Attachment A

Commercial and Military Airport Safety Zones

There are no commercial airports within 1,500 feet of the project site, and no military airports within 2,500 feet of the project site. The nearest commercial airport is Oakland International Airport, approximately 4.5 miles to the south. The nearest military airport is Moffett Federal Airfield in Santa Clara County, approximately 30 miles to the south.

**Subject: Phase I Environmental Site Assessment
Lake Merritt BART Development
Oakland, California
Langan Project: 750650002**

Dear Mr. Goodman:

Langan Engineering and Environmental Services, Inc. (Langan) is pleased to submit this Phase I Environmental Site Assessment (ESA), for the Lake Merritt Bay Area Rapid Transit (BART) Development located at 800 Madison Street, 101 8th Street and 2-98 9th Street in Oakland, California.

In performing this Phase I ESA, we have endeavored to observe the degree of care and skill generally exercised by other consultants undertaking similar studies at the same time, under similar circumstances and conditions, and in the same geographical area.

The undersigned declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in #312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. We have developed and performed the all appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

We appreciate the opportunity to assist you with this project. If you have any questions or need any information clarified, please call Ms. Wendy Kwong at (415) 955-5200.

Sincerely yours,
Langan Engineering and Environmental Services, Inc.

Wendy Kwong
Staff Scientist

PHASE I ENVIRONMENTAL SITE ASSESSMENT
Lake Merritt BART Development
San Francisco, California

E1.0 EXECUTIVE SUMMARY

Langan Engineering and Environmental Services, Inc. (Langan) has performed a Phase I Environmental Site Assessment (ESA) for Lake Merritt Bay Area Rapid Transit (BART) Development located at 800 Madison Street, 101 8th Street, and 2-98 9th Street in Oakland, California (Figure 1). The ESA was performed on behalf of Strada Investment Group (Client and User) and East Bay Asian Local Development Corporation (User) to assist them with their environmental due diligence regarding their ground lease and entitlements of the Property.

This Phase I ESA was conducted in substantial conformance with the American Society for Testing and Materials (ASTM) Practice E1527-13 (Standard Practice for ESA: Phase I ESA Process), and the United States Environmental Protection Agency's (USEPA) 2006 All Appropriate Inquiry (AAI) Rule (40 CFR Part 312) now in effect. Completion of a Phase I ESA in accordance with the ASTM Practice and AAI Rule is needed to qualify for the bona fide prospective purchaser liability protections available under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA). The objective of this Phase I ESA was to identify the presence or likely presence, use, or release on the Property of hazardous substances or petroleum products as defined in ASTM E1527-13 as a recognized environmental condition (REC).

E1.1 Site Description

The Property is comprised of two sites, hereafter referred to as Site 1 and Site 2. Site 1, (Assessor's Parcel Number [APN]: 001-0169-001), is approximately 200 by 300 feet in plan dimension. Site 1 is bound by Fallon Street on the southeast, 8th Street on the southwest, Oak Street on the northwest, and 9th Street on the northeast. A BART tunnel crosses below Site 1, and the eastern limit of the underground Lake Merritt BART station is beneath the western portion of Site 1. At street level, the site is currently a plaza with BART entrances above the underground station, and an asphalt-paved BART parking lot over the remainder of the block.

Site 2 (APN: 001-0171-002) is approximately 240 by 330 feet in plan dimension. Site 2 is bound by Oak Street on the southeast, 7th Street on the southwest, Madison Street on the northwest,

and 8th Street on the northeast. Site 2 is south to southwest of the Lake Merritt BART station. The northern portion of Site 2 is occupied by a multi-story office building with a below-grade parking level. The southern portion of Site 2 is an asphalt-paved parking lot that is several feet below adjacent 7th Street and bordered by a retaining wall.

The Site 1 and 2 APNs, current addresses and historical addresses are summarized in the following table.

APN	Site	Current Addresses	Historical Addresses
001-0169-001	1	800 Madison Street 2-98 9th Street	50, 58, 60, 68, 70, 72, 74, 76, 80, 82, 84, 86, 88, 90, 92, and 98 8th Street 802, 804, 806, 808, 816, 818, 820, 824, 826, 830, 902, 904, 906, 908, 910, 916, 944, 946 and 948 Oak Street 51, 83, 85, 89 and 99 9th Street 815, 825, 847, 849 Fallon Street
001-0171-002	2	101 8th Street	101, 103, 105, 109, 111, 113, 115, 117, 119, 121, 123, 125, 127, 131, 135, 141, 143, 145, 147, and 149 8th Street 100, 102, 104, 106, 108, 110, 114, 116, 118, 120, 124, 126, 130, 134, 146, and 148 7th Street 702, 704, 706, 710, 712, 714, 716, 722, 732, 850, 852, 854, 856, 858, and 898 Madison Street 709, 719, 721, 723, 725, 727, 855, 861, 863, 809, and 899 Oak Street

E1.2 Environmental Database and File Review

As part of the Phase I ESA, we have reviewed the environmental database report prepared by Environmental Data Resources, Inc. (EDR). The EDR report contains information from the environmental databases maintained by the United States Environmental Protection Agency (USEPA), state, and local agencies within the 1/4 to 1 mile search distance.

The 800 Madison Street address was listed in the Enforcement & Compliance History Information (ECHO), Facility Index System (FINDS), Hazardous Waste & Substance Site List, California Environmental Protection Agency (CalEPA) Regulated Site Portal Data (CERS), and California Hazardous Waste Information System (CA HAZNET) databases. These database listings were associated with the Bay Area Rapid Transit (BART) Lake Merritt station, which occupied the Property as early as 1980s. The EDR listings are related to chemical storage at Site 1. No violations have been identified on the ECHO database.

The 101 8th Street address, located on Site 2, was listed in the CERS, California Environmental Reporting System (CERS) Tanks, Aboveground Storage Tanks (AST), and Hazardous Substance Storage Container Database (HIST UST). CERS, CERS Tanks, and AST listing was associated with the current 4,000 gallon aboveground diesel ConVault tank. The AST is used as backup power for BART at the Metro Center. On 12 May 2016, the INCON monitoring system for the AST and associated underground piping were recently tested by TEC Accutite. The HIST UST listing is associated with the 4,000 gallon diesel UST installed in 1982. A visual leak was observed by BART and recorded on 27 May 1989 with the State Water Resources Control Board.

Inquiries were made and records searched at the California Department of Toxic Substances Control (DTSC), RWQCB, and Alameda County Environmental Health (ACEH) regarding additional files related to fuel and hazardous materials leaks reported at the Property. A file review was not requested from the City of Oakland Fire Department (OFD) because all relevant environmental files have been transferred to and managed by ACEH Certified Unified Program Agency (CUPA). Files were found with the ACEH CUPA and summarized below and in Section 4.0.

Our review of historical files from the ACEH CUPA identified an Underground Storage Tanks Compliance Monitoring Plan (The Plan) for BART, dated 31 July 1986, by Aqua Science Engineers, Inc. (ASE). The Plan was submitted to ACEH for the upgrade of five waste oil USTs and monitoring of two fuel oil USTs. One of the two fuel oil USTs and its associated fill piping, fuel oil pumps, vent piping and vent were located at Site 2. Figure 2 shows the location of the historical fuel oil UST, piping, vent and pumps. The UST at Site 2 was used as an emergency fuel supply source for the Metro Center office complex and owned by BART. The UST had a tank capacity of 4,000 gallons and was constructed of single-walled fiberglass. ASE recommended the installation of two groundwater monitoring wells for the UST at Site 2. No additional documents were found during the file review indicating removal or in-place closure of the UST.

Additionally, chemicals are stored on-site as part of BART'S Hazardous Materials Business Plan (HMBP) dated 2002. The HMBP outlines chemical storage and handling procedures, personnel training and duties, spill and emergency response protocols, and chemical inventory. Inventoried in 2002, chemical storage included 1,375 gallons of solvents including refined hydrotreated distillate, severely hydrotreated light naphthenic distillate, and butylated hydroxy toluene. In 2016, during a routine inspection for the HMBP and the AST on-site, the only hazardous materials referenced to in the inspection report is the diesel stored in the ConVault AST and lead acid batteries. There is no violation history for the chemicals stored on-site, based on the file review.

E1.3 Conclusions

Based on the databases searched by EDR, requests made for public documentation related to past or present environmental conditions at the Property and surrounding area and our Property site reconnaissance, Langan has identified two RECs and one Historical REC (HREC) associated with the Property during this Phase I ESA.

The following RECs were identified:

REC 1 – Unknown Status of Underground Storage Tank at Site 2

Based on the ACEH CUPA file review and the EDR Radius Report, the historical fuel oil UST and associated piping was installed in 1982. A leak was detected by the BART District and recorded on 27 May 1989 with the State Water Resources Control Board. ASE submitted an Underground Storage Tanks Compliance Monitoring Plan (The Plan) for BART, dated 31 July 1986. The Plan detailed a monitoring plan for the UST involving the installation of two groundwater monitoring wells. No additional documents were found regarding the abandonment, closure, or monitoring of the UST.

REC 2 – Vapor Encroachment Concern (VEC)

Several historical cleaner properties were identified in close proximity to the Property. The facility located at 148 9th Street is listed on the EDR Historical Cleaners list. The facility is west and upgradient of the Property approximately within 100 feet from Site 1. At Site 2, an EDR Historical Cleaner was listed at 709 Oak Street. It is common for dry cleaners during this period to have discharged hazardous substances to the subsurface environment. It is possible that these facilities could have improperly disposed of chlorinated solvents into the subsurface and can be considered a Vapor Encroachment Concern (VEC) for the Property.

HREC 1 – Historical Gas Station at Site 1

Our review of historical files from EDR indicated a gas station on the south corner of Site 1. The gas station was observed in the 1952, 1953, and 1957 Sanborn Maps and 1958 aerial photograph. The city directory compiled by EDR shows a gas station with an address of 43 8th Street, one of the historical addresses at Site 1. No further information was found regarding the closure of the gas station or removal of the associated fuel dispenser, piping and fill ports. Additionally, no other documents dated after 1958 showed evidence of the gas station.

De Minimis Conditions

De minimis conditions are defined by ASTM as environmental conditions that "generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." Possible environmental issues that in Langan's opinion are not likely historic, controlled or recognized environmental conditions but are *de minimis* conditions include the following at the site.

- Langan observed minor staining from Site 1 and Site 2's use as parking lots during the Property site reconnaissance.

1.0 INTRODUCTION

Langan Engineering and Environmental Services, Inc. (Langan) has completed this Phase I Environmental Site Assessment (ESA) for the Lake Merritt Bay Area Rapid Transit (BART) Development located at 800 Madison Street and 2-98 9th Street for Site 1 and 101 8th Street for Site 2 in Oakland, California (Site) (Figure 1). The ESA was performed on behalf of Strada Investment Group (Strada) (Client and User) and East Bay Asian Local Development Corporation (EBALDC) (User), in support of the Users' environmental due diligence regarding their ground lease and entitlements of the Property.

1.1 Purpose

The purpose of this Phase I ESA is to:

- (1) Identify Recognized Environmental Conditions (RECs) in connection with the Property, as defined in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E1527-13, which states: The presence or likely presence of any hazardous substances or petroleum products in, on, or at a Site: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- (2) Satisfy the criteria of United States Environmental Protection Agency (USEPA) 40 Code of Federal Regulations (CFR) Part 312 Subpart C Standards and Practices §312.20 AAI Rule.

1.2 Scope of Phase I ESA

This Phase I ESA was conducted utilizing a standard of good commercial and customary practice that is consistent with ASTM E1527-13. Any significant scope-of-work additions, deletions, or deviations to ASTM E1527-13 are noted in Section 9.0 of this report. In general, the scope of this assessment consisted of obtaining information from the Users; reviewing reasonably ascertainable information and environmental data relating to the Property; reviewing maps and records maintained by federal, state, and local regulatory agencies; interviewing persons knowledgeable about the Property; and conducting a site reconnaissance. The specific scope of this assessment included the following:

1. A site reconnaissance to observe conditions and assess the Property's location with respect to adjoining and surrounding property uses and natural surface features. The reconnaissance included the surrounding roads and observations of surrounding properties from public rights-of-way to identify obvious potential environmental conditions on neighboring properties. The site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the Property and then progressing to adjacent and surrounding properties. Photographs taken as part of the site reconnaissance are provided in Appendix A.
2. As per ASTM E1527-13, a questionnaire was provided to the Client who is the current user, and to the owner to obtain information related to the Property. Copies of the completed questionnaires are provided in Appendix B.
3. A review of environmental databases maintained by the United States Environmental Protection Agency (USEPA), state, and local agencies within the approximate minimum search distance. Environmental Data Resources, Inc. (EDR) prepared the environmental database report, which is included in Appendix C.
4. Physical characteristics of the Property were determined through referenced sources for topographic, geologic, soils, and hydrologic data.
5. A review and interpretation of aerial photographs, Sanborn Fire Insurance Maps (Sanborn Maps), historical topographic maps, and city directories to identify

previous activities on and in the vicinity of the Property. Copies are included in Appendices D, E, F, and G, respectively.

1.3 Assumptions, Limitations and Exceptions

This Phase I ESA report was prepared for Strada and EBALDC for the Site located in Oakland, California. The report is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. Langan cannot assume responsibility for use of this report for any property other than the Property addressed herein, or by any other third party without a written authorization from Langan.

Langan's scope of services, which is described in Section 1.2, was limited to that agreed to with the Users and no other services beyond those explicitly stated are implied. Reasonable effort has been made to check that the information obtained is factual and from reliable sources, but no responsibility is assumed for its accuracy. If no hazardous substances or conditions are reported to be on the Property, it should not be interpreted as a guarantee that they do not exist. Langan assumes no responsibility or liability for errors in the information used or statements from sources other than those of Langan. All conclusions and recommendations in this report concerning the Property are those professional opinions of the Langan personnel involved with the project, and this report should not be considered a legal interpretation of existing environmental regulations. Opinions presented herein apply to Property conditions existing at the time of our assessment, and cannot necessarily be taken to apply to Property changes or conditions of which Langan are not aware and have not had the opportunity to evaluate.

The services performed and agreed upon for this effort comports to those prescribed in the ASTM Standard E1527-13. Intrusive sampling (e.g., soil borings and groundwater sampling) was not performed as part of this Phase I ESA.

This Phase I ESA was not intended to be a definitive investigation of possible environmental impacts at the Property. The purpose of this investigation was limited to evaluating if there is reason to suspect the possibility of RECs at the Property. It should be understood that even the most comprehensive Phase I ESA may fail to detect environmental liabilities at a particular site. Therefore, Langan cannot "insure" or "certify" that the Property is free of environmental impacts. No expressed or implied representation or warranty is included or intended in this report, except that our services were performed, within the limits prescribed by our Client, with the customary standard of care exercised by professionals performing similar services under similar circumstances within the same jurisdiction.

The conclusions, opinions, and recommendations provided in this report are based solely on the specific activities as required for the performance of ASTM E1527-13 and are intended exclusively for the purpose stated herein, at the specified Property as it existed at the time of our reconnaissance.

1.4 Special Terms and Conditions and User Reliance

The Client requested that EBALDC be added as a User of this report. There are no other special terms or conditions regarding this Phase I ESA requested by the Client. Langan has prepared this report specifically for the use of Strada, the Client, and EBALDC. The findings contained within the report shall not, in whole or in part, be disseminated or conveyed to any other party, nor be used by any other party, in whole or in part without written prior consent of the Client and Langan. Other parties cannot rely on this Phase I ESA and the conclusions therein, unless Langan receives a written request from the Client, at which time a "Reliance Letter" will be prepared for the interested party. The relying party will be subject to the same terms and conditions and limitations as agreed to by the Client.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The Property is comprised of two sites, Site 1 and Site 2. Site 1, (Assessor's Parcel Number [APN]: 001-0169-001), is approximately 200 by 300 feet in plan dimension and bound by Fallon Street on the southeast, 8th Street on the southwest, Oak Street on the northwest, and 9th Street on the northeast. Site 1 is currently occupied by a plaza with BART entrances above the underground station, and an asphalt-paved BART parking lot over the remainder of the block.

Site 2 (APN: 001-0171-002) is approximately 240 by 330 feet in plan dimension and bound by Oak Street on the southeast, 7th Street on the southwest, Madison Street on the northwest, and 8th Street on the northeast. Site 2 is south to southwest of the Lake Merritt BART station. Site 2 is currently occupied by an office building and an asphalt-paved parking lot.

2.2 Site and Vicinity General Characteristics

The Property is located in a mixed use area of Oakland. According to the United States Geological Survey (USGS) Topographic Maps, reviewed by Langan in EDR's Historical Topographic Map Report (Appendix F), the Property is at approximately 20 to 33 feet above mean sea level (msl).

The Property topography is generally flat, and gently slopes down toward the southeast. Photographs showing the current Property use are provided in Appendix A.

2.3 Current Use of the Property and Adjoining Properties

A BART tunnel crosses below Site 1, and the eastern limit of the underground Lake Merritt BART station is beneath the western portion of Site 1. At street level, Site 1 is currently a plaza with BART entrances above the underground station, and an asphalt-paved BART parking lot covers the remainder of the block. The northern portion of Site 2 is occupied by a three-story office building with a below-grade parking level. The southern portion of Site 2 is an asphalt-paved parking lot that is several feet below adjacent street grade and bordered by a retaining wall. The following table summarizes the current ownership and uses of the parcel comprised within the Property.

Assessor Parcel Number (APN)	Site	Site Owner	Acres	Parcel Use
001-0169-001	1	San Francisco Bay Area Rapid Transit (SF BART) District	1.38	Commercial
001-0171-002	2	SF BART District	1.65	Commercial

The current uses of the adjoining properties include:

- North of Site 1: commercial and residential buildings;
- East of Site 1: commercial and residential buildings;
- West of Site 1: BART substation entrances and Site 2; and
- South of Site 1: Laney College, and residential and commercial buildings.
- North of Site 2: Madison Park;
- East of Site 2: Laney College;
- West of Site 2: BART substation entrances and Site 1; and
- South of Site 2: commercial and residential buildings.

2.4 Descriptions of Structures, Roads, and Other Site Improvements

Site 1 is currently occupied by a plaza with BART entrances above the underground station, and an asphalt-paved BART parking lot over the remainder of the block. Site 2 is currently occupied by an office building and an asphalt-paved parking lot. A detailed description of current uses of the Property observed during the Property site reconnaissance is discussed in Section 5.0. Photographs showing the current Site use are provided in Appendix A.

3.0 USER PROVIDED INFORMATION

3.1 User/Owner Questionnaire

Per ASTM E1527-13, user and owner questionnaires were provided to the User to inquire about specialized information related to the Property.

Mr. Bryan Fat of Strada completed the User questionnaire and Mr. Edward Moore, a representative of the Owner, completed the Owner questionnaire. Mr. Fat was not aware of activity and use limitations associated with the Property. Mr. Moore was not aware of any pending, threatened, or past litigation, administrative proceedings, or any notices from any government entities regarding violation of environmental laws relating to hazardous substances or petroleum products at the Property. The completed User and Owner questionnaires are included in Appendix B.

3.2 Title Records

The Property's title is held by Old Republic Title Company and is provided in Appendix B.

3.3 Environmental Liens or Activity and Use Limitations

The User is not aware of any environmental liens or activity and use limitations in connection to the Property.

3.4 Specialized Knowledge

The User does not have any specialized knowledge of the Property.

3.5 Commonly Known and Reasonable Ascertainable Information

The User is not aware of any commonly known and reasonable ascertainable information regarding the Property.

3.6 Valuation Reduction for Environmental Issues

The User is not aware of any valuation reduction for environmental issues in connection with the Property.

3.7 Owner, Site Manager, and Occupant Information

The Property is currently residential and commercial property. No title report was received from the Owner.

3.8 Reason for Performing Phase I ESA

It is our understanding that the Client has requested this study as part of their environmental due diligence regarding their ground lease and entitlements of the Property.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

Langan reviewed an environmental database search report, prepared by EDR, for the Property (Target Property [TP]) and surrounding area. The EDR report is a listing of properties identified on select federal and state standard source environmental databases within the approximate search radius specified by ASTM Standard Practice for E1527-13. This information is reported to Langan by EDR, and to EDR by government sources; therefore, neither Langan nor EDR can verify the completeness and accuracy of the database information. Langan reviewed each environmental database on a record-by-record basis to evaluate if certain sites identified in the report are suspected to represent a potential impact to the Property. A copy of regulatory database information was provided by EDR and is included in Appendix C.

The following summary table lists the number of properties by database within the prescribed search radius appearing in the EDR Radius Map Report:

Database (Date of government version)	Minimum Search Area	Site Listed	Properties Within Search Area
Federal			
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) SEMS Archive (SEMS-ARCHIVE) (02/06/2019)	½ mile radius	No	0
RCRA Large Quantity Generators (RCRA-LOG) (03/01/2018)	¼ mile radius	No	2

Database (Date of government version)	Minimum Search Area	Site Listed	Properties Within Search Area
RCRA Small Quantity Generators (RCRA-SQG) (03/01/2018)	¼ mile radius	No	6
RCRA Conditionally Exempt Small Quantity Generators (RCRA-CESQG) (03/01/2018)	¼ mile radius	No	0
State and Tribal			
DTSC State Response Sites (RESPONSE) (01/28/2019)	1 mile radius	No	4
SWF/LF (SWS) (02/11/2019)	½ mile radius	No	0

A description of the reviewed databases is provided in the EDR Radius Map Report (Appendix C). A summary of Property database listings and other properties identified within the prescribed search area that may have an impact on the Property is presented below.

Sites 1 and 2, Lake Merritt BART Development

At Site 1, the 800 Madison Street address was listed in the Enforcement & Compliance History Information (ECHO), Facility Index System (FINDS), Hazardous Waste & Substance Site List, California Environmental Protection Agency (CalEPA) Regulated Site Portal Data (CERS), and California Hazardous Waste Information System (CA HAZNET) databases. These database listings were associated with the Bay Area Rapid Transit (BART) Lake Merritt station, which occupied the Property as early as 1980s. The EDR listings are related to chemical storage at Site 1. No violations have been identified on the ECHO database.

During the EDR Historical Auto search, one listing in Site 1 was found. The address listed was 60 8th Street. The listing shows that the 60 8th Street was the address of a former oil and gas service station operating sometime between 1955 through 1958.

At Site 2, the 101 8th Street address, was listed in the CERS, California Environmental Reporting System (CERS) Tanks, Aboveground Storage Tanks (AST), and Hazardous Substance Storage Container Database (HIST UST). CERS, CERS Tanks, and AST listing was associated with the current 4000 gallon aboveground diesel ConVault tank. The AST is used as backup power for BART at the Metro Center. On 12 May 2016, the INCON monitoring system for the AST and associated underground piping were recently tested by TEC Accutite. The HIST UST listing is associated with the 4000 gallon diesel UST installed in 1982. A visual leak was observed and recorded on 27 May 1989 with the State Water Resources Control Board.

Our review of historical files from the ACEH CUPA identified an Underground Storage Tanks Compliance Monitoring Plan for BART, dated 31 July 1986, by Aqua Science Engineers, Inc. (ASE). The Plan was submitted to ACEH for the upgrade of five waste oil USTs and monitoring of two fuel oil USTs. One of the two fuel oil UST and its associated fill piping, fuel oil pumps, vent piping and vent were located at Site 2. Figure 2 shows the location of the historical fuel oil UST, piping, vent and pumps. The UST at Site 2 was used as an emergency fuel supply source for the Metro Center office complex. The UST has a tank capacity of 4,000 gallons and made up of single-walled fiberglass. ASE recommended a retrofit monitoring system with an electronic continuous monitoring of groundwater and/or vapor. No additional documents were found during the file review indicating removal or in-place closure of the UST.

Additionally, chemicals are stored on-site as part of BART'S Hazardous Materials Business Plan (HMBP) dated 2002. The HMBP outlines chemical storage and handling procedures, personnel training and duties, spill and emergency response protocols, and chemical inventory. Inventoried in 2002, chemical storage included 1,375 gallons of solvents including refined hydrotreated distillate, severely hydrotreated light naphthenic distillate, and butylated hydroxy toluene. In 2016, during a routine inspection for the HMBP and the AST on-site, the hazardous materials referenced to in the inspection report is the diesel stored in the ConVault AST and lead acid batteries. There is no violation history for the chemicals stored on-site, based on the file review. The monitoring plan completed by ASE, inspection reports by ACEH, and the 2002 HMBP by BART are included in Appendix C.

