

Location:	Oak Knoll Development – Parcel 10; 8750 Mountain Boulevard
Assessor’s Parcel Number:	043A467500321
Proposal:	Oak Knoll Final Development Permit (FDP) for Parcel 10 includes the construction of 23 detached single-family residences which includes modification to the front setback for the garage from 15' to 5' from a private access easement/private drive or court.
Applicant:	Marc Magstadt, SunCal
Phone Number:	Jeff Stevens, Danielian Associates/(949) 474.6030
Owner:	Oak Knoll Venture Acquisitions LLC
Case File Number:	PLN15378-PUDF08
Planning Permits Required:	FDP, compliance with CEQA
General Plan:	Mixed Housing Type Residential
Zoning:	D-OK-2 Oak Knoll District Residential Zone - 2
Environmental Determination:	Final Supplemental EIR certified on Nov. 7, 2017
Historic Status:	Non-Historic Property
City Council District:	7- Treva Reid
Status:	Under Review
Staff Recommendation:	Approve Final Development Permit
Finality of Decision:	Appealable to City Council
For Further Information:	Contact case planner Michele T. Morris at 510-238-2235 , or by email at mmorris2@oaklandca.gov

SUMMARY

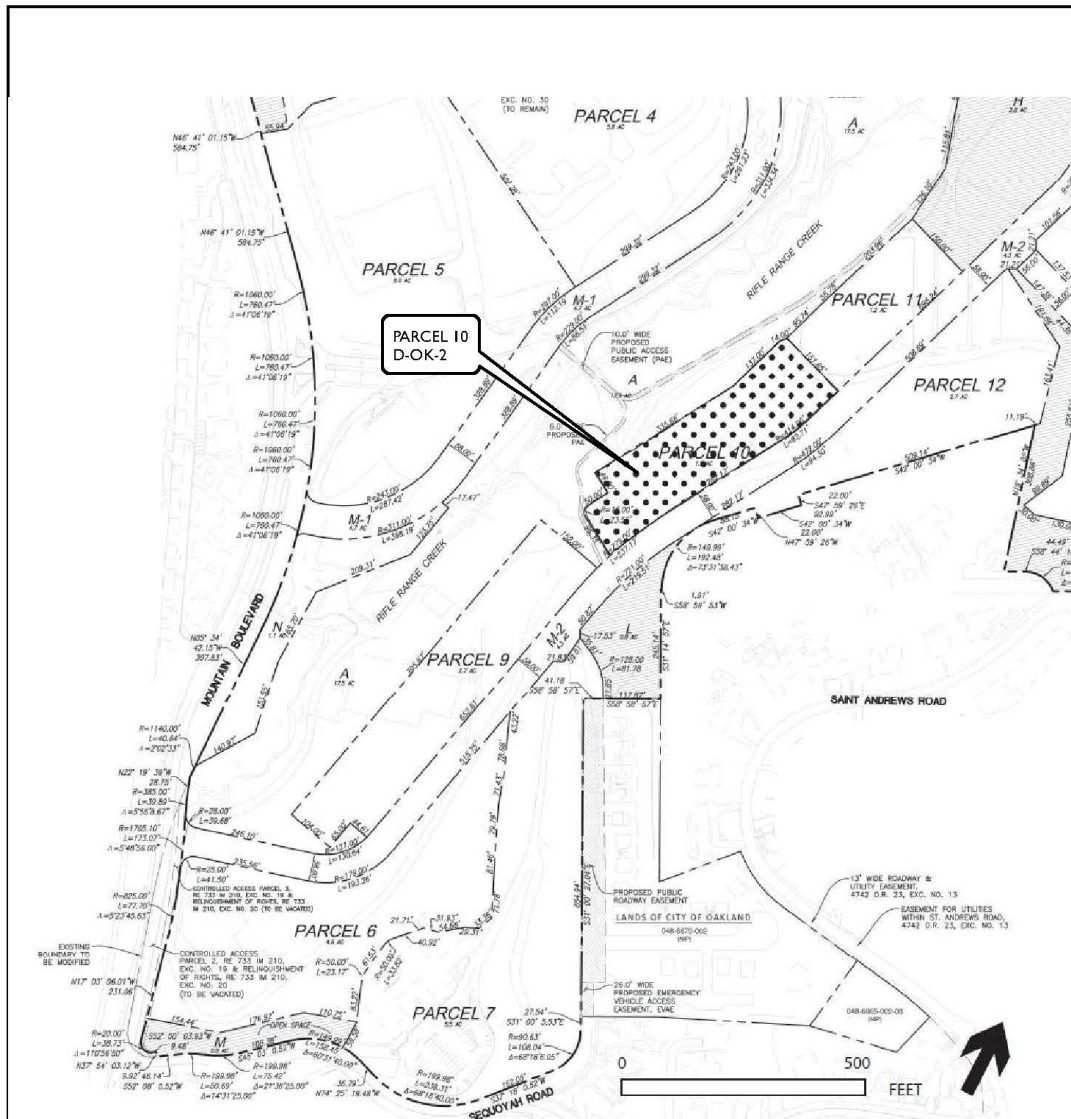

The proposed project is a Phase 1 Final Development Permit (FDP) for construction of 23 detached single-family residential units on Parcel 10 in the Oak Knoll Planned Unit Development (PUD). Parcel 10 is adjacent to Rifle Range Creek, opposite Parcel 12 and adjacent to Parcel 11 along the new Creekside Loop which is currently only accessible from Mountain Boulevard.

As detailed below, staff finds that the project meets all the required Findings. Therefore, staff recommends approval of the project subject to the Oak Knoll PUD Conditions of Approval (**Attachment C**).

