

# ENVIRONMENTAL JUSTICE ELEMENT APPENDICES

**Public Review Draft**

**March 2023**

The background of the page is a vibrant green color with a complex, abstract pattern of white, curved, and wavy lines that create a sense of movement and depth. A solid blue rectangular box is positioned in the upper left quadrant, containing the title text in white, bold, sans-serif font.

Note: Neighborhood names are based on those used in the Lead Paint Hazards REIA (2021), with some modifications to describe the neighborhood geographically.

**Table AA-2: EJ Communities Screening Indicators Data Dictionary**

INDICATOR	DESCRIPTION	SOURCE
<b>RACE AND POVERTY</b>		
<b>Race</b>		
People of Color <sup>1</sup>	Percentage of non-white, non-Hispanic/Latinx population in tract	2019 American Community Survey (ACS) 5-Year Estimates Table DP05
Redlining	Score based on HOLC redlining map grades: A=1, B=2, C=3, D (redlined)=4, population-weighted tract average	HCD Affirmatively Furthering Fair Housing Data and Mapping Resources Database 2021
<b>Very Low Income</b>		
Very-Low-Income Households <sup>1</sup>	Percentage of households in a tract that make 30% or less than the HUD Area Median Family Income (HAMFI).	US Dept. of Housing and Urban Development (HUD) Comprehensive Housing Affordability Strategy (CHAS) 2015-2019
<b>POLLUTION BURDEN</b>		
<b>Air Quality</b>		
Particulate Matter 2.5	Concentration of Particulate Matter 2.5 (2018), average of 1-km grid cell centers within the tract	Bay Area Air Quality Management District (BAAQMD) 2021, Dyett & Bhatia (D&B)
Diesel Particulate Matter	Concentration of Diesel Particulate Matter (2018), average of 1-km grid cell centers within the tract	BAAQMD 2021, D&B
Traffic Density	CES 4.0 raw score for Traffic Density	CalEnviroScreen 4.0
Toxic Releases	CES 4.0 raw score for Toxic Releases	CalEnviroScreen 4.0
<b>Water</b>		
Groundwater Threats	CES 4.0 raw score for Groundwater Threats	CalEnviroScreen 4.0
Impaired Water Bodies	CES 4.0 raw score for Impaired Water Bodies	CalEnviroScreen 4.0
<b>Hazardous Materials</b>		
Cleanup Sites	CES 4.0 raw score for Cleanup Sites	CalEnviroScreen 4.0
Hazardous Waste	CES 4.0 raw score for Hazardous Waste	CalEnviroScreen 4.0
Solid Waste	CES 4.0 raw score for Solid Waste	CalEnviroScreen 4.0

INDICATOR	DESCRIPTION	SOURCE
Proximity to Industrial Zones	Average proximity (in meters) to the nearest industrial zoning district, population-weighted	City of Oakland 2021, D&B
<b>CLIMATE CHANGE</b>		
Heat Health Events Max Temperature	Projected average maximum temperature during future Heat Health Events (HHEs) occurring between September and October, 2021-2040	California Natural Resources Agency (CNRA) California Heat Assessment Tool (CHAT) 2015
Energy Cost Burden	Tract average of total energy costs (including electricity, gas, and other fuel) as a ratio of household income, population weighted	US Dept. of Energy 2018, D&B
Sea Level Rise	Percent of population living in 100-year flood zone and 66 inches of sea level rise.	City of Oakland 2021, D&B
<b>SENSITIVE POPULATIONS</b>		
<b>Health</b>		
Asthma Emergency Department Visits	CES 4.0 raw score for Asthma	CalEnviroScreen 4.0
Low Life Expectancy at Birth	Life expectancy at birth in months, as a negative value	Alameda County Public Health Department (ACPHD) 2021
Low Birth Weight	CES 4.0 raw score for Low Birth Weights	CalEnviroScreen 4.0
Mortality, NO2 Attributable	Percentage of annual deaths attributable to exposure to NO2, population-weighted tract average of census block groups	EDF 2021
Cardiovascular Disease	CES 4.0 raw score for Cardiovascular Disease	CalEnviroScreen 4.0
Cancer	Prevalence of adults diagnosed with cancer (except skin)	CDC PLACES 2020
Lack of Health Insurance	Percentage of adults <65 who do not have health insurance	CDC PLACES 2020
<b>Socioeconomic</b>		
Linguistic Isolation	CES 4.0 raw score for Linguistic Isolation	CalEnviroScreen 4.0
Low Educational Attainment	CES 4.0 raw score for Educational Attainment	CalEnviroScreen 4.0
Population with Disability	Percentage of population with one or more disabilities	2019 ACS 5-Year estimates Table C18108
Young Children	Percent of population who are 5 years of age or younger	2019 ACS 5-Year estimates Table B01001

