Vitaly Troyan, PWA Director

Re: Biannual Curb Ramp Activities Report: July 1, 2011 to December 31, 2011

INTRODUCTION

This report provides detailed information about City of Oakland curb ramp activities for the six-month period beginning July 1, 2011 and ending December 31, 2011. The report provides updates on implementation of the City's ADA Curb Ramp Transition Plan and construction or reconstruction of curb ramps by the City and others. The Public Works Agency (PWA), Department of Engineering and Construction (DEC), administers City curb ramp programs. The City ADA Coordinator and Mayor's Commission on Persons with Disabilities (MCPD) provide direct support, technical assistance, and oversight for PWA right-of-way access compliance programs.

BACKGROUND

ADA Title II regulations stipulate that when structural changes to facilities are necessary to achieve program accessibility, a public entity that employs 50 or more persons must develop, within six months of January 26, 1992, a transition plan setting forth the steps necessary to complete such changes. That plan is to identify physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities; describe in detail the methods that will be used to make the facilities accessible; specify the schedule for taking the steps necessary to achieve compliance; and indicate the official responsible for implementation of the plan. In January 1996, the City prepared its transition plan with respect to buildings and facilities.

If a public entity has responsibility or authority over streets, roads, or walkways, then its ADA transition plan must include a schedule for providing curb ramps or other sloped areas where pedestrian walks cross curbs, giving priority to walkways serving entities covered by the ADA, including State and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas [28 C.F.R. § 35.150(d)(2)].

The 1996 Buildings and Facilities Transition Plan included curb ramp needs for off-street facilities and priorities for curb ramp installation at existing street corners. The Buildings and Facilities Transition Plan incorporated by reference a citywide curb ramp survey completed in 1994. Another citywide curb ramp survey was completed in 2002. The City operated robust curb ramp programs from 1996 to 2007 but no formal changes were made to the 1996 Plan. Pursuant to *Fairfield v. Oakland* (2007), the ADA Programs Division developed a separate ADA Curb Ramp Transition Plan to formalize long-standing curb ramp policies, practices and procedures and to adopt new ones as necessary to substantially comply with federal mandates.

Soon after passage of the ADA, the City recognized that it would take some time to complete a curb ramp transition plan, which requires construction of ramps at approximately 18,047 locations (current total). Curb ramp locations are counted individually. Certain street corners will accommodate dual (two) directional ramps and will be counted as two locations. Other street corners will accommodate only one diagonal or directional ramp and will be counted as one location. The total number of possible curb ramp locations increases when existing diagonal curb ramps are replaced with dual directional ramps; when newly improved streets are added to the City's curb ramp database; and when corrections and updates are made to the original database.

In Fiscal Year 1990-91, the City launched the On-Call Curb Ramp Program to ensure access for people with disabilities living and working in Oakland during the lengthy transition period. The Program is currently funded by the City's general fund and state gas tax funds. The On-Call Curb Ramp Program constructs curb ramps on an individual basis in response to requests from qualified persons with disabilities. Generally, requests come from residents with disabilities who wish to get from their home or work place to transportation, school, medical facilities or other areas to accommodate their activities of daily living. This program installed approximately 1,074 curb ramps from 1991 to 2010 (July).

Under the Curb Ramp Transition Plan, the City commits to install 500 curb ramps, and anticipates that others will install 150 curb ramps, on an average annual basis. The City conducts curb ramp infill activities using a corridor-based approach. The following location (land use) priorities for curb ramp infill activities are based upon U.S. Department of Justice ADA Title II Regulations, the City of Oakland General Plan (1998), and best practices of other jurisdictions:

Tier 1: Transit streets and centers

Tier 2: Public facilities

Tier 3: Privately-owned public accommodations

Tier 4: Locations that do not fall into any of the above groups but are within 100 feet of a sidewalk route.

Tier 5: Locations that do not fall into any of the above groups and are greater than 100 feet from a sidewalk route. These locations are neither counted as "possible locations" nor scheduled for improvement.

The City conducts various other capital improvement programs under which curb ramps are constructed or reconstructed, such as streetscape, street resurfacing, and sidewalk repair projects. Curb ramp construction and reconstruction is also completed through private improvements inspected by City staff.

STATUS REPORTS

Curb Ramp Transition Plan Development

The PWA / Right of Way Access Coordinator has drafted curb ramp scoping, design and construction standards that will be applicable to all public right of way improvements under the City's jurisdiction, including work performed by the City and by others (private developers, utility companies, etc.). The ROW Access Coordinator will bring the draft curb ramp standards forward to the MCPD for review (date to be determined). Once finalized, these standards will be posted on the City website.

Table 1: Citywide Curb Ramp Status All Locations

The following is the summary status of the Citywide Curb Ramp Program through December 31, 2011. These numbers may not reflect current field conditions or include all curb ramps constructed or reconstructed to date. Surveying and data collection is ongoing.

	June 2011 Quantity	Change	Dec 2011 Quantity	Dec 2011 % of Total Locations
Compliant Curb Ramp Locations	6,835	289	7,124	40%
Outdated Curb Ramp Locations	3,035	(273)	2,762	15%
No Curb Ramp Locations	8,092	0	8,092	45%
Total Locations	17,962	16	17,978	100%

NOTE: Table 1, above, provides the most up-to-date information available to Public Works Department of Engineering and Construction as of the date of this report. Quantities of curb ramps as of June 2011 provided in Table 1 and the attached Citywide Curb Ramp Program Update Map as of December 31, 2011 supersede quantities provided in the prior Curb Ramp Activities Report / map for March 1 –June 30, 2011. Certain inaccuracies in the map/ report are corrected here.

Table 2: Summary of Curb Ramps Constructed or Reconstructed Annually

Fiscal Year	City	Others	Total
2008-2009	300	216	566
2009-2010	435	140	575
2010-2011	553	6	559
2011-2012	289	0	289

NOTE: The total curb ramps reported in the above Table 2 represent confirmed locations. There is typically a lag time between the time curb ramps are constructed and the time they are reported. In addition, the number of curb ramps reported by others represents constructed locations by private development, which is impacted by the current economic downturn.

Table 3: Citywide Curb Ramps Constructed (July 2011 – December 2011)

Fund #	Project #	Project Description	# of Ramps Proposed	# of Ramps Built	# of Ramps Built this period (July 11 - Dec 11)	Unit Cost	Curb Ramp Budget	Start Date	Program Type