PROPERTY AND NEIGHBORHOOD DESCRIPTION

Oak Knoll Development encompasses an 84.7-acre site east of Interstate 580 (I-580) and is located approximately 9 miles southeast of downtown Oakland. Mountain Boulevard and the I-580 freeway are to the west; Keller Avenue to the north and east; and Sequoyah Road, a City-owned property, and residential neighborhoods are located to the south. Parcel 10, the project site, which is near the center of the Oak Knoll Development site and is currently not accessible. Parcel 10 will be accessible from a new road, Creekside Loop.

CITY OF OAKLAND PLANNING COMMISSION

Case File: PLN15378-PUDF08
Applicant: Marc Magstadt - SunCal
Address: 8750 Mountain Boulevard
Zone: D-OK-2

BACKGROUND

Planned Unit Development History

In 1996, the Naval Medical Center Oakland property was subject to a Final Reuse Plan that presented five land use alternatives for the reuse of the property. The Maximum Capacity Alternative within the Final Reuse Plan included: a) 584 residential units; b) 400,000 sq. ft. of commercial space; and c) 32 acres of open space. The Maximum Capacity Alternative was approved by the Oakland City Council as the preferred alternative.

In 2005, SunCal Oak Knoll, LLC proposed the “former Oak Knoll Project” which included 960 residential units, 82,000 sq. ft. of commercial space and 53 acres of open space. The “former Oak Knoll Project” was not approved.

Approved Oak Knoll Land Use Entitlements

The Oak Knoll Development was submitted in 2015 and approved in November 2017. The approval included General Plan Amendments, Rezoning, Planned Unit Development/Preliminary Development Plan, Final Development Plan for Master Developer Site Improvements, Final Development Permit (FDP) or Relocation and Rehabilitation of Club Knoll, Design Review, Vesting Tentative Tract Map, and a Creek Permit. The 2017 approved project is referred to as “Oak Knoll.”

Oak Knoll includes:

- 918 residential units of varying types;
- 72,000 sq. ft. of neighborhood serving commercial in the Village Center;
- 14,000 square feet of civic/commercial use, including relocation of the historic Club Knoll to the center of the Project site with 4,000 sq. ft. of community space and 10,000 sq. ft. of commercial space;
- Approximately 67.6 acres of open space and recreation areas, including four new public parks, a system of trails, bikeways, and walkways;
- Restoration and enhancement of the Rifle Range Creek, Powerhouse Creek and Hospital Creek corridors (16.7 acres);
- Three phases of development; and
- Street network designed as "complete streets" for the safe and comfortable travel of all transportation modes.

The following provides a summary of the current status of the Oak Knoll Development:

- Land Use Entitlement: The Oak Knoll Project Supplemental Environmental Impact Report (SEIR) was certified and the General Plan Amendment, Rezoning, Vesting

Tentative Tract Map, Creek Permit, and the Oak Knoll PUD was approved on November 7, 2017.

- **Construction-Related Permits:**
 - **Grading Permit:** The applicant has received a Grading permit for Phase 1 of the development, which includes Parcel 6 and Parcel 12.
 - **Bridge Permits:** The applicant has received construction related permits for the pedestrian and vehicular bridge located in Phase 1.
 - **Public Improvements:** The applicant has applied for and received the Public Infrastructure on Private Property (PX) permit for the public improvements in Phase 1, including the streets and utilities.
 - **Club Knoll:** The historic Club Knoll has a series of Building Permits associated with it, including demolition, alteration, and reconstruction.
- **Compliance with Conditions of Approval:** The relocation and restoration of Club Knoll is underway. Public improvement permits, various alternate method construction permits and Private infrastructure permits for on-site improvements are under review. The City and the applicant are actively working on formation of the Community Facilities District (CFD), Geologic Hazard Abatement District (GHAD) and Subdivision Agreement.
- **Tree Permit Amendment:** An amendment to the approved Tree Removal Permit was received on May 3, 2021. The amendment proposes to remove 394 additional trees and requires compliance with California Environmental Quality Act (CEQA). The CEQA consultant has not yet finalized the scope of work in order to proceed with analysis.
- **Final Development Permits:**
 - FDP for Club Knoll was approved with the PUD on November 7, 2017;
 - FDP for Phase 1 Master Developer Site Improvements was approved with the PUD on November 7, 2017;
 - FDPs for Phase 1 Residential Development Parcels. The Master Developer has submitted eight FDPs for Phase 1, which are in various stages of City review:
 - Parcel 6: Townhomes. Approved by the Planning Commission on December 8, 2021;
 - Parcel 12: Townhomes. Approved by the Planning Commission on December 8, 2021;
 - Parcel 11: Alley homes. Deemed complete and under review;
 - Parcel 19: Alley homes. Deemed complete and under review;
 - Parcel 23: Alley homes. Deemed complete and under review;
 - Parcel 24: Alley homes. Deemed complete and under review;
 - Parcel 9: Court homes. Deemed complete and under consideration by Planning Commission;
 - Parcel 10: Court homes. Deemed complete and under consideration by Planning Commission at this meeting (and the subject of this report).

Public Review:

The proposed FDP for Parcel 10 was initially presented to the Design Review Committee (DRC) on January 26, 2022. At the DRC public hearing, the applicant was asked to revise the plans in order to: revise the plans to clarify the width of the pedestrian walkway to improve the street interface and enhance the connection to the street, address how the open space at the ends of the private streets would be maintained, and how the slope of the parcel would be stabilized. The DRC reviewed the applicant's submittal and found it to be substantially responsive to the comments received and voted to move the application forward for Planning Commission consideration.

PROJECT DESCRIPTION

The proposed Parcel 10 project includes 23 residential units. Plans, elevations, and illustrations are provided in **Attachment A** to this report. In general, the proposed plans include the following characteristics:

- **Style:** The proposed residential development includes stylistic references to common and vernacular California architectural styles, including Craftsman and Mission architectural styles.
- **Site Planning:** The proposed FDP includes 35 small lot, detached single-family, garden court homes with one home per lot.
- **Unit Types:** Parcel 10 proposes two-story and three-story court homes which offer between three and five bedrooms depending on the number of stories and the floor plan of home.
- **Parking:** Each unit has a two-car attached garage, for a total of 46 off-street parking spaces.
- **Open Space:** The FDP includes a combination of open space, private balconies and ground floor porches.