INDICATOR	DESCRIPTION	SOURCE
Older Adult Population	Percentage of population who are 65 years or older	2019 ACS 5-Year estimates Table B01001
Low Median Household Income	Tract median household income, as a negative value <sup>2</sup>	2019 ACS 5-Year estimates Table B19013
Unemployment	CES 4.0 raw score for Unemployment	CalEnviroScreen 4.0
Disconnected Youth	Percentage of population ages 16-24 not enrolled in school	2019 ACS 5-Year estimates tables B14003 and B14005
Lack of Internet Access	Percentage of households without internet subscription	2019 ACS 5-Year estimates Table B28002
<b>BUILT ENVIRONMENT</b>		
<b>Transportation</b>		
Road Safety	Number of crashes (traffic accidents, all modes and including both fatal/severe and non-severe) from 2016-2020 per mile of streets	SafeTREC Transportation Injury Mapping System (TIMS) 2022, D&B
Low Active Commutes	Percentage of workers who do not commute by biking or walking	2019 ACS 5-Year estimates Table B08301
Extreme Commutes	Percentage of workers who commute 90+ minutes to work	2019 ACS 5-Year estimates Table B08303
Lack of Transit Access	Frequency of Peak Hour (weekday 4-7pm) Transit Service per capita, population-weighted tract average, as a negative value <sup>2</sup>	EPA SmartLocation Database 3.0 2021
<b>Food</b>		
SNAP Food Assistance	Percentage of households receiving SNAP food assistance	US Department of Agriculture Food Access Research Atlas 2019
Low Food Access	Percentage of population living beyond 1/2 mile of a supermarket/supercenter/large grocery store	City of Oakland 2021, D&B
Farmers Markets	Average distance (in meters) to nearest farmers market, population-weighted	California Dept. of Food and Agriculture 2022, D&B
Lack of Community Gardens	Average distance (in meters) to nearest community garden, population-weighted	City of Oakland 2021, D&B
Free or Reduced Price Meal	Percentage of enrolled students receiving free or reduced price meals (FRPM), averaged over 2017-2021 school years. Calculated based on the nearest school and weighted by number of enrolled students per census block group.	California Dept. of Education 2022, D&B
<b>Housing</b>		

INDICATOR	DESCRIPTION	SOURCE
Housing Habitability	Code enforcement complaints (zoning, blight, housing habitability, 2020) per 1,000 tract residents	City of Oakland 2021, D&B
Lead Risk	CES 4.0 raw score for Children's Lead Risk from Housing	CalEnviroScreen 4.0
Incomplete Facilities	Percentage of households in a census tract that lack complete kitchen or plumbing facilities	HUD CHAS 2015-2019
House Heating	Percentage of households without heating fuel	2019 ACS 5-Year estimates Table B25040
Overcrowding	Percentage of households with more than one occupant per room	2019 ACS 5-Year estimates Table B25014
Housing Burden	CES 4.0 raw score for Housing Burden	CalEnviroScreen 4.0
Evictions	Total number of evictions between 2000-2016 per renter, renter-weighted tract average	Eviction Lab 2018, D&B
<b>Green Space</b>		
Lack of Tree Canopy	Lack of tree canopy coverage (percent area without tree canopy), population-weighted tract average	NLCD 2019 (Tree Canopy Coverage 2016), D&B
Low Park Access	Number of housing units that are not within a 10-minute (half-mile) walk of a park	Trust for Public Land 2022, City of Oakland 2021, D&B
<b>Neighborhood Disinvestment</b>		
Lack of Community Facilities	Number of community facilities (libraries, senior centers, daycare centers, schools, recreation centers) per 1,000 population, as a negative value <sup>2</sup>	City of Oakland 2021, D&B
Public Safety	Number of violent crimes (aggravated assault, homicide, rape, and other sex offenses) between 2016-2020 per 1,000 population	Oakland Police Department (OPD) CrimeWatch 2020, D&B
Illegal Dumping	OAK 311 Service calls for illegal dumping per 1,000 tract residents	City of Oakland 2021, D&B
<p>1. 1. These indicators are both topics and individual indicators (same scores) because there is only one indicator for these topics.</p> <p>2. "As a negative value" means that the raw score was multiplied by -1 to reverse the ordering of the values so that the higher values (in this case, closer to zero) correspond with more burden/impact, which is consistent across all indicators.</p>

12.Note: Bolded and highlighted census tracts are EJ Communities. Scores greater than or equal to 0.75 are in the top 25%.