Neighboring Properties

Based on our review of the neighboring properties, most of the nearby listings were closed by the regulatory agency, were hydrologically cross gradient or down gradient, or were determined to be a significant distance (greater than a 1/4 mile) from the Property. Below is a summary of neighboring property of concern in regards to possible contamination at the Property.

1110 Jackson Street

This facility is located approximately 845 feet to the north and cross gradient of the Property (Langan 2018). The 1110 Jackson Street property was listed on the Alameda County CS, HAZNET, LUST, CERS, and CERS Tanks. These database listings were associated with the three USTs used for the storage of gasoline. The USTs had capacities of 265 gallons, 265 gallons and 110 gallons and the tanks were observed to be in poor condition. They were removed on 15 April 2016. An additional fourth UST was discovered with a capacity of 750 gallons and was used to store diesel. The tank was also observed to be in poor condition and have holes.

In November 2016, an environmental site investigation was performed for the collection of soil, soil gas and grab groundwater samples. No vapor intrusion risks were identified but petroleum hydrocarbon contamination was found in soil and groundwater adjacent to the USTs. In January 2018, an additional investigation was conducted for the collection of soil and grab groundwater samples. Concentrations of samples analyzed did not exceed their respective RWQCB's Tier 1 environmental screening levels (ESLs). As of March 2019, this facility is working towards case closure. Since there were no exceedances in the latest samples, this facility will not impact the Property.

Orphan Listings

According to EDR, an orphan listing is a property that cannot be mapped due to poor or inadequate address information. Upon further research, Langan concluded that none of the orphan listings appear to be within applicable search distances to the Property and are not considered properties of concern.

4.2 Physical Setting Sources

Topography

According to the United States Geological Survey (USGS) Topographic Maps, reviewed by Langan in EDR's Historical Topographic Map Report (Appendix F), the Property is at approximately 20 to 33 feet above msl. The Property topography is generally flat, and slopes down toward the east-northeast. Photographs showing the current Property use are provided in Appendix A.

Geology and Hydrogeology

Subsurface conditions are based on other environmental investigations completed crossgradient of the site at a former Chevron Service Station located at 609 Oak Street. The results of the investigations indicate that the Property is underlain by up to 13 feet of sand to sand with clay and up to 30 feet of sand.

Groundwater was encountered at a depth of approximately about 5.0 to 8.0 bgs at the former Chevron station. Fluctuations in groundwater levels are expected and occur due to many factors including seasonal variations, tides, underground drainage patterns, regional fluctuations, and other factors. Site 1 and Site 2 are north of the former Chevron station and hydrologically upgradient. The nearest surface water is the Lake Merritt, approximately 0.21 miles northeast of Site 1 and 0.30 miles northeast of Site 2 and in consensus with the direction of groundwater flow.

4.3 Surface Water and Flood Plain Conditions

Surface Water

Lake Merritt is the closest surface water body, which is approximately 0.21 to 0.30 miles northeast of the Property.

Flood Plain

According to the FEMA Map Service Center, the Property is located in an area of minimal flood hazard.

4.4 Nearby Well Locations

Langan's Property site reconnaissance and our review of the RWQCB online GeoTracker website did not identify any wells on Property. There are no wells installed in the immediate Property vicinity. The closest wells were installed for the remediation and groundwater monitoring conducted at the 706, 726, and 800 Harrison Street facility.

4.5 Historical Use Information on the Site, Adjoining Properties, and Surrounding Properties

Sanborn Maps Review

Langan reviewed Sanborn Fire Insurance Maps from EDR for the Property and adjoining properties. Sanborn Maps provide information on structures related to building construction and materials that could impact fires, i.e. gasoline tanks, chemical storage, etc. within these structures. We reviewed the following Sanborn Fire Insurance Maps from EDR: 1889, 1903, 1911, 1950, 1952, 1953, 1957, 1959, 1960, 1964, 1965, 1967 and 1969. Appendix E contains copies of the Sanborn Fire Insurance Maps from EDR.

In the 1889 Sanborn Map, Site 1 is mostly undeveloped except for a two-story dwelling in the east portion of the site. What appears to be a tank with unknown contents is located on the east (down gradient) corner of Site 1. A wood shed and two stables are located adjacent to the dwelling and tank on future 9th Street. Site 2 is undeveloped. Residential properties and undeveloped land is in the immediate vicinity. Madison Park is located northwest of Site 1. In the 1903 and 1911 Sanborn Maps, Site 1 is occupied by additional residential properties and the unknown tank is not observed. A water tank and windmill are observed next to the two-story dwelling in the east portion of Site 1. Site 2 is further developed with commercial and residential properties. The adjacent land to the southwest of Site 1 and Site 2 is developed further with residential properties.

In the 1950 Sanborn map, the two-story dwelling in the east portion of Site 1 is replaced by Ming Quong Home, Home for Chinese Girls. Site 2 is fully occupied. To the south of Site 1, "gas & oil" and "grease" representing an automobile repair shop, and Geo. R. Borrman Steel Companies replaces some of the residential and commercial properties. To the north of Site 1, the adjacent land is full developed. In the 1952, 1953, and 1957 Sanborn Maps, "gas & oil" is located near the south corner of Site 1, representing a gas station. The remaining portions of Site 1 and Site 2 remain unchanged. In the 1959 Sanborn Map, Ming Quong Home is replaced by the Inter-Tribal Friendship House. In the 1960 and 1964 Sanborn Map, Site 1 and Site 2 remains relatively unchanged.

In the 1965 Sanborn Map, the residential properties in Site 1 are replaced by vacant land and the Inter-Tribal Friendship House is still located in the east portion of Site 1. By the 1967 and 1969 Sanborn Maps, most of Site 1 and Site 2 are vacant, except for two residential properties on Site 2.

Aerial Photograph Review

Langan reviewed aerial photographs to evaluate past uses and relevant characteristics of the Property and surrounding properties. We reviewed the following aerial photographs from EDR: 1939, 1946, 1958, 1963, 1968, 1974, 1982, 1993, 1998, 2005, 2009, 2012, and 2016. Appendix D contains copies of the aerial photographs from EDR.

In the 1939, 1946, and 1958 aerial photographs, the Property appears to be fully developed. In the 1963 aerial photographs, Site 1 remains developed except for a vacant lot in the south corner and Site 2 remains full developed. In the 1968 aerial photograph, Site 1 and Site 2 appears to be vacant.

In the 1974 and 1982 aerial photographs, Site 1 and Site 2 are fully developed by what appears to be parking lots. In the 1993, 1998, 2005, 2009, 2012, and 2016 aerial photographs, Site 1 remains unchanged and Site 2 appears to be occupied by the current building. The Property remains relatively unchanged over the years.

The Property is in a fully developed area of Oakland occupied predominately by residential and small commercial buildings. The surrounding areas relative to the Property remained relatively unchanged from the 1939, 1946, 1958, 1963, 1968, 1974, 1982, 1993, 1998, 2005, 2009, 2012, and 2016 aerial photographs.

Historical Topography Maps Review

Langan reviewed the following Historical Topographic Maps from EDR: 1895, 1896, 1899, 1915, 1939, 1947, 1950, 1956, 1968, 1973, 1980, 1995, 1996, and 2012. Appendix F contains copies of the Historical Topographic Maps. The average elevation at the Property remains relatively unchanged from 1895 to 2012, and the approximate elevation is 20 to 33 feet above msl.

City Directory Review

Langan reviewed the following city directory abstracts obtained from EDR. City Directories were reviewed for the years 1910 to 2014. Site 1 was listed in the EDR City Directory as previously occupied by various residences, Ming Quong Home, Home for Chinese Girls, Inter Tribal Friendship House and gas & oil service station. Site 2 was listed in the EDR City Directory as previously occupied by various residences, and commercial properties. The adjacent properties are occupied by various private residences, a church, steel factory, auto service repair shop, and a gas station during the years 1910 through 2014. Appendix G contains a copy of the City Directory Report.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The Property site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the Site and then progressing to the adjacent and surrounding properties.

The assessment of the adjacent and surrounding properties was limited to identifying, if possible, any indications of past or current use that may involve the use, storage, disposal, or generation of hazardous substances or petroleum products; noting the general type of current use; the general topography of the surrounding area; and providing a general description of adjoining or adjacent structures.

Ms. Wendy Kwong of Langan performed a Property and vicinity reconnaissance on behalf of Langan on 9 May 2019. Appendix A contains photographs from the site reconnaissance.

5.2 General Site Setting and Reconnaissance Observations

Site 1 is currently the Lake Merritt BART parking lot, Lake Merritt BART substation entrance and bike lockers. Site 2 is currently a three-story office building housing the BART police station and parking lot. The photographs showing the current Property use are provided in Appendix A.

Past Use of Property

No evidence of past Property use was visible during the site reconnaissance.

Description of Structures

Site 1 is currently a plaza with two BART entrances above the underground station, bike lockers, and an at-grade asphalt-paved BART parking lot over the remainder of the block. Below grade, the BART tunnel crosses below Site 1, and the eastern limit of the underground Lake Merritt BART station is beneath the western portion of Site 1.

Site 2 is occupied by a three-story office building with a below-grade parking level in the northern portion. An asphalt-paved parking lot that is several feet below adjacent street grade and bordered by a retaining wall in the southern portion.

Roads

Site 1 bound by Fallon Street on the southeast, 8th Street on the southwest, Oak Street on the northwest, and 9th Street on the northeast.

Site 2 bound by Oak Street on the southeast, 7th Street on the southwest, Madison Street on the northwest, and 8th Street on the northeast.

Storm Drains

A catch basin was observed in the parking lot at Site 2 during our reconnaissance.

5.3 Site Observations

Hazardous Substances and Petroleum Products in Connection with Identified Uses

Langan observed a Vert-I-Pack vertical compactor associated with an identified use at Site 2 during the reconnaissance. The compactor uses hydraulic equipment and was observed to be on a concrete pad.

Hazardous Substances and Petroleum Products in Connection with Unidentified Uses

Langan did not observe hazardous substances or petroleum products in connection with unidentified uses at Site 1 and Site 2 during the reconnaissance.

Storage Tanks

Langan observed a ConVault diesel aboveground storage tank (AST) associated with an identified use at Site 2 during the reconnaissance.

Odors

Langan did not observe any odors at the Property during the reconnaissance.

Pools of Liquids

Langan did not observe any pools or ponded liquids at the Property during the reconnaissance.

Drums

Langan did not observe any drums at the Property during the reconnaissance.

PCBs

Langan did not observe PCBs or PCB-containing equipment at the Property during the reconnaissance.

Pits, Ponds, or Lagoons

Langan did not observe any pits, ponds, or lagoons at the Property during the reconnaissance.

Stained Soil or Pavement

Langan observed de minimis stained asphalt associated cars parked at Site 1 and Site 2 during the reconnaissance.

Stressed Vegetation

Langan did not observe stressed vegetation at the Property during the reconnaissance.

Solid Waste

Langan did not observe solid waste at the Property during the reconnaissance.

Wastewater

Langan did not observe wastewater discharges at the Property during the reconnaissance.

Wells

Langan did not observe any wells at the Property during the reconnaissance.

Septic Systems

Langan did not observe septic systems at the Property during the reconnaissance.

Utilities

Utility vaults believed to be related to water lines, electrical lines, gas lines, and storm water lines are present along the Property boundaries.

6.0 INTERVIEWS

6.1 Subject Site User

For the Phase I ESA, Langan was introduced to and interviewed the Property User of this report, as defined in ASTM 1527-13. The purpose of the interview was to obtain information indicating possible recognized environmental conditions (RECs) in connection with the Property and to provide further details regarding historical use of the Property.

Mr. Bryan Fat of Strada stated that he has no specialized knowledge or experience related to the property or nearby properties. Mr. Fat stated that he was not aware of any current government notifications, violations of environmental laws, or litigation at the Property.

6.2 Owners/Tenants of Current and Adjacent Properties

Mr. Edward Moore, a representative of the Property Owner, was interviewed as part of this Phase I ESA. Mr. Moore of BART District was asked for clarification regarding the AST observed on-site during the site reconnaissance, the historical fuel oil UST, and hazardous material stored at Site 2. He explained that the current diesel AST was a backup tank for the generator. He has no knowledge of whether the historical UST has been removed. Mr. Moore clarified that the only hazardous materials stored on-site are for maintenance activities and are in small quantities; this includes lubrication oil, hydraulic fluid for elevator and greases.

Owners/tenants of adjacent properties were not available for interview as part of this Phase I ESA.

7.0 VAPOR ENCROACHMENT ASSESSMENT

An evaluation of potential vapor encroachment concern (VEC) was included as consideration for this assessment due to the presence of VOC contamination in groundwater beneath the Property. Migration, as defined by ASTM E1527-13 Section 3.2.56, is the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor intrusion is defined as the migration of volatile chemicals from the subsurface into overlying buildings. Our assessment for

potential vapor encroachment concern or vapor migration at the Property was performed in general accordance with ASTM E1527-13, but did not include an assessment related to vapor intrusion.

Properties within 1/10th of a mile from the Property with current or historical known releases of petroleum hydrocarbons were evaluated as part of the vapor encroachment assessment. Within 1/3rd of a mile of the Property, properties with known or historical releases of other volatile chemicals were evaluated. Langan reviewed EDR's Radius Map Report with GeoCheck and the VEC Application (Appendix C) to evaluate potential vapor encroachment concerns from the surrounding properties meeting the above criteria.

Based on the analysis using the VEC application, Langan identified the following facilities as potential sources of vapor encroachment to the Property: the facility located at 148 9th Street is listed on the EDR Historical Cleaners list. The facility is west and upgradient of the Property approximately within 100 feet from Site 1. On Site 2, an EDR Historical Cleaner was listed at 709 Oak Street. Based on the age of the historical cleaning operations, these facilities may have improperly disposed of hazardous substances to the subsurface upgradient to cross gradient of the Property. Therefore, a VEC for this Property cannot be ruled out.

8.0 PHASE I ESA FINDINGS AND CONCLUSION

Langan's findings with respect to known and suspect RECs and de minimis conditions, and our opinion of these findings are as follows:

8.1 Known or Suspect RECs

Based on the databases searched by EDR, requests made for public documentation related to past or present environmental conditions at the Property and surrounding area, and our site reconnaissance, Langan has identified two RECs and one Historical REC (HREC) associated with the Property during this Phase I ESA.

The following RECs were identified:

REC 1 – Unknown Status of Underground Storage Tank at Site 2

Based on the ACEH CUPA file review and the EDR Radius Report, the historical UST and associated piping was installed in 1982. A leak was detected by the BART District and recorded on 27 May 1989 with the State Water Resources Control Board. ASE submitted an Underground Storage Tanks Compliance Monitoring Plan (The Plan) for BART, dated 31 July 1986. The Plan

detailed a monitoring plan for the UST involving the installation of groundwater monitoring wells. No additional documents were found regarding the abandonment, closure, or monitoring of the UST.

REC 2 – Vapor Encroachment Concern (VEC)

The presence of several historical cleaner properties were identified in close proximity to the Property. The facility located at 148 9th Street is listed on the EDR Historical Cleaners list. The facility is west and upgradient of the Property approximately within 100 feet from Site 1. At Site 2, an EDR Historical Cleaner was listed at 709 Oak Street. It is common for dry cleaners during this period to have discharged hazardous substances to the subsurface environment. It is possible that these facilities could have improperly disposed of chlorinated solvents into the subsurface and can be considered a Vapor Encroachment Concern (VEC) for the Property.

HREC 1 – Historical Gas Station at Site 1

Our review of historical files from EDR indicated a gas station on the south corner of Site 1. The gas station was observed in the 1952, 1953, and 1957 Sanborn Maps and the 1958 aerial photograph. The city directory compiled by EDR shows a gas station with an address of 60 8th Street, one of the historical addresses at Site 1. No further information was found regarding the closure of the gas station and the associated fuel dispenser, piping and fill ports. Additionally, no other documents dated after 1958 showed evidence of the gas station.

8.2 De Minimis Conditions

De minimis conditions are defined by ASTM as environmental conditions that "generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." Possible environmental issues that in Langan's opinion are not likely historic, controlled or recognized environmental conditions but are *de minimis* conditions include the following at the site.

- Langan observed minor staining from Site 1 and Site 2's use as parking lots during the Property site reconnaissance.

8.3 Data Gaps

The Property history could not be researched in five-year intervals back to 1940 because of a lack of readily available information. It is Langan's opinion that this variation from the ASTM standard does not significantly affect the results of this Phase I ESA or the ability to assess the presence

of a REC at the Property, because land use did not change frequently enough to warrant a five year interval history evaluation.

8.4 Conclusion

Langan conducted this Phase I ESA with a standard of commercial and customary practice using the local standard of care that is consistent with ASTM E1527-13. Any significant scope-of-work deviations, deletions, or additions to ASTM E1527-13 are noted in Sections 9.0 and 10.0 of this report.

The Property is located in a mixed use area (including residential and commercial) within Oakland and is comprised of two sites, Site 1 and Site 2. Site 1 bound by Fallon Street on the southeast, 8th Street on the southwest, Oak Street on the northwest, and 9th Street on the northeast. Site 1 is currently a plaza with two BART entrances above the underground station, bike lockers, and an at-grade asphalt-paved BART parking lot over the remainder of the block. Below grade, the BART tunnel crosses below Site 1, and the eastern limit of the underground Lake Merritt BART station is beneath the western portion of Site 1.

Site 2 bound by Oak Street on the southeast, 7th Street on the southwest, Madison Street on the northwest, and 8th Street on the northeast. Site 2 is occupied by a three-story office building with a below-grade parking level in the northern portion. The southern portion of Site 2 is an asphalt-paved parking lot that is several feet below adjacent 7th Street and bordered by a retaining wall.

Based on review of the Sanborn Fire Insurance Maps, aerial photographs, topographical maps, and city directories, the Property was partially developed with one- to two-story residential dwellings as early as 1889. Site 1 has been developed by previous occupants; including, but not limited to various residences, Ming Quong Home, Home for Chinese Girls, Inter Tribal Friendship House and gas & oil service stations. Site 2 has been developed by previous occupants; including, but not limited to various residences, and commercial properties.

Langan has identified two RECs and one HREC associated with the Property during this Phase I ESA; including, unknown status of the fuel oil UST at Site 2; a VEC from the presence of several historical cleaner properties identified in close proximity to the Property; and the historical gas station at Site 1. We recommend using a subcontractor that employs ground penetrating radar to look for the UST at Site 2 and potential USTs, pipelines and dispenser islands at the former

gas station at Site 1. If an anomaly is detected, we recommend soil, groundwater and soil gas sampling in the vicinity of the UST and/or gas station.

9.0 DEVIATIONS

This Phase I ESA has been performed without deviation to, and in conformance with, ASTM Practice E1527-13 (Standard Practice for ESA: Phase I ESA Process) except as noted. No expressed or implied representation or warranty is included or intended in the report, except that the services were performed within the limits prescribed by the Client, and with the customary thoroughness and competence of our profession.

10.0 ADDITIONAL SERVICES

The scope of services performed for this study did not include the following non-ASTM required Phase I ESA items: radon, asbestos containing materials (ACM), lead-based paint (LBP), lead in drinking water, polychlorinated biphenyl (PCB)-containing material, wetlands, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, mold, indoor air quality, and biological agents.

12.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The signatures of the environmental professional(s) responsible for this Phase I ESA are provided on the submittal letter and/or cover page of this report.

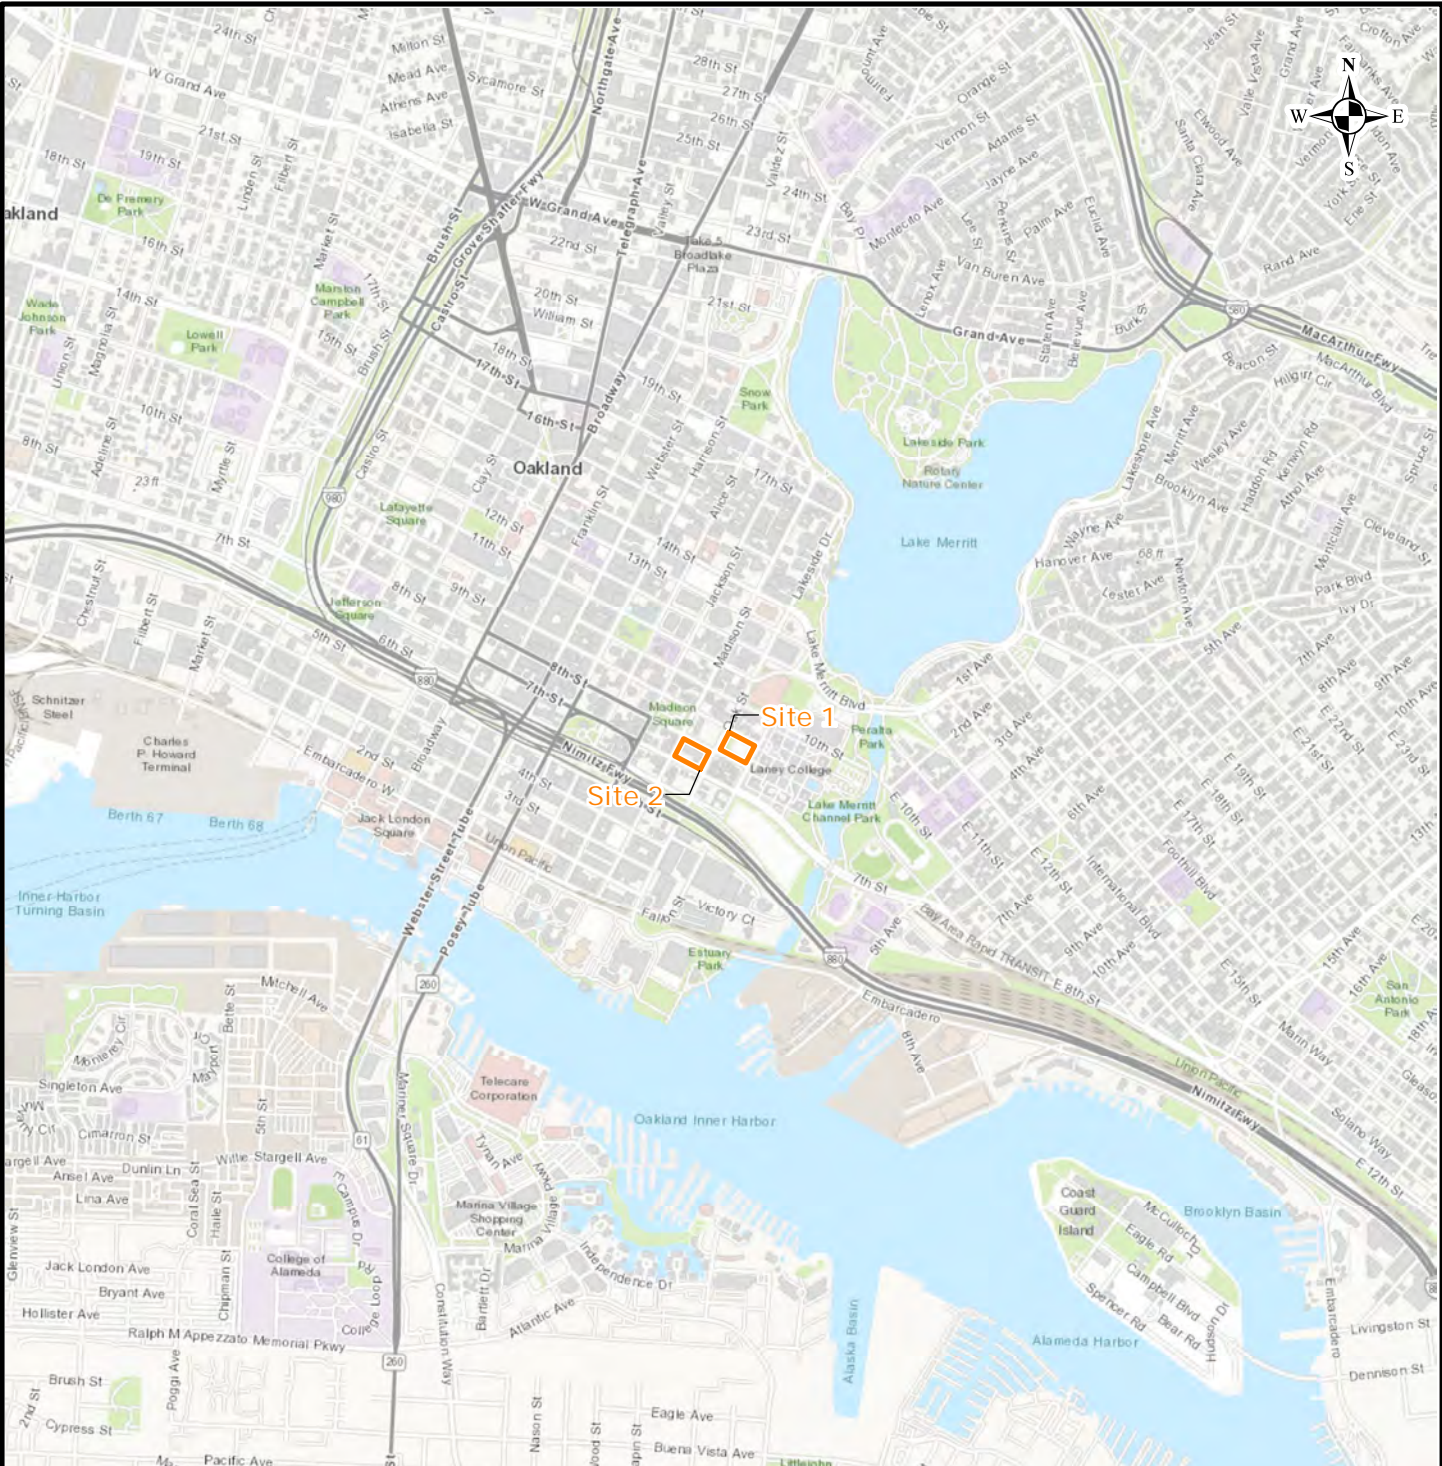

13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

The qualifications of the environmental professionals that conducted this ESA are presented in the resumes provided in Appendix H. Langan declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in #312.10 of 40 CFR 312. Langan has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. Langan has developed and performed the all appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

**Subject: Request for Information
Phase I Environmental Site Assessment
Lake Merritt BART Station Development
Oakland, California
Langan Project No.: 750650002**

Dear Mr. Fat:

Langan is pleased at the opportunity to conduct a Phase I Environmental Site Assessment (ESA) for the Lake Merritt BART Station Development (Site) property located in Oakland, California. To provide a more comprehensive assessment, we respectfully request that the current Site owners, operators, and/or managers provide the information listed attached. Please forward this request to the current Site owners, operators, and/or managers and return to us by email or fax. Please also send us any such documentation that you may have regarding this information.

