - 6th Floor.pdf

Here is the initial information that I have at this time (history/transactional details, and floor plans). Also included a Prelim Title report for the site.

The PG&E property at 1919 Webster, Oakland consists of the following parcels (as they were originally acquired):

Parcel 1 (PG&E Land Rights Library Record # 2301-04-1027)

0.264 acres

175' x 75' building, with basement and 6 floors, approximately 70,000 rentable square feet (or 10,000 RSF per floor)
 Building was originally built in 1952, and purchased by PG&E from Yuba River Lumber Company on 10/21/1975
 No parking on the parcel.

Parcel 2 (PG&E Land Rights Library Record # 2301-04-1054)

0.333 acres

145' x 100' parking lot (enclosed by security fence and gate)
 Lot was purchased by PG&E from Ericson Lumber Company on 1/6/1977
 No other improvements on the parcel

Combined, the parcels are noted as SBE # 135-01-084A (or APN # 8-637-8-8), and together consist of 0.597 acres total.

Here is the City's website reference for the lot:

Hi Mark,

I don't believe we have seen signed copies of the attached questionnaires yet. The site visit is tomorrow morning, and ideally we like to have these in place prior to our inspection. Doug Miller suggested to contact you regarding the status of these. Please advise.

Charlotte Berghoffer | charlotte.berghoffer@novaconsulting.com

From: Charlotte Berghoffer**Sent:** Monday, December 14, 2015 4:03 PM**To:** Redford, Mark**Cc:** Michael Speers (michael.speers@cushwake.com) (michael.speers@cushwake.com); Greg Murphy**Subject:** RE: PG&E 1919 Webster, Oakland - Nova inspection requirements

Mark,

I am working on getting our engineers scheduled so that we can select a date/time they would like to be onsite. Do you have an onsite contact that they can reach out to in order to coordinate access? Also, can you tell me who occupies the building? A copy of a current rent roll would be helpful.

For your reference, while onsite our engineers will need to see at least 10% of the tenant spaces, roofs (if flat), at least one attic area, common areas, and mechanical/electrical rooms.

We have some document and information requests that we are obliged to request from our client and the site contact. Please see the list below and let me know if you have any of these documents:

1. Current Rent Roll
2. Detailed Capital Expenditures for the year 2016 (from the Guide: "A listing of any planned capital improvements, the scope of work, and project timeline for such improvements")
3. Any prior PCA or ESA reports and any prior seismic reports
4. Certificates of Occupancy
5. Any energy audits/benchmarking performed for the Property buildings
6. Information and warranties related to maintenance, repair & replacement of the Property's capital items
7. Maintenance reports, contracts and repair receipts for repairs completed and capital items replaced in the past 12 months (including any contracts in place for repair or planned maintenance)
8. Elevator, boiler & safety inspection records and certificates (if applicable)
9. All applicable Operations & Maintenance Plans
10. ATLA/ACSM Land Title Survey

I have also attached the pre-survey questionnaires that need to be completed prior to our site visit if possible or they can be picked up at the time of the site visit. Feel free to let me know if you have any questions or concerns.

Thank you,

Subject: PG&E 1919 Webster, Oakland - ESA PCA SAR Proposal Approval

Greg,

PG&E has reviewed and approved the attached proposal. We would like to re-confirm the completion dates as originally outlined in the proposal. It is still feasible to complete this work and invoice by the end of this year?

In addition, you should be receiving a separate email from PG&E with regards to the Purchase Order process, and how invoicing will work. Please make sure to reference the follow PO information on all billing/invoicing:

- Purchase Order Name: "8169217-CRESS-NovaConsulting-LOPO" Number: 2501313889

Please let me know if you have any additional questions. I look forward to working with your team on this project.

Thank you,

Mark Redford

I INTRODUCTION

This report presents results of a Phase I Environmental Site Assessment (ESA) conducted by Subsurface Consultants, Inc. (SCI) of the property located at 1901-1919 Webster Street in Oakland, California. The location of the property is shown on the Site Plan, Plate 1.

SCI was retained by the Building and Land Services division of Pacific Gas & Electric Company (PG&E) to conduct this Phase I ESA to provide environmental information for the purpose of property management decisions for this specific property. The scope of services for the assessment included:

1. Conducting a site reconnaissance to visually check for indications of on-site contamination and the presence of hazardous materials,
2. Reviewing historical aerial photographs and maps,
3. Reviewing local, state, and federal lists of sites with environmental concerns in the area,
4. Reviewing available local, state, and federal agency records of the property,
5. Reviewing title records for the past 50 years,
6. Interviewing available individuals familiar with the history of the property, and
7. Contacting other pertinent offices, departments, and sources which become apparent from the research.

Sampling and analytical testing of soil and groundwater beneath the property were not within the scope of this study. An asbestos containing materials (ACM) survey of the existing structure was conducted by A.C.C. Environmental Consultants concurrent with this study.

II REGIONAL SETTING

The property lies in the California Coast Range section of the Pacific Border physiographic province, on a broad alluvial plain between the Berkeley Hills to the northeast, and San Francisco Bay to the west and south. Several earthquake faults exist near the property. The most notable of these are the Hayward Fault about 3-1/2 miles to the northeast, and the San Andreas Fault about 15-1/2 miles to the southwest.

According to a geologic map by Radbruch¹, the property is underlain by Merritt Sand, which in turn overlies the Alameda Formation. The Merritt Sand was largely deposited as a beach sand. It consists of fine-grained sand to firm clayey sand with thin layers of sandy clay and clay. The thickness of the Merritt Sand ranges up to about 65 feet. The Alameda Formation consists of sandy, silty clay in the upper part, and sand, clay and gravel in the lower part. The thickness of the Alameda Formation ranges up to about 1,000 feet.

Several groundwater investigations have been performed at other sites in the area. Based on these studies the general direction of groundwater flow is to the northeast toward a Lake Merritt drainage area. Lake Merritt is a tidally influenced body of water connected to the Oakland Inner Harbor Channel. The depth to groundwater locally may be on the order of 10 to 12 feet below the groundsurface.

¹ Radbruch, Dorothy H., Areal and Engineering Geology of the Oakland East Quadrangle California, USGS, 1969.

III SITE RECONNAISSANCE

A site reconnaissance of the property and surrounding area was performed on November 27, 1995. The property occupies the south-east corner of the block bounded by Webster, Franklin, 19th and 20th Streets in downtown Oakland. The northern 1/2 of the subject property is covered by a 6-story masonry building with a basement (Photo 1). The southern 1/2 of the property is a parking lot (Photo 2). Adjacent sites are currently occupied by commercial structures and residential hotels.

The structure is presently used by PG&E as an office building. A customer service area and a security desk are located on the 1st floor. Floors 2 through 6 are partitioned and primarily used as office space. A mechanical room, air conditioning equipment and the passenger elevator room are situated on the roof. A telecommunication center, a backup power battery bank room (photo 5), computer training area and a boiler room are located in the basement. The boiler room contains heating and air conditioning equipment, and air compressors (Photo 3). The boiler room floor is situated about 18 to 24 inches below the adjacent basement areas. There is a floor sump located in the boiler room (Photo 4). Condensate from the heating and air conditioning equipment drains into the sump. In addition, given the elevation of the boiler room floor, it appears that the boiler room extends below the local groundwater level. Groundwater seepage is apparently controlled by a wall and floor subdrainage system which discharges into the sump. Reportedly, a sump pump moves water up to storm sewer lines below Webster Street.

There are two passenger elevators at the site. The elevators are situated adjacent to each other and are cable operated. A hydraulically driven sidewalk elevator is also present. It was reportedly used

to facilitate garbage collection. A floor sump exists in the basement elevator room for the sidewalk elevator (Photo 6).

The parking lot is enclosed by a chain link fence. A mechanical gate restricts use of the lot. An emergency generator is located in the north west corner of the lot (Photo 7). The generator is fueled by diesel which is stored in an adjacent above ground "Convault" storage tank.

IV SITE HISTORY

A. General

SCI researched past uses of the property and neighboring areas by reviewing/contacting the following sources:

1. Historic aerial photographs,
2. Historic Phone Directories,
3. City of Oakland Building, Engineering and Fire Prevention Departments and Regional Water Quality Control Board records,
4. Sanborn and Nirenstein fire insurance maps,
5. Title records for the last 50 years, and
6. Current property owners, property managers, and individuals familiar with the site.

A summary of historical aerial photographs reviewed is presented in Table 1. Copies of fire insurance maps, title records and pertinent historic documents are presented in the Appendix.

B. Site Usage

The earliest available historic information, Thompson & West Historical Atlas of Alameda County, showed that the block bounded by Webster, Franklin, 19th (formerly Durant) and 20th (formerly Delger) Streets was owned by Peter Thompson. The western most finger of Lake Merritt extended onto the northeast corner of the adjacent block to the east. A map dated 1883 of the Oakland Vicinity showed that the northern portion of the block was tidal flats associated with Lake Merritt. The subject property, being the southeast portion of the block, was shown to be subdivided into two parcels measuring 145 feet x 100 feet in plan.

The 1903 and 1911 Sanborn maps show that the subject property was still subdivided into two parcels each occupied by a dwelling. The parcel addresses were shown to be 1405 and 1409 Webster Street. The 1912 Sanborn map indicates that the dwelling occupying the southern parcel was removed and that the street address for the northern dwelling was 1919 Webster.

A Nirenstein map of the block dated 1929 shows that the subject property was subdivided into four parcels each having a different owner. The owners were Frank D. Wilde, C. M. McElminery et al, E. I. Veitch, and Virginia E. Brown. This map does not show structures. However, an aerial photograph dated 1930 indicates that the site was essentially as shown by the 1912 Sanborn map, i.e. a residential structure occupied the northern portion of the subject property and the southern portion was vacant.

For purposes of clarity, the site history from 1930 till present for the northern 1/2 of the site will be discussed separately from the southern 1/2 of the site.

1. **Northern 1/2 of Site**

A 1947 aerial photograph and the 1950 Sanborn map indicate that the northern portion of the subject property was vacant and being used as a parking lot. The 1953 Sanborn map shows that a three story structure occupied by a Blue Cross Plan Home Office was built on the northern portion of the site sometime in 1950. Title documents from December 1954 indicate that Lillian M. Wollitz conveyed the office building parcels (APN 008-637-03,04 and 08) to Hospital Services of California. In 1964 Hospital Services of California applied for a permit to add 3 stories, a smoke tower, stairs and sidewalk elevators to the existing building. The permit indicates that the existing building consisted of three floors and a basement. An occupancy permit for the renovated building was filed with the city in 1966. On October 21, 1975 Blue Cross of California (formally Hospital Services of California) conveyed the northern parcels to Yuba River Lumber Company Inc., which in turn conveyed title to PG&E on the same date.

2. **Southern 1/2 of Site**

Historic phone directories indicate that a service station occupied 1901 Webster Street, the southern 1/2 of the subject property, from about 1933 to 1953. From about 1933 to 1940 the station was operated by Arthur A. Kapler. In 1939, Signal Oil Company obtained a permit to construct a "complete gasoline service station" at the site. The historic phone directories show the station listed as a Signal station from 1941 to 1953. A 1950 fire insurance map indicates that the station configuration was similar to that shown on the plan submitted by Signal in 1939. Aerial photographs confirmed the presence of a station in 1947 and 1950 at the site. An enlargement of the 1950 aerial photograph showing the station is presented as Plate 2.

Title documents indicate that Signal did not own the parcels on which the station was constructed. In 1939 the Bank of America conveyed title to three parcels on the southern portion of the subject site to E. I. Veitch who held title to these parcels until 1952.

The locations of any underground storage tanks (UST) associated either the independent or Signal station were not shown on any map, photograph nor plan reviewed during this study. In addition there were no documents indicating the removal of any UST's associated with these stations. There was a permit obtained in 1952 by Signal to wreck the station building.

Title records indicate that in 1952 the southern parcels were conveyed to the Oakland Parking Company, Inc. A 1953 aerial photograph and Sanborn maps dated 1953 through 1969 indicate that these parcels were used as a parking lot. The parking lot parcels were conveyed to PG&E in 1977.

PG&E records indicate that in 1978, two UST were installed in the parking lot area as part of a fleet servicing facility. One tank had a capacity of 6,000 gallons and was used to store unleaded gasoline. The gasoline tank and associated pump were situated near the center of the parking lot. The second tank had a capacity of 500 gallons and was to be used to store used motor oil. The tank was reportedly installed near the northwest corner of the parking lot. PG&E employee interviews indicate that the tank was never used. The approximate locations of these improvements are shown on the site plan.

In October 1988, PG&E retained Paradiso Construction Company to 1) add a tank level sensor (TLS) to the gasoline tank and 2) remove the waste oil tank. The waste oil tank was rinsed and the rinsate was submitted for volatile organic compounds (EPA 8010 and 8020), total petroleum hydrocarbons as diesel; and total oil and grease analysis. The analysis were all non-detectable. Based on the test results Mr. Ariv Levy, hazardous materials specialist with Alameda County Health Care

Services Agency rendered the tank "non-hazardous" prior to being removed from the site. The tank was removed under the observation of the Oakland Fire Prevention Department. Paradiso obtained two soil samples from beneath the tank. The samples were submitted to Trace Analysis Laboratory, Inc. for petroleum hydrocarbon and volatile organic compound analysis. The samples contained ethylbenzene (0.019 and 0.024 mg/kg), toluene (<0.007 to 0.0083 mg/kg), and xylene (0.092 and 0.11 mg/kg). All other analyses were below laboratory detection limits. A copy of the Paradiso report, dated November 28, 1988, is presented in the Appendix.

The RWQCB and ACHCSA files for the site contained the laboratory report for the soil samples obtained during removal of the waste oil tank, however there is no indication of whether these agencies considered this site closed. Ms. Loretta Altshuler, PG&E Director of Environmental Services indicated that it was her practice to submit the analytical data to the regulatory agencies as soon as they were received so that she could discuss the results prior to submitting a final report. No documents regarding case closure were located in PG&E files maintained by Ms. Altshuler nor ACHCSA, RWQCB and Paradiso Construction Company files. The subject property is still listed on the current RWQCB Leaking Underground Storage Tank list.

The site is also listed on the RWQCB list for a "Heater Fuel" tank release. Ms. Altshuler indicated that the only tank removed in 1988 was the waste oil tank. Further she was not aware that there ever was a heater fuel tank at the site.

The 6,000 gallon UST containing gasoline was removed from the site in November 1994. This tank appears to be the tank which was installed in 1978 by PG&E. The analytical data for soil samples obtained following tank removal indicated that soil had not been impacted near the tank. The Alameda

County Health Care Services Agency, as the local enforcement agency, issued a “no further action” letter regarding this tank on January 26, 1995. A copy of this letter is presented in the Appendix.

C. Historical Usage in the Surrounding Neighborhood

Historic information indicates that the surrounding properties were used for residential purposes from before the turn of the century through the mid 1950’s. Commercial development began in the mid 1920’s and continues through the present.

The 1950 fire insurance map shows service stations occupying several corner properties in the area. The northeast corner of Webster and 19th Streets was a station from the early 1930’s through 1965. In addition, the property at the southeast corner of Franklin and 19th Streets was also a station in 1950.

V ENVIRONMENTAL CASE AND RECORDS REVIEW

SCI reviewed lists of environmental case sites in the area identified by Environmental Risk Information and Imaging Services (ERIIS) from federal, state and local databases. A copy of the ERIIS report is presented in the Appendix. The databases reviewed included:

- California Oil and Gas Well Report
- California Solid Waste Assessment Test Report
- California DTSC CALSITES
- California DTSC Hazardous Waste and Substances List
- California DTSC Information System
- California Solid Waste Information System
- RCRA Notifiers
- Registered Tanks in the State
- RWQCB Leaking Underground Storage Tanks
- RWQCB North Bay Toxics
- US-EPA CERCLIS

US-EPA Emergency Response Notification System (ERNS)
US-EPA National Priority List
US-EPA RCRA Permitted TSD Facilities List
US-EPA Civil Enforcement Docket
US-EPA Open Dumps Report
US-EPA Toxic Release Inventory

In addition, SCI reviewed records from the City of Oakland Building and Department and PG&E. A summary of our findings follows.

A. **On-site concerns**

1. **Waste Oil Tank** The waste oil tank area is still considered an open regulatory case, apparently since soil left in-place following tank removal contained detectable concentrations of ethylbenzene, toluene and xylene. Since the tank was reportedly not used, the source of these compounds is unclear. The compounds are not commonly found in waste oil. This notwithstanding, the concentration left in-place are relatively low and not indicative of a significant source requiring remediation. The ACHCSA should be petitioned to consider the site for closure.

2. **Heater Fuel Tank** The RWQCB should be petitioned to have the site delisted for being associated with a "Heater Fuel " tank removal. There is no indication that such a tank existed at the site.

3. **Service Station Operation** A service station operated on the southern 1/2 of the subject property from about 1933 to 1953. It is unknown where the station tanks were located, whether there were multiple tank locations, or whether the tanks were removed. In addition, it is not known whether automobile repairs were performed at the station service. Records of operation and demolition were not available for review.

4. **Urban Locality** The site is located in an urban environment which has been developed since the late 1800's. Shallow soils at sites with similar development histories in Oakland have been found to contain concentrations of lead above background levels. The source of lead is believed to be associated with the use of lead based paints and/or airborne emissions.

B. **Off-site Concerns**

The most likely means for off-site contamination sources to impact the property is through groundwater transport. For this reason, sites located cross and/or upgradient of the subject property are judged most likely to impact the site. Groundwater flow in the area is assumed to be toward the north or northeast.

Several of the agency-listed sites located upgradient of the subject property are sufficiently remote that they are not likely to have impacted the subject site. However, descriptions of sites that could have the potential to impact the site are summarized below.

1. **Former Richfield Station - 1900 Webster Street (currently PMA Travel Building)**

A former Richfield Station occupied the northeast corner of Webster and 19th Streets between the early 1930's and 1966. Fire insurance maps indicate that the former station had one dispenser island. However, there were no maps reviewed which indicated the location(s) of UST or whether automobile repairs were performed. No records were available for review regarding this site. The site is situated about 60 feet east of the subject property.

2. **1901 Franklin Street (currently Parking Facility for Kaiser Permanente Regional Office)**

In 1985 two UST were removed from the site. Test results indicate that soil was impacted by previous releases. In addition hazardous materials are generated and/or stored on-site. No

other information regarding the site was available for review. This site situated approximately 300 feet west of the subject property.

3. **1935 Webster/1950 Franklin Street (currently Kaiser Permanente Regional Office)**

Information summarized in the ERIIS report indicates that the site has agency listings associated with existing and previous UST's, and possible some storage and use of hazardous materials. Possible UST locations were observed in the sidewalk area in front of 1935 Webster Street during the site reconnaissance. No other information regarding the site was available for review. This site situated adjacent to the north subject property boundary.

4. **1904 Franklin Street (currently a residential hotel and commercial office space)**

Information summarized in the ERIIS report indicates that the site has agency listings associated with some storage and use of hazardous materials. No other information regarding the site was available for review. The site is situated about 300 feet west of the subject property .

5. **1721 Webster Street (currently Douglas Parking Facility)**

Apparently in August 1992 UST were removed from the site. Letters in the RWQCB files indicate that the ACHCSA has requested that soil and groundwater studies be performed at the site to determine the lateral and vertical extent of gasoline contamination. Several monitoring wells were observed in the sidewalk in front of this site during our reconnaissance. No other information regarding the site was available for review. This site is situated about 600 feet south of the subject property.

6. Others

The ERIIS report lists several other sites within 2000 feet of the subject property that may generate or store hazardous materials. In addition, the subject site is situated in an urban setting with a varied development history, beginning in the late 1800's.

VI DISCUSSION AND CONCLUSIONS

This Phase I Environmental Site Assessment has been performed in general conformance with the scope and limitation of ASTM practice E1527. Any exceptions to, or deletions from this practice, are described in this report. This assessment has revealed no incident of environmental non-compliance. The assessment further revealed no evidence of recognized environmental conditions with the potential to impact the property, and its proposed use, except for the following:

- The southern 1/2 of the subject property was occupied by a service station for at least twenty years prior to a time when regulations required formal tank monitoring and removal documentation. Past tank locations are unknown and records regarding station operation and tank removal were not identified.
- The waste oil tank removed in 1988 is not considered closed by the regulatory agencies.
- The site is not considered closed by the regulatory agencies with regard to a "Heater Fuel" tank removed in 1988.
- As with other downtown Oakland sites, there is a risk that shallow soils may contain lead from airborne emissions and/or use of lead based paint. In addition groundwater from off-site sources may have the potential to impact the subject property.

VII LIMITATIONS

This assessment was intended to provide a preliminary means of evaluating the risk of the property containing significant soil and/or groundwater contamination. The conclusions drawn from this assessment are an expression of our professional opinion, and do not constitute a warranty or guaranty, either expressed or implied. Additional investigative work may modify the conclusions presented herein, as additional information is generated.