13.\* Indicates census tract with low population.

14. 1. These indicators are both topics and individual indicators (same scores) because there is only one indicator for these topics. Because the scores are the same, these indicators do not appear in the following individual indicator tables.

**Table AA-16: Scores for All Tracts — Race and Pollution Burden Indicators**

21.Note: Bolded and highlighted census tracts are EJ Communities. Scores greater than or equal to 0.75 are in the top 25%.

22. \* Indicates census tract with low population.

The background of the page is a vibrant green color with a complex, abstract pattern of white, curved, and wavy lines that create a sense of movement and depth. These lines vary in thickness and curvature, some forming concentric arcs while others are more chaotic and overlapping. A solid blue rectangular box is positioned on the left side of the page, containing the main title and subtitle in white text.

# APPENDIX B: METHODOLOGIES OF ANALYSIS

FROM EJ AND RACIAL  
EQUITY BASELINE REPORT,  
MARCH 2022

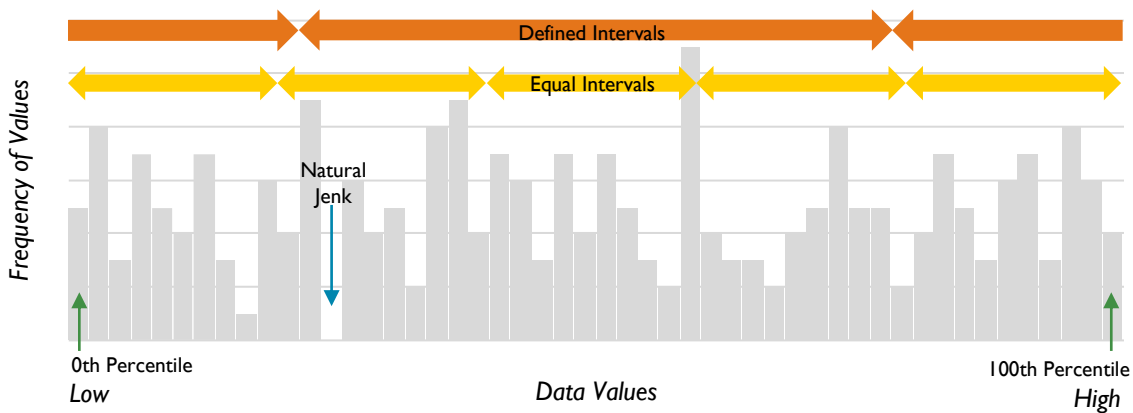

# Appendix B: Methodologies of Analysis

This appendix describes the methodologies used to analyze data and create charts referenced in the Environmental Justice Element, as also used in the Environmental Justice and Racial Equity baseline (published in March 2022).

## MAP SYMBOLIZATION OF QUANTITATIVE DATA

The following approaches describe different ways to divide up numerical data. Each looks at how data is distributed (such as in **Figure AB-1** below) to create groups. Different maps may use different approaches based on what is most appropriate for that dataset, as well as use a different number of groups.

**Figure AB-1: Data Partitioning Methods**

### NATURAL JENKS

“Jenks” are breaks or divisions, and “natural jenks” refer to thresholds where data naturally drops off. For example, the blue arrow in Figure A-3 shows where a gap in the distribution of data might be a good place to define a certain group.

### QUANTILES

“Percentiles” are commonly used to rank data based on their relative position or score among the other scores. Typically, percentiles range from zero to 100 (shown with green arrows in Figure A-3), and a 50th percentile score would represent the median value. “Quantiles” refer to the number of groups created from percentiles. For example, quartiles are four groups (i.e., 0-25, 26-50, 51-75, 76-100), and deciles are 10

groups (i.e., 0-10, 11-20, 21-30, etc.). Quantiles are a good approach for when the data should be put into equally sized groups.

## **EQUAL AND DEFINED INTERVALS**

“Intervals” refer to the partitions of a dataset and are good for when there is already structure for how the data should be divided. The sizes of the groups themselves can vary widely, based on the data.

Equal intervals divide up the range of data into an equal number of groups. For example, if a list of 25 last names was alphabetized (i.e., A to Z) and divided into four groups, there might be five people between A and G, ten people between H and M, seven between N and S, and three T and Z. The intervals are equal, even if the sizes of the groups are not.