GENERAL PLAN ANALYSIS

The Parcel 10 project site is in the Hillside Residential General Plan land use designation. The intent of the Hillside Residential land use designation is “to create, maintain, and enhance neighborhood residential areas that are characterized by detached, single unit structures on hillside lots.” However, the Land Use Element further describes the Desired Character and Use in this designation to involve future development “remain[s] residential in character.” The master-planned Oak Knoll PUD allows for development of up to 918 residential units.

The required Findings for the FDP are attached and included in staff’s evaluation as part of this report. The following is an analysis of how the proposed project meets applicable General Plan objectives (staff analysis in indented, italicized text below each objective):

- Objective N3: Encourage the construction, conservation, and enhancement of housing resources to meet the current and future needs of the Oakland community.
 - Policy N3.9 – Facilitating Housing Construction. Orienting Residential Development. Residential developments should be encouraged to face the street and to orient their units to desirable sunlight and views, while avoiding unreasonably blocking sunlight and views for neighboring buildings, respecting the privacy needs of residents of the development and surrounding properties, providing for sufficient conveniently located on-site open space, and avoiding undue noise exposure.
 - *The proposal will deliver market-rate housing that will intensify and support new uses in the South Hills area of Oakland. Front entry porches and front-facing gables provide sunlight and views.*
- Objective N6: Encourage a mix of housing costs, unit sizes, types, and ownership structures.
 - *The proposed project will include townhomes consisting of duplexes, triplexes, four-plex and five-plex buildings which will create more home ownership opportunities.*

ZONING ANALYSIS

Parcel 10 is located within the South Hills area of the Oakland hills in the D-OK-2 Oak Knoll District Residential Zone - 2 (D-OK-2). The intent of the D-OK-2 Zone is to create, maintain, and enhance areas suitable for medium-low density single-family homes. The zoning district provides medium-low density housing development. The following discussion outlines the purpose of the D-OK-2 regulations, with staff analysis provided below in indented, italicized text:

- Create, maintain, and enhance areas suitable for medium-density residential units, such as townhomes.
 - *The proposed project is a market-rate housing project that will diversify living and home ownership opportunities in the Oak Knoll Development.*

Zoning Analysis

Criteria	OK-2	Proposed	Analysis
Land Use			
Permanent Residential	P	P	Allowed
Multi-family Dwelling Facility	P	P	Allowed

Criteria	OK-2	Proposed	Analysis
Land Use			
Density	1 primary unit per lot	1 unit per lot (23 units total)	Complies
Maximum Lot Coverage	55%	Plan 1: 46% Plan 2: 50% Plan 3: 42%	Complies
Front Setback	8 ft.	8 ft.	Complies
Minimum garage front setback when accessed from a private drive aisle.	15 ft.	5 ft.	Does not comply - Applicant is requesting an exception for 5 ft. setback from the private drive aisle.
Maximum wall height primary building	35 ft/ 3 stories	35 ft./3 stories	Complies
Maximum pitched roof height	35 ft/ 3 stories	35 ft./3 stories ft	Complies
Open Space – Group Residential	N/A	2 nd floor decks between 128 sf or 144 sf.	Complies

Compliance with Oak Knoll Design Guidelines

The DRC and Planning staff believe that the FDP for Parcel 10 is in compliance with the Oak Knoll Design Guidelines which is provided as a part of **Attachment C** to this report.

ZONING AND RELATED ISSUES

Design

Staff has worked with the applicant and architect to refine the proposed design for the Parcel 10 site. The project complies with the underlying zoning regulations. Staff reviewed the proposed project against the Oak Knoll Design Guidelines (see **Attachment C**). The project meets the following key guidelines:

Design Guideline	Compliance Analysis
<i>3.5 High Visibility Façades</i>	

Corner lot façades	Complies
High Visibility Façades - Open Space	Complies

Corner lot court homes include entrances that face the street and have been enhanced with quality design elements such as stone veneer columns with wide pedestals to add to the exterior material changes for visual impact. For high visibility facades, the use of porches and balconies are encouraged on these facades, and have been designed with their visibility in mind, as well as the privacy of the homeowner.

Issues

In general, the revised project plans are more responsive to the Oak Knoll Design Guidelines. Staff identified the following design guideline issues related to the current Parcel 10 plans:

2.5 Driveways and Garage Placement and 3.9 Garages - Garage Dimensions. The project complies with the underlying zoning regulations, with the exception of the front setback for garages, where five feet is proposed instead of the required 15 feet.

3.3 Massing – Primary Volumes – Additive Building Elements. The three different court home plans have minimal additive building exterior elements such as shutters or other decorative details. More additive elements should be incorporated at the sides of the homes. (Design Guidelines Compliance Matrix, **Attachment D**)

In general, staff acknowledges that the project has improved since receiving feedback from the Design Review Committee. The proposal has been revised to better comply with the design guidelines by making improvements to the site plan by adding new pavement at the entries to the private access streets to differentiate from the arterial road, Creekside Loop, using architectural design of the building façades to frame entry to the Parcel, and proposing stepped fences along Creekside Loop. The varied mix of floor plans and façades combined with the design and building placement reduces the visual impact and breaks up the massing of the court homes facing Creekside Loop.

PUD Design Guidelines allow for an exception to be granted for shorter minimum front setbacks for garages under Design Review process (*see* Guideline 3.9 Garages – Garage Dimensions). Also, as a DRC commissioner suggested, a reduced driveway may serve to discourage parking along the private access street. Guideline 3.9 emphasizes “a pleasing streetscape and domestic ‘neighborhood’ feel” which a shorter minimum setback may help create this design intention.