SCI has performed this environmental assessment in accordance with generally accepted standards of care which exist in northern California at the time of this study. The definition and evaluation of environmental conditions are difficult and inexact. Judgments leading to conclusions and recommendations are generally made with an incomplete knowledge of the subsurface and/or historic conditions applicable to the site. In addition, the conclusions expressed herein reflect site conditions at the time of the assessment. These conditions may change with time, and as such, our conclusions may also change.

Table 1
Aerial Photographs Reviewed
1919 Webster Street
Oakland, California

1930

G4-30-108/109 1:9500

Southern portion of lot is used for automobile parking. Northern portion of lot appears to be occupied by a residential structure.

Properties north and east of site appear to be residential properties. West of site appears to be commercial. Property south of site is apparently used for automobile parking.

3/24/47

AV-11-06-03/04 1:20,000

Southern portion of site is occupied by an apparent gas station.

Northern portion is apparently used for automobile parking.

Property east of site, at northeast corner of Webster and 19th, is apparently occupied by a service station. Property south of site across 19th is occupied by a commercial structure.

Southwest and southeast corners of 20th & Webster also appear to be occupied by service stations. Surrounding area now appears primarily commercial.

4/14/50

AV-28-14-38 1:7200

Large structure has been constructed at northern end of property. Apparent service station still exists. Automobile parking/storage exists west of service station.

Surrounding area appears similar to 3/24/47 photograph. Possible gas station may exist at northwest corner of 19th and Franklin Streets.

8/14/53

AV-337-06-29/30 1:96,000

Apparent service station is gone and the area is used for parking. Apparent service station at northwest corner of 19th and Franklin is gone and area is used for parking.

7/3/59

AV-337-06-29/30 1:96,000

Site appears similar to 8/14/53 photograph.

Building at southwest corner of Webster and 20th configuration has changed.

4/20/66

AV-710-09-25/26 1:36,000

Roof configuration of buildings on site has changed. The southern portion of site is absent of automobiles.

Apparent gas station at northeast corner of 19th & Webster (east of site) is gone.

5/2/69

AV-902-06-20/21 1:12,000

Photograph appears similar to 4/20/66 photograph however automobiles again occupy the southern portion of the property.

4/24/73

AV-1100-06-22/23 1:12,000

Site appears similar to 5/2/69 photograph. Air conditioning equipment visible on roof.

Property east of site at the northeast corner of 19th & Webster is now occupied by a structure. The property at the southwest corner of 20th & Webster is now occupied by automobiles. A tall structure now exists west of the site.

7/19/77

AV-1377-05-23/24 1:12,000

Photograph appears similar to 4/24/73 photograph.

6/22/81

AV-2040-06-21/22 1:54,000

Photograph appears similar to 7/19/77 photograph.

5/15/85

AV-2640-06-21/22 1:12,000

Site appears similar to 6/22/81 photograph.

Property at southeast corner of Webster and 20th is no longer occupied by a possible gas station. It is now occupied by a large building.

3/30/88

AV-3268-6-23/24 1:12,000

Photograph appears similar to 5/15/85 photograph.

6/12/90

AV-3845-8-27/28 1:12,000

Photograph appears similar to 3/30/88 photograph. Site has concrete square patch in center of parking area.

11/29/94

AV-4625-9-25/26 1:12,000

Photograph appears similar to 6/12/90 photograph.

 Date: 10/16/88

Paradiso construction company wants to schedule a tank pull on Saturday October 15, 1988 at 1414 Webster, Oakland.

I informed Mr Paradiso that an inspection on Saturday will run 130^{hrs} per hour for emergency call person, overtime and van. The location of the tank in a heavily used parking lot requires a Saturday pull. The closure plan with a 600^{hr} deposit should arrive shortly. Be sure to discuss this with Ed and obtain his approval. If you have any difficulty in meeting this requirement - see me

Received Your FAX - All
of the Analyses are
below detection limit.
There are no hazardous
materials in tank.

10/20

PG+E - Webster St. - Oakland

Per Ariu Levi - Env. Hlth.

Env. Hlth will not be present for tank removal inspection.

Tank must be removed under bill of lading. Soil sample must be taken at the fill end of tank.

Mail a letter to Ariu Levi verifying conversation

- 1.) Env. Hlth. will not be present for inspection of tank removal because tank has never been used and is not a hazardous waste.
- 2.) A soil sample will ~~not~~ be taken at the fill end of tank and results mailed to the Hlth Dept.
- 3.) Tank will be transported under bill of lading

10/20/88

Oakland Fire Prevention
→ Ernie Robinson ← / Gollette

Fire will make an inspection per Ernie Robinson (They do have an inspector available on Saturdays)

Oakland Fire will not approve the tank removal until they get a verbal approval from The Env. Hlth.

Per Mary at Env. Hlth: Arin called The Fire Dept. regarding the removal. We must have the approved closure plan at the jobsite.

Ernie Robinson will have an inspector available at 1:00 Saturday 10/22/88

Attention: Ariu Levi

Subject: Tank removal located at PG&E 1919 Webster St., Oakland

Dear Ariu:

Per our phone conversation today regarding the above subject location, following is a written clarification of what we had spoke about.

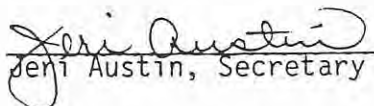

The Alameda County Environmental Health Department will not be present for the tank removal inspection due to the tank being removed as a non hazardous waste. A soil sample will be taken at the fill end of the tank and the results will be submitted to the Health Department for review. The tank will not be hauled or disposed of as a hazardous waste.

The Oakland Fire Prevention will have an inspector present to witness the removal.

If you have any questions regarding this matter, kindly call.

Sincerely,

PARADISO CONSTRUCTION CO.

RE: PG&E, Regional Headquarters
1919 Webster Street
Oakland

Dear Mr. Levi:

Enclosed for your file is a copy of the removal and closure report for one 500 gallon underground storage tank located at PG&E's Regional Headquarters. This tank was removed on October 22, 1988. This underground storage tank was never used and was identified as clean. Nevertheless, PG&E handled the closure as requested by Alameda County, following the underground tank regulations.

Although this tank was removed last year, we have continued to be billed for its operation. We would appreciate if you could contact your billing department so they will remove this tank from the billing schedule.

Should you require any additional clarification concerning this matter, please call me on 874-2422. We appreciate your continued cooperation in this matter.

Sincerely,

A handwritten signature in cursive script that reads 'Loretta Altshuler'.

FINAL JOB REPORT FOR

PACIFIC GAS AND ELECTRIC

1919 WEBSTER STREET

OAKLAND, CA

A preconstruction meeting was held at the job site prior to commencement of work; at that time a job schedule and all necessary documents were presented to the PG&E Engineer.

All required permits were applied for; Paradiso Construction Co. met with the Environmental Health Inspector to discuss and obtain procedures for removing the waste oil tank as a non hazardous material as the tank had never been used. Rinsate samples were analyzed to determine the tank non hazardous.

Trenched for electrical, removed tank slab and tank, disposed of tank to H&H Ship. During excavation of the waste oil tank we discovered portions of pipe on the existing gasoline tank were not glued together also two different pipe materials were used, we notified the PG&E Engineer and submitted a price to correct pipe. Environmental Health permits were obtained to install a secondary pipe system per local codes. Inspections were made by PG&E and the Fire Prevention and approved by the Health Department.

Installed electrical, TLS-250 and overfill protection per plans and manufacturers recommendation. Installed reinforced concrete pad and all necessary patch paving, seal coat and striped lot.

DEPARTMENT OF ENVIRONMENTAL HEALTH
470 - 27th Street, Third Floor
Oakland, CA 94612
Telephone: (415) 874-7237

These plans have been reviewed and found to be acceptable and essentially meet the requirements of State and local health laws. Changes to your plans indicated by this Department are to insure compliance with State and local laws. The project proposed herein is now released for issuance of any required building permits for construction.

A copy of these attached plans must be on the job and available to all architect and craftsmen involved with the construction and installation.

Any changes or alterations of these plans and specifications must be submitted to the Department and to the Fire and Building Department for their review to determine if such changes are in compliance with State and local laws.

It bears prior to the

ALAMEDA COUNTY HEALTH CARE SERVICES AGENCY
DEPARTMENT OF ENVIRONMENTAL HEALTH
HAZARDOUS MATERIALS DIVISION

CERTIFICATE OF DISPOSAL

OCTOBER 26, 1988

H & H Ship Service Company hereby certifies to PARADISO CONSTRUCTION
that:

1. The storage tank(s), size(s) ONE (1) 500 GALS.
removed from the P. G. & E.
facility at 1919 WEBSTER STREET
OAKLAND, CALIFORNIA

were transported to H & H Ship Service Company, 220 China Basin Street,
San Francisco, California 94107.

2. The following tank(s), H & H Job Number: 8974
have been steamed cleaned, cut with approximately 2' X 2' holes,
rendered harmless and disposed of as scrap metal.
3. Disposal site: LEVIN METALS CORPORATION, RICHMOND, CALIFORNIA.
4. The foregoing method of destruction/disposal is suitable for the
materials involved, and fully complies with all applicable regulatory
and permit requirements.
5. Should you require further information, please call (415) 543-4836.

Very Truly Yours,

Cleveland Varrey

Contact Person: Orbie Davis
3909 Park Road, Unit C
Benicia, CA 94510-1199

Projected Closure Date: October 1988

Number of tanks: One
Size of tanks: (1) 500 gallon (Waste oil)

Tank Type: Steel

All vapors will be purged from the tank 1 hour prior to removal and when transported, by using 50 pounds carbon dioxide (dry-ice) per 1,000-gallon tank capacity.

Tank and associated piping will be removed by Paradiso Construction Co., 9220 "G" Street, Oakland, CA 415/562-5511.

Tank and associated piping will be transported as a "Non Hazardous Material" by H&H Ship Service to their facility and scrapped.

Clean excavated material will be stockpiled on-site for use in backfilling the excavation.

Upon the removal of the tank and its associated piping, soil samples will be taken by Paradiso Construction Co. Samples to be analyzed by Trace Analysis Lab, State Certificate #122, Hayward, CA 415/783-6960.

PACIFIC GAS AND ELECTRIC COMPANY

PG&E 1919 WEBSTER STREET • OAKLAND, CALIFORNIA 94612 • (415) 835-8500

June 10, 1987

Mr. Rafat Shahid, Chief
Hazardous Waste Management Division
470 - 27th Street, Room 322
Oakland, CA 94612

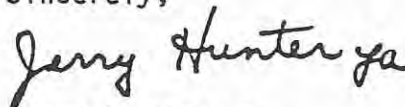

Dear Mr. Shahid:

Attached are the completed underground storage tank permit applications the County of Alameda requested by June 15, 1987. We appreciated the extension granted during your May 21, 1987, conversation with Ms. Loretta Altshuler.

These attached permit applications are for the same identified locations PGandE originally filed with the California Water Resources Control Board in 1984. They include the following locations: Oakport Service Center, Livermore Service Center, Regional Office, and Substation X. Underground storage tank permits were not submitted for our Hayward and Fremont facilities because of the separate city ordinances.

If there are any questions regarding our underground tanks, please contact Ms. Altshuler of my staff at 874-2422. We look forward to your continued cooperation and support for our company's underground tank program.

Sincerely,

Jerry L. Hunter
Regional General Services Manager

Application Number: 22628
BAAQMD GDF Number: 7406
Equipment Location:
Pacific Gas & Electric
1919 Webster St.
Oakland 94612

Gentlemen:

This is your Authority to Construct the following:

Replace Dual Dispensing Hoses with Coaxial Dispensing Hoses

Resulting in:

One(1) 5,000 Gallon Gasoline Tank with 1 Gasoline Dispensing Nozzle

Vapor Recovery Equipment

- Phase I - Coaxial System, pursuant to California Air Resources Board (CARB) Executive Orders G-70-97A.
- Phase II - Emco Wheaton Balance System; pursuant to CARB Executive Order G-70-17AB using Emco Wheaton A-4001 or equivalent CARB certified nozzles, multiplane swivels and high hose retractor.

Please notify us by letter about three days before you are ready to operate so that we may observe your equipment in operation before we issue a Permit to Operate. This authority to construct authorizes operation during the start-up period from the first date of operation until the Permit to Operate is issued, up to a maximum of 60 days. Operation of equipment beyond the start-up period without a Permit to Operate may result in enforcement action.

This Authority to Construct (and the Permit to Operate, when issued) is subject to the following conditions:

**PLEASE NOTE:
THE DYNAMIC BACK PRESSURE TEST MUST BE PERFORMED
AT 20, 60, AND 100 CFH.**

- All vapor recovery system components shall be installed in accordance with CARB Executive Order G-70-52-AL and CARB Executive Order G-70-17AB.

Peter Timmerman
Timmerman Engineering Construction
GDF No. 7406
Application No. 22628
July 15, 1991
Page 2

2. Vapor Recovery nozzles which contain a built-in vapor check valve may not be used in conjunction with any remote vapor check valve.

Vapor Recovery nozzles which do not contain a built-in check valve must be used in conjunction with a remote vapor check valve.
3. Within ten(10) days of start-up, a Leak Test on all new and/or modified nozzle systems shall be performed in accordance with the District's Manual of Procedures Source Test Procedure ST-30.
4. Within ten(10) days of start-up, a Dynamic Back Pressure Test on all new and/or modified nozzle systems shall be performed in accordance with the District's Source Test Procedure ST-27. The test shall be conducted at nitrogen flowrates of 20, 60, and 100 CFH. If remote vapor check valve is used, the test shall be conducted using Alternate Method II and III.
5. Submit all test results on the District reporting form for the applicable test procedure within twenty(20) days of start-up.

In the absence of specific permit conditions to the contrary, the throughputs, fuel and material consumptions capacities, and hours of operation described in your permit application will be considered maximum allowable limits. A new permit will be required before any increase in these parameters, or change in raw material handled, may be made.

Please include your application number with any correspondence with the District. If you have any questions on this matter, please call Eric Stevenson of Permit Services at (415) 749-4695.

Very truly yours,

Milton Feldstein
Air Pollution Control Officer

1:00 arrived onsite
 Comments:
 Bob White of Ramcon operated Gas Tech
 0% LEL + 1% O₂. They showed me a receipt
 for 500 lb dry ice, & the bags. 1:05 Removal
 of 6K UST: PG, no obvious holes. Transport
 under manifest # 93137217 by Trident Truck.
 Rudy & Promani said they pumped ~55 gal
 gasoline fm UST this am. It's drummed
 onsite, but will be properly disposed. Rudy
 said ~200 gal rinseate went to Evergreen
 under manifest. Please include copies
 of all manifests + disposal receipts w/
 tank Removal Report. UST is 8' diam.
 + buried ~3' deep. So ~12' bgs to tank invert
 Bob said that concrete slab is below the
 tank + its backfill. So we took wall
 samples. PW-1 at 10.5' bgs, PW-2 at 10.5'.
 Also under dispenser DI at 2' bgs. Tray
 calculated ~60 yd³ soil stockpiled (pea
 gravel). He took 3 discrete samples.

TANK CLOSURE REPORT
Pacific Gas and Electric Company
Division Office
1919 Webster Street
Oakland, California

Submitted to:

Mr. J. Mark Okamura, P.E.
Pacific Gas and Electric Company
123 Mission Street, Room 2057-H21A
San Francisco, California 94177

Submitted by:

RAMCON Engineering and Environmental Contracting, Inc.
P.O. Box 1026
3751 Commerce Drive
West Sacramento, CA 95691
January 11, 1995

1.0 INTRODUCTION

This summary report describes the removal of one single-wall fiberglass 6,000-gallon gasoline underground storage tank (UST) and documents the results of soil sample collection and analysis. The work was completed by Ramcon Engineering and Environmental Contracting, Inc. of West Sacramento, California for the Pacific Gas and Electric Company (PG&E). The UST was located at the PG&E division office, 1919 Webster Street, Oakland, Alameda County California. This work was completed under PG&E contract #Z16-0221-94 dated November 1, 1994, and in accordance with specification #1497. Our scope of work included the following:

- Securing the necessary permits and notifying attendant agencies, including USA underground utility service,
- Removing remaining tank liquid contents and inerting the tank,
- Removing the tank and small quantities of backfill material,
- Under the direction of Alameda County Personnel, collecting soil samples from the excavation bottom, sidewall and soil stockpile,
- Lawfully transporting the removed UST and purged liquids for recycling or disposal, and,
- Preparation of this tank closure report.

The site vicinity and UST with sample locations are illustrated in Figures 1 and 2, respectively.

2.0 TANK REMOVAL AND SOIL SAMPLING

The work described below was completed on November 18, 1994 in accordance with the County of Alameda Health Care Service Agency, Hazardous Materials Division criteria and pursuant to the City of Oakland Excavation Permit dated November 14, 1994. Permit copies are included in Appendix A. Ramcon soil sampling and handling procedures are included in Appendix B.

2.1 UST Removal

Prior to removal, liquid contents remaining in the tank were removed by vacuum equipment operated by Evergreen Environmental Services (EPA ID# CAD980695761) and transported for recycling to their 6880 Smith Avenue, Newark, California facility (EPA ID# CAD980887418). Flammable vapors were then purged from the tank by the addition of approximately 150 lbs of solid carbon dioxide, or dry ice. The UST internal atmosphere was evaluated with a Gastechtor

Model #1314 combustible gas indicator. Subsequent to purging of the vapors, the UST was removed from the excavation with the concurrence of Alameda County personnel. The tank appeared to be in good condition with no apparent holes or corrosion. Less than 50 cubic yards of material were generated by the excavation. This excavated soil was placed upon and covered by plastic sheeting for temporary stockpile storage.

The tank and associated piping were loaded onto trucks operated by Trident Truck Line, Inc. (EPA ID#CAD982484370), and transported to the Erickson Inc. facility located at 255 Parr Boulevard, Richmond, California for disposal. Copies of the Uniform Hazardous Waste Manifests and the Certificate of Tank Destruction are included in Appendix C. ✓ Photographs documenting UST removal are included in Appendix D. ✓

2.2 Soil Sample Collection

Soil sampling was conducted by a technician from Western Environmental Science and Technology, a State-Certified Analytical Laboratory located in Davis, California. The sample collection was completed under the direction of Alameda County personnel, and in accordance with the California Regional Water Quality Control Board's "Tri-Regional Board Staff Recommendations for Preliminary Evaluation and Investigation of Underground Tank Sites".

Excavation soil samples were collected from the backhoe bucket after a fresh surface area was exposed. The samples were collected in 2-inch diameter by 6-inch long brass tubes driven by a hand held hammer. Care was taken to insure the tubes were completely filled and no head space remained. After collection of the soil samples, the tube ends were quickly covered with teflon lining and capped with plastic end caps. All the samples were labeled and placed in an iced cooler, and transported to the WEST Laboratory accompanied by Chain-of-Custody documentation.

2.2.1 UST Excavation and Dispenser Sampling

Two soil samples, PW-1 and PW-2, were collected in native soils from the sidewall of each end of the UST excavation, at depths of approximately 10 1/2 feet below ground surface. ✓ Dispenser sample D-1 was collected from beneath the former product dispenser approximately 2' below ground surface. ✓ The short run of product piping between the dispenser and the UST was incorporated into the common UST excavation; therefore piping sample collection was not required by the County.

2.2.2 Soil Stockpile Sampling

Three soil samples were collected from shallow depths in the resulting soil stockpile by WEST. These samples were handled with the excavation and dispenser samples, and were transported by WEST under chain-of-custody to their Davis, California facility for chemical analyses.

2.3 Chemical Analyses and Results

The six soil samples were analyzed for total petroleum hydrocarbons as gasoline (TPHG) and the volatile aromatic compounds benzene, toluene, ethyl benzene and xylenes (BTEX) by EPA Methods 8015m/8020. Laboratory analysis indicates that no analytes were found in concentrations exceeding minimum reporting limits. Laboratory analytical results included in Appendix E are summarized below in Table 1.

Nov.
TABLE 1 - ~~October~~ 18, 1994 Soil Sample Analytical Results Summary
PG&E Division Office - 1919 Webster Street, Oakland, California

Sample #	Depth	TPH Gasoline	BTEX
PW-1	10.5'	ND ✓	ND/ND/ND/ND ✓
PW-2	10.5'	ND ✓	ND/ND/ND/ND ✓
D-1	2'	ND ✓	ND/ND/ND/ND ✓
SP-1	Stockpile	ND ✓	ND/ND/ND/ND ✓
SP-2	Stockpile	ND ✓	ND/ND/ND/ND ✓
SP-3	Stockpile	ND ✓	ND/ND/ND/ND ✓

1. ND = Not detected at minimum laboratory reporting limit

2.4 Subsurface Conditions and Excavated Soil Disposition

Soil in the sidewalls of the excavations and native soil excavated during removal of the tanks consisted of light beige to medium brown silty sands and gravels grading to silty clay and sandy silt. It was noted that abundant backfill debris was encountered during the excavation. Groundwater was not encountered in the excavation that extended to a total depth of approximately 12 feet below ground surface. Soils and UST backfill generated by the excavation were stockpiled upon, and covered by plastic sheeting.