We appreciate your assistance in initiating this assessment. If you have any questions, contact me at (415) 955-5224.

Sincerely yours,
Langan Engineering and Environmental Services, Inc.

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

Please complete the below form and return to
Langan Engineering and Environmental Services, Inc.

Providing the following information (if available) to the environmental professional (Langan) is one of the requirements to qualify for one of the *Landowner Liability Protections* offered under CERCLA. Missing or incomplete information could result in a determination that "all appropriate inquiry" is not complete.

General Information

User/Client Name (s): Strada

Property Name: Lake Merritt BART Station Development

Addresses: 800 Madison Street and 2-98 8th Street

Oakland, California

Property Type: Redevelopment sites

Type of Property Transaction:

- | | |
|-----------------------|-------------------------------------|
| Purchase of property | <input type="checkbox"/> |
| Financing of property | <input type="checkbox"/> |
| Sale of property | <input type="checkbox"/> |
| Ground Lease | <input checked="" type="checkbox"/> |
| Build to Suit Lease | <input type="checkbox"/> |
| Other _____ | <input type="checkbox"/> |

Reason Why Phase I ESA is required: Entitlements.

Site Contact (s): GARY ANDERSON, Senior REAL ESTATE OFFICER, BART
510-414-6674; GANDERS@BART.GOV

Required Information

The citation at the end of each item (e.g. 40 CFR 312.XX) is the section of EPA's November 1, 2005 AAI Final Rule which discusses that item.

(1.) Environmental cleanup liens that are filed or recorded against the property (40 CFR 312.25).

Yes No

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? [Please note, unless specifically delegated in the Scope of Work for the Phase I ESA, it is the User's responsibility to undertake a review of recorded land title records and judicial records to identify any environmental liens and to report these liens to the environmental professional conducting a Phase I ESA.]

Note 1 – In certain jurisdictions, federal, tribal, state or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

(2.) Activity and use limitations that are in place on the site or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Yes No

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? [Please note, unless specifically delegated in the Scope of Work for the ESA, it is the User's responsibility to undertake a review of recorded land title records and judicial records to identify any activity and use limitations and to report these limitations to the environmental professional conducting a Phase I Environmental Site Assessment.]

CC&RS

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Yes No

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the, current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Yes No

- (a.) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? [If no, proceed to Parts 4a and 4b.]
- (b.) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
- (c.) Identify an explanation for the lower price and provide a written record of such explanation as an attachment.

 ground lease not applicable

(5.) Commonly known or reasonably known or reasonably ascertainable information about the property (40 CFR 312.30). Yes No

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

- (a.) Do you know the past uses of the property?
- (b.) Do you know of specific chemicals that are present or once were present at the property?
- (c.) Do you know of spills or other chemical releases that have taken place at the property?
- (d.) Do you know of any environmental cleanups that have taken place at the property?

(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate Investigation (40 CFR 312.31). Yes No

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

ASTM E-1527-13, Section 10.9

Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?

Yes No

Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?

Yes No

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

Yes No

ASTM E-1527-13, Section 10.8

EXHIBIT A

The land referred to is situated in the County of Alameda, City of Oakland, State of California, and is described as follows:

PARCEL ONE:

Being a portion of Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at the intersection of the Eastern line of Oak Street with the Southern line of 9th Street; running thence Southerly along said line of Oak Street 32 feet, 6 inches; thence at right angles Easterly 120 feet; thence at right angles Northerly 32 feet, 6 inches to said line of 9th Street; thence Westerly along said last named line 120 feet to the point of beginning.

PARCEL TWO:

Being a portion of Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at a point on the Eastern line of Oak Street, distant thereon Southerly, 32 feet 6 inches from the point of intersection thereof with the Southern line of 9th Street; and running thence Southerly along said line of Oak Street, 30 feet; thence at a right angle Easterly, 120 feet; thence at a right angle Northerly, 30 feet; thence at a right angle Westerly, 120 feet to the point of beginning.

PARCEL THREE:

Being a portion of Block 135, Kellerberger's Map of Oakland, Alameda County Records.

Beginning at a point on the Eastern line of Oak Street, distant thereon Southerly 62.50 feet from the Southern line of 9th Street; running thence Southwesterly along said line of Oak Street 40 feet; thence at right angles Southeasterly 120 feet; thence at right angles Northeasterly 40 feet; thence at right angles Northwesterly 120 feet to the point of beginning.

PARCEL FOUR:

Being a portion of Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at a point on the Eastern line of Oak Street distant thereon 57 feet, 6 inches Northerly from the point of intersection thereof with the Northern line of 8th Street; and running thence Northerly along the said line of Oak Street 40 feet; thence at right angles Easterly 120 feet; thence at right angles Southerly 40 feet; thence at right angles Westerly 120 feet to the point of beginning.

PARCEL FIVE:

Being a portion of Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at the point formed by the intersection of the Northern line of 8th Street, with the Eastern line of Oak Street, as said streets are shown on the Map herein referred to; running thence Easterly along said line of 8th Street, 47 feet, 6 inches; thence at right angles Northerly, 57 feet, 6 inches; thence at right angles Westerly, 47 feet, 6 inches, to said line of Oak Street; and thence Southerly along said line of Oak Street, 57 feet, 6 inches, to the point of beginning.

PARCEL SIX:

Being a portion of Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at a point on the Northern line of the 8th Street, distant thereon Easterly 47 feet, 6 inches from the intersection thereof with the Eastern line of Oak Street, as said streets are shown on the Map herein referred to; running thence Easterly along said line of 8th Street, 72 feet, 6 inches; thence at right angles Northerly 57 feet, 6 inches; thence at right angles Westerly 72 feet, 6 inches; thence at right angles Southerly 57 feet, 6 inches, to the point of beginning.

PARCEL SEVEN:

Being a portion of Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at a point on the Northern line of 8th Street, distant thereon 120 feet Easterly from the intersection thereof with the Eastern line of Oak Street; running thence Easterly along said Northern line of 8th Street, 40 feet; thence at right angles Northerly, 100 feet; thence at right angles Westerly 40 feet; thence at right angles Southerly, 100 feet to the point of beginning.

PARCEL EIGHT:

Being Lot 24 and the Eastern 15 feet of Lot 25 in Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at a point on the Northern line of 8th Street, distant thereon Westerly 100 feet from the intersection thereof with the Western line of Fallon Street; running thence Westerly along said line of 8th Street 40 feet; thence at right angles Northerly 100 feet; thence at right angles Easterly 40 feet; thence at right angles Southerly 100 feet to the point of beginning.

PARCEL NINE:

Being Lots 19, 20, 21, 22 and 23, in Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at the point of intersection of the Northern line of 8th Street, with the Western line of Fallon Street, as said streets are shown on the Map herein referred to; and running thence Westerly along said line of 8th Street, 100 feet; thence at right angles Northerly, 100 feet; thence at right angles Easterly, 100 feet to said Western line of Fallon Street; and thence Southerly along said last named line, 100 feet to the point of beginning.

PARCEL TEN:

Being the Eastern 15 feet of Lot 12 and all of Lots 13, 14, 15, 16, 17 and 18 in Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at the point of intersection of the Western line of Fallon Street with the Southern line of 9th Street, as said streets are shown on the Map hereinafter referred to; running thence Westerly, along said line of 9th Street, 140 feet; thence at right angles Southerly 100 feet; thence at right angles Easterly 140 feet to said Western line of Fallon Street; thence at right angles Northerly, along the last named line, 100 feet to the point of beginning.

PARCEL ELEVEN:

Being the Eastern 5 feet of Lot 10, all of Lot 11 and the Western 10 feet of Lot 12, in Block 135, "Kellersberger's Map of Oakland, Alameda County Records.

Beginning at a point on the Southern line of 9th Street, distant thereon 140 feet Westerly from the point of intersection thereof with the Western line of Fallon Street, as said streets are shown on the Map herein referred to; running thence Westerly along said line of 9th Street 40 feet; thence at right angles Southerly 100 feet to the Southern boundary line of Lot 10, in Block 135, as shown on said Map; thence Easterly along the Southern boundary line of Lots 10, 11 and 12, in said block 135, 40 feet; thence at right angles Northerly 100 feet to the point of beginning.

Property Address:

51 9th Street, Oakland, CA 94607

In response to the above referenced application for a policy of title insurance, OLD REPUBLIC TITLE COMPANY, as issuing Agent of Old Republic National Title Insurance Company, hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said Policy or Policies are set forth in Exhibit I attached. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the Homeowner's Policy of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit I. Copies of the Policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit I of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of August 23, 2018, at 7:30 AM

OLD REPUBLIC TITLE COMPANY
For Exceptions Shown or Referred to, See Attached

OLD REPUBLIC TITLE COMPANY
ORDER NO. 1117019609-JM

The form of policy of title insurance contemplated by this report is:

ALTA Loan Policy - 2006. A specific request should be made if another form or additional coverage is desired.

The estate or interest in the land hereinafter described or referred or covered by this Report is:

Fee

Title to said estate or interest at the date hereof is vested in:

San Francisco Bay Area Rapid Transit District

The land referred to in this Report is situated in the County of Alameda, City of Oakland, State of California, and is described as follows:

PARCEL ONE:

Being a portion of Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at the intersection of the Eastern line of Oak Street with the Southern line of 9th Street; running thence Southerly along said line of Oak Street 32 feet, 6 inches; thence at right angles Easterly 120 feet; thence at right angles Northerly 32 feet, 6 inches to said line of 9th Street; thence Westerly along said last named line 120 feet to the point of beginning.

PARCEL TWO:

Being a portion of Block 135, Kellersberger's Map of Oakland, Alameda County Records.

Beginning at a point on the Eastern line of Oak Street, distant thereon Southerly, 32 feet 6 inches from the point of intersection thereof with the Southern line of 9th Street; and running thence Southerly along said line of Oak Street, 30 feet; thence at a right angle Easterly, 120 feet; thence at a right angle Northerly, 30 feet; thence at a right angle Westerly, 120 feet to the point of beginning.

PARCEL THREE:

APN: 001-0169-001

At the date hereof exceptions to coverage in addition to the Exceptions and Exclusions in said policy form would be as follows:

1. Taxes and assessments, general and special, for the fiscal year 2018 - 2019, a lien, but not yet due or payable.
2. Taxes and assessments, general and special, are currently not assessed because of a statutory exemption. Should the statutory exemption change, taxes may be levied against the land.
3. The lien of supplemental taxes, if any, assessed pursuant to the provisions of Section 75, et seq., of the Revenue and Taxation Code of the State of California.

4. The herein described property lying within the proposed boundaries of a Community Facilities District, as follows:

District No : 2014-1
For : Clean Energy
Disclosed By : Assessment Map
Recorded : [August 24, 2015 in Official Records under Recorder's Serial Number 2015235594](#)

Further information may be obtained by contacting:

5. Redevelopment Plan, as follows:

Entitled : Revised Statement of Institution of Redevelopment for the Central District Redevelopment Project
Executed By : Community and Economic Development Agency
Recorded : [December 3, 2007 in Official Records under Recorder's Serial Number 2007409569](#)

And any amendments thereto.

6. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.

7. Any unrecorded and subsisting leases.

8. The requirement that the Company be provided with a copy of the "rent roll" and "tenant estoppel certificates" for its review.

The Company may have different and/or additional requirements after its review.

9. The requirement that this Company be provided with a suitable Owner's Declaration (form ORT 174). The Company reserves the right to make additional exceptions and/or requirements upon review of the Owner's Declaration.

10. The requirement that satisfactory evidence be furnished to this Company of compliance with applicable statutes, ordinances and charters governing the ownership and disposition of the herein described land.

----- Informational Notes -----

- A. The applicable rate(s) for the policy(s) being offered by this report or commitment appears to be section(s) 2.2.
- B. The above numbered report (including any supplements or amendments thereto) is hereby modified and/or supplemented to reflect the following additional items relating to the issuance of an American Land Title Association loan form policy:

NONE

NOTE: Our investigation has been completed and there is located on said land a commercial building known as 51 9th Street, Oakland, CA 94607.

The ALTA loan policy, when issued, will contain the CLTA 100 Endorsement and 116 series Endorsement.

Unless shown elsewhere in the body of this report, there appear of record no transfers or agreements to transfer the land described herein within the last three years prior to the date hereof, except as follows:

NONE

- C. NOTE: The last recorded transfer or agreement to transfer the land described herein is as follows:

**AMERICAN LAND TITLE ASSOCIATION
LOAN POLICY OF TITLE INSURANCE - 2006
EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection; or the effect of any violation of these laws, ordinances, or governmental regulations.This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - (a) a fraudulent conveyance or fraudulent transfer, or
 - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

EXCEPTIONS FROM COVERAGE – SCHEDULE B, PART 1, SECTION ONE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

**WHAT DOES OLD REPUBLIC TITLE
DO WITH YOUR PERSONAL INFORMATION?**

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.
What?	The types of personal information we collect and share depend on the product or service you have with us. This information can include: <ul style="list-style-type: none"> • Social Security number and employment information • Mortgage rates and payments and account balances • Checking account information and wire transfer instructions When you are no longer our customer, we continue to share your information as described in this notice.
How?	All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Old Republic Title chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information	Does Old Republic Title share?	Can you limit this sharing?
For our everyday business purposes — such as to process your transactions, maintain your account(s), or respond to court orders and legal investigations, or report to credit bureaus	Yes	No
For our marketing purposes — to offer our products and services to you	No	We don't share
For joint marketing with other financial companies	No	We don't share
For our affiliates' everyday business purposes — information about your transactions and experiences	Yes	No
For our affiliates' everyday business purposes — information about your creditworthiness	No	We don't share
For our affiliates to market to you	No	We don't share
For non-affiliates to market to you	No	We don't share

In response to the above referenced application for a policy of title insurance, OLD REPUBLIC TITLE COMPANY, as issuing Agent of Old Republic National Title Insurance Company, hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said Policy or Policies are set forth in Exhibit I attached. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the Homeowner's Policy of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit I. Copies of the Policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit I of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of June 1, 2018, at 7:30 AM

OLD REPUBLIC TITLE COMPANY
For Exceptions Shown or Referred to, See Attached

OLD REPUBLIC TITLE COMPANY
ORDER NO. 1117019239-JM

The form of policy of title insurance contemplated by this report is:

CLTA Standard Coverage Policy -1990; AND ALTA Loan Policy - 2006. A specific request should be made if another form or additional coverage is desired.

The estate or interest in the land hereinafter described or referred or covered by this Report is:

Fee

Title to said estate or interest at the date hereof is vested in:

San Francisco Bay Area Rapid Transit District, a rapid transit district created by the San Francisco Bay Area Rapid Transit District Act pursuant to Public Utilities Code Section 28500 et seq.

The land referred to in this Report is situated in the County of Alameda, City of Oakland, State of California, and is described as follows:

Block 126, map of Kellersberger's Map of the City of Oakland, on file in the office of the County Recorder of Alameda County.

APN: 001-0171-002

At the date hereof exceptions to coverage in addition to the Exceptions and Exclusions in said policy form would be as follows:

1. Taxes and assessments, general and special, for the fiscal year 2018 - 2019, a lien, but not yet due or payable.

2. Taxes and assessments, general and special, for the fiscal year 2017 - 2018, as follows:

Assessor's Parcel No	:	001 -0171-002	
Bill No.	:	010781	
Code No.	:	17-045	
1st Installment	:	\$0.00 No Tax Due	NOT Marked Paid
2nd Installment	:	\$0.00 No Tax Due	NOT Marked Paid

3. Taxes and assessments, general and special, are currently not assessed because of a statutory exemption. Should the statutory exemption change, taxes may be levied against the land.

Public Utility - contact State Board of Equalization

OLD REPUBLIC TITLE COMPANY
ORDER NO. 1117019239-JM

4. The lien of supplemental taxes, if any, assessed pursuant to the provisions of Section 75, et seq., of the Revenue and Taxation Code of the State of California.

5. Covenant and agreement,

Executed By : The City of Oakland
In Favor Of : Bay Area Rapid Transit District
Recorded : [November 30, 1982 in Official Records under Recorder's Serial Number 1982-182279](#)

Which Among Other Things Provides : Street encroachment permits

Note: Reference is made to said instrument for full particulars.

6. Covenant and agreement,

Executed By : Special Major Conditional Street Encroachment Disclaimer and Agreement
In Favor Of : San Francisco Bay Area Rapid Transit District
Recorded : [August 22, 1983 in Official Records under Recorder's Serial Number 1983-153821](#)

Which Among Other Things Provides : Street encroachments

Note: Reference is made to said instrument for full particulars.

7. Covenants, Conditions, Restrictions, Limitations, Easements, Assessments, Reservations, Exceptions, Terms, Liens or Charges, but omitting any covenants or restrictions if any, based upon race, color, religion, sex, handicap, familial status, or national origin unless and only to the extent that said covenant (a) is exempt under Title 42, Section 3607 of the United States Code or (b) relates to handicap but does not discriminate against handicapped persons, as provided in an instrument.

Entitled : Declaration of Covenants, Conditions and Restrictions of the Regional Administrative Facility
Executed By : San Francisco Bay Area Rapid Transit District
Recorded : [August 22, 1983 in Official Records under Recorder's Serial Number 1983-153821](#)

OLD REPUBLIC TITLE COMPANY
ORDER NO. 1117019239-JM

Said Covenants, Conditions and Restrictions provide that a violation thereof shall not defeat or render invalid the lien of any Mortgage or Deed of Trust made in good faith and for value.

NOTE: "If this document contains any restriction based on race, color, religion, sex, sexual orientation, familial status, marital status, disability, national origin, source of income as defined in subdivision (p) of section 12955, or ancestry, that restriction violates state and federal fair housing laws and is void, and may be removed pursuant to Section 12956.2 of the Government Code. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status."

8. Covenants, Conditions, Restrictions, Limitations, Easements, Assessments, Reservations, Exceptions, Terms, Liens or Charges, but omitting any covenants or restrictions if any, based upon race, color, religion, sex, handicap, familial status, or national origin unless and only to the extent that said covenant (a) is exempt under Title 42, Section 3607 of the United States Code or (b) relates to handicap but does not discriminate against handicapped persons, as provided in an instrument.

Recorded : [December 27, 1984 in Official Records under Recorder's Serial Number 1984-254126](#)

9. Liens and charges for upkeep and maintenance as provided in the above mentioned Covenants, Conditions and Restrictions, if any, where no notice thereof appears on record.

Notwithstanding the Mortgagee protection clause contained in the above mentioned covenants, conditions and restrictions, they provide that the liens and charges for upkeep and maintenance are subordinate only to a first mortgage.

10. The requirement that satisfactory evidence be furnished to this Company of compliance with applicable statutes, ordinances and charters governing the ownership and disposition of the herein described land.
11. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
12. Any unrecorded and subsisting leases.

13. The requirement that this Company be provided with a suitable Owner's Declaration (form ORT 174). The Company reserves the right to make additional exceptions and/or requirements upon review of the Owner's Declaration.

----- Informational Notes -----

- A. The applicable rate(s) for the policy(s) being offered by this report or commitment appears to be section(s) 1.1 and 2.1.

- B. NOTE: The last recorded transfer or agreement to transfer the land described herein is as follows:

Instrument
Entitled : Grant Deed
By/From : San Francisco Bay Area Rapid Transit District, a Rapid Transit District established pursuant to public utilities code 28500, et seq.
To : Metropolitan Transportation Commission, a statutorily created regional transportation planning agency pursuant to government code section 66500, et seq.
Recorded : [February 22, 2005 in Official Records under Recorder's Serial Number 2005-070031](#)

**CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE POLICY - 1990
EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.-

(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
 - (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
 - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;.
 - (c) resulting in no loss or damage to the insured claimant;
 - (d) attaching or created subsequent to Date of Policy; or
 - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments Which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims Which are not shown by the public records but which could be ascertained by an inspection of the land which may be asserted by persons in possession thereof,
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

**AMERICAN LAND TITLE ASSOCIATION
LOAN POLICY OF TITLE INSURANCE - 2006
EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection; or the effect of any violation of these laws, ordinances, or governmental regulations.This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - (a) a fraudulent conveyance or fraudulent transfer, or
 - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

EXCEPTIONS FROM COVERAGE – SCHEDULE B, PART 1, SECTION ONE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

**WHAT DOES OLD REPUBLIC TITLE
DO WITH YOUR PERSONAL INFORMATION?**

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.
What?	The types of personal information we collect and share depend on the product or service you have with us. This information can include: <ul style="list-style-type: none"> • Social Security number and employment information • Mortgage rates and payments and account balances • Checking account information and wire transfer instructions When you are no longer our customer, we continue to share your information as described in this notice.
How?	All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Old Republic Title chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information	Does Old Republic Title share?	Can you limit this sharing?
For our everyday business purposes — such as to process your transactions, maintain your account(s), or respond to court orders and legal investigations, or report to credit bureaus	Yes	No
For our marketing purposes — to offer our products and services to you	No	We don't share
For joint marketing with other financial companies	No	We don't share
For our affiliates' everyday business purposes — information about your transactions and experiences	Yes	No
For our affiliates' everyday business purposes — information about your creditworthiness	No	We don't share
For our affiliates to market to you	No	We don't share
For non-affiliates to market to you	No	We don't share

Go to www.oldrepublictitle.com (Contact Us)

Who we are	
Who is providing this notice?	Companies with an Old Republic Title name and other affiliates. Please see below for a list of affiliates.