CALIFORNIA ENVIRONMENTAL QUALITY ACT

The City Council certified a Supplemental Environmental Impact Report (SEIR) for the existing project approvals on November 7, 2017. The Oak Knoll Mixed Use Community Plan Project Supplemental Environmental Impact Report is available to the public on the web at: <https://oaklandca.s3.us-west-1.amazonaws.com/government/o/PBN/OurOrganization/PlanningZoning/oak060436.pdf>. Staff has determined that no new information about the site, changes to the project, or circumstances under which the project would be undertaken have occurred that would require subsequent or supplemental environmental review for the proposed Parcel 10 FDP. In accordance with CEQA, the City reviewed and analyzed the proposed project changes and other relevant information to determine whether circumstances requiring the preparation of a subsequent or supplemental EIR exist. Based upon available information, the City has determined that none of those circumstances are present. Because the FDP is a refinement of, and not a substantive change to, the approved project, no further environmental review is required. None of the circumstances that require a supplemental or subsequent EIR pursuant to CEQA Guidelines Section 15162 have occurred. And, specifically:

- There are no substantial changes proposed in the project which would result in new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
- There are no substantial changes with respect to project circumstances which would result in new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and
- There is no new information of substantial importance which would result in new significant environmental effects, a substantial increase in the severity of previously identified significant effects, previously infeasible mitigation measures or alternatives now found to be feasible, or new mitigation measures or alternatives which are considerably different from previous ones that would substantially reduce environmental effects.

Here, based upon available information, the City believes that none of the circumstances described above have occurred since 2017 and, therefore, no subsequent or supplemental environmental review is required under CEQA.

RECOMMENDATIONS:

The proposed Oak Knoll Parcel 10 Final Development Permit is consistent with and constitutes a design evolution and refinement of the previously approved Preliminary Development Plan. Staff

finds the proposed project to be well-designed, responsive to DRC comment, and recommends approval. Staff specifically recommends that the Planning Commission:

1. Rely on the Oak Knoll Mixed Use Community Plan Project Supplemental EIR as adequate under CEQA for analysis of the Oak Knoll Parcel 10 Final Development Permit pursuant to CEQA Guidelines Section 15162, and based on the attached findings (and incorporated herein by reference);
2. Approve the Oak Knoll Parcel 10 Final Development Permit, subject to the attached findings.

Here, based upon available information, the City believes that none of the circumstances described above have occurred since 2017 and, therefore, no subsequent or supplemental environmental review is required under CEQA.

**Oak Knoll Zoning District (OK-2)
Findings for FDP**

“The Planning Commission shall approve the Final Development Plan if it makes written findings that the Final Development Plan is in substantial conformance with the Preliminary Development Plan; Oak Knoll Design Guidelines, Oak Knoll Zoning Regulations (D-OK-3 Zone), Vesting Tentative Tract Map No. 8320, Conditions of Approval, and the Mitigation Monitoring Reporting Program ...”

As demonstrated throughout this staff report, the Oak Knoll Development Parcel 10 Final Development Permit is consistent with the Preliminary Development Plan, the intent of the Oak Knoll Design Guidelines, the D-OK-2 District Residential zoning regulations, the Conditions of Approval, and the MMRP. As noted in this report, the FDP is a refinement of the PDP and includes only non-substantive changes intended to carry out the Oak Knoll Development project approvals and refine the design of Parcel 10 development.

City of Oakland Design Review Findings

The proposed Oak Knoll Development Parcel 10 design is subject to Planning Code Section 17.136.050 - Regular design review criteria. Accordingly, regular design review approval may be granted only if the proposal conforms to all of the following general design review criteria, as well as to any and all other applicable design review criteria:

17.136.050 Regular design review criteria.

Regular design review approval may be granted only if the proposal conforms to all of the following general design review criteria, as well as to any and all other applicable design review criteria:

A. For Residential Facilities.

1. That the proposed design will create a building or set of buildings that are well related to the surrounding area in their setting, scale, bulk, height, materials, and textures:

The proposed Parcel 10 project is comprised of 23 court residences that are designed to comply with the applicable design regulations for the site. The project will complement the surrounding area in scale, bulk, materials and textures.

2. That the proposed design will protect, preserve, or enhance desirable neighborhood characteristics;

The proposed Oak Knoll Parcel 10 is the first parcel of Phase 1 of the Oak Knoll Development. The project complies with the intent of the Oak Knoll Design Guidelines and provides massing and architectural style that enhances the visual appearance of the neighboring vicinity.

3. That the proposed design will be sensitive to the topography and landscape.

The Oak Knoll Parcel 10 project has been revised to be sensitive to the hillside topography and carefully designed to suit the hillside terrain.

4. That, if situated on a hill, the design and massing of the proposed building relates to the grade of the hill;

The proposal has been designed to complement the natural setting of the building site and complements the grade of the hill.

5. That the proposed design conforms in all significant respects with the Oakland General Plan and with any applicable design review guidelines or criteria, district

plan, or development control map which have been adopted by the Planning Commission or City Council.

As noted throughout this staff report, the Parcel 10 Final Development Permit is an evolution and refinement of the approved Planned Unit Development, and complies with the underlying regulations controlling development of the site, and with the intent of the Oak Knoll Design Guidelines.