3.0 SUMMARY AND CONCLUSIONS

Based on the results of soil sample analytical results and our observations made during excavation and sampling, we submit the following:

1. Fuel constituents have not been released from the UST or attendant piping. ✓
2. Detectable concentrations of fuel constituents have not impacted soils excavated during UST removal and stockpiled on site. ✓
3. Based upon the condition of materials beneath the former UST and piping, no additional assessment or remediation is warranted and the UST excavation should be closed. ✓

BUILDING

FENCE

SIDEWALK

WEBSTER STREET

- NOTES:
- ▷ Samples PW-1 and PW-2 were taken from their respective excavation sidewalls at a depth of 10.5 feet below grade.
 - ▷ Sample D-1 was taken from the dispenser area at a depth of 2 feet below grade.
 - ▷ Samples SP-1, SP-2 and SP-3 were taken from the stockpile after the top 18 to 24 inches of soil was displaced from each sampling point.

RE: PG&E site, 1919 Webster St., Oakland CA 94612

Dear Mr. Okamura,

I am in receipt of the 1/11/95 "Tank Closure Report," prepared by Ramcon. This report documents activities associated with the removal of one 6,000-gallon gasoline underground storage tank (UST) on 11/18/94.

This letter confirms the completion of site investigation and remedial action for the former 6,000-gallon gasoline UST at the above site. With the provision that the information provided to this agency was accurate and representative of existing conditions, **this office has determined that no further action is required at this time.** Further work could be required if conditions change, or a water quality threat is discovered at the site.

If you have any questions, please contact me at 510-567-6700, ext. 6761.

Sincerely,

Jennifer Eberle
Hazardous Materials Specialist

APPENDIX C
INTERVIEW SUMMARIES

INTERVIEW SUMMARIES

Draper and Kramer of California, Inc.

John Nagel
Facility Manager
1919 Webster Street
(510) 874-2437

SCI conducted interviews with Mr. Nagel on November 27, 1995, December 6, 1995, and January 12, 1996. Mr. Nagel was asked to comment on site improvements and any history he may know. Mr. Nagel indicated that he had recently become the subject sites facility manager. He indicated that the structure consists of 6 stories with a basement. Mr. Nagel's research of building history was limited, however he believed that floors 4, 5 and 6 were added sometime in the 1960's. Mr. Nagel explained that currently the upper 5 floors are predominately used as office space, the first floor is a customer service center and a telecommunications hub is located in the basement. He further indicated that the building was seismically upgraded in August 1995.

Mr. Nagel was asked to comment regarding chemical storage areas. He indicated that there are limited quantities of office supplies on each floor. Within the basement he indicated that lead acid batteries are stored for a backup power source. In addition, small quantities of lubricating oils are located near mechanical equipment areas.

Mr. Nagel was asked to comment regarding elevators at the site. He indicated that the passenger elevators are cable powered and the mechanical room is on the roof. A hydraulic sidewalk elevator does exist which facilitated garbage collection from the basement. The elevator is no longer used for this purpose.

Mr. Nagel was asked to comment regarding storage tanks. He indicated that he was aware of an underground tank being removed from the site in 1994. He said that there is still an asphalt patch in the parking lot area where reportedly the tank was located. He was not aware that a tank removal had also occurred in 1988.

SCI attended a site walk conducted by Mr. Nagel. The roof, passenger elevator room, 1st floor, 6th floor, and basement were observed by SCI. While in the basement boiler room, a floor sump was observed. Mr. Nagel indicated that he thought the sump was part of a slab/wall underdrainage system. He has been unable to locate plans showing details of the system. Reportedly, he understands that the water is pumped up to the main sewer line below Webster Street.

Mr. Nagel was asked to comment on whether the facility has experienced any seepage problems. He indicated that he was not aware of any except in the basement wash room and in the boiler room.

**Pacific Gas & Electric Company
Environmental Services**

Rudy Promani
Environmental Services
(510) 874-2656

SCI conducted a phone interview with Mr. Promani on December 1, 1995. Mr. Promani was asked to comment regarding his knowledge of underground storage tanks and hazardous materials at the subject site. He referred SCI to Ms. Loretta Altshuler of PG&E at (510) 874-2422.

Loretta Altshuler
Director, Environmental Services
510 874-2422

SCI conducted an interview with Ms. Altshuler on December 8, 1995 in her office at 1919 Webster Street, Oakland, California. Ms. Altshuler was asked to comment regarding her knowledge of underground storage tanks at the subject site. She indicated that two tanks previously existed within the parking lot area south of the building. The tanks were to be used to service company vehicles. A 6,000 gallon gasoline tank formerly situated near the center of the parking lot, was removed in November 1995. Another tank, reportedly installed to store oil drained from company vehicles was removed in the late 1980's. Based on her recollection, the waste oil tank was not used.

Ms. Altshuler allowed SCI to review her files regarding the oil tank removal. The file indicated that a 500 gallon waste oil tank was removed from the site on October 22, 1988. The file contained a tank removal report prepared by Paradiso Construction which presented the results of analytical testing. A tank rinsate sample and two soil samples were obtained following tank removal. Notes in the file indicate that the tank was rendered non-hazardous on the basis of no detectable analytes in the rinsate sample.

The file also contained various correspondence between the ACHCSA and PG&E regarding the payment of fees for operating the tank. It appears that even after the tank was removed the ACHCSA still tried to collect these fees. There was not written correspondence nor notes in the file regarding the tank being considered closed.

After the review, SCI discussed the file contents with Ms. Altshuler. She was surprised that there was no correspondence regarding tank closure from PG&E nor the ACHCSA, and was further surprised that the site was still considered an open regulatory case. She recollected possibly discussing the test results with the ACHCSA and coming to some

agreement that no further actions would be required. However, she indicated that if this did occur then she would have pursued obtaining written correspondence to that effect. She indicated that it was possible that a file was missing.

During the interview she placed two phone calls to PG&E employees she remembered may have additional information regarding the oil tank removal. She left a message for Mr. Orby Davis, and spoke with Mr. John Villalobos. Mr. Villalobos recalled that the tank was situated adjacent to the south west corner of the office building. He further indicated that he believed that the tank area was considered a closed issue as far as the regulatory agencies were concerned.

John Villalobos
Environmental Services

SCI left a message for Mr. Villalobos on January 11, 1996 following SCI's file review at Paradiso Mechanical and Alameda County Health Care Services Agency.

DEAR ERIIS CUSTOMER:

Thank you for your order for a Chain of Title Search.

ERIIS is pleased to provide this service, at extremely competitive rates and service terms, through its relationship with Milliken & Michaels Credit Services, an industry leader in the title services field.

ERIIS provides a full suite of ASTM compliant property use and site proximity report and imaging services including:

- Regulatory Records Reports
- Digitized Site Maps
- Sanborn (and other) Fire Insurance Maps
- Aerial Photos
- Topo Maps
- Wetlands, Soil, Hydrologic and Geologic Maps

Now, with the Milliken and Michaels 50, 75 and 100 year Chain of Title Reports, ERIIS has truly become your one-stop-shop for all your Phase I property information needs.

Call ERIIS at (800) 989-0402 or (703) 836-0402 or fax us at (703) 836-0468 for the highest quality, lowest prices and fastest service in the environmental regulatory and prior-use report market.

Sincerely,

Ted Fox

RE: 4138 IM: 379

First party further grants to second party the right to maintain, reconstruct, replace, and use an automatic sprinkler system and windows, with all necessary appurtenant fixtures, on the northerly face of the building erected on said real property, together with a right of way, within the areas situate in said City of Oakland, described as follows:

(APN 9-537-8-4)

1. An area of the uniform width of 6 feet lying contiguous to and northerly of the northerly face of said building and extending from the westerly face of the smoke tower westerly 20.5 feet and lying above a plane which is 57 feet above the floor of the street level floor of said building.

2. An area of the uniform width of 6 feet lying contiguous to and northerly of the northerly face of said building and extending from the westerly boundary line of the area hereinbefore described and designated 1 westerly 76 feet and lying above a plane which is 17 feet above the floor of the street level floor of said building.

3. An area of the uniform width of 6 feet lying contiguous to and northerly of the northerly face of said building and extending from the westerly boundary line of the area hereinbefore described and designated 2 westerly approximately 32 feet to the northerly prolongation of the westerly face of said building and lying above a plane which is 57 feet above the floor of the street level floor of said building.

First party shall have the right to use said areas for purposes which will not interfere with second party's full enjoyment of the rights hereby granted. The provisions hereof shall inure to the benefit of and bind the successors and assigns of the respective parties hereto, and shall apply to and run with the land.

ERIIS DISCLAIMER

The information contained in this report has been obtained from publicly available sources and other secondary sources of information produced by entities other than Environmental Risk Information & Imaging Services (ERIIS). Although great care has been taken by ERIIS in compiling and checking the information contained in this report to insure that it is current and accurate, ERIIS disclaims any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence or otherwise, and for any consequences arising therefrom. The data provided hereunder neither purports to be nor constitutes legal or medical advice. It is further understood that ERIIS MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND, INCLUDING, BUT NOT LIMITED TO, THE WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE OF MERCHANTABILITY, NOR ANY SUCH REPRESENTATIONS OR WARRANTIES TO BE IMPLIED WITH RESPECT TO THE DATA FURNISHED, AND ERIIS ASSUMES NO RESPONSIBILITY WITH RESPECT TO CUSTOMER'S, ITS EMPLOYEES', CLIENTS', OR CUSTOMERS' USE THEREOF. ERIIS SHALL NOT BE LIABLE FOR ANY SPECIAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES RESULTING, IN WHOLE OR IN PART, FROM CUSTOMER'S USE OF THE DATA. Liability on the part of the Environmental Risk Information & Imaging Services (ERIIS) is limited to the monetary value paid for this report. The report is valid only for the geographical parameters specified on the cover page of this report, and any alteration or deviation from this description will require a new report. This report does not constitute a legal opinion.

ERIIS REPORT OVERVIEW

The following features are available for an ERIIS report:

- * Database Report
 - * Statistical Profile
 - * Database Records
- * Related Maps
 - * Digital Custom Plotted Map
 - * Sanborn Fire Insurance Map(s)
 - * Topographical Map(s)

Statistical Profile

The statistical profile is an at-a-glance numeric summary of the databases searched for your ERIIS Report.

Database Records

The detailed federal and state database information indicates potential and actual environmental threats within the study radius. These records are sorted by their distance from the study site.

Digital Custom Map

The digital custom map is cross referenced with the database records. The cross-in-circle in the center of the map represents the study site. The red circles represent distances from the study site. The plottable sites in the report are distinguished on the map by symbols of different shape and color.

Historic Fire Insurance Maps

The ERIIS collection of historical Sanborn Fire Insurance Maps covers 14,000 cities and towns. These maps may indicate prior use of the study site. If no maps are available for the study site, a notice to that effect is included. This notice should serve as evidence of due diligence.

Topographical Map

USGS topographical maps show natural and man-made features as well as the shape and elevation of the terrain. The 7.5 minute quad maps are produced at a scale of 1:24,000, or one inch represents 2,000 feet.

Radon Zone Level: 2

Zone 2 has a predicted average indoor screening level ≥ 2 pCi/L and ≤ 4 pCi/L

A Radon Zone should not be used to determine if individual homes need to be tested for radon. The EPA's Office of Radiation and Indoor Air (202/233-9320) recommends that all homes be tested for radon, regardless of geographic location or the zone designation in which the property is located.

A property is defined as a .05 mile buffer around the site's latitude and longitude.

A blank radius count indicates that the database was not searched by this radius per client instructions.

NR in a radius count indicates that the database cannot be reported by this search criteria due to insufficient and/or inaccurate addresses reported by a federal/state agency.

Comprehensive Environmental Response, Compensation, And Liability Information System

The CERCLIS Database Is A Comprehensive Listing Of Known Or Suspected Uncontrolled Or Abandoned Hazardous Waste Sites. These Sites Have Either Been Investigated, Or Are Currently Under Investigation By The Federal EPA For The Release, Or Threatened Release Of Hazardous Substances. Once A Site Is Placed In CERCLIS, It May Be Subjected To Several Levels Of Review And Evaluation And Ultimately Placed On The National Priorities List. As Of February 1995, CERCLIS Sites Designated "No Further Remedial Action Planned" (NFRAP) Have Been Removed From The CERCLIS Database.

NFRAP

Date of Data: 02/28/1995
Release Date: 04/07/1995
US Environmental Protection Agency
Office Of Solid Waste And Emergency Response
703/803-8881

No Further Remedial Action Planned Sites

The No Further Remedial Action Planned Report (NFRAP) Contains Information Pertaining To Sites Which Have Been Removed From The Federal EPA's CERCLIS Database. NFRAP Sites May Be Sites Where, Following An Initial Investigation, No Contamination Was Found, Contamination Was Removed Quickly Without Need For The Site To Be Placed On The NPL, Or The Contamination Was Not Serious Enough To Require Federal Superfund Action Or NPL Consideration.

California Underground Storage Tank Report

The California Underground Storage Tank Report Is A Comprehensive Listing Of All Registered Underground Storage Tanks Located Within The State Of California.

California Cortese List

The California Cortese List, Also Known As The Hazardous Waste And Substances Sites List, Contains Summary Information Pertaining To Contaminated Sites In The State Of California. Contaminated Wells, Leaking Underground Storage Tanks, And Sanitary Landfills Are Among The Facilities Contained On The Cortese List. Information For This Report Was Extracted From The California Facility Inventory Data System (FIDS) List.

California Hazardous Waste Information System

The California Hazardous Waste Information System Contains Summary Information Pertaining To Facilities That Are Required To Report Their Hazardous Waste Activities With The California EPA Under The Resource Conservation And Recovery Act (RCRA).

California Oil and Gas Well Report

The California Oil And Gas Well Data Report Contains Location And Production Information For All Regulated Oil And Gas Wells In The State Of California.

California Solid Waste Assessment Test

The California Solid Waste Assessment Test Report Contains Information Pertaining To Solid Waste Landfills From Which There Is A Known Migration Of Hazardous Waste. Information For This Report Was Extracted From The California Waste Management Unit Data System (WMUDS).

California Waste Discharger System

The California Waste Discharger System (WDS) Report Contains Information Pertaining To All Active And Regulated Facilities That Have Been Issued Waste Discharge Permits For The Release Of Waste Water Or Hazardous Waste Into Either An Injection Well Or Surface Water.

Unplottable Sites

The remaining report pages list additional environmental sites that have been selected based on geographic criteria unique to your study site. They are classified as "unplottable sites" and require further investigation to assess their potential impact on your site.

How to Evaluate Unplottable Sites

Step 1

Streets Within the Radius: the following page is an alphabetical index of all streets that intersect or are contained within the largest study radius (usually one mile).

Step 2

Cross-Reference: use the "Streets Within the Radius" index to cross-reference the unplottable sites. For example, if Maple Avenue and Oak Avenue are listed in the street index, then any unplottable sites with a Maple Avenue or Oak Avenue address should be checked for possible impact on study site.

Questions on ERIIS' Proprietary Geocoding?

We're happy to answer any questions you might have about our data processing and **point-geocoding** (assigning a latitude and longitude to each address). Just give us a call on our toll-free number at (800) 989-0402 and let us know what state you're calling from. Our customer service staff is available from 8 a.m. to 8 p.m. (EST).

The ASTM Standard Practice For Environmental Site Assessments

As stated in the recently published **Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527)** by the American Society for Testing and Materials (ASTM):

"For large databases with numerous facility records (such as RCRA hazardous waste generators and registered underground storage tanks), the records are not practically reviewable unless they can be obtained from the source agency in the smaller geographic area of ZIP code (3.3.24)."

Therefore, this Report contains information available by latitude/longitude or by ZIP code. If your research requires environmental records for which only city or county information is available (i.e., no valid street or ZIP code) ERIIS will include this data at no extra charge.

EPA HAZARDOUS WASTE NUMBERS -- HAZARDOUS WASTE DESCRIPTION

D001 -- A solid waste that exhibits the characteristic of ignitability, but is not listed as a hazardous waste in Subpart D.

D002 -- A solid waste that exhibits the characteristic of corrosivity, but is not listed as a hazardous waste in Subpart D.

D003 -- A solid waste that exhibits the characteristic of reactivity, but is not listed as a hazardous waste in Subpart D.

EPA HAZARDOUS WASTE NUMBERS -- HAZARDOUS WASTE DESCRIPTION

F001 -- The following spent halogenated solvents used in degreasing: Tetrachloroethylene, trichloroethylene, methylene chloride, 1,1,1-trichloroethane, carbon tetrachloride, and chlorinated fluorocarbons; all spent solvent mixtures/blends used in degreasing containing, before use, a total of ten percent or more (by volume) of one or more of the above halogenated solvents or those solvents listed in F002, F004, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.

F002 -- The following spent halogenated solvents: Tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane, chlorobenzene, 1,1,2-trichloroethane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above halogenated solvents or those listed in F001, F004, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.

F003 -- The following spent non-halogenated solvents: Xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, and methanol; all spent solvent mixtures/blends containing, before use, only the above spent non-halogenated solvents; and all spent solvent mixtures/blends containing, before use, one or more of the above non-halogenated solvents, and, a total of ten percent or more (by volume) of one or more of those solvents listed in F001, F002, F004, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.

F004 -- The following spent non-halogenated solvents: Cresols and cresylic acid, and nitrobenzene; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above non-halogenated solvents or those solvents listed in F001, F002, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.

F005 -- The following spent non-halogenated solvents: Toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above non-halogenated solvents or those solvents listed in F001, F002, or F004; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.

F006 -- Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum.

F007 -- Spent cyanide plating bath solutions from electroplating operations.

F008 -- Plating bath residues from the bottom of plating baths from electroplating operations where cyanides are used in the process.

EPA HAZARDOUS WASTE NUMBERS -- HAZARDOUS WASTE DESCRIPTION

F009 -- Spent stripping and cleaning bath solutions from electroplating operations where cyanides are used in the process.

F010 -- Quenching bath residue from oil baths from metal heat treating operations where cyanides are used in the process.

F011 -- Spent cyanide solutions from salt bath pot cleaning from metal heat treating operations.

F012 -- Quenching wastewater treatment sludges from metal heat treating operations where cyanides are used in the process.

F019 -- Wastewater treatment sludges from the chemical conversion coating of aluminum.

F020 -- Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tri- or tetrachlorophenol, or of intermediates used to produce their pesticide derivatives. (This listing does not include wastes from the production of hexachlorophene from highly purified 2,4,5-trichlorophenol.)

F021 -- Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of pentachlorophenol, or of intermediates used to produce its derivatives.

F022 -- Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tetra-, penta-, or hexachlorobenzenes under alkaline conditions.

F023 -- Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production of materials on equipment previously used for the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tri- and tetrachlorophenols. (This listing does not include wastes from equipment used only for the production or use of hexachlorophene from highly purified 2,4,5-trichlorophenol.)

F024 -- Wastes, including but not limited to, distillation residues, heavy ends, tars, and reactor clean-out wastes from the production of chlorinated aliphatic hydrocarbons, having carbon content from one to five, utilizing free radical catalyzed processes. (This listing does not include light ends, spent filters and filter aids, spent dessicants, wastewater, wastewater treatment sludges, spend catalysts, and wastes listed in §261.32.)

F026 -- Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production of materials on equipment previously used for the manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tetra-, penta-, or hexachlorobenzene under alkaline conditions.

F027 -- Discarded unused formulations containing tri-, tetra-, or pentachlorophenol or discarded unused formulations containing compounds derived from these chlorophenols. (This listing does not include formulations containing hexachlorophene synthesized from prepurified 2,4,5-trichlorophenol as the sole component.)

EPA HAZARDOUS WASTE NUMBERS -- HAZARDOUS WASTE DESCRIPTION

F028 -- Residues resulting from the incineration or thermal treatment of soil contaminated with EPA Hazardous Waste Nos. FO20, FO21, FO22, FO23, FO26, and FO27.

K001 -- Bottom sediment sludge from the treatment of wastewaters from wood preserving processes that use creosote and/or pentachlorophenol.

K002 -- Wastewater treatment sludge from the production of chrome yellow and orange pigments.

K003 -- Wastewater treatment sludge from the production of molybdate orange pigments.

K004 -- Wastewater treatment sludge from the production of zinc yellow pigments.

K005 -- Wastewater treatment sludge from the production of chrome green pigments.

K006 -- Wastewater treatment sludge from the production of chrome oxide green pigments (anhydrous and hydrated).

K007 -- Wastewater treatment sludge from the production of iron blue pigments.

K008 -- Oven residue from the production of chrome oxide green pigments.

K009 -- Distillation bottoms from the production of acetaldehyde from ethylene.

K010 -- Distillation side cuts from the production of acetaldehyde from ethylene.

K011 -- Bottom stream from the wastewater stripper in the production of acrylonitrile.

K013 -- Bottom stream from the acetonitrile column in the production of acrylonitrile.

K014 -- Bottoms from the acetonitrile purification column in the production of acrylonitrile.

K015 -- Still bottoms from the distillation of benzyl chloride.

K016 -- Heavy ends or distillation residues from the production of carbon tetrachloride.