Defined intervals break up the data based on a defined range of values. This differs from equal intervals because a defined interval may extend beyond the minimum and maximum values of the dataset. For example, if a group of adults (ages 18 and older) was asked to sit at a table based on their age and each table included a 10-year range, there would be a table for ages 10 and under, but no adults would sit at this table.

## **DATA ANALYSIS BY RACE**

### **RACIAL CONCENTRATION TYPOLOGIES**

*Rules, in order of consideration:*

1. Any group 50% or more is “majority”
2. If two groups together constitute 80% or more of the tract population, those two groups are the (2-group) mixed majority
  - 2-group mixed are labeled in alphabetical order of groups, not by concentration. (see examples)
  - Where 2 groups do not add up to 80% but there is no additional group that meets the 10% or 15% threshold (rule #3 below), that tract is a 2-group majority. (see examples 3 and 4)
3. A concentration greater than 10% (11% or more) is considered a substantial concentration, except for White, which is substantial above 15% (16% or more).
4. Where the “2 or more races” category is greater than 10%, that tract is “Mixed” (even if there are only 2 other concentrations - see example 8).
  - Before 1980, when only Black, White, and Other populations are distinguished, the tract is “Mixed” if there is a substantial/majority concentration of “Other” (see example 9)

- Beyond “3 Group Mixed,” tract is considered diverse, and label is simplified to “Mixed”

Examples:

- 19% White, 51% Black, 20% Asian, 10% Hispanic/Latinx is “Majority Black”
- 42% White, 38% Black, 11% Asian, 7% Hispanic/Latinx, and 2% balance is “Black and White”
- 29% White, 49% Black, 6% Asian, 10% Hispanic/Latinx, and 5% balance is “Black and White”
- 29% White, 47% Black, 7% Asian, 8% Hispanic/Latinx, and 9% balance is “Black and White”
- 40% White, 38% Black, 11% Asian, 7% Hispanic/Latinx, and 4% balance is “3 Group Mixed”
- 15% White, 40% Black, 35% Asian, 10% Hispanic/Latinx is “Asian and Black”
- 30% White, 28% Black, 22% Asian, 14% Hispanic/Latinx, and 6% balance is “Mixed”
- 29% White, 40% Black, 5% Asian, 9% Hispanic/Latinx, 14% 2+ races, and 2% balance is “Mixed”
- 1950: 48% White, 20% Black, 33% Other is “Mixed”

## CENSUS TRACT RACIAL PLURALITIES

Racial pluralities (majority/greatest concentration or share of population) were assigned to each census tract based on demographic census information (2015-2019 ACS). For example, a tract with 52% white population is a white plurality. Even if the greatest concentration is not a majority (i.e., 50% or greater), the tract is assigned to that maximum concentration. **Table AB-1** below shows the pluralities determined for each tract that intersects with the City of Oakland.

**Table AB-1: Census Tract Racial Pluralities by 2019 Population**

TRACT	PLURALITY	HISPANIC/ LATINX	NON-HISPANIC/LATINX						
			WHITE	BLACK/ AFRICAN AMERICAN	ASIAN	HAWAIIAN/ PACIFIC ISLANDER	NATIVE AMERICAN/ ALASKAN	OTHER RACE	2 OR MORE RACES

## CODE ENFORCEMENT COMPLAINTS BY RACE WITHIN CENSUS BLOCK GROUPS

*This methodology was used because complaints data is anonymous and is not given by race.*

Code enforcement complaints data is available as geolocated points, which are associated with certain parcels. Points were summarized by type of complaint (i.e., blight, housing habitability, or zoning) and the census block groups within which they are located. Using racial pluralities (see above) by census block group, the number of complaints was then tallied to compare the share of complaints by race with the share of the population.

## DATA BY RACE WITHIN CENSUS TRACTS

*For data available at the census tract level for which the data itself is not given by race.*

The same methodology described above, except using census tract geography and information from ACS 2015-2019, was used.

## COMPARISON WITH ALL-TRACT AVERAGE BY RACE

*This methodology was used in favor of data by race within census tracts because the underlying data already represents a prevalence (rate), rather than raw counts (number of people).*

Similar to the methodology described above, census tracts were assigned by racial plurality. The average across all census tracts was determined as a baseline for comparing tract averages by race (i.e., tract plurality). Tracts were then separated by racial plurality then averaged for each group. The ratio of the plurality's average over the all-tract average was calculated, then subtracted from the all-tract average to show the difference.