What we do	
How does Old Republic Title protect my personal information?	To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings. For more information, visit http://www.OldRepublicTitle.com/newnational/Contact/privacy .
How does Old Republic Title collect my personal information?	<p>We collect your personal information, for example, when you:</p> <ul style="list-style-type: none"> • Give us your contact information or show your driver's license • Show your government-issued ID or provide your mortgage information • Make a wire transfer <p>We also collect your personal information from others, such as credit bureaus, affiliates, or other companies.</p>
Why can't I limit all sharing?	<p>Federal law gives you the right to limit only:</p> <ul style="list-style-type: none"> • Sharing for affiliates' everyday business purposes - information about your creditworthiness • Affiliates from using your information to market to you • Sharing for non-affiliates to market to you <p>State laws and individual companies may give you additional rights to limit sharing. See the "Other important information" section below for your rights under state law.</p>

Definitions	
Affiliates	<p>Companies related by common ownership or control. They can be financial and nonfinancial companies.</p> <ul style="list-style-type: none"> • Our affiliates include companies with an Old Republic Title name, and financial companies such as Attorneys' Title Fund Services, LLC, Lex Terrae National Title Services, Inc., Mississippi Valley Title Services Company, and The Title Company of North Carolina.
Non-affiliates	<p>Companies not related by common ownership or control. They can be financial and non-financial companies.</p> <ul style="list-style-type: none"> • Old Republic Title does not share with non-affiliates so they can market to you
Joint marketing	<p>A formal agreement between non-affiliated financial companies that together market financial products or services to you.</p> <ul style="list-style-type: none"> • Old Republic Title doesn't jointly market.

Other Important Information

Oregon residents only: We are providing you this notice under state law. We may share your personal information (described on page one) obtained from you or others with non-affiliate service providers with whom we contract, such as notaries and delivery services, in order to process your transactions. You may see what personal information we have collected about you in connection with your transaction (other than personal information related to a claim or legal proceeding). To see your information, please click on "Contact Us" at www.oldrepublictitle.com and submit your written request to the Legal Department. You may see and copy the information at our office or ask us to mail you a copy for a reasonable fee. If you think any information is wrong, you may submit a written request online to correct or delete it. We will let you know what actions we take. If you do not agree with our actions, you may send us a statement.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which

EXECUTIVE SUMMARY

there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 24 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 77 LUST sites within

EXECUTIVE SUMMARY

approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 20 CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 15 SWEEPS UST sites within approximately 0.25 miles of the target property.

Local Land Records

DEED: The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes .

A review of the DEED list, as provided by EDR, and dated 03/04/2019 has revealed that there are 2 DEED sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
PACIFIC BELL EPA ID:: CAD980881809	125 TWELVE ST	NNE 1/8 - 1/4 (0.153 mi.)	K60	145

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 01/31/2015 has revealed that there are 2 FUDS sites within approximately 1 mile of the target property.

NAVAL INDUSTRIAL REP Federal Facility ID:: CA9799F5980 INST ID:: 61354		SSE 1/4 - 1/2 (0.495 mi.)	198	641

DOD: Consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

A review of the DOD list, as provided by EDR, and dated 12/31/2005 has revealed that there is 1 DOD site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ALAMEDA NAVAL AIR ST		WSW 1/2 - 1 (0.969 mi.)	0	14

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 56 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 21 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 5 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Actual:
33 ft.

CERS TANKS:
Site ID: 97447
CERS ID: 10343530
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 97447
Site Name: BART Lake Merritt Substation (LMA)
Violation Date: 05-01-2017
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 08/11/2017. OBSERVATION: Fire extinguisher with expired date of February 2017 observed in transformer room. Emergency equipment (such as fire extinguishers, spill prevention and alarm equipment) shall be tested and maintained as necessary (e.g. fire extinguishers assessed annually). CORRECTIVE ACTION: Maintain emergency equipment such as fire extinguishers as necessary; ensure fire extinguisher is serviced and is current. Provide written and/or photo documentation of corrective action within 30 days.
Violation Division: Alameda County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-01-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine hazardous materials business plan (HMBP) inspection of BART Lake Merritt Substation (LMA) located at 800 Madison St, Oakland CA 94607. ACDEH Inspectors Kevin Hom and Antoinette Stetzenmeyer conducted the inspection. Facility walk through conducted with Aaron Meeks, Safety Specialist, and Jonathan Rossen, Manager of Employee/Patron Safety. Email inspection reports to: ameeks@bart.gov; jrossen@bart.gov. Facility inventory confirmed on site. CERTIFICATION OF RETURN TO COMPLIANCE: I certify that the violation(s) noted in this HMBP inspection report have been corrected at BART Lake Merritt Substation (LMA) located at 800 Madison St, Oakland, CA 94607. I have personally examined any documentation attached to the certification to establish that the violations have been corrected.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection
 Eval Date: 05-24-2016
 Violations Found: No
 Eval Type: Routine done by local agency
 Eval Notes: Onsite to conduct the Hazardous Materials Business Plan Inspection at BART Metro Center - 101 8th Street, Oakland, CA 94607. Met with Principal Engineer, Gary Jensen. Facility's most recent HMBP submittal was on 2/19/2016. Facility has a room of Lead Acid Batteries that we were unable to access. Will verify when inspecting Lake Meritt BART station in the future. Facility has a 4,000 gallon aboveground diesel convault tank that is backup power for BART's operating system at the Metro Center. The tank and underground piping are monitoring with an INCON monitoring system that was recently tested by TEC Accutite on 5/12/2016.

Violation Description: Failure to accumulate hazardous waste in a container that is in good condition.

Violation Notes: OBSERVATION: Observed hazardous waste containers in photography lab with incorrect lids that are not tight fitting. Generator must accumulate hazardous waste in containers that are in good condition with tight fitting lids that minimizes release. CORRECTIVE ACTION: Provide the correct tight fitting lid for the hazardous waste container. Submit proof of correction to inspector within 30 days.

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: OBSERVATIONS: The chemical inventory in CERS needs to be updated. Only chemicals meeting the reporting threshold of 55 gallons for liquids, 500 pounds for solids and 200 cubic feet for compressed gases need to be reported in CERS. Also include any extremely hazardous substances if they are equal to or greater than the federal threshold planning quantity (TPQ) listed in Appendix A, Part 355, Title 40 of the Code of Federal Regulations. CORRECTIVE ACTIONS: The following items need to be addressed in the chemical inventory in CERS: Laney Tower: diesel update the Largest Container size to 500 gallons, Maximum Daily Amount should also be 500 gallons. Pool: Add two 60 gallon tanks of sodium hypochlorite. Add hypochlorite solution (observed 128 one gallon containers). Add carbon dioxide (observed 25 cylinders). Update sodium chloride Largest Container size to 50 pounds and Maximum Daily Amount to at least 500 pounds. Chemistry Lab A237 Add carbon dioxide [Truncated]

Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Laney College failed to establish and adequately implement a Hazardous Materials Business Plan by the following observations: OBSERVATIONS FOR LANEY TOWER: The 500 gallon diesel tank for the generator does not have the contents listed on the tank. CORRECTIVE ACTIONS: Label this tank as diesel . Submit a photo of the correction. OBSERVATIONS FOR CHEMISTRY LABS A235-A277: Many containers of hazardous waste stored in the chemical hoods were found open. According to the lab manager, they are left open to vent. Most hazardous waste containers were not properly labeled with the required information and were stored piled on one another. Acetylene cylinder in A277 was not properly secured. CORRECTIVE ACTIONS: Keep all hazardous waste containers closed except when in use. Hazardous waste cannot be left open to vent . Properly store all containers of hazardous waste so that each container can be

Violation Notes: OBSERVATION: Copies of hazardous waste disposal records for the disposal of silver waste from photo processing solutions and spent rinse water were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility on site for three years and have them readily available for review. CORRECTIVE ACTION: The Facility shall maintain copies of the manifests for any transport of a hazardous waste for off-site transfer, treatment, storage or disposal going forward for three years. Locate and submit copies of manifests for photography waste for the last three years.

have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all shipping papers for universal waste for the last three years, maintain them on site, and submit copies to inspector within 30 days.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-15-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine hazardous waste generator (HWG) inspection of Laney College at 900 Fallon Street Oakland CA 94607. Met with Royle Roberts, Risk and Safety Program Manager, who granted consent to perform inspection. Alameda County Department of Environmental Health (ACDEH) to provide inspection report by email to: rroberts@peralta.edu. Laney College is a community college that offers classes in art, welding, machinery, chemistry, biology, and other disciplines. Facility wastes streams include: 1) oily coolant from machine shop and boiler room 2) metal fines from machine shop and welding 3) photographic waste from photography lab 4) laboratory waste 5) universal waste and 6) waste from art building. Facility has five to six employees handling hazardous waste. All violations noted in this Hazardous Waste Generator Inspection Report are to be corrected within 30 days and proof of those corrections submitted to ACDEH in the same time frame.

Violation Date: 11-15-2017
Citation: 22 CCR 23 66273.35 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.35

Violation Description: Failure to accumulate universal waste for one year or less and to demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received.

Violation Notes: OBSERVATION: Universal Waste Handler failed to properly accumulate waste within one year and/or demonstrated accumulation time. Observed no shipping documents or invoices that demonstrate that universal waste are properly disposed of. Royle Roberts states that all universal waste is picked up by North State Environmental. Invoices and shipping documents of universal waste pick up were not available. CORRECTIVE ACTION: Universal Waste Handler shall properly process accumulated waste within one year and/or demonstrated accumulation time. Submit copies of shipping documents or invoices for the disposal of universal waste for the last three years to ACDEH inspector within 30 days.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: OBSERVATIONS: The chemical inventory in CERS needs to be updated. Only chemicals meeting the reporting threshold of 55 gallons for liquids, 500 pounds for solids and 200 cubic feet for compressed gases need to be reported in CERS. Also include any extremely hazardous substances if they are equal to or greater than the federal threshold planning quantity (TPQ) listed in Appendix A, Part 355, Title 40 of the Code of Federal Regulations. CORRECTIVE ACTIONS: The following items need to be addressed in the chemical inventory in CERS: Laney Tower: diesel update the Largest Container size to 500 gallons, Maximum Daily Amount should also be 500 gallons. Pool: Add two 60 gallon tanks of sodium hypochlorite. Add hypochlorite solution (observed 128 one gallon containers). Add carbon dioxide (observed 25 cylinders). Update sodium chloride Largest Container size to 50 pounds and Maximum Daily Amount to at least 500 pounds. Chemistry Lab A237 Add carbon dioxide [Truncated]

Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: OBSERVATION: The annotated site maps that were submitted to CERS are not adequate for the size of this campus. CORRECTIVE ACTION: Submit to CERS an overall site map showing the locations of all of the buildings on campus. Submit to CERS a separate site map for each location that stores or handles hazardous materials or hazardous waste to CERS. At a minimum they should include all of the following on each map: north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous materials/waste handling and storage areas and emergency response procedures. Site maps are required for Laney Tower, the chemistry laboratories, pool storage area, boiler rooms, machine shop, welding shop and cage, art building and the community garden.

Violation Date: 11-15-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: OBSERVATION: No waste analysis was available for the following: 1. Saw dust waste used to clean up spills in machine shop is currently discarded in trash. 2. Fine metal shavings located in welding area and machine shop. Shavings are currently being recycled. 3. Waste clay, clay dust, and wash water from ceramics class in art building. 4. Containers that previously held hazardous materials or waste in the chemistry laboratory. Observed crusty glassware discarded in trash. These wastes are being disposed of as non-hazardous waste. A generator shall make a hazardous waste determination and keep a record of any test results, waste analyses, or other determinations made in accordance with hazardous waste regulations for at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal. CORRECTIVE ACTION: 1. Manage and dispose of saw dust clean up waste as a hazardous waste. 2. Conduct a waste analysis for the [Truncated]

Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Laney College failed to establish and adequately implement a Hazardous Materials Business Plan by the following observations: OBSERVATIONS FOR LANEY TOWER: The 500 gallon diesel tank for the generator does not have the contents listed on the tank. CORRECTIVE ACTIONS: Label this tank as diesel . Submit a photo of the correction. OBSERVATIONS FOR CHEMISTRY LABS A235-A277: Many containers of hazardous waste stored in the chemical hoods were found open. According to the lab manager, they are left open to vent. Most hazardous waste containers were not properly labeled with the required information and were stored piled on one another. Acetylene cylinder in A277 was not properly secured. CORRECTIVE ACTIONS: Keep all hazardous waste containers closed except when in use. Hazardous waste cannot be left open to vent . Properly store all containers of hazardous waste so that each container can be inspected weekly for spillage or leaks. Properly secure all compressed [Truncated]

Site Name: Laney College
Violation Date: 11-15-2017
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: OBSERVATIONS: The HMBP inventory is not accurate and was not updated within 30 days of change of inventory. See Violation #4 for details on this violation. CORRECTIVE ACTIONS: Correct Violation #4. Update CERS anytime the chemical inventory increases by 100% per item.

Violation Date: 11-15-2017
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: OBSERVATION: 1.Observed spills in secondary containments located in chemistry laboratory hazardous waste storage area. 2.Observed spills under equipment in machine shop. 3.Observed fire extinguishers throughout facility that were last assessed and certified on 6/21/2016. Facilities shall be maintained and operated to minimize the possibility of a fire, explosion, or release of hazardous waste to air, soil, or surface water which could threaten human health or the environment. CORRECTIVE ACTION: 1. Immediately clean up spills listed in above observations and manage according to Title 22 hazardous waste regulations. 2. Re-certify fire extinguisher and ensure it is assessed and certified annually. Submit photo/written documentation of corrective actions to inspector within 30 days.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine hazardous waste generator (HWG) inspection of Laney College at 900 Fallon Street Oakland CA 94607. Met with Roysl Roberts, Risk and Safety Program Manager, who granted consent to perform inspection. Alameda County Department of Environmental Health (ACDEH) to provide inspection report by email to: rroberts@peralta.edu. Laney College is a community college that offers classes in art, welding, machinery, chemistry, biology, and other disciplines. Facility wastes streams include: 1) oily coolant from machine shop and boiler room 2) metal fines from machine shop and welding 3) photographic waste from photography lab 4) laboratory waste 5) universal waste and 6) waste from art building. Facility has five to six employees handling hazardous waste. All violations noted in this Hazardous Waste Generator Inspection Report are to be corrected within 30 days and proof of those corrections submitted to ACDEH in the same time frame.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 07/13/1986
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 File Location: All Files are on GeoTracker or in the Local Agency Database
 Local Case Number: RO0000202
 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Gasoline
 Site History: The site is currently occupied by Vics Auto, an automotive repair facility equipped with one 13,000-gallon underground storage tank (UST). Surrounding land use is mixed commercial and residential. Soils in the vicinity of the site are mostly fine to medium sand, with varying silt and clay content. On June 17, 1993, four 1,000-gallon gasoline USTs and one 250-gallon waste oil UST were removed from the site. No groundwater was encountered during excavation activities. The tank conditions were slightly rusted, with two visible holes noted in the waste oil tank. Soil samples collected from the gasoline UST pit and waste oil UST pit contained up to 24 parts per million (ppm) Total Petroleum Hydrocarbons as gasoline (TPHg) and 2,100 ppm Total Oil and Grease (TOG), respectively. The waste oil tank pit was over-excavated and re-sampled. The

MAP FINDINGS

VIC'S AUTOMOTIVE SERVICE (Continued)

S102657129

over-excavation soil sample contained 3.9 ppm TPHg. On August 23, 1994, the two remaining 6,000-gallon gasoline tanks were removed from the site. The UST located in the northern corner of the site was replaced with a 13,000-gallon gasoline UST. Fourteen soil samples were collected from the tank pits and soil stockpiles. The soil samples collected from beneath the southern-most tank contained the greatest petroleum hydrocarbon concentrations of 160 ppm TPHg and 0.82 ppm benzene. The two tank pits were subsequently over-excavated to approximately 19 feet below ground surface (bgs). Heavily contaminated groundwater and soils were encountered. Confirmation soil samples collected after over-excavation contained up to 3,900 ppm TPHg and 6.1 ppm benzene. On July 14, 1995, two soil borings were advanced and completed as groundwater monitoring wells (MW-1 and MW-2). Soil samples were collected from each boring at approximately five-foot intervals. Well MW-1 was not sampled for groundwater because free product was observed in the well at a thickness of 2.22 feet. Groundwater depth at the site was measured to be 17.21 feet bgs. The soil samples contained up to 390 ppm TPHg and 0.3 ppm benzene. The groundwater sample from MW-2 contained 68,000 parts per billion (ppb) TPHg and 480 ppb benzene. On August 8, 1996, three soil borings (SB-1 through SB-3) were advanced to depths ranging between 24 and 25 feet bgs. Soil samples were collected from each boring at 24 feet bgs, with an additional sample collected from boring SB-1 at 18 feet bgs. Grab groundwater samples were also collected from each boring. The soil sample collected from boring SB-1 at 18 feet bgs contained the greatest contamination of 9,100 ppm TPHg, 57 ppm benzene, and 47 ppm MTBE. The grab groundwater samples contained concentrations of up to 140,000 ppb TPHg, 19,000 ppb benzene, and 27,000 ppb MTBE. Manual bailing and pumping of Light Non-Aqueous Phase Liquid (LNAPL) from well MW-1 occurred intermittently from 1997 to 1998. On May 25, 2001, two soil borings were advanced and converted to monitoring wells MW-3 and MW-4. Soil samples were collected from each boring at 15 and 20 feet bgs. The completed wells were sampled during the next monitoring event on June 29, 2001. Soil samples collected from the borings did not contain petroleum hydrocarbons or fuel oxygenates at concentrations above reporting limits. Groundwater from wells MW-3 and MW-4 contained up to 550 ppb TPHg. Groundwater from well MW-2 collected during the same monitoring event contained 69,000 ppb TPHg, 7,200 ppb benzene, and 4,400 ppb MTBE. Due to the continued presence of free product, a LNAPL recovery system was installed in well MW-1 in July 2001. Well MW-1 is located within the backfill of the southern-most gasoline UST. The LNAPL recovery system operated between 2001 and 2003. On April 2 and 3, 2003, fourteen soil borings (SB-4 through SB-17) were advanced both on-site and off-site. Soil samples were collected from the borings at depths ranging between 11 and 18 feet bgs. Grab groundwater samples were collected from each boring and soil vapor samples were collected from five of the borings. The soil samples collected from boring SB-7 at 18 feet bgs and SB-11 at 16 feet bgs contained the highest TPHg concentrations of 4,900 ppm and 2,700 ppm, respectively. Borings SB-7 and SB-11 are located southwest of the former UST locations. Similarly, groundwater samples collected southwest of the former UST locations contained the highest TPHg concentrations. TPHg and benzene were detected in grab groundwater samples at concentrations up to 310,000 ppb and 45,000 ppb, respectively. Soil vapor samples did not contain petroleum hydrocarbons at concentrations above reporting limits. On January 11, 19, and 20, 2005, six extraction/monitoring

VIC'S AUTOMOTIVE SERVICE (Continued)

S102657129

wells (MW-5 through MW-7 and MW-10 through MW-12) were installed both on-site and off-site, with the intent of utilizing a High Vacuum Dual-Phase Extraction (HVDPE) system in the near future. At least one soil sample was selected for analysis from each well. Groundwater samples were collected from newly completed and previously constructed wells (MW-1 through MW-4) on February 3, 2005. The soil samples contained up to 3,200 ppm TPHg, 35 ppm benzene, and 8.5 ppm MTBE. Results of the groundwater samples were similar to previous investigations with the high petroleum hydrocarbon concentrations detected south of the former UST locations. From July 11 to July 27, 2005, a 15-day HVDPE event was conducted in five of the extraction/monitoring wells. During the event, an estimated 10,600 pounds of hydrocarbons were removed in the vapor phase. Following this event, preparations were made to implement a fixed HVDPE system at the site. Startup of the HVDPE system began on June 26, 2007. On July 13, 2006, eight soil borings were advanced throughout the site and off-site in the downgradient direction. Four of the borings were converted to permanent, nested soil gas probes (GP-1 through GP-4). Soil samples and soil gas samples were collected from the gas probes at depths of five and ten feet bgs. The soil samples contained up to 1.6 ppm TPHg, with no concentrations of MTBE above reporting limits. The soil gas samples contained up to 705 micrograms per cubic meter (a%g/m³) TPHg and 6.1 a%g/m³ benzene. On March 18, 2008, wells MW-8, MW-9, and MW-13 were installed to delineate the petroleum hydrocarbon plume in groundwater. Soil samples were collected from the new wells at depths of 15 and 20 feet bgs and contained up to 1.5 ppm TPHG, 0.37 ppm benzene, and 0.089 ppm MTBE. Between August 21 and 22, 2008, soil gas probes GP-3 and GP-4 were decommissioned due to property development. Horizontal HVDPE conveyance piping laterals were installed on wells MW-10 through MW-12 to continue remediation. On July 28, 2009, three monitoring wells (MW-14 through MW-16) were installed off-site to delineate the downgradient extent of the petroleum hydrocarbon plume in groundwater. Soil samples were collected from each of the monitoring well borings at depths ranging between 16 and 25 feet bgs. Groundwater samples were collected from the new wells during the next monitoring event on August 21, 2009. Results of the monitoring event incorporating the newly established wells indicated that the petroleum hydrocarbon plume extended laterally from the former UST location to approximately 7th Street. On March 17, 2010, four soil borings (SB-16 through SB-19) were advanced as part of a source zone delineation study. Soil samples were collected from the borings at approximately two or three foot intervals at depths ranging between 15 and 25 feet bgs. The highest concentrations of TPHg and benzene in soil were detected in soil samples collected below the water table at a depth of 20 feet bgs. Soil samples from borings SB-19, SB-16, and SB-17 contained TPHg at concentrations up to 7,500 ppm, 4,300 ppm, and 2,100 ppm, respectively. Benzene concentrations in soil were highest in borings SB-19 and SB-17 at concentrations of 100 ppm and 87 ppm, respectively (both samples collected at a depth of 20 feet bgs). Groundwater was first encountered in the borings at approximately 19.5 feet bgs with the exception of borings SB-16 and SB-19, where groundwater was encountered at approximately 25 and 21 feet bgs, respectively. One grab groundwater sample collected from boring SB-18 contained 230 ppb TPHg and 3.2 ppb benzene. On June 30 and July 1, 2010, four air sparge wells (AS-1 through AS-4) were installed within the source zone to a total depth of 30 feet bgs. A pilot test for HVDPE with air

MAP FINDINGS

VIC'S AUTOMOTIVE SERVICE (Continued)

S102657129

sparging was conducted between August and October 2010. Results indicated that air sparging in conjunction with the HVDPE system increased the effectiveness of petroleum hydrocarbon mass removal by increasing the off-gas vapor concentrations. High Vacuum Dual Phase Extraction (HVDPE) remediation was conducted at the site from June 2007 to June 2011 in both on-site and off-site wells. The remediation system removed an estimated total of 5,663 gallons of Total Petroleum Hydrocarbons as gasoline (TPHg). A soil vapor sampling event was conducted on October 16, 2012. Five new soil gas probes (GP-5 through GP-9) were installed and sampled along with the remaining two existing soil gas probes (GP-1 and GP-2) on October 31, 2012. TPHg was detected in soil vapor from vapor probe GP-1 at a concentration of 2,700 a%g/m3. TPHg was not detected at concentrations above reporting limits in the remaining eight soil vapor samples. Benzene was not detected in soil vapor depth at concentrations above reporting limits in any of the nine soil vapor samples collected. Groundwater monitoring began at the site on June 29, 2001 and was conducted quarterly until the most recent groundwater monitoring event on May 5, 2012. The depth to groundwater in site monitoring wells has ranged between 12.61 to 20.44 feet bgs. Soil vapor was also monitored on a quarterly schedule from August 2006 to August 2008. Results of soil, groundwater, and soil vapor investigations indicate that a plume of petroleum hydrocarbons extended from the former southern-most UST location a distance of approximately 200 feet southwest (downgradient) of the site. HVDPE and air sparging remediation has reduced the concentrations of TPHg in groundwater from the highest detection of 310,000 ppb in 2003 to a maximum concentration of 250 ppb during the most recent groundwater monitoring event in May 2012. Benzene has also been reduced from a maximum of 52,000 ppb in February 2005 to a maximum concentration of 250 ppb during the most recent groundwater monitoring event in May 2012. Groundwater monitoring data indicate that the plume of petroleum hydrocarbons is stable or shrinking in extent. Based on evidence from recent investigations, the residual soil, groundwater, and soil vapor contamination from the former USTs does not appear to pose a threat to public or environmental health. Therefore, no further action is required for the site.