K017 -- Heavy ends (still bottoms) from the purification column in the production of epichlorohydrin.

K018 -- Heavy ends from the fractionation column in ethyl chloride production.

K019 -- Heavy ends from the distillation of ethylene dichloride in ethylene dichloride production.

K020 -- Heavy ends from the distillation of vinyl chloride in vinyl chloride monomer production.

K021 -- Aqueous spend antimony catalyst waste from fluoromethane production.

K022 -- Distillation bottom tars from the production of phenol/acetone from cumene.

K023 -- Distillation light ends from the production of phthalic anhydride from naphthalene.

EPA HAZARDOUS WASTE NUMBERS -- HAZARDOUS WASTE DESCRIPTION

- K024 -- Distillation bottoms from the production of phthalic anhydride from naphthalene.
- K025 -- Distillation bottoms from the production of nitrobenzene by the nitration of benzene.
- K026 -- Stripping still tails from the production of methyl ethyl pyridines.
- K027 -- Centrifuge and distillation residues from toluene diisocyanate production.
- K028 -- Spent catalyst from the hydrochlorinator reactor in the production of 1,1,1-trichloroethane.
- K029 -- Wastes from the product steam stripper in the production of 1,1,1-trichloroethane.
- K030 -- Column bottoms or heavy ends from the combined production of trichloroethylene and perchloroethylene.
- K031 -- By-product salts generated in the production of MSMA and cacodylic acid.
- K032 -- Wastewater treatment sludge from the production of chlordane.
- K033 -- Wastewater and scrub water from the chlorination of cyclopentadiene in the production of chlordane.
- K034 -- Filter solids from the filtration of hexachlorocyclopentadiene in the production of chlordane.
- K035 -- Wastewater treatment sludges generated in the production of creosote.
- K036 -- Still bottoms from toluene reclamation distillation in the production of disulfoton.
- K037 -- Wastewater treatment sludges from the production of disulfoton,
- K038 -- Wastewater from the washing and stripping of phorate production.
- K039 -- Filter cake from the filtration of diethylphosphorodithioic acid in the production of phorate.
- K040 -- Wastewater treatment sludge from the production of phorate.
- K041 -- Wastewater treatment sludge from the production of toxaphene.
- K071 -- Brine purification muds from the mercury cell process in chlorine production, where separately prepurified brine is not used.
- K073 -- Chlorinated hydrocarbon waste from the purification step of the diaphragm cell process using graphite anodes in chlorine production.
- K083 -- Distillation bottoms from aniline production.

EPA HAZARDOUS WASTE NUMBERS -- HAZARDOUS WASTE DESCRIPTION

K085 -- Distillation or fractionation column bottoms from the production of chlorobenzenes.

K093 -- Distillation light ends from the production of phthalic anhydride from ortho-xylene.

K095 -- Distillation bottoms from the production of 1,1,1-trichloroethane.

K096 -- Heavy ends from the heavy ends column from the production of 1,1,1-trichloroethane.

K097 -- Vacuum stripper discharge from the chlordane chlorinator in the production of chlordane.

K098 -- Untreated process wastewater from the production of toxaphene.

K103 -- Process residues from aniline extraction from the production of aniline.

K104 -- Combined wastewater streams generated from nitrobenzene/aniline production,

K105 -- Separated aqueous stream from the reactor product washing step in the production of chlorobenzenes.

K106 - Wastewater treatment sludge from the mercury cell process in chlorine production.

K111 - Product washwaters from the production of dinitrotoluene via nitration of toluene.

K112 -- Reaction by-product water from the drying column in the production of toluenediamine via hydrogenation of dinitrotoluene.

K113 -- Condensed liquid light ends from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene.

K114 -- Vicinals from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene.

K115 -- Heavy ends from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene.

K116 -- Organic condensate from the solvent recovery column in the production of toluene diisocyanate via phosgenation of toluenediamine.

K117 -- Wastewater from the reactor vent gas scrubber in the production of ethylene dibromide via bromination of ethene.

K118 -- Spent absorbent solids from purification of ethylene dibromide in the production of ethylene dibromide via bromination of ethene.

K136 -- Still bottoms from the purification of ethylene dibromide in the production of ethylene dibromide via bromination of ethene.

FINDS REFERENCE GUIDE

AIRS (*Aerometric Information Retrieval System*) - The AIRS system contains detailed information pertaining to over 85,000 sites which submit air emissions reports. Developed under the Clean Air Act, this database also maintains data on compliance status and enforcement actions.

CERCLIS (*Comprehensive Environmental Cleanup Liability Information System*) - This system contains information on over 38,000 sites that have been identified as hazardous, or potentially hazardous, and may require cleanup. Information included in this database is provided by both state and federal sources.

CICIS (*Chemicals in Commerce Information System*) - The CICIS database is responsible for the tracking of hazardous chemicals that are listed in the Toxic Substances Control Act (TSCA). Data elements include the manufacturer's name and address, CAS registry number, chemical prefaced name, and any possible synonyms.

CONTR LIST (*Contractor List*) - The CONTR LIST is an inventory of companies that are barred from conducting business with the EPA due to violations of environmental laws or statutes.

CRIMDOCK (*Criminal Docket System*) - The CRIMDOCK is a comprehensive automated system for tracking criminal enforcement actions. CRIMDOCK handles data for all environmental statutes and tracks enforcement actions from the initial stages of investigation through conclusion.

CUS (*Chemical Update System*) - CUS is used to track facilities which manufacture or import specific toxic chemicals in excess of 10,000 pounds per year.

DOCKET - A national system containing all pertinent information regarding a civil or administrative enforcement action taken by the EPA, or state agency, against violators of environmental laws or statutes.

FATES (*FIFRA and TSCA Enforcement System*) - The FATES database contains records of FIFRA and TSCA inspections and enforcement proceedings, registration data for pesticide producing establishments and annual pesticide production reports, state grant-in-aid program and accomplishment data, and program and financial status of TSCA inspection contracts.

FTTS (*FIFRA and TSCA Tracking System*) - The FTTS system contains information regarding Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA) legislation. This database also contains selected data concerning pesticide producers.

FFIS (*Federal Facility Information System*) - FFIS is an index of selected federally owned facilities. It is a monitoring and tracking tool for the Office of Federal Facilities Enforcement. Its main purpose is to monitor pollution abatement programs for federal facilities worldwide.

NCDB (*National Compliance Database*) - The NCDB was used to support the implementation of the Federal Insecticide, Fungicide and, Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system is also used to track the inspections of approximately 17,000 chemical facilities.

PADS (*PCB Activity Database System*) - The PADS database contains information on sites where there is known contamination of polychlorinated biphenols.

PCS (*Permit Compliance System*) - PCS contains information pertaining to over 76,000 facilities that are permitted to discharge waste into bodies of surface water. Also, this system stores selective summaries of information for facilities with National Pollution Discharge Elimination System (NPDES) permits.

RCRA-J (*Resource Conservation Recovery Act - Medical Waste*) - This database is used to track medical waste under the stipulations of the Medical Waste Tracking Act (MWTa) of 1988. Data for this system is obtained from regulated communities through incinerator reports.

RCRIS (*Resource Conservation Recovery Act Information System*) - This report identifies and tracks hazardous waste from the point of generation to the point of disposal. Sites listed in the RCRIS database are those which comply with the regulations stipulated in the Resource Conservation Recovery Act.

SSTS (*Section Seven Tracking System*) - This system contains registration information and production data for facilities which manufacture pesticides.

STATE (*State Regulated Facilities*) - The STATE system is responsible for maintaining records for those facilities that are not required to register with any type of federal agency. The information on this database is quite varied due to the differing state environmental laws and statutes.

TRI (*Toxic Release Inventory*) - All facilities which manufacture, process, or import toxic chemicals in quantities in excess of 25,000 pounds per year are required to register with the EPA under Section 313 of the Superfund Amendments and Reauthorization Act (SARA Title III) of 1986. Data contained in the TRI system covers approximately 20,000 sites and 75,000 chemical releases.

EAST BAY MUNICIPAL UTILITY DISTRICT

2014 ANNUAL WATER QUALITY REPORT

DROUGHT ALERT

Our water supply is critically low for 2015.

The drought continues. Tougher measures and more emergency supplies are needed. Please visit ebmud.com/drought for the latest information on water supplies and tips to conserve.

EBMUD is proud to report that in 2014, your drinking water surpassed every state and federal public health requirement.

YOUR WATER

In the East Bay, 1.3 million customers rely on high-quality EBMUD water. Almost all of EBMUD's water comes from the 577-square mile watershed of the Mokelumne River on the western slope of the Sierra Nevada. This area is mostly national forest, EBMUD-owned lands and other undeveloped lands little affected by human activity.

The Mokelumne watershed collects snowmelt from Alpine, Amador and Calaveras counties, which flows into Pardee Reservoir near the town of Valley Springs. During times of high water demand, system maintenance or for operational needs, EBMUD may draw water from local watersheds. During drought emergencies, EBMUD may use water from the Sacramento River to meet customer needs.

Three large aqueducts carry water 90 miles from Pardee Reservoir to the East Bay. EBMUD's network of reservoirs, pipelines, pumps and water treatment plants are put to work to provide great water quality every day, as reflected in this report.

Dismal precipitation in 2014 meant EBMUD reservoirs did not refill back to normal levels. EBMUD used supplemental water supplies from the Sacramento River for the first time.

In early summer, 23,000 acre-feet of Sacramento River water was diverted into Upper San Leandro and San Pablo reservoirs in the East Bay — about a month's supply. A half-billion dollar investment by ratepayers for dry-year infrastructure combined with solid efforts by customers to conserve precious water helped us weather one of the driest years in California history. Drought conditions have worsened. Visit ebmud.com/drought for the latest news.

HOW WE MANAGE WATER QUALITY

Regardless of source, all water is treated at an EBMUD water treatment plant before it reaches your tap.

EBMUD takes many steps to ensure high water quality including managing watershed lands and reservoirs, treating the water, operating a complex distribution system, maintaining facilities and addressing customer concerns.

In laboratories and in the field, EBMUD samples and tests your water extensively to ensure it is safe to drink. We look for more than 100 substances including microorganisms, pesticides, herbicides, asbestos, lead, copper, petroleum products and by-products of industrial and water treatment processes. More than 20,000 laboratory tests each year ensure the safety of your drinking water.

WHERE YOUR WATER IS TREATED

Most of the year, your drinking water comes from Pardee Reservoir in the Sierra Nevada mountains. Before reaching your tap, most water is treated at a facility in Walnut Creek, Orinda or Lafayette.

Some parts of EBMUD's service area draw water year-round from EBMUD's Sierra Nevada supply. During times of high water

demand, system maintenance or for operational needs, drinking water may come from local watersheds and may be treated at a different facility. Some customers receive water from multiple sources at different times of the year.

WHAT WAS DETECTED AND REPORTED

In 2014, EBMUD treated raw water from multiple sources, including Sacramento River water, and consistently provided high-quality drinking water, surpassing every public health requirement set by the State Water Resources Control Board (State Board) and the U.S. Environmental Protection Agency.

Drinking water requirements were formerly set by the California Department of Public Health. On July 1, 2014, the Drinking Water Program was transferred to the State Board.

The tables on the following pages show the measured amounts of contaminants detected in 2014 or in the most recent year sampling was required. Water is sampled in EBMUD's source waters, at water treatment plants, in the distribution system or at customers' taps.

Although EBMUD tests for more than 100 substances, this report only lists those detected at or above the state or federal level required for reporting. In this case, no news is good news!

Table 1 – Regulated for public health

These contaminants are regulated to protect your health. They have maximum contaminant levels, known as primary MCLs, set by the State Board or U.S. Environmental Protection Agency. These levels are set as close to the established public health goals as is economically and technologically feasible.

Table 2 – Regulated for drinking water aesthetics

These contaminants are regulated to maintain aesthetic standards to maintain the odor, taste and appearance of drinking water. They have maximum contaminant levels, also known as secondary MCLs, set by the State Board.

Table 3 – Unregulated with no established maximum contaminant level

Water agencies are required to report these contaminants if detected, but no maximum contaminant levels have been established by the State Board or U.S. Environmental Protection Agency.

Table 4 – Other parameters of interest to customers

These water measurements, such as pH, hardness and alkalinity, may be of interest to customers.

ARE YOU READY FOR A WATER EMERGENCY?

Natural disasters or other emergencies can temporarily cut off the East Bay's water supply or affect water quality. Be prepared with your own supplies until water is restored. This will be your water supply while emergency management agencies set up temporary water distribution in your community.

You need one to two gallons per day per person for at least 3-7 days. Store extra water for pets and frequent visitors. Store water in clean, airtight, food-grade plastic containers and keep in a dark, cool place.

In case of a water quality emergency, be prepared to disinfect your tap water. In your emergency kit include a heat source, such as a camping stove, plus a clean pot to boil water for two minutes before consuming. If power supplies are disrupted or boiling water is not possible, disinfect your water with 1/4 teaspoon (16 drops) of liquid bleach per gallon of water and then let stand for 30 minutes. Add measuring spoons, a clean medicine dropper and a sealed bottle of regular, unscented liquid bleach to your emergency supplies.

HOW TO READ THE WATER QUALITY TABLE

Find your location on the map on page 2. Note which water treatment plant(s) serve that area.

- Go to the table on page 4 to find the contaminant you are interested in.
- Column two notes the unit of measurement.
- Column three lists the most recent year the contaminant was tested.
- Column four lists the state or federal goal. At that amount or lower, there is no known or expected risk to health from its presence in drinking water. Not all listed contaminants have goals set by the California or US Environmental Protection Agency.
- Column five notes the highest amount the State Board or U.S. Environmental Protection Agency allows. This amount is usually not as low as the public health goal in column four.
- Column six lists the average amount detected across the EBMUD service area or at designated locations.
- Find the column that corresponds to the water treatment plant(s) that serve you. This is the amount of the contaminant detected in your area's water. All reported contaminants were detected at amounts lower than the highest amount allowed (column 5) by the State Board and U.S. Environmental Protection Agency.
- The last column lists how the contaminant typically gets into your drinking water.

EBMUD 2014 ANNUAL WATER QUALITY REPORT

In 2014, your drinking water was consistently the highest quality, surpassing every public health requirement set by the State Water Resources Control Board (State Board), Division of Drinking Water and the U.S. Environmental Protection Agency.

KEY TERMS

- AL** Regulatory action level. The concentration which, if exceeded, triggers treatment or other requirements that a water system must follow.
- DBP** Disinfection by-products. These are formed when chlorine and/or ozone reacts with natural constituents in water. Trihalomethanes (THMs), haloacetic acids (HAAs), chlorate, and bromate are disinfection by-products.
- MCL** Maximum contaminant level. The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs or MCLGs as is economically and technologically feasible. Secondary MCLs address odor, taste and appearance of drinking water.
- MCLG** Maximum contaminant level goal. The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. Environmental Protection Agency.
- MRDL** Maximum residual disinfectant level. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial pathogens.
- MRDLG** Maximum residual disinfectant level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial pathogens.
- Notification level** A health-based advisory level established by the State Board for chemicals in drinking water that lack MCLs.
- Primary drinking water standard** These standards regulate contaminants that affect health by setting MCLs and MRDLs along with their monitoring, reporting and water treatment requirements.
- PHG** Public health goal. The level of a contaminant in drinking water below which there is no known or expected risk to health. Public health goals are set by the California Environmental Protection Agency.
- TOC** Total organic carbon. A measure of organic compounds that are present in the water.
- Turbidity** A measure of the cloudiness of water. Turbidity is monitored because it is a good indication of the effectiveness of our filtration systems.
- TT** Treatment technique. A required process intended to reduce the level of a contaminant in drinking water.
- 90th percentile** A measure that indicates 90 percent of the samples had a lower result.

ABBREVIATIONS

- gpg** grains per gallon
- NA** not applicable
- NL** notification level
- NTU** nephelometric turbidity unit, a measure of the cloudiness of water.
- pCi/L** picocuries per liter, a measure of radioactivity.
- ppm** parts per million. One ppm is like 32 seconds in one year.
- ppb** parts per billion. One ppb is like 3 seconds in 100 years.
- ppt** parts per trillion. One ppt is like 3 seconds in 100,000 years.
- TON** threshold odor number, a measure of odor in water.
- µS/cm** microsiemens per centimeter, a measure of electrical conductance.

NOTES

- a)** Chloramine residuals in the distribution system are measured as an equivalent quantity of chlorine. When the chloramine residual cannot be detected, the sample is further analyzed to ensure that microbiological water quality is in compliance with the regulations. **b)** Highest running annual average. **c)** EBMUD is required by state law to add fluoride to drinking water to help prevent dental decay in consumers. Current regulations require that fluoride levels in the treated water be maintained between 0.7 to 1.4 ppm with an optimum dose of 0.8 ppm. Our monitoring showed that the fluoride levels in the treated water distribution system ranged from 0.05 to 1.0 ppm with an average of 0.8 ppm. Information about fluoridation, oral health and current issues is available at www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Fluoridation.shtml. **d)** See page 7 for additional information about lead and chromium in drinking water. **e)** Highest locational running annual average. **f)** Sampling locations are chosen to represent worst-case scenarios. **g)** All hexavalent chromium samples are in compliance with the new California MCL of 10 ppb. **h)** Sobrante water treatment plant was not in service when *Cryptosporidium* was detected.

* Grains per gallon (gpg) is a measure of water hardness. Knowing the amount can help improve the function of dishwashers, cooling equipment and other industrial processes. Refer to your appliance manufacturer's instruction manual for the optimum grains per gallon level.

WATER QUALITY REGULATIONS

In order to ensure that tap water is safe to drink, the U.S. Environmental Protection Agency and the State Water Resources Control Board (State Board) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. State Board regulations also establish limits for contaminants in bottled water.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

Microbial contaminants, such as viruses, bacteria and protozoa, such as *Cryptosporidium*, that may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.

Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.

Synthetic organic contaminants, such as pesticides and herbicides that may come from a variety of sources, including agriculture, urban storm water and residential uses.

Volatile organic chemical contaminants from industrial processes and petroleum production, and from gas stations, urban storm water runoff, agricultural application and septic systems.

Radioactive contaminants that can be naturally occurring or be the result of oil and gas production and mining activities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants

and potential health effects is available from the U.S. Environmental Protection Agency's Safe Drinking Water Hotline at 800-426-4791 or online at www.epa.gov/safewater. Contact your healthcare provider or visit the Centers for Disease Control and Prevention website for guidelines on using tap water for health or medical purposes.

Cryptosporidium

Cryptosporidium is a microbial contaminant found in surface water throughout the United States. Although filtration is highly effective in removing *Cryptosporidium*, the most commonly used filtration methods cannot guarantee 100 percent removal.

Our monitoring indicates the presence of these organisms in one of our source waters. Current test methods cannot determine if the organisms are dead or are capable of causing disease. Ingestion of *Cryptosporidium* may cause abdominal infection with symptoms including nausea, diarrhea and abdominal cramps.

Cryptosporidium must be ingested to cause disease, and it may be spread through means other than drinking water. Most healthy individuals can overcome the disease within a few weeks. However, immuno-compromised people, infants and small children, and the elderly are at greater risk of developing life-threatening illness. We encourage these individuals to consult their physician regarding appropriate precautions to take to avoid infection.

Populations with low resistance

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, and some elderly and some infants can be particularly at risk to infections.

These people should seek advice about drinking water from their health care providers. USEPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the USEPA Safe Drinking Water Hotline at 800-426-4791 or www.epa.gov/safewater.

REPORT A WATER QUALITY CONCERN

Do you have a question or concern about your water quality? If so call 866-403-2683. EBMUD inspectors respond to calls within one day regarding water which appears dirty, colored, or has foreign particles or unusual taste or odor.

Lead in drinking water

If present, elevated levels of lead can cause serious health problems. Pregnant women, infants and young children are typically more vulnerable to lead in drinking water than the general population.

Lead in drinking water is primarily from materials and components associated with lead service lines and home plumbing. EBMUD has replaced all lead water lines in its service area, but you may have lead in your home plumbing. It is possible that lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing.

If you are concerned about elevated lead levels in your home's water, you may wish to have your water tested. If your water has been sitting for several hours, you can minimize the potential for lead exposure by running your faucet for 30 seconds to 2 minutes before using water for drinking or cooking. Capture and reuse this water for other uses such as watering ornamental plants.

Information on lead in drinking water, testing methods and steps you can take to minimize exposure is available from the U.S. Environmental Protection Agency Safe Drinking Water Hotline at 800-426-4791 or online at www.epa.gov/safewater/lead.

Fluoride and infant formula

Water fluoridation is a widely accepted practice and mandated by state law. It is proven to be safe and effective for preventing and controlling tooth decay. According to the American Dental Association and Centers for Disease Control and Prevention (CDC), it is safe to use optimally fluoridated water for preparing infant formula. If an infant is primarily fed infant formula prepared with fluoridated water, there may be an increased chance for mild enamel fluorosis, but enamel fluorosis does not affect the health of the infant or the health of the infant's teeth. To lessen this chance, deionized, purified, distilled or demineralized bottled water can be used some of the time to prepare infant formula.