HOA MAINTAINED AREA WITH HIGH SHRUBS, LOW SHRUBS, GROUNDCOVER & GRASSES
-  ORNAMENTAL PLANTING
HOA MAINTAINED AREA WITH LOW SHRUBS, GROUNDCOVER & GRASSES
-  NO MOW TURF
HOA MAINTAINED AREA, SEE PLANT LIST FOR SPECIES, HYDROSEED ON SLOPES GREATER THAN 3:1
-  PRIVATE OPEN SPACE
UNIRRIGATED AND UNIMPROVED, HYDROSEED FOR EROSION CONTROL, FUTURE IMPROVEMENTS BY HOME OWNERS

PLANTING DESIGN INTENT & NOTES

1. ALL LANDSCAPE AREAS ARE TO BE MAINTAINED BY HOME OWNERS' ASSOCIATION. PRIVATE PATIOS AND PRIVATE YARDS WILL BE MAINTAINED BY INDIVIDUAL HOME OWNERS.
2. PLANT LISTS ARE SUGGESTED PALETTE. PLANTS MAY BE SUBSTITUTED AT OWNER'S DISCRETION SO LONG AS THEY ARE CLIMATE ADAPTED, AND MEET WATER REQUIREMENTS.
3. PLANT ALL TREES A MINIMUM OF 5 FEET AWAY FROM ANY UNDERGROUND UTILITIES, A MINIMUM OF 15 FEET FROM A LIGHT POLE, AND A MINIMUM OF 30 FEET FROM THE FACE OF A TRAFFIC SIGNAL, OR AS OTHERWISE SPECIFIED BY THE CITY.
4. PROVIDE ROOT BARRIER FOR ALL TREES LOCATED WITHIN 7 FEET OF PAVED EDGES OR STRUCTURE. ROOT BARRIER IS 18 INCH DEEP BY APPROXIMATELY 6 FT LONG PANEL BARRIER, DEEP ROOT UB18-2, AVAILABLE FROM VILLA LANDSCAPE PRODUCTS, INC. (714) 630-3181; ROOT SOLUTIONS (800)554-0914 OR APPROVED EQUIVALENT. INSTALL 12' LENGTH ALONG EDGE OF PAVEMENT CENTERED ON EACH TREE.
5. ALL SHRUBS, GROUNDCOVERS, TREES AND VINES SELECTED FOR PLANTING ARE CLIMATE ADAPTED AND DROUGHT TOLERANT.
6. NON-TURF AREAS: AT LEAST 80% OF PLANTS SELECTED ARE CLIMATE APPROPRIATE LOW WATER USE SPECIES AND REQUIRE MINIMAL WATER ONCE ESTABLISHED. UP TO 20% OF THE PLANTS MAY BE NON-DROUGHT TOLERANT VARIETY AS LONG AS THEY ARE APPROPRIATELY GROUPED TOGETHER AND IRRIGATED SEPARATELY AND EFFICIENTLY.
7. WATER USE ACCORDING TO "WUCOLS: WATER USE CLASSIFICATION OF LANDSCAPE SPECIES"

IRRIGATION DESIGN INTENT & PERFORMANCE STANDARDS

1. ALL SHRUBS AND GROUNDCOVER AREAS (NON-TURF AREAS) TO BE IRRIGATED WITH DRIP IRRIGATION. ALL TURF AREAS IRRIGATED WITH HIGH EFFICIENCY SPRINKLERS.
2. LANDSCAPING TO BE DESIGNED TO BE IRRIGATED AT NO MORE THAN 55% OF THE REFERENCE EVAPOTRANSPIRATION FOR THE IRRIGATED AREA.
3. NO ORNAMENTAL TURF HAS BEEN SPECIFIED. ALL TURF IS FOR RECREATIONAL USE AND WILL NOT COVER MORE THAN 25% OF TOTAL IRRIGATED AREA.
4. TURF IS NOT ALLOWED IN AREAS LESS THAN 10' WIDE.
5. AUTOMATIC, SELF-ADJUSTING IRRIGATION CONTROLLERS ARE TO BE SPECIFIED ON ALL IRRIGATION SYSTEMS AND WILL AUTOMATICALLY ACTIVATE AND DEACTIVATE THE IRRIGATION SYSTEM BASED ON CHANGES IN THE WEATHER. ALL AUTOMATIC IRRIGATION SYSTEMS ARE EQUIPPED WITH RAIN SENSORS.
6. OVERHEAD SPRINKLER IRRIGATION FOR TURF AREAS ONLY, NO SPRINKLERS OR SPRAY HEADS IN AREAS LESS THAN 10' WIDE. LANDSCAPE DESIGN BEST PRACTICES WILL INCLUDE DISTRIBUTION UNIFORMITY, HEAD TO HEAD SPACING AND SETBACKS FROM WALKWAYS AND PAVEMENT.
7. HOMEOWNER AND DEVELOPER TO CONFORM TO EBMUD SECTION 31 WATER EFFICIENCY REQUIREMENTS FOR LANDSCAPE. PLANS PROVIDED INCLUDE SUGGESTED PLANT PALETTE, AND IRRIGATION DESIGN/BUILD SPECIFICATION TO CONFORM TO SECTION 31. HOMEOWNER TO REFER TO EBMUD BOOK "PLANTS AND LANDSCAPES FOR SUMMER-DRY CLIMATES OF THE SAN FRANCISCO BAY REGION" FOR FURTHER INFORMATION AND PLANT SELECTION. WWW.STOPWASTE.ORG WEB SITE PROVIDES ADDITIONAL INFORMATION REGARDING BAY FRIENDLY PLANTS AND PRACTICES FOR LANDSCAPING.
8. VALVES AND CIRCUITS TO BE SEPARATED (INDIVIDUAL HYDROZONES) BASED ON PLANT MATERIAL AND WATER USE.
9. STATIC PRESSURE AT POINT OF CONNECTION TO BE 60 PSI OR HIGHER. IRRIGATION DEMAND NOT TO EXCEED 20 GPM AT 60 PSI STATIC PRESSURE.
10. PROVIDE AUTOMATIC IRRIGATION SYSTEM THAT PROVIDES 100% UNIFORM COVERAGE AND MEETS CURRENT WATER EFFICIENCY STANDARDS FOR LANDSCAPE AREAS.
11. IRRIGATION BACKFLOW PREVENTION DEVICE TO BE LOCATED CLOSE TO STRUCTURE AWAY FROM EDGE OF ROAD OR PAVEMENT ON A CONCRETE PAD. A POLAR BLANKET AND STEEL CAGING TO BE PROVIDED FOR EACH BACKFLOW PREVENTER.
12. WATER USE ACCORDING TO "WUCOLS: WATER USE CLASSIFICATION OF LANDSCAPE SPECIES"

Note:
Refer to engineer's drawings for details regarding retaining walls, precise location of boundaries, grading and slopes.