Case Worker: JES
RB Case Number: 01-0582
Local Agency: ALAMEDA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000479
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: A gasoline service station formerly occupied the site. Ten USTs were removed in May 1992. Soil overexcavation was conducted between December 1992 and March 1993. Various site investigation activities have been conducted since 1995. Several remedial actions have taken place since 1999. A remedial system consisting of a soil vapor extraction and ozone sparging system was installed at the site in early 2011. The systems operated at the site until April 2015 when they were shut down to monitor for potential rebound. Quarterly groundwater monitoring is ongoing to evaluate potential rebound of groundwater concentrations while the remedial systems are not operating. A soil vapor sampling work plan has been requested by ACEH to evaluate the effectiveness of the remediation.

 Local Case Number: RO0003232
 Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
 Potential Contaminants of Concern: Acetone, Benzene, Diesel, Ethylbenzene, Gasoline, Naphthalene, Toluene, Xylene
 Site History:

Site is a 5-story multi-family mixed-use residential complex on Jackson between 11th and 12th Streets. The first floor of the building is commercial and on grade parking with utility rooms and 2 elevators. Previously, the site was developed with the Oakland Hospital as early as 1889. Residential structures were located on-site in the early 1900s, with an automobile repair garage present from at least 1911 through 1933. By the 1940s/1950s, a glass shop was present, as was a retail building and parking lots. By the 1960s/1970s, a store and warehouse were present, as was a private school. In 2005, site development included a warehouse, beauty salon, market, and offices. All historic on-site structures reportedly were demolished in January 2007 and the current building constructed. Three underground storage tanks (USTs) used for the storage of gasoline were removed from the sidewalk adjacent to the site along Jackson St. during utility trench work associated with site redevelopment. The USTs, having capacities of 265 gallons, 265 gallons, and 110 gallons, were removed on April 15, 2016 and noted to be poor condition. Petroleum hydrocarbon was observed in the tank pit. The laboratory analysis report for excavation samples included total petroleum hydrocarbons as gasoline (TPHg) to 2,480 milligrams per kilogram (mg/kg) and naphthalene to 4.59 mg/kg. On May 4, 2016 a limited excavation of the tank pit was performed with concentrations of TPHg reported to 6,320 mg/kg and benzene, toluene, ethyl benzene, and xylenes (BTEX) to 0.943 mg/kg, 0.805 mg/kg, 0.624 mg/kg, and 3.05 mg/kg, respectively, and naphthalene to 2.58 mg/kg. Additionally, several volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) were reported at concentrations above their respective reporting limits. A total of 78.20 tons soil manifested for off site disposal. A fourth sidewalk UST, having a capacity of 750 gallons, reported to be used for the storage of diesel fuel, was discovered and removed in November 2016. The tank was reported in poor condition with visible holes. Over excavation was performed on 12-02-2016 and visually impacted soil was removed to the extent feasible, removing approximately 24.74 tons for off site disposal. A site investigation consisting of four soil borings, five temporary soil gas wells, and five sub-slab soil gas sample points was performed in November 2016. A sixth sub-slab soil gas sample point

was added with the discovery of the fourth UST. Based on the findings of the investigation there does not appear to be vapor intrusion risk to building occupants. Petroleum hydrocarbon contamination is present in soil and groundwater beneath the sidewalk/site and grab groundwater concentrations exceed the Tier I ESLs. Plume delineation completed w/ down gradient GGW sampling. No significant VI risks identified for on- and off-site receptors.

Violation Date: 02-15-2018
Citation: 23 CCR 16 2712 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712

Violation Description: Failure to comply with any of the applicable requirements of the permit issued for the operation of the UST system.

Violation Notes: Returned to compliance on 02/15/2018. OBSERVATION: High product alarm is set at 98 percent. Overfill is set at 95 percent. Observed one high product alarm in T1 87 tank on July 2, 2017. Permit conditions are not complied with due to filling tank to 95%. No tank should be overfilled above 95%. In addition, overfill alarms are not registering on the tape as seen by the Highy product alarms on the alarm history report which means that the tanks could have been filled above 95% without being recorded. CORRECTIVE ACTION: Corrected onsite. The overfill alarm was reset to 90% and the high product was set at 95%. Ensure that this set-up is maintained.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: ACDEH staff completed a previously scheduled inspection for a retail fuel station. The facility does not have a current UST permit to operate from ACDEH. Meet with facility owner Richard Texara who granted permission to complete the inspection. The facility operates 4-10000 gallon SW fiberglass USTs to store 87, 89, 91 fuel and diesel product. All buried fuel piping is sw fiberglass and leak detection is accomplished by ELLD while overfill prevention is via fill tube shutoff valves and spill buckets located within the turbine sump. CSLD is in use at the facility and 0.2 gal monthly and 0.1 gallon annual line test are completed. ACDEH reviewed DO reports on site and other UST document submitted via CERS which were accepted on 3/5/2016; all documentation are current and up to date. Employee training was completed by the facility DO and is documented and is due again 3/2017. Secondary containment testing was completed on 7/2016. Email contact: texara@aol.com

Hazardous Material Business Plan (HMBP) inspection conducted by Alameda County Department of Environmental Health (ACDEH) on March 10, 2016 Consent to inspect was given by and the completed inspection report was reviewed with Kevin Texera, manager. There are four 10,000 gallon single walled fiberglass underground storage tank (one Regular Unleaded, one Mid-grade unleaded, one Premium Unleaded gasoline and one Diesel). Need to add Hazardous Waste Generator program element. Annual submittal into CERS is required by Alameda County Department of Environmental Health.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-10-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: ACDEH staff completed a previously scheduled inspection for a retail fuel station. The facility does not have a current UST permit to operate from ACDEH. Meet with facility owner Richard Texera who granted permission to complete the inspection. The facility operates 4-10000 gallon SW fiberglass USTs to store 87, 89, 91 fuel and diesel product. All buried fuel piping is sw fiberglass and leak detection is accomplished by ELLD while overfill prevention is via fill tube shutoff valves and spill buckets located within the turbine sump. CSLD is in use at the facility and 0.2 gal monthly and 0.1 gallon annual line test are completed. ACDEH reviewed DO reports on site and other UST document submitted via CERS which were accepted on 3/5/2016; all documentation are current and up to date. Employee training was completed by the facility DO and is documented and is due again 3/2017. Secondary containment testing was completed on 7/2016. Email contact: texara@aol.com

 Potential Contaminants of Concern: Gasoline
 Site History: Summary This fact sheet has been prepared to inform community members and other interested parties of potential case closure for a fuel leak case at the Shell-branded service station at 105 5th Street in Oakland, California (see attached map on back). Site investigation and cleanup activities have been completed and it does not appear that the fuel release presents a risk to human health for nearby residents or site workers. Site investigation activities, which were conducted at various times between 1999 and 2012, have defined the extent of petroleum hydrocarbons in soil, soil vapor, and groundwater beneath the site. Groundwater monitoring was conducted from July 1999 to July 2008 using seven groundwater monitoring wells at the site. The groundwater monitoring data indicate that the concentrations of petroleum hydrocarbons in groundwater have decreased since 1999 and that water quality is expected to be restored to water quality objectives through natural attenuation processes. During the most

recent groundwater sampling event in July 2008, the maximum concentration of total petroleum hydrocarbons as gasoline (TPHg) detected in groundwater beneath the site was 980 micrograms per liter (parts per billion). Between August 2009 and December 2011, soil vapor sampling was conducted at ten locations throughout and along the margins of the site. Elevated concentrations of petroleum hydrocarbons were detected in soil vapor samples collected from three locations within the interior portion of the site but were not detected at concentrations of concern along the margins of the service station or near the station kiosk. The residual contamination does not appear to pose a risk to nearby residents or site workers. Background The site is an active service station at the corner of 5th Street and Oak Street in Oakland, CA. A fuel release was discovered during an upgrade of the dispensers and piping system in November 1996. Soil and groundwater sampling activities have taken place at various times between 1999 and 2012. Periodic dual-phase vacuum extraction was conducted from April 2000 to March 2001 to remove petroleum hydrocarbons in the vapor and groundwater phases. Periodic groundwater extraction was conducted at the site from November 2001 to June 2006.

Environmental Interest/Information System
STATE MASTER

Registry ID: 110002819200

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 390685
Site Name: County of Alameda GSA Rene C. Davidson Courthouse
Violation Date: 04-20-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 05/29/2018. OBSERVATION: Employee training documentation for all applicable employees was not available for review. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan and procedures. Submit employee training records for the past three years.
Violation Division: Alameda County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-20-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site with Rod Alston, GSA Supervisor of Building & Plant Maintenance, who granted permission to conduct the inspection. Ed Hunter, GSA Building Engineer, assisted with the walk-through of the facility. Facility does not routinely generate hazardous waste. Facility does generate universal waste (lamps, ballasts and non-empty aerosols). Facility is to ensure that lamps are properly stored in containers large enough to enclose the entire lamp. Lamps must always be stored to prevent breakage. Ballasts and non-empty aerosols must be stored in containers and not in cardboard boxes. This facility will be removed from the Hazardous Waste Generator program.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS HAZ WASTE:
 Site ID: 22062
 CERS ID: 10397998
 CERS Description: Hazardous Waste Generator

Violations:

Site ID: 22062
 Site Name: County of Alameda GSA Administration Bldg.
 Violation Date: 04-20-2018
 Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
 Violation Description: Failure to complete and electronically submit a site map with all required content.
 Violation Notes: Returned to compliance on 05/10/2018. OBSERVATION: The site map submitted to CERS does not include the location of the hydraulic fluid in the elevator rooms 24A and 13. The site map for the Generator/AST Enclosure incorrectly shows compressed nitrogen stored in two locations inside the generator. Nitrogen is only stored on the northeast side. CORRECTIVE ACTION: Revise the site map to include the hydraulic fluid in the elevator rooms and remove one of the nitrogen locations and resubmit the maps to CERS.
 Violation Division: Alameda County Environmental Health
 Violation Program: HMRRP
 Violation Source: CERS

Site ID: 22062
 Site Name: County of Alameda GSA Administration Bldg.
 Violation Date: 04-20-2018
 Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
 Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
 Violation Notes: OBSERVATION: Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years. The only inspection record found for tank inspections is a "Generator Service Bi-Weekly" form which does not cover all of the tank inspection requirements such as visually looking for corrosion or inspecting foundations. Please refer to Table G10 in the SPCC Plan or the "Tank Inspections" document that was submitted as part of the SPCC

Site ID: 22062
Site Name: County of Alameda GSA Administration Bldg.
Violation Date: 04-20-2018
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: OBSERVATIONS: The HMBP has not been adequately implemented as demonstrated by emergency equipment is not tested and maintained as necessary. One emergency eye wash fountain in the maintenance area is missing a cover to one of the spouts. It is unknown when this fountain was last inspected. Compressed gases stored throughout the maintenance area are not adequately secured. CORRECTIVE ACTION: Submit photos/documentation demonstrating that the emergency eye wash fountain has been inspected and the missing cover has been replaced and that all compressed gases have been properly secured.

Violation Date: 04-20-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to prepare a Spill Prevention, Control, and Countermeasures (SPCC) Plan.

Violation Notes: OBSERVATIONS: A Tier 1 SPCC Plan dated December 2010 (with February 2015 Admin Updates) was last uploaded to CERS on March 2, 2015. The SPCC Plan is not being implemented due to the following: a copy of the plan is not available on site; AST weekly inspections are not occurring weekly as directed by the plan and no training on the SPCC Plan has occurred. CORRECTIVE ACTIONS: Provide a copy of the latest SPCC Plan to the site. Begin weekly inspections of both of the ASTs. Train all employees on the contents of the SPCC plan. Submit documentation supporting the above corrections.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-20-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site with Rod Alston, GSA Supervisor of Building & Plant Maintenance, who granted permission to conduct the inspection. Ed Hunter, GSA Building Engineer, assisted with the walk-through of the facility. Facility does not routinely generate hazardous waste. Diesel generators and hydraulic elevator units are serviced by outside vendors. Facility does generate universal waste (lamps, ballasts and non-empty aerosols). Facility is to ensure that lamps are properly stored in containers large enough to enclose the entire lamp. Lamps must always be stored to prevent breakage. Ballasts and non-empty aerosols must be stored in containers and not in cardboard boxes. This facility will be removed from the Hazardous Waste Generator program.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 05/10/2018. OBSERVATION: The site map submitted to CERS does not include the location of the hydraulic fluid in the elevator rooms 24A and 13. The site map for the Generator/AST Enclosure incorrectly shows compressed nitrogen stored in two locations inside the generator. Nitrogen is only stored on the northeast side. CORRECTIVE ACTION: Revise the site map to include the hydraulic fluid in the elevator rooms and remove one of the nitrogen locations and resubmit the maps to CERS.

Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes: OBSERVATION: Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years. The only inspection record found for tank inspections is a "Generator Service Bi-Weekly" form which does not cover all of the tank inspection requirements such as visually looking for corrosion or inspecting foundations. Maintenance, who granted permission to conduct the inspection. Ed Hunter, GSA Building Engineer, assisted with the walk-through of the facility. Facility does not routinely generate hazardous waste. Diesel generators and hydraulic elevator units are serviced by outside vendors. Facility does generate universal waste (lamps, ballasts and non-empty aerosols). Facility is to ensure that lamps are properly stored in containers large enough to enclose the entire lamp. Lamps must always be stored to prevent breakage. Ballasts and non-empty aerosols must be stored in containers and not in cardboard boxes. This facility will be removed from the Hazardous Waste Generator program.

Eval Type: Routine done by local agency
Eval Notes: On site with Rod Alston, GSA Supervisor of Building & Plant Maintenance, who granted permission to conduct the inspection. Ed Hunter, GSA Building Engineer, assisted with the walk-through of the facility. Facility has one 2700 gallon AST for diesel which is connected to a 500 gallon diesel generator AST. RL Stevens services the Veeder Root monitoring system. The display on the system is currently malfunctioning and is not readable. The system printout currently reads All Functions Normal . The Hazardous Materials Business Plan (HMBP) was last submitted to CERS on February 28, 2018. All violations noted in this HMBP inspection report are to be corrected within 30 days and proof of those corrections submitted to this office in the same time frame. CERTIFICATION OF RE TURN TO COMPLIANCE I certify that the violation(s) noted in this HMBP inspection report have been corrected. I have personally examined any documentation attached to the certification to establish [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-20-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site with Rod Alston, GSA Supervisor of Building & Plant Maintenance, who granted permission to conduct the inspection. Ed Hunter, GSA Building Engineer, assisted with the walk-through of the facility. Facility does not routinely generate hazardous waste. Diesel generators and hydraulic elevator units are serviced by outside vendors. Facility does generate universal waste (lamps, ballasts and non-empty aerosols). Facility is to ensure that lamps are properly stored in containers large enough to enclose the entire lamp. Lamps must always be stored to prevent breakage. Ballasts and non-empty aerosols must be stored in containers and not in cardboard boxes. This facility will be removed from the Hazardous Waste Generator program.

Violation Notes: UST system by a designated operator (DO). Returned to compliance on 07/05/2018. "OBSERVATION: The designated operator employee training records were not on site or readily available for review and therefore it could not be verified by ACDEH that employee training was performed and current. The designated operator shall document the training on a required form for facility employees for which he or she is responsible in the proper operation and maintenance of the UST system once every 12 months. The training shall include, but is not limited to: 1. Operation of the UST system in a manner consistent with the facility's best management practices 2. Employee's role with regard to monitoring equipment as specified in the facility's monitoring plan 3. Employee's role with regard to spills and overfills as specified in the facility's response plan 4. Name of the contact person(s) for emergencies and monitoring equipment alarms. CORRECTIVE ACTION: Ensure that employees have been trained by the designated operator, use the required form attached to maintain [Truncated]

Site ID: 108426
Site Name: County of Alameda GSA AlcoPark Garage
Violation Date: 04-23-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 07/16/2018. OBSERVATION: Facility last disposed of waste coolant on 1/11/17. Waste oily debris was last disposed of on 3/10/14. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. All hazardous waste must be disposed of every six months. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to ACDEH.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site with Rick Salaverria, Lead Mechanic for GSA. Scot Allan previously granted permission to conduct this inspection. The Hazardous Waste Generator program was the only program inspected today. There is a sump near the waste coolant and new soap storage area that has liquid in it. According to Mr. Salaverria Safety-Kleen will be pumping it out later this week. Ensure that no liquid accumulated in that sump. Facility may want to consider moving all hazardous materials/waste from that area to avoid contaminating this sump. Facility is a Small Quantity Generator and thus all hazardous waste must be disposed of at least every six months (except for used oil filters and waste aerosols which must be disposed of annually). Ensure that all empty drums are labeled as "empty". All violations noted in this Hazardous Waste Generator inspection report are to be corrected within 30 days and proof of those corrections submitted to this office in the same time [Truncated]

Violation Date: 07-20-2017
Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)
Violation Description: Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the CUPA, for the life of the UST.
Violation Notes: Returned to compliance on 07/05/2018. OBSERVATION: The facility did not have 2015 Annual Monitoring Certification test results and 2016 Annual Monitoring Certification test results on site during inspection. CORRECTIVE ACTION: Maintain written monitoring and maintenance records for a period of 3 years. Submit verification to ACDEH.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 07/16/2018. OBSERVATION: Facility last disposed of waste coolant on 1/11/17. Waste oily debris was last disposed of on 3/10/14. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. All hazardous waste must be disposed of every six months. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to ACDEH.

Violation Description: Failure to have current UST Monitoring Plan available on site.
Violation Notes: Returned to compliance on 08/07/2018. OBSERVATION: The monitoring plan on site is not approved by the CUPA. UST facility UST tank information for both tanks (Tank ID #1921-3 and Tank ID #1921-4) is not current in CERS. Line item 464 (e) for both tanks should be fiberglass and line item 452 (a) for both tanks should be no. The monitoring plan must be current and approved by the CUPA. CORRECTIVE ACTION: Correct line items listed above, submit monitoring plan to CERS for approval and maintain an approved copy on site. Submit verification to the CUPA within 30 days.

previously granted permission to conduct this inspection. The Hazardous Waste Generator program was the only program inspected today. There is a sump near the waste coolant and new soap storage area that has liquid in it. According to Mr. Salaverria Safety-Kleen will be pumping it out later this week. Ensure that no liquid accumulated in that sump. Facility may want to consider moving all hazardous materials/waste from that area to avoid contaminating this sump. Facility is a Small Quantity Generator and thus all hazardous waste must be disposed of at least every six months (except for used oil filters and waste aerosols which must be disposed of annually). Ensure that all empty drums are labeled as "empty". All violations noted in this Hazardous Waste Generator inspection report are to be corrected within 30 days and proof of those corrections submitted to this office in the same time [Truncated]

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Global Id: T0600101486
Latitude: 37.798989492
Longitude: -122.269965472
Status: Open - Remediation
Status Date: 07/15/2014
Case Worker: JES
RB Case Number: 01-1611
Local Agency: ALAMEDA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000231
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Three UST were removed in 1990 and significantly elevated concentrations of petroleum hydrocarbons were detected in soil during the UST removal. A program of groundwater monitoring was implemented in 1991 and dissolved phase contamination is migrating offsite and impacting the downgradient sites located at 726 and 706 Harrison Street. Soil and groundwater sampling completed in 2007 detected elevated levels of MTBE in the deeper water bearing zone at 48 feet bgs. This site is part of a commingled plume and remedial action is proposed to remove residual mass beneath the sites. A pilot test of multi-phase extraction and air sparging/soil vapor extraction was conducted in 2013. Based on the results of the pilot test, remediation of 706 and 726 Harrison Street is planned to begin in 2014 using air sparging and soil vapor extraction. A Remedial Action Plan that describes the planned remediation was approved in July 2014 following a public comment period on the Remedial Action Plan.

Citation: HSC 6.7 29291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 29291(b)
Violation Description: Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment.
Violation Notes: Returned to compliance on 03/23/2017. OBSERVATION: UDC 3/4 Premium float and chain failed functional test. Float responded to water but the shear valve assembly was not triggered. Lead seal on chain was interfering with the trigger mechanism. CORRECTIVE ACTION: Service tech re-positioned lead seal and re-tested. Passed. CORRECTED AT THE TIME OF INSPECTION.

Site ID: 18619
Site Name: Union 76
Violation Date: 03-22-2018
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description: Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 p.s.i.g. and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes: Returned to compliance on 03/22/2018. OBSERVATION: The Regular Unleaded (Tank ID # 1-87) line leak detector failed to detect a leak when tested. All line leak detectors shall be capable of detecting a 3-gallon per hour leak at 10 psi. CORRECTED ON SITE: The service technician adjusted the leak detector, retested it, and it passed. This was corrected on site.

Environmental Health (ACDEH) on March 23, 2017. Nik Zagorov is the service technician conducting the monitoring equipment certification and spill container testing. Consent to inspect was given by and the completed inspection report was reviewed with Farukh Cho, manager. OBSERVATION: Unable to locate UST Operating Permit. Action: I will review with ACDEH to determine status of UST Operating Permit. A current valid UST Operating Permit will be issued by ACDEH upon return to compliance. Submit the annual monitoring equipment certification and spill container test results to ACDEH within 30-days of completion of testing.

Status Date: 06/11/2018
Case Worker: DY
RB Case Number: Not reported
Local Agency: ALAMEDA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0003262
Potential Media Affect: Soil Vapor, Well used for drinking water supply
Potential Contaminants of Concern: Heating Oil / Fuel Oil, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubrication Oil
Site History: This site is eligible for closure based on the low risk from petroleum constituents under the Low Threat Closure Policy. The site is located at 401 Jackson Street at the northwest corner of Jackson Street and 4th Street. The site consists of one parcel and is surrounded by mixed-commercial and residential properties. Historically the property consisted of a two-story structure and operated as residential dwellings between the 1880's and 1900's. In the 1940's the site was redeveloped as the currently developed industrial building consisting of a single story commercial warehouse. Operations between 1940's and 1990's included food processing and packing, wholesale poultry sales, and slaughterhouse. Between the 1990's and 2010's the site primarily operated as a meat processing and packing facility. Currently the property is pending a sales transaction. Information collected in the Phase I investigation indicated one underground storage tank (UST) was located beneath the southwestern corner of the warehouse. Based on interviews conducted during the Phase I, the UST was reportedly used for gasoline and installed in 1960's and abandoned in place and filled with concrete in 1980's. No evidence of a release at the site was identified during record review. Subsurface investigations were performed at the site during July, August, and November 2017 and included the collection of soil, sub-slab vapor, soil gas, and groundwater samples and completion of two geophysical surveys. Concentrations of Total Petroleum Hydrocarbon as motor oil (TPH-mo) in soil were reported up to 12 milligrams per kilogram (mg/kg). Groundwater samples reported Total Petroleum Hydrocarbon as gasoline (TPH-g), benzene, and methyl tert butyl ether (MTBE) at concentrations of 3,800, 21, and 16 micrograms per liter (ug/l) respectively. Additionally, Total Petroleum Hydrocarbon as diesel (TPH-d) and TPH-mo in groundwater were reported up to 3,400 and 45,000 ug/l, respectively, in an area located outside the southeast corner of the building which was not consistent with the noted former gasoline UST reported and consistent of a home heating oil tank. Concentrations reported in temporary sub-slab soil vapor probes installed beneath the foundation in the vicinity of the former gasoline UST indicated a low threat from petroleum hydrocarbons and associated constituents. Additionally, results of the geophysical surveys did not identify the presence of a

historical heating oil tank or gasoline UST. Subsequent investigation activities were conducted in first quarter 2018 to evaluate secondary source below the suspected heating oil tank pit, delineate the petroleum hydrocarbon groundwater plume, and evaluate vapor intrusion in sub-slab soil gas across the building footprint.