If you have additional questions about fluoride, contact your health provider. Additional information can be found at the State Board www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Fluoridation.shtml or the CDC www.cdc.gov/fluoridation websites.

Chromium

Chromium is found naturally in the environment, in two forms: trivalent and hexavalent chromium. Both forms of chromium find their way into bodies of water through mineral deposits. Hexavalent chromium is also a byproduct of industrial manufacturing. Trivalent chromium is an essential human dietary element. When ingested, hexavalent chromium is a suspected carcinogen.

Currently, trivalent and hexavalent chromium are regulated together by the federal and state agencies. As of July 1, 2014, there is also a California maximum contaminant level (MCL) for hexavalent chromium of 10 parts per billion. EBMUD monitors for total chromium at our five treatment plants. Beginning in October 2013, EBMUD began collecting samples for hexavalent chromium. EBMUD is in compliance with the California MCL and will continue to meet all regulatory requirements.

APPENDIX G

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

ELIZABETH FRENCH, G.I.T.

PROJECT MANAGER

PROFESSIONAL EDUCATION

B.S. Geology, California State University, Sacramento, CA, 2008

CERTIFICATIONS/QUALIFICATIONS

- Certified Geologist-in-Training – California (#522)
- Environmental Professional (EP) in accordance with ASTM E1527-13
- OSHA 40 Hour Hazardous Waste Operations Certification (29CFR 1910.120)
- AHERA Certified Asbestos Building Inspector (BI819-15)
- Termite and Wood Destroying Pests Training, Nova Training Center 3
- Phase I Environmental Assessment Experience, 8+ years
- Phase II Subsurface Investigation Experience, 7+ years
- Phase III Remediation Investigation Experience, 8+ years

SELECTED EXPERIENCE

Ms. French has eight years of experience conducting and managing environmental investigations and property assessments for private, commercial, and industrial business clients including: property owners, banks, agency lenders and real estate development companies. She has managed hundreds of projects that have been overseen by state and local government agencies (i.e. California Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), and various county oversight programs). Ms. French has conducted and managed numerous Phase I Environmental Site Assessments (ESAs), Phase II Subsurface Investigations, Phase III Remediation Investigations, Asbestos Operations and Maintenance (O&M) plans, Storm Water Pollution Prevention plans (SWPPs), Spill Prevention Control and Countermeasure plans (SPCCs), and Job Safety Analysis plans.

PHASE I ESAs

In addition to project management, Ms. French has conducted hundreds of Phase I ESAs throughout the western United States including: multi-family residential, retail, office, commercial, industrial, hospitality, vineyards, other agricultural land, and vacant lands. Ms. French has provided environmental site assessments in accordance with ASTM E1527 standards, the USEPA All Appropriate Inquiry rules, Fannie Mae Standards, Freddie Mac Guidelines, HUD guidelines, and other client specific scopes of work.

PHASE II SUBSURFACE INVESTIGATIONS

Ms. French has extensive experience conducting and managing Phase II's which have included investigations of: hazardous materials storage, industrial activities, above ground and underground storage tanks, polychlorinated biphenyls (PCBs), tetrachloroethylene (PCE), petroleum hydrocarbons, indoor air analysis, soil vapor sampling, soil sampling, groundwater sampling, mold, and radon.

PHASE III REMEDIATION

Ms. French has worked on several former industrial and federal Superfund sites involved in the active remediation of soil, groundwater and soil vapor. Properties of note include: The Sacramento Railyards, Curtis Park Railyards, McClellan Airforce Base, and the McLaughlin Gold Mine. Ms. French has conducted soil and groundwater sampling, groundwater monitoring and remediation, soil vapor sampling, soil vapor extraction (SVE) system operations and maintenance, and dust and asbestos monitoring.

CONRAD VAN DYKE PROJECT MANAGER

PROFESSIONAL EDUCATION

B.S. Environmental Sciences, Michigan State University, 2004

CERTIFICATIONS/QUALIFICATIONS

- Environmental Professional (EP) in accordance with ASTM E1527-13
- AHERA Certified Asbestos Building Inspector
- OSHA 40 Hour Hazardous Waste Operations Certification (29CFR 1910.120)

SELECTED EXPERIENCE

Mr. Van Dyke has more than five (5) years of experience in the environmental due diligence field and has performed and managed hundreds of Phase I ESA projects during his career, including but not limited to management of multi-site portfolios for a diverse client base, in accordance with ASTM E1527, the USEPA All Appropriate Inquiry rules, Fannie Mae Delegated Underwriting Standards, Freddie Mac guidelines, HUD guidelines, NEPA, and other client specific scopes of work.

Mr. Van Dyke has experience providing services in asbestos, lead paint and mold practices and has performed asbestos bulk sampling on a variety of structures (residential, commercial, industrial sites and schools) for renovation and demolition purposes. In addition to asbestos sampling, he has conducted asbestos abatement oversight in large scale (1 million + sq ft.) abatement projects. Mr. Van Dyke has also served terms of employment with two State agencies in an environmental regulatory role as well as managed industrial source's air compliance testing and consulting privately.

PROFESSIONAL ORGANIZATIONS

NATIONAL AWARDS

- Ronald E. McNair Scholar for Environmental Research (recipient twice)

PUBLIC SERVICE

- City of Fort Collins, Colorado Air Quality Advisory Board
-

CHARLOTTE BERGHOFFER, R.G. SENIOR PROJECT MANAGER

PROFESSIONAL EDUCATION

B.S. Geology, Portland State University, Portland, OR, 2002

CERTIFICATIONS/QUALIFICATIONS

- AHERA Certified Asbestos Building Inspector, Certification No. 139219
- AHERA Certified Asbestos Management Planner, Certificate No. MP-15-7815A
- NIOSH 582, Phase Contrast Microscopy (PCM) Certified
- Registered Geologist (Oregon), License No. G2315
- OSHA 40 Hour Hazardous Waste Operations Certification (29CFR 1910.120)
- Termite and Wood Destroying Pests Training
- National Radon Proficiency Program (NRPP) Residential Radon Measurement Provider, License No. 107664 RT

SELECTED EXPERIENCE

Ms. Berghoffer has over 13 years of experience in the environmental due diligence field and has performed and managed hundreds of Phase I ESA projects during her career, including, but not limited to management of multi-site portfolios for a multitude of clients, in accordance with ASTM E1527, the USEPA All Appropriate Inquiry rules, Fannie Mae Delegated Underwriting Standards, Freddie Mac guidelines, HUD guidelines, and other client specific scopes of work.

Ms. Berghoffer has performed and managed numerous subsurface site investigation projects on industrial, dry cleaners and gasoline/service stations. She has experience providing services in asbestos, lead paint and mold practices and has performed asbestos bulk sampling on a variety of structures (residential, commercial, industrial and schools) for renovation and demolition purposes. In addition she has conducted asbestos abatement oversight, assisted in the development of site-specific asbestos management plans and specifications, conducted lead paint surveys, conducted water intrusion surveys, and conducted bulk, surface, and air sampling for fungi (molds). Ms. Berghoffer has also conducted and assisted in the preparation of spill prevention, control, and countermeasure plans (SPCC Plans); stormwater pollution prevention plans (SWPP); and compliance reports for a variety of industrial clients.

PROFESSIONAL ORGANIZATIONS

- Women in Environment Portland, Oregon Chapter
 - Commercial Real Estate Women (CREW)
-

GREGORY F. MURPHY
VICE PRESIDENT
CAPITAL MARKETS GROUP

EDUCATION

Bachelor of Arts, Environmental Studies, University of California, Santa Barbara, 1989

CERTIFICATIONS/QUALIFICATIONS

- California Registered Environmental Assessor #06614
- Leadership in Energy and Environmental Design (LEED), Accredited Professional, October, 2008
- Environmental Professional (per ASTM 1527-05 definition)

SELECTED EXPERIENCE

Mr. Murphy is a Vice President in Nova's San Francisco, CA office. As part of the Capital Markets Group, he offers 17 years experience in the commercial real estate assessment field. Mr. Murphy has managed more than 7,000 due diligence projects during his career, including phase I environmental site assessments, property condition assessments, phase II soil and groundwater investigations, seismic studies, and asbestos studies. His primary responsibilities at Nova include providing all aspects of project management and coordination of these services for national clients. Mr. Murphy provides senior technical review of phase I and phase II environmental site assessments, and his work involves extensive client contact and project management nationwide.

The clients for whom Mr. Murphy has worked include Freddie Mac, Fannie Mae and HUD lenders, CMBS and balance sheet lenders, insurance companies, mortgage bankers, attorneys, and equity participants in real estate acquisition. Mr. Murphy understands the often strict expectations of his clients and their projects, and he has a comprehensive understanding of both physical and environmental due diligence needs within the capital markets. Additionally, Mr. Murphy has served as a liaison between clients and regulatory agencies on matters related to environmental compliance and required investigative efforts.

Mr. Murphy also sits on the ASTM (WK24707) Working Group currently developing the Standard Practice for *Building Energy Performance Assessment and Disclosure for a Building Involved in a Real Estate Transaction*.

APPENDIX H

Additional Transportation Analysis

Memorandum

Date: July 10, 2023
To: Crescentia Brown, ESA
From: Sam Tabibnia, Fehr & Peers
Subject: 1919 Webster Street – Transportation Impact Review (Non-CEQA)

OK22-0476

This memorandum discusses the non-CEQA transportation assessment that Fehr & Peers completed for the development Project located at 1919 Webster Street in Oakland. The Project proposes office and retail space at the northwest corner of the 19th Street/Webster Street intersection in Downtown Oakland. The information provided in this memorandum is based on the City of Oakland's Transportation Impact Review Guidelines (TIRG) published in April 2017. Sections in this memorandum include:

- Project Description (page 1)
- Trip Generation, Trip Distribution, and Study Intersection Selection (page 2)
- Access and Circulation Review (page 7)
- Collision Analysis (page 19)
- Conclusions and Summary of Recommendations (page 22)

This document also provides recommendations to improve multi-modal access, circulation, and safety which are summarized at the end of the memorandum.

Project Description

The Project is located at the northwest corner of the 19th Street/Webster Street intersection in Downtown Oakland. The Project site is currently occupied by a surface parking lot and vacant building which will be demolished by the Project. Two design schemes are under consideration which are described below:

- **Scheme 1** would consist of a 17-level building providing about 408,000 square feet of office space and 5,000 square feet of ground level commercial space. Scheme 1 would include a basement parking garage with approximately 37 parking spaces (which may be increased to up to 75 parking spaces with parking lifts) accessed through a right-in/right-out only driveway on Webster Street. Scheme 1 would also provide a bike room accommodating long-term bicycle parking for at least 42 bicycles on the ground level of the building and provide short-term bicycle parking for 22 bicycles in the form of bicycle racks along on the sidewalks along the Project frontage on Webster and 19th Streets.
- **Alternative Scheme 2** would consist of a 24-level building providing about 521,000 square feet of office space and 6,000 square feet of ground level commercial space. Alternative Scheme 2 would include approximately 158 parking spaces (which may be increased to up to 221 parking spaces with parking lifts) consisting of a 32-space basement parking garage accessed through a right-in/right-out only driveway on Webster Street and 126 parking spaces in Levels 2 through 4 accessed through a right-in/right-out only driveway on 19th Street. Alternative Scheme 2 would also provide a bike room accommodating long-term bicycle parking for at least 82 bicycles on the ground level of the building and provide short-term bicycle parking for eight bicycles in the form of bicycle racks along on the sidewalks along the Project frontage on Webster and 19th Streets.

Trip Generation, Trip Distribution, and Study Intersection Selection

Trip generation for automobiles, other travel modes, as well as the trip distribution and the selection of the study intersections under both Project Schemes is discussed below.

Automobile Trip Generation

Trip generation is the process of estimating the number of vehicles that would likely access the Project on a typical weekday. **Tables 1** and **2** present the trip generation for Scheme 1 and Alternative Scheme 2, respectively. Trip generation data published by the Institute of Transportation Engineers (ITE) in the *Trip Generation Manual* (11th Edition) was used as a starting point to estimate the vehicle trip generation.

Table 1: Scheme 1 (17-Story Project) Automobile Trip Generation

Land Use	ITE Code	Size ¹	Daily Trips	Weekday AM Peak Hour			Weekday PM Peak Hour		
				In	Out	Total	In	Out	Total
Office ²	710	408.0 KSF	3,940	494	67	561	91	442	533
Retail ³	822	5.0 KSF	270	7	5	12	16	17	33
<i>Subtotal</i>			<i>4,210</i>	<i>501</i>	<i>72</i>	<i>573</i>	<i>107</i>	<i>459</i>	<i>566</i>
Non-Auto Adjustment ⁴			-1,970	-235	-34	-269	-50	-215	-265
Net New Automobile Trips			2,240	266	38	304	57	244	301

Notes:

1. KSF = 1,000 square feet.
 2. ITE Trip Generation (11th Edition) land use category 710 (General Office Building in General Urban/Suburban Setting):
 Daily: $\text{Ln}(T) = 0.87 \cdot \text{Ln}(X) + 3.05$
 AM Peak Hour: $\text{Ln}(T) = 0.86 \cdot \text{Ln}(X) + 1.16$ (88% in, 12% out)
 PM Peak Hour: $\text{Ln}(T) = 0.83 \cdot \text{Ln}(X) + 1.29$ (17% in, 83% out)
 3. ITE Trip Generation (11th Edition) land use category 822 (Strip Mall Plaza (<40K) in General Urban/Suburban Setting):
 Daily: $T = 54.45(X)$
 AM Peak Hour: $T = 2.36(X)$ (60% in, 40% out)
 PM Peak Hour: $T = 6.59(X)$ (50% in, 50% out)
 4. Reduction of 46.9% assumed, based on City of Oakland TIRG using Census data for urban environments within 0.5 miles of a BART Station.
- Source: Fehr & Peers, 2022.

Table 2: Alternative Scheme 2 (24-Story Project) Automobile Trip Generation

Land Use	ITE Code	Size ¹	Daily Trips	Weekday AM Peak Hour			Weekday PM Peak Hour		
				In	Out	Total	In	Out	Total
Office ²	710	521.0 KSF	4,880	609	83	692	111	542	653
Retail ³	822	6.0 KSF	330	9	5	14	19	21	40
<i>Subtotal</i>			<i>5,210</i>	<i>618</i>	<i>88</i>	<i>706</i>	<i>130</i>	<i>563</i>	<i>693</i>
Non-Auto Adjustment ⁴			-2,440	-290	-41	-331	-61	-264	-325
Net New Automobile Trips			2,770	328	47	375	69	299	368

Notes:

1. KSF = 1,000 square feet.
 2. ITE Trip Generation (11th Edition) land use category 710 (General Office Building in General Urban/Suburban Setting):
 Daily: $\text{Ln}(T) = 0.87 \cdot \text{Ln}(X) + 3.05$
 AM Peak Hour: $\text{Ln}(T) = 0.86 \cdot \text{Ln}(X) + 1.16$ (88% in, 12% out)
 PM Peak Hour: $\text{Ln}(T) = 0.83 \cdot \text{Ln}(X) + 1.29$ (17% in, 83% out)
 3. ITE Trip Generation (11th Edition) land use category 822 (Strip Mall Plaza (<40K) in General Urban/Suburban Setting):
 Daily: $T = 54.45(X)$
 AM Peak Hour: $T = 2.36(X)$ (60% in, 40% out)
 PM Peak Hour: $T = 6.59(X)$ (50% in, 50% out)
 4. Reduction of 46.9% assumed, based on City of Oakland TIRG using Census data for urban environments within 0.5 miles of a BART Station.
- Source: Fehr & Peers, 2022.

The ITE data is based on data collected at mostly single-use suburban sites where the automobile is often the only travel mode. However, the Project site is in a dense mixed-use urban environment where many trips are walk, bike, or transit trips. Since the Project is about 0.2 miles from the 19th Street BART Station, this analysis reduces the ITE based trip generation by about 47 percent to account for the non-automobile trips. This reduction is consistent with City of Oakland TIRG and based on Census commute data for Alameda County from the 2014 5-Year Estimates of the American Community Survey (ACS), which shows that the non-automobile mode share for areas within than 0.5 miles from a BART Station is about 47 percent.

Since the building at the site is currently vacant, the trip generation does not account for the trips generated by the existing building that would be demolished by the Project. As shown in Table 1, Scheme 1 is estimated to generate about 2,240 daily, 304 AM peak hour, and 301 PM peak hour net new trips. As shown in Table 2, Alternative Scheme 2 is estimated to generate about 2,770 daily, 375 AM peak hour, and 368 PM peak hour net new trips.

The trip generation based on the TIRG process may be overestimating the actual automobile trips generated by the Project. The TIRG process estimates about 304 AM peak hour and 301 peak hour trips for Scheme 1 and about 375 AM peak hour and 368 PM peak hour trips for Alternative Scheme 2, while the Project would only provide about 37 on-site parking spaces in Scheme 1 (which may be increased to up to 75 parking spaces with parking lifts) and about 158 parking spaces in Alternative Scheme 2 (which may be increased to up to 221 parking spaces with parking lifts). The peak hour vehicle trips generated by the Project's parking supply will be much less than the estimated peak hour Project trip generation using the TIRG procedures. Thus, the Project trip generation presented in Tables 1 and 2 may be overestimating the automobile trips that would be generated by the Project. However, there are several other parking facilities in the vicinity of the Project that are open to the public and can be used by the Project employees and visitors if the Project parking facility is at capacity. Although many of these public parking facilities operated at or near capacity on most weekdays before the start of the pandemic, this analysis assumes that parking would be available to Project employees and visitors who choose to drive. Therefore, this analysis uses the TIRG-based trip generation to present a conservative estimate of the automobile trips generated by the Project.

Non-Vehicular Trip Generation

Consistent with the City of Oakland TIRG, **Tables 3** and **4** present the trip generation estimates for all travel modes for Scheme 1 and Alternative Scheme 2, respectively.

Table 3: Scheme 1 (17-Story Project) Trip Generation by Travel Mode

Mode	Mode Share Adjustment Factors ¹	Daily	AM Peak Hour	PM Peak Hour
Automobile	0.531	2,240	304	301
Transit	0.297	1,250	170	168
Bike	0.051	220	29	29
Walk	0.105	440	60	60
Total Net Trips		4,150	563	558

Notes:

1. Based on *City of Oakland TIRG*, for an urban environment within 0.5 miles of a BART station. The mode adjustment factors are applied to the unadjusted ITE-based trip generation estimates as presented in Table 1.

Source: Fehr & Peers, 2022.

Table 4: Alternative Scheme 2 (24-Story Project) Trip Generation by Travel Mode

Mode	Mode Share Adjustment Factors ¹	Daily	AM Peak Hour	PM Peak Hour
Automobile	0.531	2,770	375	368
Transit	0.297	1,550	210	206
Bike	0.051	270	36	35
Walk	0.105	550	74	73
Total Net Trips		5,140	695	682

Notes:

1. Based on *City of Oakland TIRG*, for an urban environment within 0.5 miles of a BART station. The mode adjustment factors are applied to the unadjusted ITE-based trip generation estimates as presented in Table 2.

Source: Fehr & Peers, 2022.

Trip Distribution and Assignment

The trip distribution and assignment process is used to estimate how the vehicle trips generated by a project site would be distributed across the roadway network. Based on existing travel patterns, locations of complementary land uses, and the one-way street network and turn restrictions in Downtown Oakland, and consistent with the trip distribution used in the recently approved 415 20th Street Project, Fehr & Peers estimated the following directions of approach to and departure from the Project site:

- SR 24, 15%
- I-580 West, 19%
- I-580 East, 15%
- I-880, 20%
- Broadway North, 5%
- Telegraph Avenue, 5%
- West Oakland, 5%
- East Oakland, 4%
- San Pablo Avenue, 2%
- Harrison Street North, 5%
- Alameda, 5%

Study Intersection Selection

According to the City of Oakland's TIRG the criteria for the intersections to be studied in a TIR include the following:

- All intersection(s) of streets adjacent to Project site;
- All signalized intersections, all-way stop-controlled intersections, or roundabouts where 100 or more peak hour trips are added by the Project;
- All signalized intersections with 50 or more peak-hour trips and the existing intersection operations are at Level of Service D, E, or F; and
- Side-street stop-controlled intersection(s) where 50 or more peak hour trips are added by the Project to any individual movement other than the major-street through movement.

The following intersections would meet the criteria for Project adding 100 or more peak hour trips to a signalized intersection for both Scheme 1 and Alternative Scheme 2:

1. 20th Street/Webster Street
2. 19th Street/Franklin Street
3. 19th Street/Webster Street
4. 19th Street/Harrison Street
5. 17th Street/Webster Street

In addition, intersection #3 is adjacent to the Project site.

In the last two years, travel behavior has changed at a global level due to the COVID-19 pandemic. In Downtown Oakland and the surrounding areas, travel patterns (both amount and mode of trips) have changed significantly since the first shelter-in-place orders were issued on March 16, 2020. Based on current observations, the daytime population in Downtown Oakland is currently lower than it was before the start of the pandemic. Thus, current turning movement counts may not accurately reflect the long-term typical conditions due to changes in travel patterns during this time. Since count data collected before the pandemic are available at the five study intersections, this analysis uses the available count data, as summarized in **Table 5**.