Construction

Aluminum
Less than 0.1% copper content - Marine Grade 6060 extruded & LM6 Aluminum High Pressure die casting provides excellent mechanical strength, clean detailed product lines and excellent heat dissipation.

Pre paint
8 step degrease and phosphate process that includes deoxidizing and etching as well as a zinc and nickel phosphate process before product painting.

Memory Retentive -Silicon Gasket
Provided with special injection molded "fit for purpose" long life high temperature memory retentive silicon gaskets. Maintains the gaskets exact profile and seal over years of use and compression.

Thermal management
LM6 Aluminum is used for its excellent mechanical strength and thermal dissipation properties in low and high ambient temperatures. The superior thermal heat sink design by Ligman used in conjunction with the driver, controls thermals below critical temperature range to ensure maximum luminous flux output, as well as providing long LED service life and ensuring less than 10% lumen depreciation at 50,000 hours.

Surge Suppression
Standard 10kv surge suppressor provided with all fixtures.

BUG Rating
B1 - U3 - G1

Finishing
All Ligman products go through an extensive finishing process that includes fettling to improve paint adherence.

Paint
UV Stabilized 4.9Mil thick powder coat paint and baked at 200 Deg C. This process ensures that Ligman products can withstand harsh environments. Rated for use in natatoriums.

Hardware
Provided Hardware is Marine grade 316 Stainless steel.

Anti Seize Screw Holes
Tapped holes are infused with a special anti seize compound designed to prevent seizure of threaded connections, due to electrolysis from heat, corrosive atmospheres and moisture.

High Impact Acrylic Lens
Manufactured with Ultra High Impact, Naturally UV Stabilized Injection Molded Acrylic.

Optics & LED
Precise optic design provides exceptional light control and precise distribution of light. LED CRI > 80

Lumen - Maintenance Life
L80 /B10 at 50,000 hours (This means that at least 90% of the LED still achieve 80% of their original flux)

Sealed-optic urban post top. Traditional urban realm lighting post top, with external diffuser cover and clean lines

A modern post top luminaire with excellent downward symmetrical light distribution and visual appeal. The precision optical system gives very low glare rating, while reducing light pollution. Designed for lighting entrances, footpaths and car parks.

