Population Growth and Estimated Deviations

The US Census has released in a "legacy format" the data from the decennial census, identifying the whole count of persons and where they resided as of April 1, 2020. Redistricting Partners has concluded the work of placing this data into the census blocks, block groups, and tracts.[1]

This data represents the whole population data prior to a state required reallocation of prison population that will be conducted by the Statewide Database at UC Berkeley. This adjusted data will be completed in the coming weeks and updated counts will be provided at that time.

[1] These counts are based on the 2020 Census geography. There may be slight differences as many census blocks were consolidated.

Based on this data, the city has increased by 49,916 residents or 12.8% since the last decennial census. This is significantly higher than the state population change of 6.1%.

This population change has included a growth of 14,656 residents in District 3, and 10,192 residents in District 7.

The data used to determine the size of ethnic and racial subgroups utilized for Voting Rights Act calculations have been finalized for the current redistricting cycle. Both the Latino and Asian CVAP grew, while the African American CVAP shrunk. Addressing these changes will likely be an important part of the coming redistricting process.