File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000321
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Three UST were removed in 1990 and significantly elevated concentrations of petroleum hydrocarbons were detected in soil during the UST removal. A program of groundwater monitoring was implemented in 1991 and dissolved phase contamination is migrating offsite and impacting the downgradient sites located at 726 and 706 Harrison Street. Soil and groundwater sampling completed in 2007 detected elevated levels of MTBE in the deeper water bearing zone at 48 feet bgs. This site is part of a commingled plume and remedial action is proposed to remove residual mass beneath the sites. A pilot test of multi-phase extraction and air sparging/soil vapor extraction was conducted in 2013. Based on the results of the pilot test, remediation of 706 and 726 Harrison Street is planned to begin in 2014 using air sparging and soil vapor extraction. A Remedial Action Plan that describes the planned remediation was approved in July 2014 following a public comment period on the Remedial Action Plan.

Latitude: 37.7981959136734
Longitude: -122.270396947861
Status: Open - Remediation
Status Date: 07/14/2014
Case Worker: JES
RB Case Number: NA
Local Agency: ALAMEDA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000484
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Benzene, Gasoline
Site History: In February 1991 six USTs were removed and confirmation soil sampling detected elevated levels of hydrocarbon contamination beneath the site. Additional site characterization completed from 1993 through 1995 detected significantly elevated levels of TPHg and benzene in soil and groundwater. This site is part of a commingled plume and remedial action is proposed to remove residual mass beneath the sites. A pilot test of multi-phase extraction and air sparging/soil vapor extraction was conducted in 2013. Based on the results of the pilot test, remediation of 706 and 726 Harrison Street is planned to begin in 2014 using air sparging and soil vapor extraction. A Remedial Action Plan that describes the planned remediation was approved in July 2014 following a public comment period on the Remedial Action Plan.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

 Site ID: 16954
 CERS ID: 10456867
 CERS Description: Hazardous Waste Generator

Violations:
 Site ID: 16954
 Site Name: Cash & Carry # 567
 Violation Date: 04-03-2018
 Citation: 22 CCR 18 66268.7(a) - California Code of Regulations, Title 22, Chapter 18, Section(s) 66268.7(a)
 Violation Description: Failure to determine if the waste has to be treated before it can be land disposed and retain the documentation at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal.
 Violation Notes: Returned to compliance on 04/03/2018. OBSERVATION: Observed no copy of land disposal restriction (LDR) notification made available for review during inspection for the following: Manifest #010824354 FLE dated 12/21/2017 CORRECTIVE ACTION: The generator shall make a determination of all hazardous wastes if the waste is restricted from land disposal. Submit to the inspector a copy of the missing LDR Notification or documentation showing that the hazardous waste is not subject to land disposal. Facility manager contacted corporate headquarters and was able to obtain the missing LDR to correct violation on-site.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 04/03/2018. OBSERVATIONS: Observed the following: 1. Hazardous waste container for Oxidizers Waste has an accumulation start date of 5/4/15. No waste observed in container. 2. Hazardous waste container for Corrosive Bases, OTC Pharmaceuticals and Toxics has an accumulation start date of 7/26/17. No waste observed in container. 3. Labeling for all hazardous waste containers are missing generator name. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) most current accumulation start date. CORRECTIVE ACTION: Immediately label all hazardous waste containers with the name of the generator and most current accumulation start date and submit proof of corrective action to inspector within 30 days. Facility manager corrected on-site. Facility currently has no hazardous waste stored on site.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

about 1929. Site developed in the 1940s-possibly military related, becoming vacant land by the late 1950s through the early 1970s. Development of site, consistent with current development, performed in the late 1970s. A 1,000-gal UST was removed in 1992. TPHd identified up to 54,000 mg/kg in soil & 580 ug/L in GW. Elevated metals levels of up to 720 mg/kg Zn, 600 mg/kg Pb, and 120 mg/kg Ni in soil and 8.5 ug/L Cd, 27 ug/L Cr, 46 ug/L Pb, 45 ug/L Ni and 52 ug/L Zn in GW. Numerous PNAs identified in soil and GW. Much of the contamination documented during UST investigation was not attributable to the UST but to a more regional industrial source-possibly the lumber mill with possible wood treatment. The LUST case was closed and this SCP case opened as RO2666.

Status: Open - Eligible for Closure
Status Date: 02/02/2018
Case Worker: KLD
RB Case Number: NA
Local Agency: ALAMEDA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0002922
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Gasoline
Site History: The three underground storage tanks (USTs) were removed from operation in May 1986. Four soil samples collected at the time of removal were below the detection limits. However, no groundwater samples were collected at the time. Subsequent sampling beginning in 2001 detected elevated petroleum hydrocarbons in soil and groundwater. In addition, PCE, TCE, cis-1,2-DCE and vinyl chloride were detected in water samples collected at the site. The site was converted to a condominium building with parking and commercial on the lower floor. Soil vapor sampling and downgradient extent of groundwater contamination sampling requested.

Completed Date: 04/07/2017
Comments: DTSC provided conditional approval of the document entitled Indoor-Air Sampling Results, Fourth Quarter 2016.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 05/11/2017
Comments: DTSC provided to AMethod the May 2017 Fact Sheet (in english, Spanish and chinese) via email.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 05/09/2017
Comments: DTSC issued its conditional approval of the First Quarter 2017 Indoor-Air Sampling Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Pilot Study/Treatability Workplan
Completed Date: 07/20/2017
Comments: DTSC issued a letter approving the ZVI Pilot Test Work Plan via email and poste.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 08/11/2017
Comments: Issued public notices for the draft Response Plan to the Alameda Times Star, the La Opinion De la Bahia and the Sing Tao Daily. Papers are to publish notices on 8/18/2017.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 11/17/2017
Comments: DTSC issued the work notices (English, Spanish and Chinese versions) for the Response Action field work to commence the week of November 27, 2017 with the pre-demo investigation soil, soil gas and groundwater sampling.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 08/14/2017
Comments: DTSC prepared a Community Update (aka Fact Sheet) for the Response Plan in English, Spanish and Chinese and mailed the update to occupants within a 1/4-mile radius of the project site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 11/15/2017
Comments: DTSC approved the Pre-demolition Investigation Work Plan. Field activities are scheduled to be conducted the week of November 27, 2017.

Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0001201
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: This case was closed by ACEH on December 8, 1999. A separate case (ACEH case RO0003037) was apparently opened for this site in 2012 using a different address (54 Embarcadero). Further review of the case files indicates that both cases apply to the same site and that the 1999 case closure closes the investigation and cleanup related to underground storage tanks at the site. Approximately 1,400 cubic yards of soil that was impacted by polycyclic aromatic hydrocarbons (PAHs) was excavated from three areas of the site. The soil containing PAHs was used for road base under the parking lot and under a portion of a building. Due to the PAHs in these areas, the site was closed in 1999 with site management requirements that require review of the corrective action if land use changes. The integrity of the asphalt and concrete cap over the soil containing PAHs is to be maintained.

VUKASIN/SOUTHERN PACIFIC (Continued)

S118406174

Site History: Kaldveer Associates indicated that the site was created in the early 1900's by in-filling of shallow water tidal flats. Kleinfelder reported that the Southern Pacific Transportation Company purchased the property in 1929 from Tilden Lumber and Mill Company and retained ownership until 1987. The property was leased to lumber wholesalers in the 1940's and 1950's for storage and distribution of lumber arriving by rail. Kleinfelder reported that aerial photographs taken in 1959 to 1975 indicate that the southwestern half of the site and the adjacent lot to the north (bordering Oak Street) apparently served as telephone pole storage areas and possible treatment areas, although Kleinfelder reported that none of the photos indicated the presence of drum storage or staining or other visible signs of contamination. After 1959, the site was used as a railroad team spur. A team spur is a secondary location for freight handling for a number of companies which do not own private spurs. In 1980, the Ford Motor Company leased a portion of the property for freight storage. The property was purchased by Mr. George Vukasin in 1987.

Local Case Number: RO0003084
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil, Under Investigation
Potential Contaminants of Concern: Benzene, Diesel, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Naphthalene, Toluene
Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health (ACEH) website at <https://ehgis.acgov.org/dehpublic/dehpublic.jsp>. Site is developed as a warehouse and distribution center for The Salvation Army (TSA) and is in the initial characterization phase of investigation. In November 2010, two USTs, a 10,000-gallon diesel and an 8,000-gallon gasoline tank, were removed. Discolored soil and obvious petroleum odor was noted in the pit excavation. Samples recovered from the tank pit were reported to include up to 17,000 milligrams per kilogram (mg/kg) total petroleum hydrocarbons as gasoline (TPHg) and 300 mg/kg benzene. Diesel and MTBE were not detected at the site. The 10,000-gallon diesel and an 8,000-gallon gasoline USTs are second generation tanks. Previous USTs were removed circa 2000. A strong odor emanated from the tank pit, so it was left open to aerate prior to the installation of the second generation USTs. No record of tank condition or sampling was found for the first generation tanks in the files. Initial soil and groundwater investigation performed in January 2014 with the advance of 7 soil bores- three in the former tank pit with 4 bores forming a transect along the SSW side of the pit. No soil samples were collected within 10 feet of the ground surface. Maximum soil concentrations within the pit were near the northwest corner (SB7 @ 20) with TPHg: 8,900 mg/kg, total petroleum hydrocarbons as diesel (TPHd): 41 mg/kg, benzene, toluene, ethylbenzene, and xylenes (collectively BTEX): 64, 260, 170, & 610 mg/kg, & 12 mg/kg methyl tertiary butyl ether (MTBE). Maximum soil concentrations along transect were located in a western bore (SB3 @ 20) at TPHg: 9,400 mg/kg, TPHd: 120 mg/kg, BTEX: 110, 380, 240, & 890 mg/kg, & <2.0 mg/kg MTBE. Maximum grab groundwater (GGW) concentrations within the pit were reported for SB1 with TPHg: 210,000 micrograms per liter (ug/L) (x8015), BTEX (x8015): 35,000, 47,000, 3,000, & 16,000 ug/L, respectively, & 240 ug/L (x8260) MTBE; and maximum GGW concentrations along transect were reported for SB4, the western most soil bore, at TPHg: 280,000 ug/L (x8015), BTEX (x8015): 35,000, 30,000, 3,900, & 20,000 ug/L & 5,300 ug/L (x8260) MTBE. Note: no water was recovered in SB3. Three on-site and one off-site wells installed for GW investigation. Skimmers operational in two wells and seen consistently reported in two of the 3 on-site wells & intermittent in other well. Most recent event- conducted 1Q18 reported 2 inches of FP in MW-3 skimmer. Passive soil gas survey performed for down gradient plume delineation- report over due, but may have been delayed due to weather-related issues.

File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0002947
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Four USTs, located under the sidewalk on 11th Street near the Webster Street intersection were removed from the site in April 1987. Significantly elevated concentrations of soil and groundwater contamination was present at the site. In 1987, borings and monitoring wells were installed at the site. In 1988, a groundwater extraction system began operation. The site was later redeveloped to an multi-story office complex with three floors of sub-grade parking.

Completed Date: 04/22/2010
Comments: DTSC approved the SSI report and concurred with the recommendation that a release has occurred and that the response action will be completed in two phases.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 02/01/2010
Comments: PEA public review and comment period ran from December 23, 2009 through February 1, 2010. The Public Hearing was held on January 27, 2010. Based on notice from district, no comments were received from the public during the public review period or at the public hearing. Notice of compliance was provided in the final PEA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 06/28/2010
Comments: DTSC approved for implementation the RAW for the Phase I area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 05/13/2010
Comments: DTSC finalized the Community Profile Report (CPR). A copy of the CPR is to be placed in the information repositories along with Draft RAW, Draft NOE, Site Fact Sheet, and other related documents.

Completed Area Name: PROJECT WIDE

Completed Date: 07/10/2010
Comments: SSI fieldwork for Phase II area was completed on July 10 and 11, 2010 (Sat. and Sun).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 01/25/2011
Comments: DTSC approved the SSI-II report for the Phase II area of the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 09/08/2010
Comments: Received additional TEM analytical results for NOA. Additional samples results show non-detect (0.01%) NOA fibers. Fill material from the proposed Doyle Drive borrow source area between Doyle Drive and the Golden Gate Bridge in San Francisco is suitable for fill material. Additionally, DTSC was informed that a second proposed borrow source area, from a quarry in Brisbane, may be used. Additional information and analytical data to be submitted for proposed A/B source area in Brisbane.

Completed Area Name: Phase I OU

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Benzene, Diesel, Ethylbenzene, Gasoline, Naphthalene, Toluene, Waste Oil / Motor / Hydraulic / Lubricants
Site History: Prior to 1989 the site operated as a gasoline service station. Previous investigations indicate that five underground storage tanks (USTs) previously existed on site including two 6,000-gallon gasoline USTs, one 550-gallon waste oil, and one 1,000-gallon solvent UST. One of the USTs was said to have been removed prior to 1988; however, no documentation exists regarding this UST and its removal. Available records do not indicate who pulled the tank, the contents of the tank, or the exact date of the removal, but it is believed that this tank was located close to the location of monitoring well MW 1. The other four USTs were removed in 1989. During the 1989 UST excavation, soil samples were collected from beneath each tank, and the tanks were observed to have no obvious pitting or corrosion. 10 cubic yards of soil that were deemed contaminated were stockpiled onsite, and sent for analysis. High concentration of fuel contamination was detected in the northeastern excavation, and in the waste oil/solvent UST excavation. In September and October 1989, a preliminary investigation was conducted to determine whether fuel detected in soil during UST excavation activities impacted groundwater. Two locations (north western, and waste/oil solvent excavation area) were re-excavated and 25 cubic yards of additional contaminated soil was removed. The northwestern excavation was backfilled with a combination of clean fill and re-used uncontaminated soil from the initial excavation of the two gasoline USTs while the waste oil/solvent excavation was backfilled with clean fill. Construction of the existing commercial 2-story building began in early 1991. Starting from October 1989, monitoring wells (onsite and offsite) and soil borings were installed to define the lateral extent of the contaminant plume. A periodic subsurface monitoring program was implemented to monitor contaminants from October 1989 to December 2015. Trend analysis from these subsurface investigation indicates that dissolved-phase hydrocarbon plume in the groundwater appears to be generally stable. Two soil vapor probes and two sub-slab soil vapor probes were installed in November 2006 and December 2015 respectively to assess vapor intrusion risk to indoor air within the on-site building. Based on the sample results obtained from these vapor probes, no concentrations were detected above regulatory screening levels, and it was determined that no potential risk for vapor intrusion to the site building exists. Potential Exposure to Chemicals of Concern The chemicals of concern at the site are residual TPHg, TPH as diesel, and BTEX in groundwater and soil from the former gasoline USTs located in the northwest portion of the site and the former USTs located in the sidewalk along 8th Street. Since soil vapor results showed no concentrations were detected above regulatory screening levels, direct contact and ingestion appear to be the two potential exposure to these chemicals of concern. Remediation Activities Remediation was conducted by over excavating hydrocarbon contaminated soil below the former USTs. No additional corrective actions were performed at the site.

File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0002992
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Two underground fuel tanks were closed in place beneath the sidewalk at 1424 Harrison Street in 1982. The tanks were filled with cement slurry. Site investigation activities conducted for a release from a UST system at the adjacent property at 1432 Harrison Street, detected petroleum hydrocarbons in soil adjacent to and beneath the USTs closed in place at 1424 Harrison Street. Further investigation of the site was requested. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

RB Case Number: 01-0739
Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000266
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Site investigations were conducted at various times from July 1990 to October 1996. In December 1993, two 1,000-gallon gasoline underground storage tanks were removed from beneath the sidewalk along Harrison Street. In addition, three hydraulic lifts, one vault, one wash rack sump, and associated piping were reportedly excavate and removed from the site. A total of approximately 240 cubic yards of hydrocarbon-impacted soil was reportedly removed from these areas. Soil vapor extraction and air sparging remediation was conducted from December 2001 through April 2005. Not all historic documents for the fuel leak case are available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

 Local Case Number: RO0002931
 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Gasoline
 Site History: June 23, 2006 a phase II environmental assessment was performed. Petroleum hydrocarbons and oxygenates were observed in soil samples. Groundwater samples were not collected. Additional investigation was proposed and approved however, this was not performed. In August 2009, three 12,000-gallon USTs, dispensers and piping were removed

FINDS:

Registry ID: 110002629503

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

RB Case Number: NA
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Copper, Lead, Diesel, Gasoline, Naphthalene
Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at <https://ehgis.acgov.org/dehpublic/dehpublic.jsp>. A 1,000-gallon fuel UST was removed in October 2007. Stained and odiferous soil ws encountered at the time of the removal. The tank pit was over excavated. Impacts at the site were reported to include 5,300 mg/kg TPHg, 15,000 mg/kg TPHd and 1,200 mg/kg lead. VOCs are also reported at the site. Grab groundwater was reported to include up to 5,400 ug/L TPHg, 11,000 ug/L TPHd, 2.4 ug/L PCE, 1.3 ug/L TCE and 1.1 ug/L MTBE.

Local Agency: Not reported
File Location: Not reported
Local Case Number: RO0003216
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Diesel, Waste Oil / Motor / Hydraulic / Lubricating
Site History: The site is currently developed with an apartment building with a liquor store occupying the first floor. On December 8, 2015, one 1,000 gallon underground storage tank (UST) used for light diesel heating fuel was removed from the sidewalk at the southeast side of the site. During the UST removal, 50 tons of impacted soil and 2,800 gallons of impacted groundwater were removed. Site investigation including soil, grab groundwater, and soil gas sampling was performed. This diesel UST release case has been evaluated for closure consistent with the current site use and the State Water Resource Control Board Low-Threat Underground Storage Tank Closure Policy (LTCP) for petroleum related contaminants. Based on this evaluation, the site has been closed as a low-risk site. Case closure is granted for current residential and commercial land use with no site management requirements.

Case Worker: RS
RB Case Number: 01-1066
Local Agency: ALAMEDA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000384
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Diesel, Gasoline
Site History: In April 1992 five USTs were removed and confirmation soil sampling detected elevated levels of contamination in soil. In November 1993, three USTs were removed and four groundwater monitoring wells were installed at the site. In June 1995, overexcavation and removal of 2,250 yd3 of contaminated soil was completed, then in September 1998 an additional 2,200 yd3 of contaminated soil was removed and disposed offsite. However, groundwater monitoring was discontinued after the remedial action, and verification sampling not performed to determine the effectiveness of the remedial action. Several areas of the site that may have been affected by leaking fuel USTs have not been investigated. A Work Plan to conduct site assessment in these areas was approved by the ACDEH on 18 July 2013. Two Notices to Comply were sent to the responsible party, the first in 2015 and the second in 2016. ACDEH is preparing a Notice of Violation and plans to work with the Alameda County District Attorney's office to enforce compliance.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Region: STATE
Facility Status: Completed - Case Closed
 Status Date: 10/20/2016
 Global Id: T06019705750
 Lead Agency: ALAMEDA COUNTY LOP
 Lead Agency Case Number: RO0002914
 Latitude: 37.800977
 Longitude: -122.273272
 Case Type: Cleanup Program Site
 Case Worker: KEN
 Local Agency: ALAMEDA COUNTY LOP
 RB Case Number: NA
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affected: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Total Petroleum Hydrocarbons (TPH)
 Site History: The site is currently developed as a 5-story hotel having a slab-on-grade foundation. At the time this case was opened, the property was owned by Oakland Garden Hotel LLC. The property, a former parking lot, had recently been transferred from the Redevelopment Agency of the City of Oakland following closure of the Alameda County Department of Environmental Health (ACDEH) Spills, Leaks, Investigation and Cleanup (SLIC) Program case RO0002673, STID 5803 and GeoTracker Global ID T0601975838, for the subject site. Residual petroleum hydrocarbon (PH) contamination was encountered along the sidewalk area along Ninth Street during excavation activities for the hotel foundation. The residual PH concentrations exceeded the case closure concentrations reported for RO0002673,

closed on April 13, 2000. PH contaminated soil was excavated and the hotel constructed. However, the case had not been closed. ACDEHs review of the case file determined the case met all General Criteria of the State Water Resources Control Boards (SWRCBs) Low Threat Underground Storage Tank Case Closure Policy (LTCP) and two of the three Media Specific LTCP Criteria (Groundwater and Direct Contact and Outdoor Air Criteria). It was unclear to ACDEH if the site met the LTCP Media Specific Criteria for Vapor Intrusion to Indoor Air (VI-IA). Therefore, in a letter dated May 20, 2016, ACDEH requested the collection and analysis of indoor air samples in order to satisfy the VI-IA criteria. The findings of the vapor intrusion study, presented in a report dated June 8, 2016, demonstrated concentrations of PHs were below the laboratory reporting limits for the indoor air samples, thus satisfying the LTCP VI-IA Criteria.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Case Type: Cleanup Program Site
 Case Worker: DY
 Local Agency: ALAMEDA COUNTY LOP
 RB Case Number: Not reported
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affected: Aquifer used for drinking water supply, Soil, Under Investigation
 Potential Contaminants of Concern: Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating
 Site History: The Site is located at 229 and 255 International Boulevard at the northeast corner of the intersection of 3rd Avenue and International Boulevard. The Site is currently a vacant lot developed with a single building, paved parking area, and an area with exposed dirt. The Site consists of one parcel and is surrounded by residential and sparse commercial properties. Currently redevelopment is proposed on the property and will include an eight story residential building with a subterranean garage and loading areas in the basement, commercial space, residential lobby, loading area and parking on the first floor, and residential condominium units on floors 2 through 7. The building will include 3 elevators (2 residential and 1 freight). Proposed redevelopment plans include the over-excavation of soils along the entire property to a depth of approximately 8 feet below ground surface to facilitate construction of the underground parking garage. Historical operations on the site included a commercial fueling facility, auto repair, and printing facility known to have handled hazardous materials in the past. Qualitative results from a previous Phase II Investigation conducted in August 2017, indicated

total petroleum hydrocarbons (TPH) as gasoline (g) were reported in groundwater above San Francisco Bay Regional Water Quality Control Board's Environmental Screening Levels (ESLs) beneath the building located 255 International Blvd. Subsequent investigation activities are being conducted to: 1) confirm the initial qualitative results presented in the Phase II investigation, 2) further assess the extent of onsite subsurface conditions in soil, soil gas, and groundwater, and 3) characterize in situ soils scheduled to be overexcavated during redevelopment for potential off-hauling and disposal.

Case Worker: CH
Local Agency: Not reported
RB Case Number: 01S0728
File Location: Regional Board
Potential Media Affected: Soil
Potential Contaminants of Concern: Lead, Other Metal, Benzene, Total Petroleum Hydrocarbons (TPH)
Site History: Several environmental investigations have been performed at the Site between 1995 and 2014 to evaluate potential soil, soil gas, and groundwater contamination. Those investigations indicate the presence of petroleum compounds and heavy metals in soil and groundwater at concentrations slightly over environmental screening levels. In April 2015, soil with elevated concentrations of contaminants in one area of the Site was excavated and disposed of at an offsite permitted disposal facility. Potential long-term exposures to Site contaminants will be avoided by durable ground covers including the building structure, paved parking areas, and landscaping. After completion of the ground-disturbing activities, the Site owner will submit an SMP implementation report. The Regional Water Board will then evaluate the Site for case closure. Developer, CIM Group, began construction in 2018, implementing the 2015 soil management plan to manage contaminated soil and groundwater beneath the subject parcel.
Associated site: JACK LONDON SQUARE PARCEL D with Global ID # T10000004184.

