

Sediment control

- Used when sediment could be mobilized by rain or by non-stormwater discharges
- “Backup” control to other source control measures like erosion control or materials management

It is easier to keep sediment out of water
than to get sediment out of water

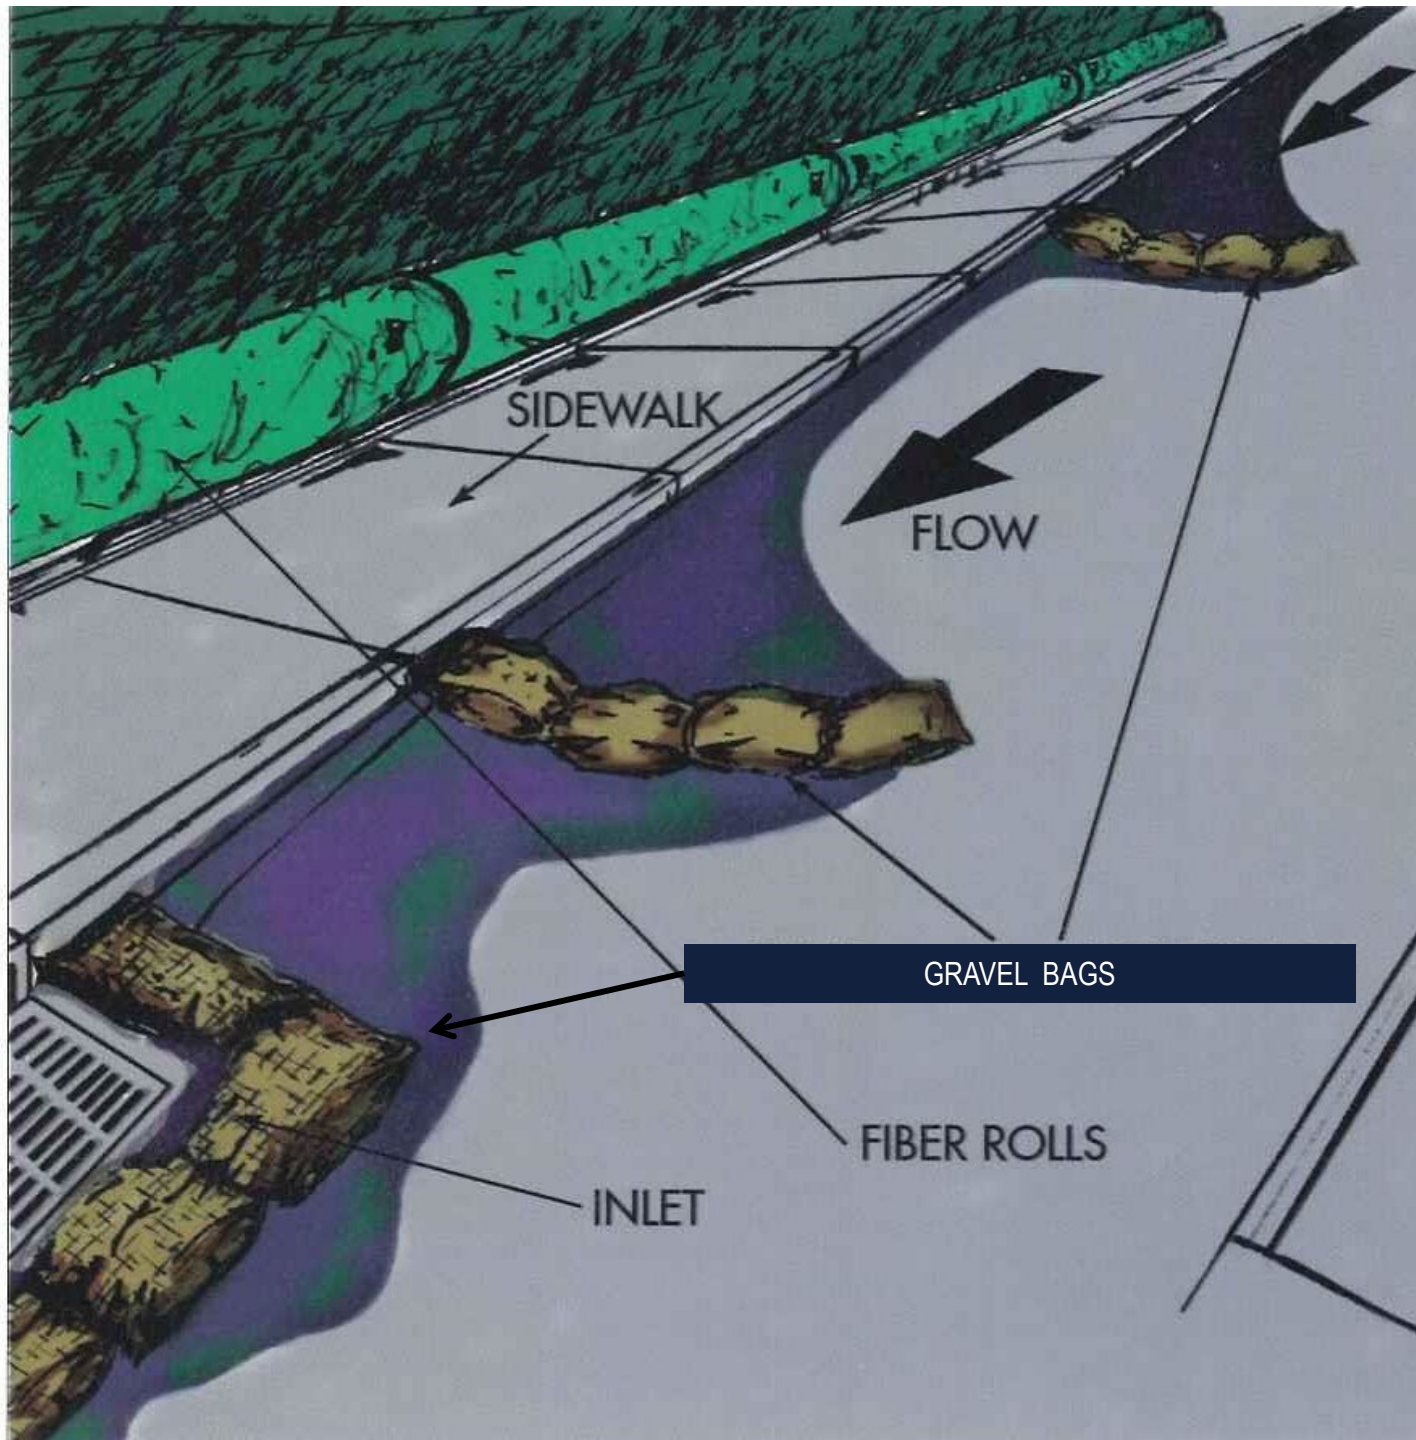

Gravel bag protection of a catch basin

TYPICAL PROTECTION FOR INLET ON SUMP

- Gravel bag protection around a drop inlet

- Gravel bag treatment train

Examples of a catch basin filter bags

Example of storm drain filter protection