Table 5: Sources for Existing Counts

#	Intersection	Source	Collection Date
1	20th Street/Webster Street	Kaiser Center Expansion Non-CEQA Analysis (TIR)	October 2018
2	19th Street/Franklin Street	1750 Broadway Non-CEQA Analysis (TIR)	November 2017
3	19th Street/Webster Street	1721 Webster Non-CEQA Analysis (TIA)	April 2016
4	19th Street/Harrison Street	19th & Harrison Street Project CEQA Analysis	April 2016
5	17th Street/Webster Street	1433 Webster Non-CEQA Analysis (TIA)	February 2016

Source: Fehr and Peers, 2022.

Access and Circulation Review

An evaluation of access and circulation for all travel modes under both Project Schemes, based on site plans dated May 2022, is summarized below. Where applicable, Scheme 1 and Alternative Scheme 2 are addressed separately.

Motor Vehicle Access and Circulation

An evaluation of motor vehicle access and circulation for both Project Schemes is summarized below.

On-Site Garage Parking

The two Project Schemes provide different configurations of on-site parking, as described below.

Scheme 1

Scheme 1 would provide a basement garage accommodating approximately 37 parking spaces, which may be increased to up to 75 spaces with parking lifts. Automobiles would access the garage via a driveway on Webster Street, approximately 135 feet north of 19th Street. As Webster Street is a one-way southbound street, vehicles would enter the garage by turning right into the parking garage; similarly, vehicles would exit the garage by turning right onto Webster Street heading south.

The Project driveway would be approximately 12 feet set back from the curb on the west side of Webster Street and approximately 22 feet set back from the south face of the adjacent building. The driveway curb-cut would be about 27 feet wide and provide one inbound and one outbound lane, and would accommodate passenger vehicles. The Project driveway would provide adequate

sight distance between exiting motorists and pedestrians on the adjacent sidewalk on each side of the driveway.¹

The garage driveway on Webster Street would be controlled by gates approximately 20 feet from the driveway entrance, accommodating queuing for about one vehicle before queues spill back and block the adjacent sidewalk, which would be adequate considering the small size of the garage.

The basement parking garage would be connected to the driveway via a two-way ramp approximately 22.5 feet wide at its narrowed. All parking spaces would be perpendicular to the 23-foot-wide two-way drive aisle. Based on a review of the site plan, the garage would provide adequate sight distance throughout the garage, the garage drive aisles and parking spaces would meet the minimum dimension requirements, and passenger vehicles would be able to maneuver through the parking garage, into and out of all parking spaces and the turnaround area provided at the southwest corner of the garage, as shown in **Attachment A**.

Scheme 1 would designate 20 feet of red curb on the west side of Webster Street just north of the proposed Webster Street driveway, which would provide adequate sight distance between motorists exiting the driveway and cyclists or motorists on southbound Webster Street.²

Alternative Scheme 2

Alternative Scheme 2 would provide on-site parking in two separate facilities, one basement garage accommodating 32 parking spaces and one above-ground garage accommodating 126 parking spaces. Automobiles would access the basement garage via a split driveway on Webster Street, approximately 150 feet north of 19th Street, and access the above-ground garage via a driveway on 19th Street, approximately 100 feet west of Webster Street. As Webster Street is a one-way southbound street and 19th Street is a one-way westbound street, vehicles would enter each facility by turning right into the parking garage; similarly, vehicles would exit the facilities by turning right onto Webster Street heading south or right onto 19th Street heading west, respectively.

¹ Adequate sight distance is defined as a clear line-of-sight between a motorist ten feet back from the sidewalk and a pedestrian 10 feet away on each side of the driveway.

² Adequate sight distance is defined as the stopping sight distance per the Caltrans Highway Design Manual, Chapter 400. Since the speed limit on Webster Street is 25 miles per hour, the stopping sight distance is 150 feet.

The Webster Street driveway would be approximately 12 feet set back from the curb on the west side of the street and is set back from the south face of the adjacent building by approximately two feet. The separate inbound and outbound driveway segments at Webster Street would be about 12 feet wide each and separated by about seven feet, merging into a single 12-foot-wide ramp after approximately 20 feet. The ramp would provide a single two-way lane that would accommodate both inbound and outbound passenger vehicles. The site plan does not indicate how the single-lane ramp would be controlled. The inbound lane would accommodate queuing for one vehicle before queues spill back and block the adjacent sidewalk, which would be adequate considering the small size of the garage. The Webster Street driveway would provide adequate sight distance between exiting motorists and pedestrians on the adjacent sidewalk on each side of the driveway as well as between exiting motorists and cyclists or motorists on southbound Webster Street.

Recommendation 1: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design for Alternative Scheme 2:

- At the Webster Street driveway, provide signals and/or gates at both ends of the two-way lane that provides access to the basement parking to indicate when vehicles may not enter the two-way lane due to oncoming vehicles in the opposite direction.
- At the Webster Street driveway, provide “Do Not Block” signage for entering vehicles referring to the bicycle lane and sidewalk that activates when vehicles are exiting the driveway.

The basement parking garage would include parking spaces perpendicular to the 23-foot-wide two-way drive aisle. Based on a review of the site plan, the garage would provide adequate sight distance throughout the garage, the garage drive aisles and parking spaces would meet the minimum dimension requirements, and passenger vehicles would be able to maneuver through the parking garage, into and out of all parking spaces and the turnaround area provided at the southeast end of the basement garage, as shown in Attachment A.

The 19th Street driveway would be approximately ten feet set back from the curb on the north side of the street and is set back from the east face of the adjacent building by approximately 16 feet. The driveway would be about 24 feet wide and provide one inbound and one outbound lane, which would accommodate passenger vehicles. The 19th Street driveway would provide adequate sight distance between exiting motorists and pedestrians on the adjacent sidewalk on

each side of the driveway. Alternative Scheme 2 would designate about 30 feet of red curb on the north side of 19th Street just east of the proposed 19th Street driveway, which would provide adequate sight distance between motorists exiting the 19th Street driveway and cyclists or motorists on westbound 19th Street.

The above-ground parking garage would consist of three levels of parking connected via parking ramps and would generally include parking spaces perpendicular to the 23-foot-wide two-way drive aisle which provides circulation on the west, south, and east sides of the garage. Additional one-way 13-foot-wide drive aisles in the center of the garage provide circulation between the levels. The above-ground garage would provide a short dead-end drive aisle accommodating six parking spaces on the north end of each level. Based on a review of the site plan, the garage would provide adequate sight distance throughout the garage, the garage drive aisles and parking spaces would meet the minimum dimension requirements, and passenger vehicles would be able to maneuver through the parking garage, into and out of all parking spaces and into and out of the turnaround area at the north ends of the dead-end garage drive aisles, as shown in Attachment A.

Although not shown on the site plan, the 19th Street driveway is expected to be controlled by gate arms.

Recommendation 2: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design for Alternative Scheme 2:

- Ensure that entry gate arm at the 19th Street driveway is set back from the street by at least 40 feet to minimize vehicle queues spilling back and blocking the adjacent sidewalk.

Under both Project Schemes, trucks and other commercial vehicles would access the loading area on the east side of the building from a different driveway on Webster Street. The Loading Evaluation section of the memorandum describes truck access for the Project.

Automobile Parking Requirements – Both Project Schemes

The *City of Oakland Planning Code* sets minimum and maximum parking requirements for the Project, which is in a Central Business District zone (CBD-C and CBD-P). Section 17.116.080 does not have minimum off-street parking requirements for office or retail developments in the CBD

zones and allows a maximum parking of one space for each 300 square feet of ground floor area, and one space for each 500 square feet of above ground floor area for office and retail uses.

Table 6 summarizes the parking code requirements for the Project. The City of Oakland requires between zero and 818 parking spaces for Scheme 1 and between zero and 1,044 parking spaces for Alternative Scheme 2. Thus, the parking spaces provided by the Project under both Scheme 1 and Alternative Scheme 2, regardless of providing parking lifts, would be consistent with the City's parking requirements.

Table 6: Automobile Parking Requirements

Land Use	Size ¹	Required Off-Street Parking Supply		Parking Supply	Within Range?
		Minimum	Maximum		
Scheme 1 (17-Story Project)					
Upper Level Office ²	403.8 KSF	0	808	37 (up to 75 with parking lifts)	Yes
Ground Floor Retail ²	2.9 KSF	0	10		
Total		0	818		
Alternative Scheme 2 (24-Story Project)					
Upper Level Office ²	518.3 KSF	0	1,037	158 (up to 221 with parking lifts)	Yes
Ground Floor Retail ²	2.0 KSF	0	7		
Total		0	1,044		

Notes:

1. KSF = 1,000 square feet.
2. City of Oakland off-street maximum parking requirement for office and retail uses is one space for each 300 square feet of ground floor area, and one space for each 500 square feet of above ground floor area in a CBD-C zone. The City of Oakland does not establish a minimum off-street parking requirement for office or retail uses in a CBD-C zone (Planning Code Section 17.116.080).

Source: *City of Oakland Planning Code*, Fehr & Peers, 2022.

Loading Evaluation – Both Project Schemes

City of Oakland Municipal Code Section 17.116.140 requires three off-street loading docks for commercial buildings larger than 160,000 square feet. Both Project Schemes would include two commercial loading spaces, which does not satisfy the City's loading requirements. The Project is requesting a variance to meet the reduced loading requirement. The two loading spaces would, meet the Code's dimension requirements which require the loading spaces to be a minimum of 33-feet long, 12-feet-wide, and 14-feet-high.

Under both Project Schemes, the loading area would be located at the ground level on the east side of the building and would be accessed via a curb-cut on Webster Street. In Scheme 1, the driveway would be located approximately 105 feet north of 19th Street, adjacent and to the south

of the garage driveway with a separate curb-cut. In Alternative Scheme 2, the curb-cut would be located approximately 90 feet north of 19th Street and approximately 30 feet south of the garage driveway. Under both Project Schemes, trucks would back into and head out of the loading docks. Currently, Webster Street provides about 90 feet of yellow curb (commercial loading) just north of the Project site, which can also be used by the Project under both Project Schemes if both loading Docks are in use.

On-Street Parking and Loading

Currently, Webster Street along the Project frontage, provides three metered parking spaces and a BayWheels bike-share station, which is described in the next Bicycle Access and Circulation subsection of this memorandum. 19th Street, along the Project frontage, provides metered parking for about five vehicles, including one ADA-accessible parking space just west of Webster Street. The metered spaces have a two-hour time limit between 8:00 AM and 6:00 PM on weekdays and Saturdays.

Scheme 1

Scheme 1 would remove the existing BayWheels bike-share station and continue to provide three parking spaces on Webster Street. Scheme 1 would continue to maintain the five parking spaces on 19th Street but would designate three of the parking spaces for passenger loading (white curb). The existing ADA-accessible parking space on 19th Street just west of Webster Street would be relocated west along the Project frontage with a curb-ramp to adjacent to the sidewalk and converted to a passenger loading space. The implementation of Recommendation 4 may eliminate one or more additional parking spaces on either Webster Street or 19th Street. All on-street parking and passenger loading spaces would be 22-feet long.

Alternative Scheme 2

Alternative Scheme 2 would remove the existing BayWheels bike-share station and continue to provide three parking spaces on Webster Street. Alternative Scheme 2 would reduce the number of parking spaces on 19th Street from five to three spaces with two spaces designated for passenger loading (white curb). It is likely that the existing ADA-accessible parking space on 19th Street just west of Webster Street would be eliminated. The implementation of Recommendation 4 may eliminate one or more additional parking spaces on either Webster Street or 19th Street. All on-street parking and passenger loading spaces would be 22-feet long.

Recommendation 3: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Provide one ADA-accessible parking space within one block of the Project site.

Bicycle Access and Circulation

The following bicycle facilities are currently provided adjacent to the Project site:

- Class 2 buffered bicycle lane along the west side of Webster Street, which is a one-way southbound street

The City's 2019 Oakland Bike Plan (*Let's Bike Oakland*, July 2019) proposes the following in the vicinity of the Project:

- Protected Class 4 bicycle lanes on Webster, Franklin, and Harrison Streets; Franklin and Webster are both one-way streets. City of Oakland is currently designing the Franklin Street bikeway as a two-way facility on the west side of the street between 11th Street in the south and Broadway in the north.
- Class 2 buffered bicycle lane on 17th Street, which is a one-way street

A Bay Wheels bike-share station accommodating up to 26 bicycles is located adjacent to the Project site on the west side of Webster Street. Based on data available from BayWheels, an average of eight trips per day started or ended at this bike-share station in August 2022.³ The Project proposes to remove this bike-share station by paying the relocation fee, at which point the nearest Bay Wheels stations would be located:

- 0.1 miles northeast of the Project on the east side Harrison Street just south of 20th Street, adjacent to Snow Park
- 0.2 miles northwest of the Project on the east side of Broadway, approximately 100 feet north of 20th Street

Bicycle Parking Requirements

Chapter 17.117 of the Oakland Planning Code requires long-term and short-term bicycle parking for new buildings. Long-term bicycle parking includes lockers or locked enclosures, and short-term bicycle parking includes bicycle racks. Short-term spaces should be placed within fifty feet of the main building entrance or commercial use and be in a well-trafficked, visible location. **Table 7** summarizes the minimum bicycle parking requirements for both Project Schemes and **Table 8** summarizes the shower and locker requirements.

³ Based on data available at <https://s3.amazonaws.com/baywheels-data/index.html>

Table 7: Bicycle Parking Requirements

Land Use	Size ¹	Long-Term Bicycle Parking		Short-Term Bicycle Parking	
		Spaces per Unit	Spaces	Spaces per Unit	Spaces
Scheme 1 (17-Story Project)					
Office ²	403.8 KSF	1:10 KSF	40	1:20 KSF	20
Retail ³	2.9 KSF	1:12 KSF	2	1:2 KSF	2
Minimum Required Bicycle Parking		-	42	-	22
Proposed Parking Spaces		-	42	-	22
Minimum Requirement Met?		-	Yes	-	Yes
Alternative Scheme 2 (24-Story Project)					
Office ²	518.3 KSF	1:10 KSF	52	1:20 KSF	26
Retail ³	2.0 KSF	1:12 KSF	2	1:2 KSF	2
Minimum Required Bicycle Parking		-	54	-	28
Proposed Parking Spaces		-	82	-	8
Minimum Requirement Met?		-	Yes	-	No ⁵

Notes:

1. KSF = 1,000 square feet
2. The Oakland Planning Code (Section 17.117.110) requires a minimum long-term parking requirement of one space per 10,000 square feet of office floor area and minimum short-term parking requirement of one space per 20,000 square feet of office floor area (Section 17.117.110).
3. The Oakland Planning Code (Section 17.117.110) requires a minimum long-term parking requirement of one space per 12,000 square feet of retail floor area (minimum of 2 spaces) and minimum short-term parking requirement of one space per 5,000 square feet of retail floor area (minimum of 2 spaces).
4. Bicycle parking spaces proposed in the May 6 and 13, 2022 Project site plans.
5. The Project is requesting a variance to provide fewer short-term bicycle parking spaces than required because there may not be adequate frontage available to provide all the required short-term bicycle parking spaces. The Project would provide additional long-term bicycle parking spaces to off-set the reduction in short-term bicycle parking spaces.

Source: Fehr & Peers, 2022.

Scheme 1

Scheme 1 would require a minimum of 42 long-term bicycle parking spaces. The Project site plan includes at least 42 long-term spaces which would meet the minimum long-term bicycle parking required by the Code. The long-term bicycle parking would be provided in a secure bicycle room on the west side of the ground level of the building. The bicycle room would be accessed either through the building lobby and series of service corridors leading to a stair entrance, or directly from a door on the southwest corner of the building leading to a six-foot-wide bicycle entry corridor. Scheme 1 would require 22 short-term bicycle parking spaces. The Project site plan shows bicycle racks accommodating 22 bicycles on the sidewalks along the Project frontages on Webster and 19th Streets, which would meet the minimum Code requirement. All bicycle racks would be located outside the pedestrian through zone.

Table 8: Bicycle Shower and Locker Requirements

Land Use	Size ¹	Required Showers		Required Lockers	
		Required	Provided	Required	Provided
Scheme 1 (17-Story Project)					
Commercial ²	406.7 KSF	4 Female, 4 Male	4 Female, 4 Male	16 Female, 16 Male	16 Female, 16 Male
<i>Minimum Requirement Met?</i>			Yes		Yes
Alternative Scheme 2 (24-Story Project)					
Commercial ²	518.3 KSF	4 Female, 4 Male	4 Female, 4 Male	16 Female, 16 Male	16 Female, 16 Male
<i>Minimum Requirement Met?</i>			Yes		Yes

Notes:

1. KSF = 1,000 square feet
2. The Oakland Planning Code (Section 17.117.130) requires that Commercial land uses of 150 KSF or greater provide a minimum of two showers per gender, plus one shower per gender for each 150 KSF above 150 KSF, plus four lockers per shower.

Source: Fehr & Peers, 2022.

Scheme 1 would provide eight showers and 16 lockers, allocated evenly between sexes, which meets Code requirements. These amenities would be located in the northwest corner of the ground level of the building, accessible via doors from the bicycle entry corridor, long-term bicycle storage room, and the service corridor leading to the lobby.

Alternative Scheme 2

Alternative Scheme 2 would require a minimum of 54 long-term bicycle parking spaces. The Project site plan includes at least 82 long-term spaces which would exceed the minimum long-term bicycle parking required by the Code. The long-term bicycle parking would be provided in a secure bicycle room on the west side of the ground level of the building. The bicycle room would be accessed either through the building lobby and a service corridor leading to a staired entrance, or directly from a door on the southwest corner of the building leading to a 15-foot-wide bicycle entry corridor. Alternative Scheme 2 would provide eight showers and 16 lockers, allocated evenly between sexes, which meets Code requirements. These amenities would be located in the west side of the ground level of the building, accessible via doors from the bicycle entry corridor, long-term bicycle storage room, and the service corridor leading to the lobby.

The Project would require a minimum of 28 short-term parking spaces and would provide only eight, which does not meet Code requirements. Short-term parking spaces would be located outside the building, with two racks (four spaces) on the Webster Street sidewalk, approximately

32 to 40 feet north of the lobby entrance, and two racks (4 spaces) on the 19th Street sidewalk, approximately 60 to 68 feet west of the lobby entrance, directly in front of the retail entrances. All bicycle racks would be located outside the pedestrian through zone. Alternative Scheme 2 is requesting a variance to meet the reduced short-term bicycle parking requirement and would offset the reduction in short-term bicycle parking with additional long-term bicycle parking spaces.

Recommendation 4: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- As required by the TDM Plan, monitor the usage of the short-term bicycle parking spaces and provide additional short-term bicycle parking if demand exceeds supply. Potential options may include:
 - Additional bicycle racks along the sidewalks on Webster and/or 19th Streets
 - Replacing one or more on-street parking spaces on Webster and/or 19th Streets with an in-street bicycle parking corral

Pedestrian Access and Circulation

An evaluation of pedestrian access and circulation for the two Project Schemes is summarized below.

Pedestrian Facilities – Both Project Schemes

Under both Project Schemes, pedestrians would access the building lobby, located at the southeast corner of the building, along either Webster Street or 19th Street. Scheme 1 would provide additional pedestrian access via an entrance on the northeast corner of the building. Alternative Scheme 2 would provide additional pedestrian access via an entrance on the east side of the building adjacent to the driveway. Each of these entrances would provide access to internal staircases or service passageways leading to the main lobby and bank of high-rise elevators. In both Project Schemes, the main access to the retail facilities would be on 19th Street. The retail facilities may also be accessed from the main building lobby.

Currently, the sidewalks along the Project frontage on Webster and 19th Streets are 12 and 10 feet wide, respectively. Neither Project Scheme would widen the sidewalks but would install new sidewalk paving and two tree wells on 19th Street, located outside the pedestrian through zone adjacent to the retail component.

Pedestrian facilities at the intersections near the Project site include:

- The signalized 20th Street/Webster Street intersection provides curb ramps at all four corners, although none are directional and only the northeast and southwest provide truncated domes. Marked crosswalks are provided on all four approaches. Non-audible pedestrian signal heads with countdown timers and no push buttons are provided at each crosswalk.
- The signalized 19th Street/Franklin Street intersection provides curb ramps at all four corners. The northwest and southwest corners provide directional ramps with truncated domes, while the southeast corner has a diagonal ramp with truncated domes, and the northeast corner has a diagonal ramp without truncated domes. Marked crosswalks are provided on all four approaches. Non-audible pedestrian signal heads with countdown timers and no push buttons are provided at each crosswalk. The TIR for the approved 415 20th Street Project includes the following recommendation at this intersection:⁴
 - Explore the feasibility and if deemed feasible by City staff, install the following at the 19th Street/Franklin Street intersection:
 - Bulb-outs (curb extensions) at all four corners of the intersection to reduce pedestrian crossing distances.
 - Dual directional curb ramps with truncated domes and consistent with ADA standards at all four corners of the intersection.