Potential Contaminants of Concern: Gasoline

Site History:

A former gasoline service station operated at the site until 1980. The site is currently a parking lot. Separate-phase hydrocarbons (SPH) were reported in a Bay Area Rapid Transit (BART) tunnel under the intersection of 7th Street and Broadway in January 1979. Approximately 2,600 gallons of a gasoline and water mixture was removed from the BART tunnel between October 1979 and April 1980. Groundwater monitoring and extraction wells were installed at the site between 1981 and 1988. On-site and off-site investigations were conducted at the site between 1994 and 2006. A Corrective Action Plan was prepared for the site in February 2008. Remediation by excavation and secondary remediation by in-situ chemical oxidation (ISCO) was approved as an interim remedial action in April 2008. Onsite soil excavation to 20 feet bgs was conducted in June 2008. ISCO injections were conducted at the site between December 2008 and August 2009. The site is under construction as of 6/23/17. A five-story building with a subterranean garage and commercial spaces on the ground floor and residential units on the upper floors is planned. Construction included excavation to 14 feet bgs in the vicinity of the subterranean parking areas. During excavation, impacted soil was encountered near the base of the excavation at 14 feet bgs; no soil samples were collected. Excavation was discontinued, and fill soil was emplaced on top of the contaminated soil. Semi-annual groundwater monitoring is being performed. Separate-phase product was observed in downgradient monitoring wells through April 2014. Benzene concentrations up to 1,200 ug/L and ethylbenzene concentrations up to 1,200 ug/L are reported in groundwater samples collected downgradient of the site. ACDEH has requested a report of site construction activities and will request an updated evaluation of vapor intrusion risk that incorporates current site construction and recent site data. Concurrent with assessment of onsite vapor intrusion risk, ACDEH will require delineation of offsite groundwater impacts and evaluation of offsite vapor intrusion risk.

Case Type: Cleanup Program Site
Case Worker: KLD
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: Not reported
File Location: Local Agency
Potential Media Affected: Under Investigation
Potential Contaminants of Concern: Heating Oil / Fuel Oil
Site History: Petroleum hydrocarbons were detected in soil samples collected during the removal of two underground storage tanks (USTs) from the site. The USTs were described as home heating oil tanks. The fuel leak was investigated. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>

LUST:

Lead Agency: ALAMEDA COUNTY LOP
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T10000007042
Global Id: T10000007042
Latitude: 37.8045
Longitude: -122.26254
Status: Open - Assessment & Interim Remedial Action
Status Date: 06/16/2015
Case Worker: KEN
RB Case Number: Not reported
Local Agency: ALAMEDA COUNTY LOP
File Location: Not reported
Local Case Number: RO0003165
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Heating Oil / Fuel Oil
Site History: Total petroleum hydrocarbons (C10-C28) were detected at concentrations up to 13,800 milligrams per kilogram in soil samples collected during the removal of a heating oil tank. Contractor reported oil was observed during sampling. Site investigation did not reveal presence of petroleum-related compounds in grab-groundwater samples. Soil samples did not contain total petroleum hydrocarbons (TPH) as gasoline (TPHg) or as motor oil (TPHmo), benzene, toluene, ethyl benzene, and xylenes (BTEX), methyl tertiary butyl ether (MTBE), and naphthalene at concentrations above the laboratory reporting limit. Diesel range petroleum hydrocarbons (TPHd) were reported up to 7.2 mg/kg. .

 Local Agency: ALAMEDA COUNTY LOP
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Local Case Number: RO0000143
 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
 Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at:
 <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>. The subject site was used as a service station until 1972 when the site was demolished and the tanks removed. The station building, two dispenser islands, one waste oil UST, and two gasoline USTs were removed. An earlier generation of USTs had previously been removed. Since 1975 it has been used as a parking lot. A soil vapor survey was conducted in 1988 to determine if the site had been impacted, three wells were installed in October 1988, four wells were installed in 1989, four wells were installed offsite in June 1990, two offsite wells were installed in October 1991, and another two wells were installed offsite in late 1992, for a total of 16 wells. Limited soil excavation was conducted in January 1992. An SVE system operated

onsite in 1993, but showed minimal effectiveness. In June 2004 the first generation UST pit was investigated and impacts were discovered. In April 2007 four bores were installed to investigate the extent of contamination associated with the first generation USTs. In June 2007 a vapor survey was conducted and elevated concentrations were detected in all vapor points. In early 2008 105 bucket auger bores were installed to remove impacted soil associated with the first generation USTs. A report on the installation of a post-remediation groundwater monitoring well and the installation of several soil bores to infill a data gap in the downgradient extent of the groundwater plume was generated. Well MW-17 was installed in October 2010. Additional excavation of soil impacted by the second generation USTs and the waste oil UST was conducted between January and June 2011 as part of the redevelopment project for the subject site.

 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Gasoline
 Site History: In September 1995 one USTs was removed and confirmation soil sampling detected elevated levels of contamination in soil. In July 1997 groundwater monitoring was implemented to evaluate the dissolved contaminant plume. In 2007 ACEH evaluated the site for closure and determined that additional information was needed. The responsible party has not responded to requests for additional information. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at:

Description: The 3.4-acre site is located in Alameda County, California, and is approximately five miles southwest of the City of Oakland on the port waterfront in the San Francisco Bay (Inner Oakland Harbor). After the Department of Defense left the site, Crowley Maritime Corporation used the site for vessel maintenance until 1992. There were three underground storage tanks, and one aboveground storage tank located on the site. One 500 gallon leaded gasoline underground tank was removed in September 1994 by Crowley. The two remaining underground storage tanks, each having a 5,000 gallon capacity, were removed on June 30, 1998 by the Port of Oakland. The Port of Oakland razed the buildings comprising the Naval Industrial Reserve (NIR) in 1998 in a renovation of the industrial waterfront. The Port of Oakland still owns the site and currently leases out the property to the Oakland Strokes boating school.

Current Program:
History:

Not reported
In 1942, the U.S. entered into a contract for ship repair facilities with Hurley Marine Works, Inc. (which leased 19.4 acres of land from the Port of Oakland) beginning in 1940 to form the NIR Repair Facility. In 1944, Amendment No. 4 to the Hurley contract provided for an expansion of the property to establish the NIR, which was comprised

of approximately 3.4 acres of the Hurley property in Alameda County. The property was used by the 12th Naval District, Alameda for shipbuilding and ship repair during WWII. A Government-owned 2,800 ton Auxiliary Floating Drydock Light was moored at the NIR during WWII. Beginning in 1955 through the mid-1960s, the Martinolich Ship Repair Company leased the AFDL from the Government at the Hurley facility. The Department of Defense lease expired on 30 June 1965. The United States Navy leased the property from the City of Oakland and occupied it from 1942 to 1951 and sub-leased the property from 1951 to 1962. Pacific Dry Dock leased the site from the Port of Oakland and began operations at the site on July 14, 1964 for vessel maintenance. The parent company of Pacific Dry Dock (Crowley Maritime Corporation) informed the Port of Oakland that Pacific Dry Dock closed its operation at the site on 17 May 1991. Currently the Oakland Strokes lease the property from the Port of Oakland. A hazardous, toxic, and radioactive waste (HTRW) project is proposed to further investigate the former tanks on site.

Comments: The remedial implementation plan for Parcel B has been approved by DTSC.

Completed Area Name: Phase I Area
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 01/30/2015
Comments: Soil remediation in the phase I area has been completed. Post-remediation soil gas sampling will be performed over the next few months.

Completed Area Name: Phase I Area
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 06/27/2014
Comments: Work notice announcing the initiation of cleanup activities on Phase 1 of the Site was finalized and mailed out to the community.

Completed Area Name: Parcel TCWA
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 03/10/2015
Comments: The remedial implementation plan for the Chemical Warehouse parcel has been approved by DTSC.

Completed Area Name: Parcels F and G
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 07/07/2014
Comments: Notice for California Regulatory Notice Register regarding Prospective Purchaser Agreement.

Completed Area Name: Parcel C
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 03/10/2015
Comments: The remedial implementation plan for Parcel C has been approved by DTSC.

Completed Area Name: Parcels A3 and W
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 07/15/2015
Comments: DTSC has approved the implementation plan for these parcels. Soil gas sampling probes will be installed in these parcels and a small area of soil will be excavated.

Completed Area Name: Parcels T
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/16/2015
Comments: The pre-construction plan for Parcels T and TCWA has been approved. Streets, sidewalks, landscaping, and utilities will be constructed in these parcels.

BROOKLYN BASIN (Continued)

S117038744

Completed Document Type: Design/Implementation Workplan
Completed Date: 10/17/2016
Comments: DTSC has approved the implementation plan for remediation of the Phase II Development Parcels. These parcels are located on the southern portion of the Ninth Avenue Terminal, and will be developed into urban residences and streets.

Completed Area Name: Phase II Open Space Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 04/24/2017
Comments: DTSC has approved the implementation plan for the Phase II Open Space Parcels at the Brooklyn Basin site. The implementation plan discusses the cleanup that will occur on these parcels, and the measures to protect workers and the community during the cleanup.

Completed Area Name: Parcels F and G
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 02/16/2016
Comments: The Active Remediation Completion Report documents the excavation, transport, and disposal at off-site disposal facilities of approximately 17,000 tons of contaminated soil from these parcels. Excavations on these parcels were backfilled with clean soil. The Report also includes results of soil vapor sampling.

Completed Area Name: Phase I Area
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/04/2015
Comments: The Active Remediation Completion Report documents the excavation and off-site disposal at a permitted landfill of approximately 224 tons of contaminated soil from these parcels. The Report also includes soil vapor sampling results. These parcels are slated for development into multi-family residences.

Completed Area Name: Parcels T
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 07/27/2015
Comments: DTSC has approved this report. 11,482 tons of contaminated soil from these parcels was excavated and disposed offsite. An addendum to this completion report will prepared after groundwater monitoring and soil vapor wells are installed and sampled in these parcels. These parcels are located in the northern portion of the Phase 1 area, and will be developed into streets, sidewalks, and landscaping.

Completed Date: 06/12/2015
 Comments: The project-wide soil management plan template for the Brooklyn Basin site has been approved by DTSC. The soil management plan will be used by parcel owners and developers during future construction and maintenance activities. Deviations from this template will require DTSC review and approval.

Completed Area Name: Parcels A3 and W
 Completed Sub Area Name: Not reported
 Completed Document Type: Design/Implementation Workplan
 Completed Date: 07/10/2015
 Comments: DTSC has approved this construction plan. A stormwater outfall and stormwater retention areas will be constructed on parcels A3 and W1.

Completed Area Name: Parcels T
 Completed Sub Area Name: Not reported
 Completed Document Type: Fieldwork
 Completed Date: 07/08/2016
 Comments: Soil vapor probes have been installed and sampled in the Phase 1 T parcels.

Completed Area Name: Parcel X
 Completed Sub Area Name: Not reported
 Completed Document Type: Soils Management Plan
 Completed Date: 04/25/2016
 Comments: DTSC has approved the City of Oakland's soil management plan for construction of the new Embarcadero Bridge. The SMP discusses groundwater and soil handling procedures during construction of the eastern abutment of the bridge, which is located within and adjacent to the northern portion of Parcel X.

Completed Area Name: Parcel X
 Completed Sub Area Name: Not reported
 Completed Document Type: Design/Implementation Workplan
 Completed Date: 04/21/2016
 Comments: DTSC has approved this interim remediation memo to address excavation areas in Parcel X that overlap with the Embarcadero Bridge replacement project.

Completed Area Name: Phase II Area
 Completed Sub Area Name: Not reported
 Completed Document Type: Fieldwork
 Completed Date: 03/01/2018
 Comments: Phase II remedial fieldwork was completed and is documented in the Phase II Development Active Remediation Completion Report.

Completed Area Name: Phase II Area
 Completed Sub Area Name: Not reported
 Completed Document Type: Work Notice
 Completed Date: 07/20/2017
 Comments: DTSC has prepared and mailed out a work notice announcing the start of Phase II cleanup activities at the site. Phase II cleanup activities will occur in the southern portion of the Ninth Avenue terminal.

Completed Document Type: Remedial Action Completion Report
Completed Date: 08/01/2018
Comments: The Active Remediation Completion Report documents excavation activities performed for the Phase II Development Parcels, as outlined in the Response Plan/Remedial Action Plan. The Report details excavation of impacted soil, disposal of excavated soil, and infill with clean material. The design and capping of the Phase II parcels and soil vapor issues are to be addressed in future plans and reports.

Completed Area Name: Phase II Area
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 12/08/2017
Comments: Memo summarizing excavation activities at Area 67 (Parcels D and E): Pentachlorophenol (PCP) and naphthalene were detected above remedial cleanup goals in sidewall samples. Excavation boundary was extended laterally in efforts to fully excavate impacted soils; however, contaminants above remedial goals still remained. Excavation was halted in order to devise a plan to delineate and excavate all impacted soils. Implementation plan will be submitted to DTSC for review and approval prior to field implementation.

Completed Document Type: Phase 1
Completed Date: 07/12/2010
Comments: The "All Appropriate Inquiries Report" was included as part of the California Land Reuse and Revitalization Act (CLRRRA) application submitted by Oakland Harbor Partners for the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 06/29/2007
Comments: Soil, soil gas, and groundwater data from the implementation of site assessment workplans I and II.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 12/10/2012
Comments: Interim remedial measures approved which include stormwater controls, groundwater monitoring, and removal of free product from existing site wells. Additionally an implementation plan for the 901 Embarcadero parcel will be submitted to DTSC in February 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 12/15/2012
Comments: Groundwater monitoring of all near-shore wells was performed at the site to assess the current status of groundwater at the site.

Completed Document Type: Fieldwork
Completed Date: 04/22/2013
Comments: Interim groundwater monitoring performed at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 07/31/2013
Comments: Interim groundwater monitoring report approved by DTSC. The groundwater data for the wells sampled was similar to historical sampling data.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 02/13/2013
Comments: Stormwater controls well implemented at the site by the Port of Oakland in the fall of 2012 in order to prevent contaminated runoff from leaving the site and entering the Bay.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/24/2013
Comments: Interim groundwater monitoring report approved by DTSC.

Completed Area Name: Parcels F and G
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/05/2014
Comments: Implementation Plan for active remediation of Parcels F&G approved by DTSC. The remediation is anticipated to occur in the summer of 2014.

Completed Area Name: Parcels T
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 08/14/2014
Comments: Implementation Plan for Parcels T2, T3, and T4 has been approved. These parcels will be redeveloped into roads on the Ninth Avenue Terminal.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Application
Completed Date: 03/24/2014
Comments: DTSC accepted the application for a Prospective Purchaser Agreement for Parcels F & G with the City of Oakland

Completed Area Name: Parcels A
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 03/10/2015
Comments: The remedial implementation plan for Parcel A has been approved by DTSC.

Comments: The remedial implementation plan for Parcel B has been approved by DTSC.

Completed Area Name: Phase I Area
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 01/30/2015
Comments: Soil remediation in the phase I area has been completed. Post-remediation soil gas sampling will be performed over the next few months.

Completed Area Name: Phase I Area
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 06/27/2014
Comments: Work notice announcing the initiation of cleanup activities on Phase 1 of the Site was finalized and mailed out to the community.

Completed Area Name: Parcel TCWA
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 03/10/2015
Comments: The remedial implementation plan for the Chemical Warehouse parcel has been approved by DTSC.

Completed Area Name: Parcels F and G
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 07/07/2014
Comments: Notice for California Regulatory Notice Register regarding Prospective Purchaser Agreement.

Completed Area Name: Parcel C
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 03/10/2015
Comments: The remedial implementation plan for Parcel C has been approved by DTSC.

Completed Area Name: Parcels A3 and W
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 07/15/2015
Comments: DTSC has approved the implementation plan for these parcels. Soil gas sampling probes will be installed in these parcels and a small area of soil will be excavated.

Completed Area Name: Parcels T
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/16/2015
Comments: The pre-construction plan for Parcels T and TCWA has been approved. Streets, sidewalks, landscaping, and utilities will be constructed in these parcels.

Completed Area Name: Phase II Development Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 10/17/2016
Comments: DTSC has approved the implementation plan for remediation of the Phase II Development Parcels. These parcels are located on the southern portion of the Ninth Avenue Terminal, and will be developed into urban residences and streets.

Completed Area Name: Phase II Open Space Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 04/24/2017
Comments: DTSC has approved the implementation plan for the Phase II Open Space Parcels at the Brooklyn Basin site. The implementation plan discusses the cleanup that will occur on these parcels, and the measures to protect workers and the community during the cleanup.

Completed Area Name: Parcels F and G
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 02/16/2016
Comments: The Active Remediation Completion Report documents the excavation, transport, and disposal at off-site disposal facilities of approximately 17,000 tons of contaminated soil from these parcels. Excavations on these parcels were backfilled with clean soil. The Report also includes results of soil vapor sampling.

Completed Area Name: Phase I Area
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/04/2015
Comments: The Active Remediation Completion Report documents the excavation and off-site disposal at a permitted landfill of approximately 224 tons of contaminated soil from these parcels. The Report also includes soil vapor sampling results. These parcels are slated for development into multi-family residences.

Completed Area Name: Parcels T
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 07/27/2015
Comments: DTSC has approved this report. 11,482 tons of contaminated soil from these parcels was excavated and disposed offsite. An addendum to this completion report will prepared after groundwater monitoring and soil vapor wells are installed and sampled in these parcels. These parcels are located in the northern portion of the Phase 1 area, and will be developed into streets, sidewalks, and landscaping.

Completed Area Name: PROJECT WIDE

Completed Document Type: Soils Management Plan
Completed Date: 06/12/2015
Comments: The project-wide soil management plan template for the Brooklyn Basin site has been approved by DTSC. The soil management plan will be used by parcel owners and developers during future construction and maintenance activities. Deviations from this template will require DTSC review and approval.

Completed Area Name: Parcels A3 and W
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 07/10/2015
Comments: DTSC has approved this construction plan. A stormwater outfall and stormwater retention areas will be constructed on parcels A3 and W1.

Completed Area Name: Parcels T
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/08/2016
Comments: Soil vapor probes have been installed and sampled in the Phase 1 T parcels.

Completed Area Name: Parcel X
Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 04/25/2016
Comments: DTSC has approved the City of Oakland's soil management plan for construction of the new Embarcadero Bridge. The SMP discusses groundwater and soil handling procedures during construction of the eastern abutment of the bridge, which is located within and adjacent to the northern portion of Parcel X.

Completed Area Name: Parcel X
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 04/21/2016
Comments: DTSC has approved this interim remediation memo to address excavation areas in Parcel X that overlap with the Embarcadero Bridge replacement project.

Completed Area Name: Phase II Area
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/01/2018
Comments: Phase II remedial fieldwork was completed and is documented in the Phase II Development Active Remediation Completion Report.

Completed Area Name: Phase II Area
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 07/20/2017
Comments: DTSC has prepared and mailed out a work notice announcing the start of Phase II cleanup activities at the site. Phase II cleanup activities will occur in the southern portion of the Ninth Avenue terminal.

Completed Area Name: Phase II Development Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/01/2018
Comments: The Active Remediation Completion Report documents excavation activities performed for the Phase II Development Parcels, as outlined in the Response Plan/Remedial Action Plan. The Report details excavation of impacted soil, disposal of excavated soil, and infill with clean material. The design and capping of the Phase II parcels and soil vapor issues are to be addressed in future plans and reports.

Completed Area Name: Phase II Area
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 12/08/2017
Comments: Memo summarizing excavation activities at Area 67 (Parcels D and E): Pentachlorophenol (PCP) and naphthalene were detected above remedial cleanup goals in sidewall samples. Excavation boundary was extended laterally in efforts to fully excavate impacted soils; however, contaminants above remedial goals still remained. Excavation was halted in order to devise a plan to delineate and excavate all impacted soils. Implementation plan will be submitted to DTSC for review and approval prior to field implementation.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

MERRITT TWO SITE (Continued)

S112875990

Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/13/2016
Comments: Estimate of DTSC costs for regulatory oversight for the fiscal year (July 1, 2016 to June 30, 2017).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 12/28/2015
Comments: The Preliminary Endangerment Assessment (PEA) report documented site conditions related to historical industrial usage of the site which included a lumber mill, bottle washing operations, warehouse, garbage truck storage, and current usage as a storage facility. The report documented that surface soils contained elevated levels of polynuclear aromatic hydrocarbons (PAHs) which may have occurred via air deposition (from nearby historical manufactured gas plant operations) and the metal lead possibly related to historical residences or industrial operations. The report recommended placement of a Land Use Covenant (LUC) on the property to restrict future usage of the site to industrial usages. Other environmental issues were investigated from 1989-2015 which did not find significant contamination including: an asbestos manufacturing, an underground storage tank (UST), industrial piping, and former sumps.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Application
Completed Date: 10/17/2014
Comments: DTSC identified as Lead Agency

Completed Area Name: PROJECT WIDE

Comments: The investigation was conducted prior to DTSC's involvement with the site. The report documented investigation of soils for metals and polynuclear aromatic hydrocarbons (PAHs).

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Phase 1

Completed Date: 01/05/1995

Comments: The assessment was conducted prior to DTSC's involvement with the site. The report recommended additional characterization of shallow soils for hydrocarbons, asbestos, creosote-related compounds, and lead.

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Site Characterization Report

Completed Date: 12/30/1994

Comments: The report was prepared prior to DTSC's involvement with the site. The report documented environmental conditions related to historical operations of environmental concern including a lumber yard, asbestos factory, and a fuel dispenser. Surface soil samples were collected for lead and asbestos analysis. Subsurface soil samples were collected in the area of the suspected former underground storage tank (UST).

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Site Characterization Report

Completed Date: 07/25/1995

Comments: The report was prepared prior to DTSC's involvement with the site. The report documented shallow soil testing results for hydrocarbons, polynuclear aromatic hydrocarbons (PAHs), asbestos and lead.

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Phase 1

Completed Date: 01/18/2005

Comments: The report was prepared prior to DTSC's involvement with the site. The report documented site conditions after construction of the SAF Keep Storage Facility in 1997.

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Phase 1

MERRITT TWO SITE (Continued)

S112875990

Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 03/23/2015
Comments: The Voluntary Cleanup Agreement (VCA) covers tasks for reviewing existing data, reviewing and commenting on a Preliminary Endangerment Assessment (PEA) report, and preparing a Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 04/20/2016
Comments: The Land Use Covenant restricts the parcel from sensitive usage. The site can only be used for industrial/commercial usages.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/12/2016
Comments: The Merritt Two site was investigated and slightly elevated levels of lead and polynuclear aromatic hydrocarbons (PAHs) were found in shallow soils (the contaminant concentrations are above established residential levels but acceptable for commercial/industrial levels) from historical industrial operations. Since the owner intends to continue commercial/industrial usage of the property, a Land Use Covenant was recorded with the County Recorder to restrict future usage to commercial/industrial purposes (and a copy was sent to the City of Oakland Planning Department for placement in the property file). On an annual basis the owner is required to certify that the site is in compliance with the usage restrictions.

Completed Document Type: Fieldwork
Completed Date: 11/30/2015
Comments: Field work including collection of soil, groundwater, and soil gas samples was completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 12/23/2015
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 01/12/2017
Comments: No disturbance of cap or changes in land use have occurred.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 02/14/2018
Comments: Merritt Two LP, the Site owner, submitted the annual compliance letter and an attached checklist to verify the Site was in compliance with the environmental restrictions of the Land Use Covenant during 2017.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 02/23/2017
Comments: Notification of a change in the DTSC project manager was provided to Merritt Partners LP, the site owner.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 03/23/2015
Comments: The Voluntary Cleanup Agreement (VCA) covers tasks for reviewing existing data, reviewing and commenting on a Preliminary Endangerment Assessment (PEA) report, and preparing a Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 04/20/2016
Comments: The Land Use Covenant restricts the parcel from sensitive usage. The site can only be used for industrial/commercial usages.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/12/2016
Comments: The Merritt Two site was investigated and slightly elevated levels of

lead and polynuclear aromatic hydrocarbons (PAHs) were found in shallow soils (the contaminant concentrations are above established residential levels but acceptable for commercial/industrial levels) from historical industrial operations. Since the owner intends to continue commercial/industrial usage of the property, a Land Use Covenant was recorded with the County Recorder to restrict future usage to commercial/industrial purposes (and a copy was sent to the City of Oakland Planning Department for placement in the property file). On an annual basis the owner is required to certify that the site is in compliance with the usage restrictions.

Alternate Address: EMBARCADERO WEST AND MARKET STREETS
Alternate City,St,Zip: OAKLAND, CA 94604
Background Info: Howard Terminal operated a large marine terminal for containerized cargo at this Site. From 1900 to 1930 a manufacturing gas plant occupied the Site. Site investigation found elevated levels of polynuclear aromatic hydrocarbons, semi and volatile organic compounds, metals, cyanides, and petroleum hydrocarbons. The entire site was covered with an asphalt concrete cap ranging in thickness from 4 to 30 inches.

