Consultants ?: Ben Sigman and Michael Neiman (consultants?) gave a PowerPoint presentation.

Vince Sugrue, Landmarks Preservation Advisory Board member gave a summary of the motion given at a previous Landmarks Preservation Advisory Board meeting. The summary of the motion is stated as follows:

To delete from the Downtown Specific Plan, action item 54, bullet #3 that explores allowing additional height on parcels adjacent to historic properties that rehabilitate the adjacent historic property.

To delete from the Downtown Specific Plan, action item 74 which updates the city’s demolition findings to allow development near the periphery of fragmented APIs and ASIs. Reclassify opportunity sites into distinct categories to explain their intensions. Don’t include historic properties and opportunity sites. Incorporate the items listed into the DOSP DEIR for mitigation measures, **cult** A-1 through **cult** A-F in the action items in the Specific Plan as part of the Downtown Oakland Specific Plan statement about establishing an iconic downtown. Add new design review criteria that includes massing and building setbacks as well as standards for building tops.

As a follow up to the Landmarks Advisory Board’s previous comments on reducing the baseline intensity and density throughout the plan area. The intensity density should be significantly reduced in historic districts in the DOSP intensity density map and don’t wait for the establishment zoning regulations.

Recommendation: Staff provide clarification as to whether the increased height allowance in the waterfront warehouse district was intentional or not. If it’s a mistake, please correct it in the Specific Plan.