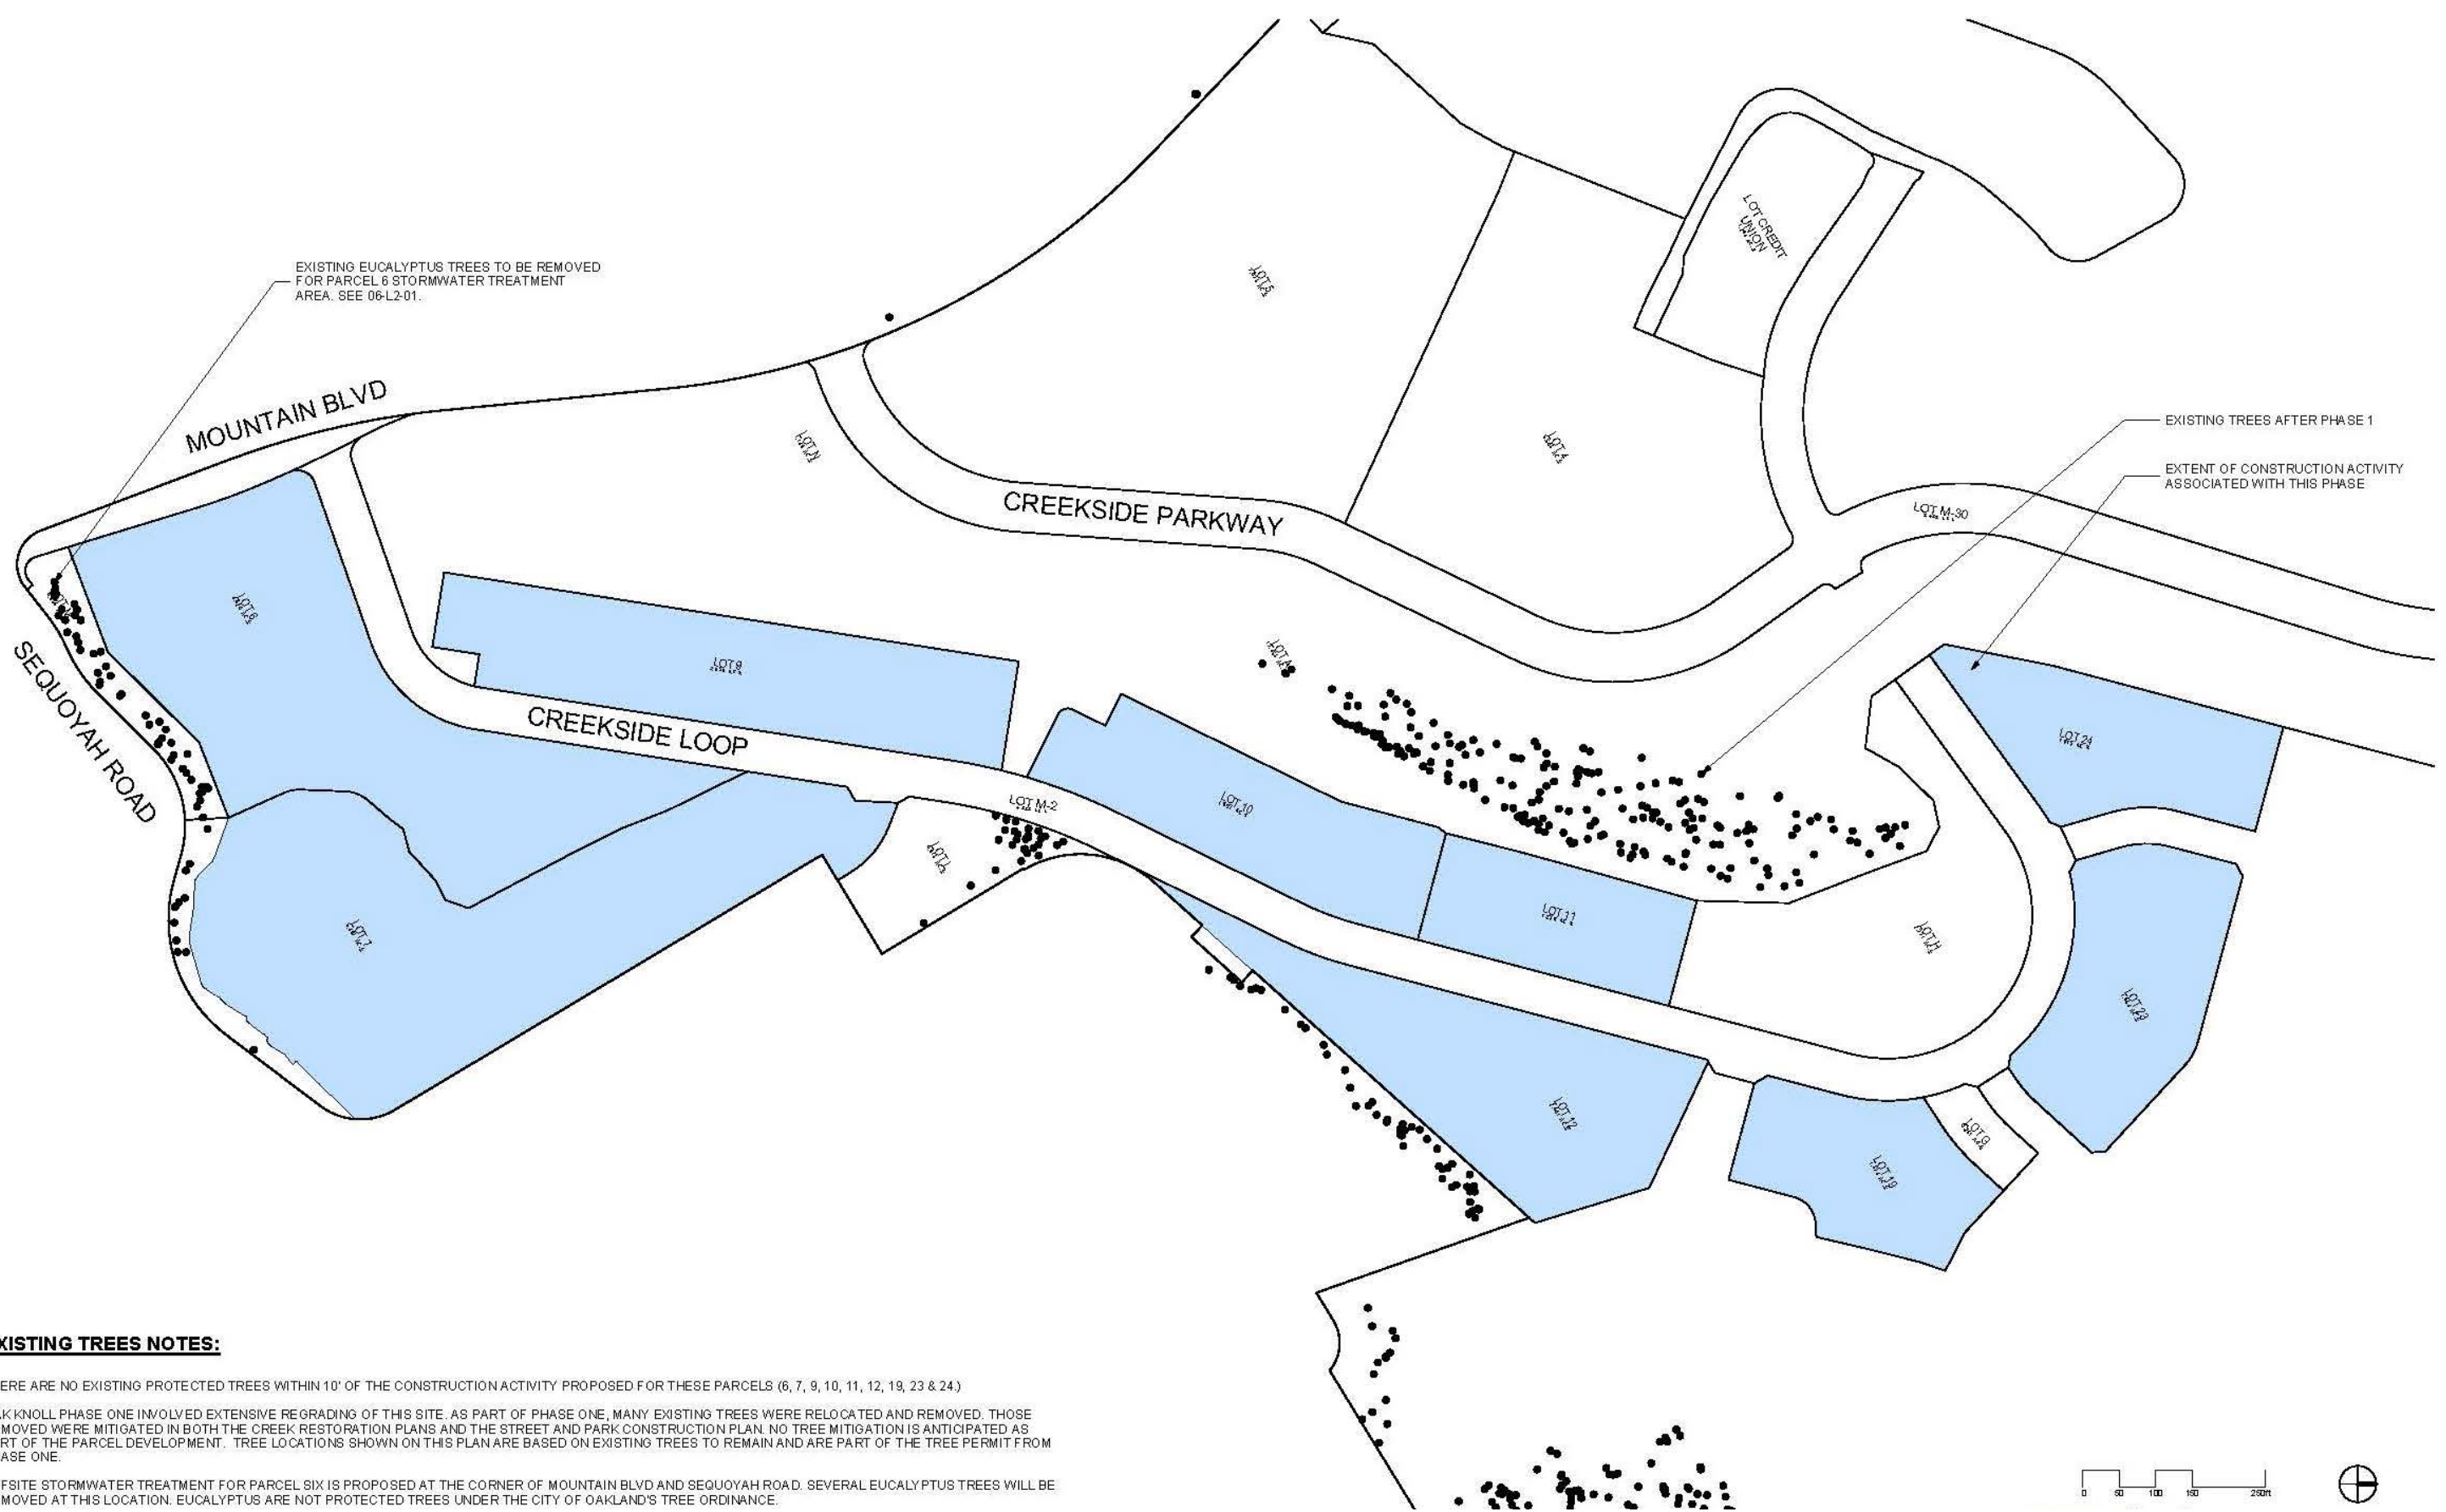

Color temperature 2700K, 3000K, 3500K and 4000K, LED CRI >80 and life time 50,000 Hours. Low copper content die-cast aluminium housing with high corrosion resistance. Stainless steel fasteners in grade 316. Durable silicone memory retentive gasket and clear prismatic UV stabilized acrylic lens. Housing is treated with a nickel and zinc phosphate protection before powder coating, ensuring high corrosion resistance.

High performance COB LED light engine. White coating aluminium reflector on the top of luminaire. This luminaire is provided prewired with power cord to the handhole to simplify installation

Additional Options (Consult Factory For Pricing)

Ligman Lighting USA reserves the right to change specifications without prior notice, please contact factory for latest information. Due to the continual improvements in LED technology data and components may change without notice.

EXISTING EUCALYPTUS TREES TO BE REMOVED FOR PARCEL 6 STORMWATER TREATMENT AREA. SEE 06-L2-01.

EXISTING TREES AFTER PHASE 1
 EXTENT OF CONSTRUCTION ACTIVITY ASSOCIATED WITH THIS PHASE

EXISTING TREES NOTES:

HERE ARE NO EXISTING PROTECTED TREES WITHIN 10' OF THE CONSTRUCTION ACTIVITY PROPOSED FOR THESE PARCELS (6, 7, 9, 10, 11, 12, 19, 23 & 24.)