Lead Agency: ALAMEDA COUNTY LOP
Lead Agency Case Number: RO0003174
Latitude: 37.80227
Longitude: -122.28173
Case Type: Cleanup Program Site
Case Worker: RS
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium VI
Site History: This case (RO0003174) is connected with Alameda County Department of Environmental Health Site Cleanup Case No. RO0002586 - Francis Plating Frog Pond (GeoTracker Global ID SL0600130797). The former plating facility operated from approximately 1957 to 1998. In 1998, the property was found to be abandoned with chemicals and equipment on site. As part of an emergency response action, the U.S. Environmental Protection Agency removed abandoned chemicals and equipment and excavated shallow soil in areas without asphalt or concrete coverings. The former plating facility site was separated

into two separate parcels in 2016 designated as APN 1-223-7 and 1-223-6. Case RO0003174 was opened in 2015 for APN 1-223-7. Additional investigation and remedial activities have been focused on APN 1-223-6 (RO0002586). Residual contamination at the site is covered by a cap consisting of the site building and asphalt and concrete paving.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 05/09/2018
Comments: TriHydro letter notifying DTSC of its intent to conduct sub-slab depressurization (SSD) system sampling and operation and maintenance (O&M) activities on May 23, 2018 in accordance with the 1/19/2017 O&M Agreement, 2/5/2016 O&M/MNA Plans, and land use covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/22/2017
Comments: Trihydro Corporation (Trihydro), on behalf of Safety-Kleen Systems, Inc. (S-K), conducted sub-slab depressurization (SSD) system sampling and operation and maintenance (O&M) activities at the former S-K Service Center in Oakland, California on March 22, 2017. The event included evaluating that SSD system fans are operating properly, collection of system readings, and collection of a vapor sample from SSD system point SP-2 for laboratory analysis of volatile organic compounds by Method TO-15. Per the Agreement between S-K and DTSC, S-K intends to submit a report summarizing quarterly 2017 SSD system sampling and O&M activities on or before January 31, 2018.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/25/2017
Comments: Sub-Slab Depressurization System 2017 Annual Operation Summary (Report); January 23, 2018. During 2017, The Sub-Slab Depressurization (SSD) system was monitored by a qualified environmental professional on a quarterly basis in accordance with the Permit. During quarterly O&M activities, the system was inspected to verify fans were running and providing vacuum as designed. The SSD system remained operable throughout 2017 with no repairs required. Current Permits are included as Attachment A. Analytical laboratory reports for samples collected during 2017 are included as Attachment B. Field notes for the quarterly events are included as Attachment C. Calibration information for the anemometer is included as Attachment D. Safety-Kleen (S-K) intends to conduct quarterly SSD system and O&M and sampling activities in 2018. Per the O&M Agreement, S-K will notify DTSC in writing a minimum of seven days before conducting O&M and sampling activities. S-K intends to submit a report summarizing SSD system O&M and sampling procedures and analytical results to DTSC on or before January 31, 2019.

Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/30/2018
Comments: Report documents well abandonment activities conducted pursuant to the 2/19/2016 Sub-Slab Depressurization System O&M Plan and Monitored Natural Attenuation Plan and overseen by the Alameda County Public Works Agency. The work was performed under the responsible charge of a registered geologist.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 10/16/2017
Comments: Per the requirements of the LUC, S-K performed an onsite LUC compliance inspection on May 3, 2017. The attached Inspection Form (Attachment A) documents site conditions observed during the inspection. During the inspection, the site was observed to be in compliance with the requirements of the LUC. The drilling activity noted on the attached Inspection Form was being performed to abandon groundwater and soil vapor monitoring wells pursuant to DTSC approval.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: RFI Report
Completed Date: 05/20/1996
Comments: RCRA FACILITY INVESTIGATION (RFI) REPORT, March 27, 1996. The focus of the RFI activities was to define the presence and extent of potential impacts associated with SWMUs (Solid Waste Management Units) and AOC (Area of Concern) and on collecting data to evaluate potential corrective measures. Safety-Kleen believes that the site characterization activities which have been completed adequately assess the subsurface in the vicinity of SWMU No. 2, SWMU No. 3, and AOC No. 1. Investigation of SWMU No. 1 will be conducted as part of facility closure or partial closure activity. Safety-Kleen does not propose to conduct additional site characterization work at this time. Safety-Kleen requests that the soil vapor extraction (SVE) system be considered the final interim corrective measure. The operation of the SVE system and the product recovery system is continuing Safety-Kleen will not initiate groundwater extraction and treatment at this time due to the encroaching VOC plume. Groundwater extraction will only be considered when mitigation of the upgradient source the VOCs has been performed by the responsible parties.

Completed Document Type: Certification
Completed Date: 10/17/2017
Comments: Pursuant to the September 21, 2009 Corrective Action Consent Agreement (CACA), the Department of Toxic Substances Control (DTSC) issues this RCRA Corrective Action Completion Determination for the Safety-Kleen Systems, Incorporated (S-K) property located at 400 Market Street, Oakland, Alameda County, California 94607 (Site). S-K is the owner of the Site. On October 17, 2017, DTSC issued a Cleanup Complete (CC) determination that Cleanup Complete - Controls Required Long Term Stewardship has been achieved. The facility was completely characterized and assessed with respect to all media onsite and offsite (if applicable), and not all media met cleanup requirements. Noncompliant media were remediated so that no further operation of engineered remedies is required for industrial land use. Nevertheless, some amount of hazardous waste still remains beneath the facility and limited periodic examination and care are required to continue into the long-term future to ensure that certain installed engineered barriers, covers, caps, fences, signage, etc. and certain active and/or passive remedies, e.g., SSDS and MNA, remain efficacious. A No Further Action Determination is not applicable.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedy Selection and Statement of Basis
Completed Date: 09/25/2015
Comments: The selected remedy for the site includes monitored natural attenuation for ground water and a sub-slab depressurization system for soil gas beneath the building.

Completed Document Type: RFI Workplan
Completed Date: 06/29/2011
Comments: RCRA FACILITY INVESTIGATION (RFI) WORK PLAN, May 20, 2011. This RFI Work Plan proposes further activities to characterize groundwater impacts on the upgradient portion of the Site and proposes a soil gas survey for the purpose of conducting a future human health risk assessment. According to DTSC's February 2010 correspondence, when Site characterization is deemed complete, S-K will continue with previously proposed risk assessment activities, with formal approval by the DTSC. S-K proposes installing and sampling twelve soil vapor wells near the former service center to estimate potential vapor intrusion impacts and additional groundwater investigation activities to further characterize impacts in the upgradient portion of the Site. Proposed groundwater investigation and soil gas survey activities are further discussed in Sections 5.4.4 and 5.4.5 respectively.

Completed Document Type: Monitoring Report
Completed Date: 05/19/2011
Comments: Quarterly Progress Report (October through December 2010). This report summarizes activities conducted as part of the RFI/CMS at the Site and presents the procedures and results of the November 2010 semiannual groundwater monitoring event. The semiannual groundwater monitoring event was conducted at the S-K Service Center located in Oakland, California on November 15, 2010. The monitoring event included gauging fluid levels in the nine facility monitoring wells, and collecting and submitting groundwater quality samples for analysis of VOCs and TPH-MS from monitoring wells MW-1, MW-2, MW-3, MW-4, MW-5, MW-8, and MW-11.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/12/2011
Comments: Quarterly Progress Report (April through June 2011). The report presents the results of the most recent groundwater monitoring event conducted in May 2011. The semiannual groundwater monitoring event included collection of groundwater measurements and samples from wells (MW-1 through MW-5, MW-8, and MW-11). Fluid levels were gauged in each of the wells at the facility, and groundwater samples were analyzed for volatile organic constituents (VOCs) and total petroleum hydrocarbons reported as mineral spirits (TPH-MS).

Completed Document Type: Risk Assessment Report
Completed Date: 09/04/2012
Comments: Revised Risk Assessment Report. The conservative RA performed for the site indicated potential site-related risks and hazards above target levels for some chemicals in soil, groundwater, and soil vapor. Specifically, elevated risk and hazard estimates for onsite receptors were associated with benzo(a)pyrene in soil, TPHms in groundwater, and 1,2,4-trimethylbenzene, benzene, and ethylbenzene in soil vapor. 1,4-Dichlorobenzene and PCE in soil vapor also contributed, but to a lesser extent, to the elevated risk estimates. Offsite risks that were considered to be potentially site-related were mainly due to 1,2-DCA, PCE, and 1,1-DCA in groundwater. Each of the exposure scenarios associated with these elevated risks and hazards is further discussed within the Report. Target concentrations for chemicals in onsite groundwater and soil vapor were developed to assist with future site monitoring and management decisions. Based on recent comments from DTSC (2012b) for another S-K site in California, single chemical values, rather than multiple chemical adjusted values, were calculated. Target concentrations were determined by identifying the concentrations of each chemical in groundwater or soil vapor that would result in a risk estimate of 10⁻⁶ or a hazard quotient of 1 (whichever was lower). These values could be used to determine when operation of the SSD system, or continuation of long-term monitoring, is no longer necessary, or to assist with remedial or mitigation efforts in the event of a future land use change. Target groundwater and soil vapor concentrations are shown in Table 26, and summarized within the Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: RFI Report
Completed Date: 08/20/2013
Comments: Revised RFI Report Addendum. The RFI Addendum field investigation was conducted pursuant to the December 2012 RFI Work Plan Addendum. Additional groundwater data at the facility has been further characterized and an indoor air investigation was completed to further evaluate the effectiveness of the SSD system. PCE and TCE, the two primary constituents of concern identified during 2011/2012 soil gas sampling, were not detected in the March 2013 indoor air samples. Acrolein, benzene, and carbon tetrachloride were detected in indoor air above RSLs, but at similar concentrations to background. Chloroform was detected in three indoor air samples above the residential RSL but below the industrial RSL. Chloroform is commonly detected in indoor air and often attributed to use of water from chlorine treated water systems. Ethylbenzene was detected above the

SAFETYKLEEN SER CTR (Continued)

1001407764

residential RSL, but also below the industrial RSL in all samples. Potential indoor air sources of ethylbenzene include paint, paint thinner, wood office furniture, scented candles, and gasoline. Information provided in the September 2012 RFI Report indicated the current SSD system met industry standard pressure differential benchmarks within the building. Evaluation of the March 2013 indoor air data further supports the SSD system is effective in mitigating potential vapor intrusion attributable to soil gas impacts beneath the building. March 2013 groundwater data was generally consistent with historical results. It should be noted that the March 2013 TPH-MS concentration in the sample collected from well MW-14 (2.11 mg/L) was lower than the October 2011 grab groundwater sample concentration (7.66 mg/L) collected in the same vicinity. However, the March 2013 concentration still exceeds the target level of 1.0 mg/L identified in the Revised Risk Assessment Report.

SAFETYKLEEN SER CTR (Continued)

1001407764

Completed Date: 09/18/2014
 Comments: Corrective Measures Study Update. Per the April 2014 DTSC-approved CMS Work Plan, Safety-Kleen Systems, Inc. (S-K) and DTSC agreed to evaluate data from a minimum of two consecutive quarterly groundwater monitoring events in April 2014 and July 2014. Pending results of the April and July 2014 monitoring events, S-K and DTSC would determine if two additional quarterly events are appropriate to evaluate monitored natural attenuation (MNA) as a remedial strategy for the site. The purpose of this letter report is to present the data collected during the April 2014 and July 2014 CMS quarterly groundwater monitoring events, and reach concurrence with DTSC on a path forward in finalizing submittal of the CMS Report. S-K believes that data presented in this letter report shows ample and appropriate evidence that MNA is a strong remedial option and would prefer to move forward with submittal of the CMS Report. If DTSC agrees that two additional quarterly MNA events are not necessary to complete the CMS, S-K intends to submit the CMS Report within 30 days of receiving formal DTSC concurrence. In the event that DTSC prefers additional information for evaluating MNA, the CMS will progress in general accordance with the timeline in the approved CMS Work Plan (two additional quarterly monitoring events and submittal of the CMS Report on or before March 31, 2015). DTSC approves the Update and agrees that no further monitoring for MNA evaluation is necessary.

 Completed Date: 10/15/2014
 Comments: Quarterly Progress Report (July through September 2014). Per the approved CMS Work Plan, Safety-Kleen Systems, Inc. (S-K) performed two consecutive quarterly groundwater-sampling events the weeks of April 14, 2014, and July 7, 2014. S-K submitted an August 29, 2014, letter style CMS Update Report to DTSC, documenting results of April and July 2014 field activities, and a recommendation that the two additional consecutive quarters of groundwater sampling were not necessary to move forward with the CMS report. DTSC approved the CMS Update Report in a letter dated September 18, 2014, and requested that S-K provide a formal CMS Report. S-K intends to submit the CMS Report to DTSC on or before October 17, 2014.

 Completed Date: 01/16/2014
 Comments: Quarterly Progress Report (October through December 2014). Safety-Kleen Systems, Inc. (S-K) submitted the CMS Report to DTSC on October 15, 2014. DTSC provided comments on the CMS report in an email dated December 2, 2014, and S-K submitted a revised electronic version of the CMS report on December 24, 2014. S-K anticipates receiving DTSC approval and/or comments on the revised December 2014 CMS report during the January through March 2015 reporting period.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Operations and Maintenance Plan
 Completed Date: 02/23/2016
 Comments: Sub-Slab Depressurization System Operation and Maintenance Plan and Monitored Natural Attenuation Plan (Plan), dated February 19, 2016, for Former Safety-Kleen Systems, Inc. (S-K) Service Center, located at 400 Market Street, Oakland, California. Plan approved by DTSC letter, dated February 23, 2016. Plan documents an operation and maintenance (O&M) plan for the existing sub-slab depressurization system (SSDS) and contains planned activities for long-term monitored natural attenuation (MNA) for groundwater at the site. Plan Appendices include the SSDS Technical Memorandum, Bay Area Air Quality Management District Authority to Operate Permit, SSDS Standard Operating Procedure, and Revised Standardized Sampling and Analysis Plan. The active SSDS reduces the potential for vapor intrusion by creating a negative pressure differential that reverses the direction of airflow inside a structure (i.e. intrusion to extrusion) and dilutes the indoor air with additional ambient air. A figure showing the SSDS layout is provided as Figure 3. A Technical Memorandum describing the SSDS design and installation, along with further information, is included as Appendix A. A field log will be kept to document maintenance, repairs, and replacements performed on the SSDS. A schedule for planned O&M visits and quarterly sampling is presented in Table 1. Field readings and laboratory data are evaluated every quarter to confirm emission rates are within BAAQMD Permit limits. Field readings and data are kept available and on file per current BAAQMD Permit conditions. S-K will submit a summary of field readings and results to the DTSC on an annual basis. Quarterly laboratory data, field readings, and equipment replacement information will be submitted to DTSC on or before the last day of January of each calendar year. Natural attenuation involves the breakdown of constituents of concern (COCs) by microbial degradation processes. MNA includes monitoring the groundwater conditions that indicate natural attenuation is occurring. As part of the approved remedy for the site, S-K will evaluate attainment of cleanup levels in groundwater by conducting routine groundwater monitoring at the site once every five years, with an estimated time frame of fifteen years (4 events total over estimated 15 years). Consistent with the Corrective Measures Study (CMS), S-K will gauge and sample monitoring wells MW-1, MW-2R, MW-3, MW-4, MW-8R, MW-11R, and MW-14, during each monitoring event. Groundwater samples will be submitted for VOCs, TPH-MS, and TPH-D. S-K will implement the first MNA event within 60 days of DTSC approval of this document, with the following three events occurring approximately every five years. S-K will evaluate

1001407764

and compare groundwater data to the corrective action objectives (CAOs) defined by the CMS. S-K will submit groundwater-sampling reports to the DTSC, for each event, within 60 days receipt of complete and accurate laboratory data. A proposed schedule for groundwater sampling is presented in Table 2. S-K proposes to abandon monitoring wells MW-5, MW-6 and MW-12 because they are no longer included in the monitoring plan. Additionally, S-K proposes to plug and abandon soil gas wells SVW-1, SVW-2, SVW-3, SVW-6, SVW-7, SVW-8, and SVW-9 as they were utilized for the previous RFI activities. S-K will leave soil gas wells SVW-4, SVW-5, SVW-10, SVW-11, and SVW-12 in place in the event future soil gas sampling on the perimeter of the building is warranted. A figure showing proposed abandonment locations is provided as Figure 4.

Completed Document Type: Fieldwork

Completed Date: 05/03/2017

Comments: On April 19, 2017, Safety-Kleen Systems, Inc. (S-K) obtained all necessary permits from the City of Oakland for well abandonment activities approved in the February 2016 Sub-Slab Depressurization System Operation and Maintenance Plan and Monitored Natural Attenuation Plan. S-K performed well abandonment activities on May 2 and 3, 2017, per the April 24, 2017 Monitoring Well Abandonment Field Activity Notification letter submitted to DTSC. S-K plans to submit a brief letter-style report, documenting well abandonment, within 60 days of completion of activities (July 2, 2017). DTSC provided field oversight of the fieldwork activities on May 2/3, 2017.

Comments: The monitoring event included water level measurements and/or sampling of groundwater monitoring wells MW-1, MW-2R, MW-3, MW-4, MW-8R, MW-11R, and MW-14. Groundwater samples were analyzed for volatile organic compounds (VOCs) by EPA Method 8260B and total petroleum hydrocarbons reported as mineral spirits and diesel (TPH-MS and TPH-D) by EPA Method 8015.

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Removal Action Completion Report

Completed Date: 07/07/2017

Comments: Monitoring Well Abandonment Activity Summary, dated June 29, 2017, documents the removal and abandonment of three groundwater monitoring wells (MW-5, MW-6, and MW-12) and four soil vapor monitoring wells (SVW-6, SVW-7, SVW-8, and SVW-9) at the site. Note, three soil vapor monitoring wells (SVW-1, SVW-2, and SVW-3) designated for abandonment were inaccessible during May 2017 field activities due to a homeless encampment (Figure 2). S-K intends to conduct a quarterly sub-slab depressurization system sampling and operation/maintenance event in August 2017. S-K will evaluate potential accessibility of soil vapor wells SVW-1, SVW-2, and SVW-3 for future abandonment during quarterly site visits.

Completed Date: 12/02/2016
Comments: Safety-Kleen Systems, Inc. conducted groundwater monitoring in June 2016 to further evaluate monitored natural attenuation (MNA) in groundwater as part of the DTSC-approved remedy. The groundwater monitoring (GWM) report summarizes procedures and results of the June 2016 groundwater monitoring event. The June 2016 GWM data are generally consistent with information provided in previous reports. Anaerobic biodegradation of contaminants of concern at the Site is ongoing, as concentrations continue to decrease from historical levels. Per the DTSC-approved MNA Work Plan, the next groundwater monitoring event for the Site is scheduled for June 2021.

Completed Document Type: Fieldwork
Completed Date: 12/07/2016
Comments: Sub-slab depressurization (SSD) system sampling and operation and maintenance (O&M) activities, performed in accordance with the Sub-Slab Depressurization System Operation and Maintenance Plan and Monitored Natural Attenuation Plan, including verifying SSD system fans are operating properly, collection of system readings, and collection of a vapor sample from SSD system point SP-2 for laboratory analysis of volatile organic compounds by Method TO-15.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 05/05/2017
Comments: Revised Sub-Slab Depressurization System 2016 Annual Operation Summary (Report), May 4, 2017. The Sub-Slab Depressurization (SSD) system was monitored and sampled by a qualified environmental professional in 2016 on a quarterly basis in accordance with the Permit. During quarterly O&M activities, the system was inspected to verify fans were running and providing vacuum as designed. Safety-Kleen Systems, Inc. (S-K) observed that the fan attached to riser SP-1 was inoperable during the June 22, 2016, quarterly O&M event. A new fan was installed to the same riser on June 28, 2016. The former fan attached to riser SP-1 was operational during the March 2016 quarterly event; therefore, it is estimated that fan SP-1 was nonoperational for a maximum period of 3.5 months, during which time all other SSD fans operated continuously. A manual that includes product specifications for the replacement RadonAway HS5000 high suction fan is included as Attachment B. S-K performed quarterly sampling of the SSD system according to the procedures outlined in the February 2016 Plan. S-K collected air flow readings from each exhaust stack on the roof of the building using a VelociCalc anemometer. Vapor samples were collected from exhaust stack SP-2 on a quarterly basis in 2016. Analytical laboratory reports for samples collected during 2016 are included as Attachment C. Field notes for the quarterly events are included as Attachment D. Calibration information for the anemometer is included as Attachment E. A summary of individual effluent VOC concentrations detected in each sample is included as Table 1. Air flow readings and magnehelic gauge readings are included as Table 2. Calculated VOC removal rates, in pounds per day (lbs/day), are included as Table 3. Because the SSD emission

stacks extract commingled vapor beneath the slab, the maximum concentration of individual and total VOCs was used to conservatively calculate daily VOC removal rates for comparison to Permit limits. The mass removal rates for the 2016 operation period, ranged from 0.00017 to 0.00174 lbs/day and were well within Permit conditions of 10 lbs/day. In a letter dated May 5, 2017, DTSC approved the Report and provided the following comment and requirement for future monitoring/sampling and reporting: The Report Attachment E, TSI Model 8360 VelociCalc Calibration Certificate, states, Calibrations are valid for one year. However, the DTSC-approved Sub-Slab Depressurization System Operation and Maintenance Plan and Monitored Natural Attenuation Plan (Plan), dated February 19, 2016, states, All instruments will be calibrated according to manufacturer s specifications prior to use. (2-1) The TSI Model 8360 VelociCalc or other anemometer (air velocity meter), used for measuring and recording air velocity through the sub-slab depressurization system extraction pipes, must be calibrated prior to each monitoring and sampling event scheduled quarterly in March, June, September, and December.

Completed Date: 01/20/2017
Comments: Land Use Covenant and Agreement - Environmental Restrictions, recorded with Alameda County on January 20, 2017. This Land Use Covenant and Agreement ("Covenant") is made by and between Safety-Kleen Systems, Incorporated (the "Covenantor"), the successor in interest to the owner of record located at 400 Market Street, Oakland, in the County of Alameda County, State of California (the "Property"), and the Department of Toxic Substances Control (the "Department"). The Property that is subject to this Covenant, totaling approximately 0.6 acres, is more particularly described in the attached Exhibit A, Legal Description, and depicted in Exhibit B, Assessor's Map. The Property is located in the area now generally bounded by 5th Street on the north, 4th Street on the south, Brush Street on the east, and Market Street on the west. The Property is also identified as County of Alameda, Assessor Parcel Numbers 001-0113-001-02 and 001-0113-002-02. This Property has been investigated and/or remediated under the Department's oversight. The Department approved a Corrective Measures Study (CMS), dated April 2, 2015, and an Operations and Maintenance Plan and Monitored Natural Attenuation Plan, dated February 19, 2016, in accordance with Health and Safety Code, division 20, chapter 6.5. The remediation activities conducted at the Property include installation and continued operation and maintenance of the sub-slab depressurization system, monitored natural attenuation for groundwater, and land use restrictions. As part of the DTSC-approved remedy at the Site, the sub-slab depressurization system layout and a monitoring well location diagram showing the location(s) of the installed remedy are attached as Exhibit C and Exhibit D.

Date form received by agency: 03/29/2004

Site name: SAFETY-KLEEN SYSTEMS INC

Classification: Large Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: Yes
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: Yes

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 01/19/2017
Comments: The Report summarizes the installation of a new plumbing in the optical department inside Target Store T2829 pursuant to the June 26, 2014 Operation and Maintenance Plan. The new plumbing was installed directly under the floor slab with soil disturbance down to 55 inches below ground surface. Approximately 1.14 cubic yards of soil, characterized as a non-hazardous waste, were transported to an off-site permitted landfill for disposal.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 04/18/2018
Comments: The Report summarizes the installation of new plumbing at a beverage area within the Target store in October and November 2017. Target contained waste soil from trench excavation in one 55-gallon drum and transported the drum to a permitted landfill for disposal.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/11/2019	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.