As described in the Bicycle Access and Circulation subsection of this memorandum, City of Oakland is currently designing a Class 4 bikeway on the west side of Franklin Street between 11th Street and Broadway. Any potential improvements at the 19th Street/Franklin Street intersection would need coordination with the planned bikeway project.

- The signalized 19th Street/Webster Street intersection provides curb ramps with truncated domes at all four corners, although none are directional. Marked crosswalks are provided on all four approaches. Non-audible pedestrian signal heads with countdown timers and no push buttons are provided at each crosswalk.
- The signalized 19th Street/Harrison Street intersection provides curb ramps with truncated domes, although none are directional. Marked crosswalks are provided on all four approaches. Pedestrian signal heads with audible countdown timers and push buttons are provided at each crosswalk.
- The signalized 17th Street/Webster Street intersection provides curb ramps on all four corners. The northeast corner has directional curb ramps with truncated domes, the northwest and southwest corners have diagonal ramps with truncated domes. The southeast corner has a diagonal curb ramp lacking truncated domes. Marked crosswalks

⁴ See Recommendation 6 in the 415 20th Street – Transportation Impact Review (Non-CEQA) Memorandum dated August 24, 2020.

are provided on all four approaches. Non-audible pedestrian signal heads with countdown timers and no push buttons are provided at each crosswalk.

Recommendation 5: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Install a bulb-out (curb-extension) with directional curb ramps at the northwest corner of the 19th Street/Webster Street intersection

Recommendation 6: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Explore the feasibility and if deemed feasible by City staff and not in conflict with the planned bicycle improvements along Franklin Street, and not installed by the proposed 415 20th Street Project, complete Recommendation 6 from the 415 20th Street TIR at the 19th Street/Franklin Street intersection:
 - Bulb-outs (curb extensions) at the northeast and southeast corners of the intersection to reduce pedestrian crossing distances
 - Directional curb-ramps with truncated domes on the northeast and southeast corners

Transit Access

An evaluation of transit access for both Project Schemes is summarized below.

Transit Access – Both Project Schemes

Transit service providers in the Project vicinity include BART and AC Transit.

BART provides regional rail service throughout the East Bay and across the Bay. The Project is located 0.2 miles from the nearest 19th Street BART Station portals on the northeast corner of the Broadway/20th Street intersection and midblock on the east side of Broadway between 19th and 20th Streets.

AC Transit is the primary bus service provider in the City of Oakland. Although there are no transit stops adjacent the Project site, AC Transit operates multiple major routes on Broadway and 20th Street in the vicinity of the Project:

- Lines 1T, 6, 12, 18, 33, 51A, 72, 72M, 800, 805, 840, and 851 have stops on Broadway between 17th and 20th Streets, approximately 0.15 miles west of the Project site.
- Lines 802 and NL have stops on 20th Street at Broadway, approximately 0.18 miles northwest of the Project site.

Neither Project Scheme would modify access between the Project site and the BART Station portals or the AC Transit bus stops described above. Considering that the Project main entrance is on the north side of 19th Street. It is expected that most Project employees and visitors walking between the Project site and the BART portals and bus stops on Broadway would walk along 19th Street and would cross Franklin Street. Recommendation 6, which would improve pedestrian crossings at the 19th Street/Franklin Street intersection, would enhance pedestrian access between the Project site and the transit service along Broadway.

Collision Analysis

A five-year history (January 1, 2017 to December 31, 2021) of collision data in the study area was obtained from the Statewide Integrated Traffic Records System (SWITRS) and evaluated for this collision analysis. **Table 9** summarizes the collision data by type and location, and **Table 10** summarizes the collision data by severity and location.

As shown in Table 9, 46 collisions were reported during this five-year timeframe along the five study intersections and two roadway segments adjacent the Project site. The 19th Street/Harrison Street intersection had the highest number of reported collisions with 15 collisions, followed by the 19th Street/Franklin Street and the 17th Street/Webster Street intersections with 10 collisions. The most reported collision types within the study are broadside (19 collisions, 41 percent) and sideswipe (12 collisions, 26 percent). Most of the collisions within the area were due to drivers making improper turning movements (11 collisions, 24 percent) or improperly responding to traffic signs and signals (18 collisions, 39 percent). Pedestrians were involved in five (11 percent) and cyclists were involved in four (nine percent) of the reported collisions. As shown in Table 10, 22 collisions (48 percent) resulted in injuries, none in fatalities.

The Highway Safety Manual (HSM, Predictive Method - Volume 2, Part C) provides a methodology to predict the number of collisions for intersections and street segments based on roadway and intersection characteristics like vehicle and pedestrian volumes, number of lanes, signal phasing, on-street parking, and number of driveways. **Table 11** presents the predicted collision frequencies for the five study intersections and two study segments using the HSM Predictive Method for Urban and Suburban Arterials and compares the predicted collision frequencies to the reported collision frequencies. **Attachment B** provides detailed predicted collision frequency calculation sheets based on the HSM methodology. Intersections or roadway segments with collision frequencies greater than the predicted frequency are identified as locations that should be evaluated in greater detail for collision trends and potential modifications.

Table 9: Summary of Collisions by Type

Location	Head-On	Sideswipe	Rear End	Broadside	Hit Object	Overtaken	Pedestrian-Involved	Other	Total
Intersection									
20th Street/Webster Street	0	1	0	2	0	0	1	0	4
19th Street/Franklin Street	1	3	0	6	0	0	0	0	10
19th Street/Webster Street	0	1	1	2	0	0	1	1	6
19th Street/Harrison Street	2	3	0	6	3	0	0	1	15
17th Street/Webster Street	0	4	0	2	1	0	3	0	10
<i>Subtotal</i>	3	12	1	18	4	0	5	2	45
Roadway Segment									
19th Street, Webster to Franklin Streets	0	0	0	1	0	0	0	0	1
Webster Street, 19th to 20th Streets	0	0	0	0	0	0	0	0	0
<i>Subtotal</i>	0	0	0	1	0	0	0	0	1
Total	3	12	1	19	4	0	5	2	46

Notes:

3. Based on SWITRS five-year collision data reported from January 1, 2017 to December 31, 2021.

Source: Fehr & Peers, 2022.

Table 10: Summary of Collisions by Severity and Persons Involved

Location	Collision Severity ²			Total	Persons & Modes Involved			
	Property Damage Only Collisions	Injury Collisions	Fatality Collisions		Bicycle	Pedestrian	Driver/ Passenger	Total
Intersection								
20th Street/Webster Street	2	2	0	4	0	1	1	2
19th Street/Franklin Street	5	5	0	10	1	0	1	2
19th Street/Webster Street	1	5	0	6	0	2	0	2
19th Street/Harrison Street	8	7	0	15	3	1	0	4
17th Street/Webster Street	7	3	0	10	0	2	1	3
<i>Subtotal</i>	23	22	0	45	4	6	3	13
Roadway Segment								
19th Street, Webster to Franklin Streets	1	0	0	1	0	0	0	0
Webster Street, 19th to 20th Streets	0	0	0	0	0	0	0	0
<i>Subtotal</i>	1	0	0	1	0	0	0	0
Total	24	22	0	46	4	6	3	13

Notes:

1. Based on SWITRS five-year collision data reported from January 1, 2017 to December 31, 2021.
2. Based on crash severity as reported in SWITRS: Property Damage Only Collisions consist of Severity 0 (PDO); Injury Collisions consists of Severity 2 (Injury (Severe)), Severity 3 (Injury (Other Visible)), and Severity 4 (Complaint of Pain); Fatality Collisions consists of Severity 1 (Fatal).

Table 11: Predicted and Actual Collision Frequencies

Location	Predicted Collision Frequency ¹ (per year)	Actual Collision Frequency ² (per year)	Difference	Higher Than Predicted?
Intersection				
20th Street/Webster Street	2.1	0.8	-1.3	No
19th Street/Franklin Street	1.8	2.0	+0.2	Yes
19th Street/Webster Street	2.0	1.2	+0.8	No
19th Street/Harrison Street	1.8	3.0	+1.2	Yes
17th Street/Webster Street	2.5	2.0	-0.5	No
Roadway Segment				
19th Street, Webster to Franklin Streets	0.1	0.2	-0.8	No
Webster Street, 19th to 20th Streets	0.2	0.0	-0.2	No

Notes:

1. Based on the Highway Safety Manual Predictive Method (Volume 2, Part C)
2. Based on SWITRS five-year collision data reported from January 1, 2017 to December 31, 2021.

Source: Fehr & Peers, 2022.

As shown in **Table 11**, two study intersections have a higher reported collision frequency than predicted by the HSM. These include the 19th Street/Franklin Street and 19th Street/Harrison Street intersections. Of the ten collisions reported at the 19th Street/Franklin Street intersection, the majority were broadside (six) and sideswipe (three) collisions and most (seven) were associated with traffic signs and signals violations. This may indicate that the yellow and red clearance intervals for the existing traffic signal may not be adequate for the intersection. Recommendation 6 would also improve pedestrian crossings at this intersection.

Recommendation 7: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Consider increasing the yellow and/or red clearance intervals at the existing Franklin Street/19th Street intersection traffic signal

Most collisions reported at the 19th Street/Harrison Street intersection (12 of 15), occurred prior to 2020 when pedestrian signal heads with push buttons were installed in this intersection. Review of the more recent collision history shows no other discernable pattern in these collisions that the

prevalent crash types continue to be broadside (two collisions) and sideswipe (one collision). No modifications are recommended for this intersection at this time.

Conclusion and Summary of Recommendations

Per the site plan review, the Project would have adequate automobile, bicycle, pedestrian, and transit access and circulation with the inclusion of the following recommendations:

Recommendation 1: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design for Alternative Scheme 2:

- At the Webster Street driveway, provide signals and/or gates at both ends of the two-way lane that provides access to the basement parking to indicate when vehicles may not enter the two-way lane due to oncoming vehicles in the opposite direction.
- At the Webster Street driveway, provide "Do Not Block" signage for entering vehicles referring to the bicycle lane and sidewalk that activates when vehicles are exiting the driveway.

Recommendation 2: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design for Alternative Scheme 2:

- Ensure that entry gate arm at the 19th Street driveway is set back from the street by at least 40 feet to minimize vehicle queues spilling back and blocking the adjacent sidewalk.

Recommendation 3: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Provide one ADA-accessible parking space within one block of the Project site.

Recommendation 4: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- As required by the TDM Plan, monitor the usage of the short-term bicycle parking spaces and provide additional short-term bicycle parking if demand exceeds supply. Potential options may include:

- Additional bicycle racks along the sidewalks on Webster and/or 19th Streets
- Replacing one or more on-street parking spaces on Webster and/or 19th Streets with an in-street bicycle parking corral

Recommendation 5: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Install a bulb-out (curb-extension) with directional curb ramps at the northwest corner of the 19th Street/Webster Street intersection

Recommendation 6: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Explore the feasibility and if deemed feasible by City staff and not in conflict with the planned bicycle improvements along Franklin Street, and not installed by the proposed 415 20th Street Project, complete Recommendation 6 from the 415 20th Street TIR at the 19th Street/Franklin Street intersection:
 - Bulb-outs (curb extensions) at the northeast and southeast corners of the intersection to reduce pedestrian crossing distances
 - Directional curb-ramps with truncated domes on the northeast and southeast corners

Recommendation 7: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Consider increasing the yellow and/or red clearance intervals at the existing Franklin Street/19th Street intersection traffic signal

Worksheet 2A -- General Information and Input Data for Urban and Suburban Arterial Intersections						
General Information			Location Information			
Analyst	Molly Riddle		Roadway	17th Street & Webster Street		
Agency or Company	Fehr & Peers		Intersection	City of Oakland, CA		
Date Performed	09/07/22		Jurisdiction	2022		
Analysis Year						
Input Data			Base Conditions	Site Conditions		
Intersection type (3ST, 3SG, 4ST, 4SG)			--	4SG		
AADT _{major} (veh/day)	AADT _{MAX} = 67,700 (veh/day)		--	5,290		
AADT _{minor} (veh/day)	AADT _{MAX} = 33,400 (veh/day)		--	6,160		
Intersection lighting (present/not present)			Not Present	Present		
Calibration factor, C _i			1.00	1.00		
Data for unsignalized intersections only:			--	--		
Number of major-road approaches with left-turn lanes (0,1,2)			0	0		
Number of major-road approaches with right-turn lanes (0,1,2)			0	0		
Data for signalized intersections only:			--	--		
Number of approaches with left-turn lanes (0,1,2,3,4) [for 3SG, use maximum value of 3]			0	1		
Number of approaches with right-turn lanes (0,1,2,3,4) [for 3SG, use maximum value of 3]			0	1		
Number of approaches with left-turn signal phasing [for 3SG, use maximum value of 3]			--	1		
Type of left-turn signal phasing for Leg #1			Permissive	Permissive		
Type of left-turn signal phasing for Leg #2			--	Not Applicable		
Type of left-turn signal phasing for Leg #3			--	Not Applicable		
Type of left-turn signal phasing for Leg #4 (if applicable)			--	Not Applicable		
Number of approaches with right-turn-on-red prohibited [for 3SG, use maximum value of 3]			0	0		
Intersection red light cameras (present/not present)			Not Present	Not Present		
Sum of all pedestrian crossing volumes (PedVol) -- Signalized intersections only			--	8,320		
Maximum number of lanes crossed by a pedestrian (n _{lanesx})			--	4		
Number of bus stops within 300 m (1,000 ft) of the intersection			0	10		
Schools within 300 m (1,000 ft) of the intersection (present/not present)			Not Present	Not Present		
Number of alcohol sales establishments within 300 m (1,000 ft) of the intersection			0	10

APPENDIX I

Transportation Demand Management Plan

Memorandum

Date: July 10, 2023
To: Crescentia Brown, ESA
From: Sam Tabibnia, Fehr & Peers
Subject: 1919 Webster Street - Transportation and Parking Demand Management Plan

OK22-0476

Transportation and Parking Demand Management (TDM) plans are a requirement of the City of Oakland's Standard Conditions of Approval (Department of Planning and Building, Bureau of Planning, Revised December 16, 2021 – Condition #78) for all land use projects generating more than 50 net new peak hour vehicle trips as described in the City of Oakland's Transportation Impact Review Guidelines (TIRG) dated April 2017.

Two Project Schemes are under consideration for the 1919 Webster Street Project. Both Project Schemes would generate over 100 peak hour trips, which triggers the requirement for the applicant to develop a TDM with a 20 percent vehicle trip reduction (VTR) goal.

This memorandum describes the Project and its setting, lists the mandatory TDM strategies that the project shall implement to achieve the 20 percent VTR, provides the additional strategies that should be considered if the 20 percent VTR is not achieved, and describes the monitoring, evaluation, and enforcement of the TDM Plan.

Project Transportation Characteristics

The Project is located at the northwest corner of the 19th Street/Webster Street intersection in Downtown Oakland. The Project site is currently occupied by a surface parking lot and vacant building which will be demolished by the Project. Two design schemes are under consideration which are described below:

- **Scheme 1** would consist of a 17-level building providing about 408,000 square feet of office space and 5,000 square feet of ground level commercial space. Scheme 1 would include a basement parking garage with approximately 37 parking spaces (which may be increased to up to 75 parking spaces with parking lifts) accessed through a right-in/right-out only driveway on Webster Street. Scheme 1 would also provide a bike room accommodating long-term bicycle parking for at least 42 bicycles on the ground level of the building and provide short-term bicycle parking for 22 bicycles in the form of bicycle racks along on the sidewalks along the Project frontage on Webster and 19th Streets.
- **Alternative Scheme 2** would consist of a 24-level building providing about 521,000 square feet of office space and 6,000 square feet of ground level commercial space. Alternative Scheme 2 would include approximately 158 parking spaces (which may be increased to up to 221 parking spaces with parking lifts) consisting of a 32-space basement parking garage accessed through a right-in/right-out only driveway on Webster Street and 126 parking spaces in Levels 2 through 4 accessed through a right-in/right-out only driveway on 19th Street. Alternative Scheme 2 would also provide a bike room accommodating long-term bicycle parking for at least 82 bicycles on the ground level of the building and provide short-term bicycle parking for eight bicycles in the form of bicycle racks along on the sidewalks along the Project frontage on Webster and 19th Streets.

The Project is in Downtown Oakland, a high-density, mixed-use, transit-rich, pedestrian-friendly area with limited parking supply. The Project is within 0.2 miles of the 19th Street BART Station, and within walking distance of numerous bus routes, including AC Transit's Bus Rapid Transit (BRT) Line 1T, trunk Lines 6, 51A and 72/72M/72R along Broadway, as well as several local and night buses. Adjacent to the site, Webster Street provides buffered bicycle lanes, and the City's 2019 Oakland Bike Plan (*Let's Bike Oakland*, May 2019) proposes Class 4 protected bike lanes along Webster, Franklin, and Harrison Streets.

The Project's location is expected to result in a relatively high rate of pedestrian, bicycle, and transit trips. As a result of the availability of various destinations within walking and biking distance of the site and the available walking and biking infrastructure and transit service in the Project area, the Project site has a WalkScore of 97/100 (Walker's Paradise), BikeScore of 98 (Biker's Paradise), and TransitScore of 75 (Excellent Transit).¹ This means that it is extremely

¹ <https://www.walkscore.com/CA/Oakland/Downtown>. Accessed on September 22, 2022.

accessible to various non-transportation modes of transportation that enable employees and visitors to use non-automobile modes in accessing the Project site.

Commute Mode Share and Trip Generation

Per the CEQA Study the project’s location is expected to result in a relatively high rate of pedestrian, bicycle, and transit trips. This is evidenced in part by the travel patterns of the area’s existing workers per the US Census. The commute mode split for workers in the project census tract (4029) shows about 30 percent of workers drive alone, while three percent carpool; 52 percent use transit; and about 15 percent bicycle, walk, or use another mode.²

Tables 1 and 2 shows the trip generation by travel mode for Scheme 1 and Alternative Scheme 2 respectively, as summarized in the *Project non-CEQA Transportation Impact Review (TIR)* Memorandum per the City’s TIRG. As described in the TIR, the project trip generation is somewhat conservative in that it does not account for the limited on-site parking supply, which could limit the number of people who would drive to the project site.

The automobile trips generated by the project are estimated to be slightly more than half of all trips generated by a typical suburban office space under both Project Schemes. Similarly, as discussed in the Project environmental documentation, the VMT per worker in the Project area is about 57 percent of the regional VMT per worker (The average VMT per worker in the project area is about 10.4 compared to the regional average VMT of 18.1).

Table 1: Scheme 1 (17-Story Project) Trip Generation by Travel Mode

Mode	Mode Share Adjustment Factors ¹	Daily	AM Peak Hour	PM Peak Hour
Automobile	0.531	2,240	304	301
Transit	0.297	1,250	170	168
Bike	0.051	220	29	29
Walk	0.105	440	60	60
Total Net Trips		4,150	563	558

Notes:

- Based on *City of Oakland TIRG*, for an urban environment within 0.5 miles of a BART station. The mode adjustment factors are applied to the unadjusted ITE-based trip generation estimates of 4,210 daily trips, 573 AM peak hour trips, and 566 PM peak hour trips.

Source: Fehr & Peers, 2022.

² US Census CTPP (2012-2016)

Table 2: Alternative Scheme 2 (24-Story Project) Trip Generation by Travel Mode

Mode	Mode Share Adjustment Factors ¹	Daily	AM Peak Hour	PM Peak Hour
Automobile	0.531	2,770	375	368
Transit	0.297	1,550	210	206
Bike	0.051	270	36	35
Walk	0.105	550	74	73
Total Net Trips		5,140	695	682

Notes:

1. Based on *City of Oakland TIRG*, for an urban environment within 0.5 miles of a BART station. The mode adjustment factors are applied to the unadjusted ITE-based trip generation estimates of 5,210 daily trips, 706 AM peak hour trips, and 693 PM peak hour trips

Source: Fehr & Peers, 2022.

Mandatory TDM Strategies

This section describes the mandatory strategies that shall be implemented at the Project as well as Project features that would reduce the automobile trips generated by the Project. Some of these strategies shall be directly implemented by the building management and others shall be implemented by individual tenants. **Appendix A** lists the mandatory strategies that are part of the City’s TIRG and their applicability to the Project under both Project Schemes.

Table 4 lists the mandatory TDM strategies, and the effectiveness of each strategy primarily on reducing VTR based on the Alameda County Transportation Commission (CTC) VMT Reduction Calculator Tool,³ which is a tool that accounts for the particular location of a development project and quantifies the effects of various strategies in reducing VMT and is generally consistent with the research primarily compiled in *Quantifying Greenhouse Gas Mitigation Measures* (California Air Pollution Control Officers Association (CAPCOA), December 2021). This report is a resource for local agencies to quantify the benefit, in terms of reduced travel demand, of implementing various TDM strategies.

³ See <https://www.alamedactc.org/planning/sb743-vmt/> for more information.

