<u>Frequently Asked Questions FAQ's</u> <u>for an Obstruction Permit (OB)</u>

1. When is an Obstruction Permit (OB) required?

Answer: You must first obtain an OB permit before blocking or obstructing any street parking, curb, sidewalk, or traffic lane.

2. How much does an OB permit cost?

Answer: Rates are shown in the Table titled, "Obstruction Permit Rates" in Page 7. The cost is calculated based on the number of metered or non-metered parking spaces obstructed for the duration. Based on the City's current master fee schedule obstructing metered or non-metered parking space for up to 14 days is known as a short-term obstruction. For longer duration of 15 days or more, the fees are calculated in 30-day increments and in lump sum amounts. Therefore, applicants are advised to reapply if no set long term duration is anticipated to prevent paying for days not used. Alternatively, the applicant may ask for refund through a Request for Refund Form at the City Cashier on the 2nd floor of 250 Frank Ogawa Plaza. Refund will be processed and verified for the dates and activities for consideration. Refer to "HOW ARE OB FEES CALCULATED" in Page 4.

3. Must I provide the exact Start and End Dates on my OB application?

Answer: Yes. The OB Permit Placard will be printed with the beginning and ending dates that are provided on the OB permit application.

4. What if I need to extend my OB permit after my Placards are printed?

Answer: To extend your End Date you must submit a written request prior to the end date that is printed on your issued Placard(s). Updated OB Permit Placards cost \$3 each and total must be paid prior to receiving updated placards. Email and official letter are acceptable as written request.

5. If I don't need the OB Permit for all the days approved can I receive a refund?

Answer: A refund request form must be received prior to the start date for approval of a partial refund.

6. Is an OB permit required before erecting any Building Scaffolding?

Answer: An OB permit is required if a 5 ft. 6 in. clearance for pedestrian access <u>cannot</u> be maintained within the existing sidewalk. Scaffolding plans must show accurately the dimensions on both the plan and profile views. The minimum clearance of 5 ft. 6 in. must be identified at all conflict points, obstacles, street trees, streetlights, utility poles, fire hydrants, bus shelters, parking meters, driveway aprons and curb ramps. A Building Permit is required for any non-factory assembly scaffolding. For all vertical types of construction check with the Building Department for permitting requirements.

7. Can my OB permit be renewed (extended) beyond 6 months?

Answer: Yes, however if the original OB permit required a Traffic Control Plan (TCP), the TCP must be updated and approved before the OB permit is renewed. The approved TCP and renewed OB permit must show the exact same Start and End Dates for the OB permit renewal to be valid.