Table 4: Mandatory TDM Program Components

TDM Strategy	Description	Estimated Vehicle Trip Reduction ¹
A. Infrastructure Improvements	Various improvements	N/A ²
B. Telecommuting	Encourage tenants to allow employees to work remotely at least one day per week	6-8%
C. Pre-Tax Commuter Benefit	Encourage tenants to provide employees with pre-tax commuter benefits	0-4%
D. Subsidized or Discounted Transit Program	Encourage tenants to provide subsidized, discounted, or free transit passes for all full-time employees. ³	
E. Limited Parking Supply	Minimal parking is provided for the Project (Both Schemes would provide much less than the maximum one space per 0.5 KSF)	10-15%
F. Parking Management	Market-rate parking rates	
G. Carpooling and Ride-Matching Assistance	Assist Project employees in forming carpools.	<1%
H. Bicycle Amenities and Monitoring	Provide bicycle parking above the minimum requirement, including showers, long-term bicycle storage and personal lockers, and monitor usage	2-4%
I. Guaranteed Ride Home	Encourage employees to register for the Guaranteed Ride Home (GRH) program.	N/A ²
J. TDM Coordinator	Coordinator responsible for implementing and managing the TDM Plan	N/A ²
K. TDM Marketing and Education	Active marketing of carpooling, BART, AC Transit, bike-sharing, and other non-auto modes	1-4%
Estimated Trip Reduction		18-31%

Notes

1. Based on the results of the Alameda CTC VMT Reduction Calculator Tool. Although the focus of the Tool is reductions to VMT, the research used to generate the reductions also indicates vehicle trip reductions are applicable as well. For the purposes of this analysis the VTR is assumed to equal the VMT reduction.
2. The effectiveness of this strategy cannot be quantified at this time. This does not necessarily imply that the strategy is ineffective. It only demonstrates that at the time of the CAPCOA report development, existing literature did not provide a robust methodology for calculating its effectiveness. In addition, many strategies are complementary to each other and isolating their specific effectiveness may not be feasible.
3. This strategy assumes that a transit subsidy of \$3.00 per weekday (value to transit user) would be available to 50 percent of the Project employees.

Source: Fehr & Peers, 2022.

The TDM strategies include both one-time physical improvements and on-going operational strategies. Physical improvements will be constructed as part of the Project and are therefore anticipated to have a one-time capital cost. Some level of ongoing maintenance cost may also be

required for certain improvements. Operational strategies provide on-going incentives and support for the use of non-auto transportation modes. These TDM measures have monthly or annual costs and will require on-going management.

Operational TDM strategies are most effective for persons that commute to and from a site on a regular basis, especially during weekday peak commute periods when transit service peaks and is most conveniently available. Thus, the mandatory strategies in Table 4 are targeted at office workers. Retail employees, customers, and office visitors are not directly targeted because the retail component of the project is small and would have few employees. In addition, many retail customers would be residents and workers in Downtown Oakland who would mostly walk or bike to the site, and office visitors would visit the project too infrequently to be aware of the TDM benefits or to make them cost-effective. However, some of the mandatory strategies, especially the ones that would improve the infrastructure, would also benefit the site visitors.

The VTR ranges in Table 4 represent conservative assumptions about potential trip reduction at the low end of the range. Due to the Project location in an area that has very good transit, bicycle, and pedestrian access, it is expected that the high end of the VTR range would be achieved with this TDM program.

A more detailed description of the TDM measures that comprise the mandatory TDM Plan is provided below:

- A. *Infrastructure Improvements* – the following infrastructure improvements in the Project vicinity, which were identified in the site plan evaluation completed as part of the Project TIR, would improve the bicycling, walking, and transit systems in the area and further encourage the use of these modes. The recommendations applicable to Alternative Scheme 2 only followed by the ones applicable to both Scheme 1 and Alternative Scheme 2 are provided below:

The following recommendations are only applicable to Alternative Scheme 2:

Recommendation 1: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design for Alternative Scheme 2:

- At the Webster Street driveway, provide signals and/or gates at both ends of the two-way lane that provides access to the basement parking to indicate when

vehicles may not enter the two-way lane due to oncoming vehicles in the opposite direction.

- At the Webster Street driveway, provide "Do Not Block" signage for entering vehicles referring to the bicycle lane and sidewalk that activates when vehicles are exiting the driveway.

Recommendation 2: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design for Alternative Scheme 2:

- Ensure that entry gate arm at the 19th Street driveway is set back from the street by at least 40 feet to minimize vehicle queues spilling back and blocking the adjacent sidewalk.

The following recommendations are applicable to both Scheme 1 and Alternative Scheme 2:

Recommendation 3: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Provide one ADA-accessible parking space within one block of the Project site.

Recommendation 4: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- As required by the TDM Plan, monitor the usage of the short-term bicycle parking spaces and provide additional short-term bicycle parking if demand exceeds supply. Potential options may include:
 - Additional bicycle racks along the sidewalks on Webster and/or 19th Streets
 - Replacing one or more on-street parking spaces on Webster and/or 19th Streets with an in-street bicycle parking corral

Recommendation 5: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Install a bulb-out (curb-extension) with directional curb ramps at the northwest corner of the 19th Street/Webster Street intersection

Recommendation 6: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Explore the feasibility and if deemed feasible by City staff and not in conflict with the planned bicycle improvements along Franklin Street, and not installed by the proposed 415 20th Street Project, complete Recommendation 6 from the 415 20th Street TIR at the 19th Street/Franklin Street intersection:
 - Bulb-outs (curb extensions) at the northeast and southeast corners of the intersection to reduce pedestrian crossing distances
 - Directional curb-ramps with truncated domes on the northeast and southeast corners

Recommendation 7: While not required to address a CEQA impact, and at the discretion of City of Oakland staff, the following shall be considered as part of the final design:

- Consider increasing the yellow and/or red clearance intervals at the existing Franklin Street/19th Street intersection traffic signal
- B. *Telecommuting* – Encourage Project tenants to allow remote work, which can eliminate employee trips, at least one day per week.
- C. *Pre-tax Commuter Benefits* – Encourage Project tenants to enroll in WageWorks or other service to help with pre-tax commuter savings. This strategy allows employees to deduct monthly transit passes or other amount using pre-tax dollars. This can help to lower payroll taxes and allows employees to save on transit.
- D. *Transit Fare Subsidy* – Encourage Project tenants to provide free or reduced cost transit for their employees to increase transit mode share. Options include:
- Employers can offer a monthly commuter check (or alternatively Clipper Card, which is accepted by BART, AC Transit, and other major transit providers in the Bay Area) to employees to use public transit. Note that as of 2023, IRS allows up to \$300 per employee per month.⁴
 - Employers can participate in AC Transit’s EasyPass program, which enables employers to purchase annual bus passes for their employees in bulk at a deep discount. The passes allow unlimited rides on all AC Transit buses for all employees. For more information, see www.actransit.org/rider-info/easypass.

Based on the CAPCOA report, a transit fare subsidy of about \$3.00 per employee per weekday (value to rider and not cost to employer) available to 50 percent of the site employees would translate to up to approximately four percent VTR.

⁴ Department of the Treasury Internal Revenue Service, Publication 15-B, *Employer's Tax Guide to Fringe Benefits 2022*, page 20 (<https://www.irs.gov/pub/irs-pdf/p15b.pdf>)

- E. *Limited Parking Supply* - As shown in Tables 1 and 2, both Project Schemes are estimated to generate more than 300 vehicle trips during the AM and PM peak hours; however, the parking garage would only accommodate approximately 37 spaces under Scheme 1 which could increase to up to 75 spaces with parking lifts and about 158 spaces under Alternative Scheme 2 which could increase to up to 221 spaces with parking lifts, which is less than the peak hour demand. There are several other parking facilities in the vicinity that are open to the public and can be used by the Project employees and visitors if the Project parking facility is at capacity. Since most of these public parking facilities operated at or near capacity prior to the pandemic on most weekdays and the Project would increase the number of jobs in Downtown Oakland at a higher rate than the parking supply, it is expected that the project would result in a higher rate of workers in Downtown Oakland using non-automobile travel modes. Thus, this analysis assumes that the limited on-site parking supply would result in a 10 to 15 percent VTR.
- F. *Parking Management* – The Project shall implement the following:
- Charge for all off-street parking spaces unless noted in other strategies
 - Remove the cost of parking from the commercial lease agreements
 - Set the fee for monthly, daily, and/or hourly parking to be same as or higher than other nearby garages
- G. *Carpooling and Ride-Matching Assistance* – The building management shall offer personalized ride-matching assistance to pair employees interested in forming commute carpools. As an enhancement, building management may consider using specific services such as ComoVee, or 511.org RideShare.
- H. *Bicycle Amenities and Monitoring* – The Project would include long-term on-site parking in a secure bicycle room with an adjacent locker room and shower facility and short-term parking in the form of bike racks along the Project frontages. The Project shall monitor the usage of these facilities and provide additional bicycle parking, if necessary.
- I. *Guaranteed Ride home* – Encourage tenants to encourage employees to register for the Guaranteed Ride Home (GRH) program. Employees may be hesitant to commute by any other means, besides driving alone, since they lose the flexibility of leaving work in case of an emergency. GRH programs encourage alternative modes of transportation by offering free rides home in the case of an illness or crisis, if the employee is required to work unscheduled overtime, if a carpool or vanpool is unexpectedly unavailable, or if a bicycle problem arises. The Alameda County Transportation Commission offers a GRH

service for all registered permanent employees who are employed within Alameda County, live within 100 miles of their worksite, and do not drive alone to work. The GRH program is offered at no cost to the employer, and employers are not required to register for their employees to enroll and use the program.

- J. *TDM Coordinator* – Each tenant shall designate a staff person as their TDM coordinator to coordinate, monitor and publicize TDM activities. Building management shall also designate a “Building TDM coordinator.”
- K. *TDM Marketing and Education* – Building management shall provide tenants and employees information about various transportation options in the Project area and the TDM strategies provided by the building. This information would also be posted at central location(s) and be provided to each building employee. The information shall be updated, as necessary. Marketing strategies can promote alternative trips by making commuters aware of the options and incentives of using non-automobile transportation. Implementing commute trip reduction strategies with a complementary marketing strategy can increase the overall effectiveness of the program. This information shall include:
 - *Transit Routes* – Promote the use of transit by providing user-focused maps. These maps provide employees with wayfinding to nearby transit stops and transit-accessible destinations and are particularly useful for those without access to portable mapping applications.
 - *Real-time Transit Information System* – The Project should consider installing real-time transit information, such as TransitScreen, in a visible location in the main building lobby to provide employees and visitors with up-to-date transit arrival and departure times.
 - *Transit Fare Discounts* – Provide information about local discounted fare options offered by BART and AC Transit, including discounts for youth, elderly, persons with disabilities, and Medicare cardholders.
 - *Car Sharing* – Promote accessible car sharing programs, such as Zipcar, and Getaround by informing employees of nearby car sharing locations and applicable membership information.
 - *Ridesharing* – Provide employees with phone numbers and contact information for ride sharing options including Uber, Lyft, and Oakland taxicab services.

- *Carpooling* – Provide employees with phone numbers and contact information for carpool matching services such as the Metropolitan Transportation Commission’s 511 RideMatching.
- *Walking and Biking Events* – Provide information about local biking and walking events, such as Oaklavia, as events are planned.
- *Bike-share/Scooters* – Educate employees about nearby bike sharing station locations (nearest Bay Wheels bike-share station is about 0.1 miles north of the Project site northeast of the Project on the east side Harrison Street just south of 20th Street, adjacent to Snow Park) and membership information and dock-less bike-share/ scooters.
- *Bay Area Commuter Benefits Program* – Building management shall provide information on the Bay Area Commuter Benefits Program to all building tenants. As of September 30, 2014, Bay Area employers with 50 or more full-time employees within the Bay Area Air Quality Management District (Air District) geographic boundaries are required to register and offer commuter benefits to their employees in order to comply with Air District Regulation 14, Rule 1, also known as the Bay Area Commuter Benefits Program. Employers must select one of four Commuter Benefit options to offer their employees: a pre-tax benefit, an employer-provided subsidy, employer-provided transit, or an alternative commute benefit. (Information about Commute Benefits Program is at 511.org/employers/commuter/overview.)

Additional TDM Strategies

The project should consider the implementation of some or all the following additional strategies to limit automobile use and encourage non-automotive travel. If the mandatory TDM strategies do not meet the required goals, the implementation of some or all these measures may become necessary.

- L. *Required Transit Subsidy* – Require all tenants to provide a transit subsidy to employees. Alternatively, the building management can include a specific number of transit passes with each lease agreement.
- M. *Increased Parking Fees* – Increase the cost of on-site parking to further discourage site employees from driving.
- N. *Bike-Share/Scooter-Share Membership* – Encourage increased usage of bike-share and/or scooter-share by encouraging tenants to fully or partially pay for employees’ yearly membership fee and insurance associated with bike-sharing.

- O. *Car-Share Membership* – Encourage project tenants to provide free/subsidized car-share membership to their employees.
- P. *Provide a Bike-Share Station* - Coordinate with City of Oakland, and/or other regional agencies to facilitate the installation of a BayWheels bike-share station near the Project frontage.
- Q. *Personalized Trip Planning* – In the form of in-person assistance or as a web tool, this provides employees with a customized menu of options for commuting. Trip planning reduces the barriers employees see to making a walk, bike, or transit trip to the site. Transit trip making tools, such as those available from Google or 511.org, could be promoted to inform employees of transit options to/from work. Providing a map of preferred walking routes to destinations within one mile of the site and a map of bicycling routes within five miles of the site would be a proactive strategy to encourage those individuals to use alternatives to driving. Carpooling can be encouraged by conducting surveys and/or mapping exercises and connecting employees who are traveling from similar origins. The Project can make regular presentations to employees upon request or at set times.

Monitoring, Evaluation and Enforcement

Since the Project would generate more than 100 peak hour trips, this TDM program requires regular periodic evaluation of the program to determine if the program goals in reducing automobile trips are satisfied and to assess the effectiveness of the various strategies implemented. The Project shall submit an annual compliance report for the first five years following completion of the project for review and approval by the City. The annual report shall document the following:

- Summary of implemented TDM measures and their effectiveness (e.g., bicycle parking occupancy, number of transit passes issued, etc.)
- Results of Project employee transportation survey to monitor the vehicle trip generation and mode share for Project employees
- Weekday AM and PM peak period and daily traffic volume counts at the garage driveway(s)

If deemed necessary, the City may elect to have a peer review consultant, paid for by the Project, review the annual report. If timely reports are not submitted and/or the annual reports indicate that the Project has failed to implement the TDM Plan, the Project will be considered in violation of the Conditions of Approval and the City may initiate enforcement action as provided for in the

Project Conditions of Approval. The Project shall not be considered in violation of this Condition if the TDM Plan is implemented but the VTR goal is not achieved.

If in two successive years the project's TDM goals are not satisfied, Project shall implement additional TDM measures. If in five successive years the project is found to meet the stated TDM goal, additional surveys and monitoring shall be suspended until such a time as the City deems they are needed.

Please contact Sam Tabibnia (s.tabibnia@fehrandpeers.com, 510.835.1943) with questions or comments.

Appendix A: TDM Program Consistency with City Requirements

TDM Strategy	Required When	Required for Project?
Bus boarding bulbs or islands	<ul style="list-style-type: none"> A bus boarding bulb or island does not already exist and a bus stop is located along the project frontage; and/or A bus stop along the project frontage serves a route with 15 minutes or better peak hour service and has a shared bus-bike lane curb 	Not applicable. The Project does not have a bus stop along the project frontage.
Bus Shelter	<ul style="list-style-type: none"> A stop with no shelter is located within the project frontage, or The project is located within 0.10 miles of a flag stop with 25 or more boardings per day 	Not applicable. The Project does not have a bus stop along the project frontage.
Concrete Bus Pad	<ul style="list-style-type: none"> A bus stop is located along the project frontage and a concrete bus pad does not already exist 	Not applicable. The Project does not have a bus stop along the project frontage.
Curb Extensions or bulb-outs	<ul style="list-style-type: none"> Identified as an improvement within site analysis 	Yes, the Project may provide bulb-outs at the 19th Street/ Webster Street and/or 19th Street/Franklin Street intersection (TIR Recommendations 5 and 6).
Implementation of Corridor-Level Bikeway Improvement	<ul style="list-style-type: none"> A buffered Class II or Class IV bikeway facility is in a local or county adopted plan within 0.10 miles of the project location; and The project would generate 500 or more daily bicycle trips 	No, the Project would not generate 500 or more daily bicycle trips
Implementation of Corridor-Level Transit Capital Improvement	<ul style="list-style-type: none"> A high quality transit facility is in a local or county adopted plan within 0.25 miles of the project location; and The project would generate 400 or more peak period transit trips 	No, the Project would not generate 400 or more peak period transit trips.
Installation of amenities such as lighting; pedestrian oriented green infrastructure, trees, or other greening landscape; and trash receptacles per the Pedestrian Master Plan and any applicable streetscape plan.	<ul style="list-style-type: none"> Always required 	Yes, the Project would upgrade the pedestrian amenities adjacent to the site

TDM Strategy	Required When	Required for Project?
Installation of safety improvements identified in the Pedestrian Master Plan (such as crosswalk striping, curb ramps, count down signals, bulb outs, etc.)	<ul style="list-style-type: none"> When improvements are identified in the Pedestrian Master Plan along project frontage or at an adjacent intersection 	Not Applicable. No safety improvement identified in the Pedestrian Master Plan.
In-street bicycle corral	<ul style="list-style-type: none"> A project includes more than 10,000 square feet of ground floor retail, is located along a Tier 1 bikeway, and on-street vehicle parking is provided along the project frontages. 	No, the Project does not provide more than 10,000 square feet of ground floor retail.
Intersection improvements	<ul style="list-style-type: none"> Identified as an improvement within site analysis 	Yes, the Project may provide crossing improvements at the at the 19th Street/Webster Street and/or 19th Street/Franklin Street intersection (TIR Recommendations 5, 6 and 7).
New sidewalk, curb ramps, curb and gutter meeting current City and ADA standards	<ul style="list-style-type: none"> Always required 	Yes, the Project would upgrade the sidewalks along Project frontage.
No monthly permits and establish minimum price floor for public parking	<ul style="list-style-type: none"> If proposed parking ratio exceeds 1:1,000 sf (commercial) 	Not applicable. The Project parking ratio would not exceed 1:1,000 sf under both Project Schemes.
Parking garage is designed with retrofit capability	<ul style="list-style-type: none"> Optional if proposed parking ratio exceeds 1:1.25 (residential) or 1:1000 sf (commercial) 	Not applicable. The Project parking ratio would not exceed 1:1,000 sf under both Project Schemes.
Parking space reserved for carshare	<ul style="list-style-type: none"> A project is located within downtown. One car share space preserved for buildings between 50 – 200 units, then one car share space per 200 units. 	No, the Project is not required to dedicate reserved space for carshare. In addition, Project parking facility would not be open to the general public.
Paving, lane striping or restriping (vehicle and bicycle), and signs to midpoint of street section	<ul style="list-style-type: none"> Typically required 	Yes, the Project would update the paving and striping along the Project frontage to the midpoint of the street section.

TDM Strategy	Required When	Required for Project?
Pedestrian crossing improvements, pedestrian supportive signal changes	<ul style="list-style-type: none"> Identified as an improvement within site analysis Identified as an improvement within operations analysis 	Yes, the Project may upgrade intersection crossings at the 19th Street/Webster Street and/or 19th Street/Franklin Street intersection (TIR Recommendation 5, 6 and 7).
Real-time transit information system	<ul style="list-style-type: none"> A project frontage block includes a bus stop or BART station and is along a Tier 1 transit route with 2 or more routes or peak period frequency of 15 minutes or better 	No, the Project is not adjacent to a bus stop or a BART Station.
Relocating bus stops to far side	<ul style="list-style-type: none"> A project is located within 0.10 mile of any active bus stop that is currently near-side 	Not applicable. The Project does not have a bus stop along the project frontage.
Signal upgrades	<ul style="list-style-type: none"> Project size exceeds 100 residential units, 80,000 sf of retail, or 100,000 sf of commercial; and Project frontage abuts an intersection with signal infrastructure older than 15 years 	No, Project does not abut an intersection with a qualifying signal.
Transit queue jumps	<ul style="list-style-type: none"> Identified as a needed improvement within operations analysis of a project with frontage along a Tier 1 transit route with 2 or more routes or peak period frequency of 15 minutes or better 	Not applicable. The Project does not have a bus stop along the project frontage.
Trenching and placement of conduit for providing traffic signal interconnect	<ul style="list-style-type: none"> Project size exceeds 100 units, 80,000 sf of retail, or 100,000 sf of commercial; and Project frontage block is identified for signal interconnect improvements as part of a planned ITS improvement; and A major transit improvement is identified within operations analysis requiring traffic signal interconnect 	No, Project frontage block is not identified for signal interconnect and no major transit improvements are identified.
Unbundled parking	<ul style="list-style-type: none"> If proposed parking ratio exceeds 1:1.25 (residential) 	Not applicable. The Project is not residential