OAK KNOLL PHASE ONE INVOLVED EXTENSIVE REGRADING OF THIS SITE. AS PART OF PHASE ONE, MANY EXISTING TREES WERE RELOCATED AND REMOVED. THOSE REMOVED WERE MITIGATED IN BOTH THE CREEK RESTORATION PLANS AND THE STREET AND PARK CONSTRUCTION PLAN. NO TREE MITIGATION IS ANTICIPATED AS PART OF THE PARCEL DEVELOPMENT. TREE LOCATIONS SHOWN ON THIS PLAN ARE BASED ON EXISTING TREES TO REMAIN AND ARE PART OF THE TREE PERMIT FROM PHASE ONE.

OFFSITE STORMWATER TREATMENT FOR PARCEL SIX IS PROPOSED AT THE CORNER OF MOUNTAIN BLVD AND SEQUOYAH ROAD. SEVERAL EUCALYPTUS TREES WILL BE REMOVED AT THIS LOCATION. EUCALYPTUS ARE NOT PROTECTED TREES UNDER THE CITY OF OAKLAND'S TREE ORDINANCE.

OAK KNOLL

TREE SURVEY

FINAL DEVELOPMENT PLAN - PARCEL 10

An architectural rendering of a residential street. In the foreground, a wide, light-colored concrete driveway leads to a two-car garage with wooden doors. To the right of the garage is a tall, slender evergreen tree and a garden bed with purple flowers and green shrubs. In the middle ground, a two-story house with a tan stucco finish and white window frames stands. To its left is a house with a stone and wood exterior, a brown garage door, and a gabled roof. Two people are standing on the sidewalk near the stone house. The background shows more houses and trees under a blue sky with light clouds.

THE FINAL WINDOW MANUFACTURER CONTRACTED BY THE BUILDER AT THE TIME OF CONSTRUCTION PERMITS MUST ADHERE TO THE FOLLOWING REQUIREMENTS BASED ON TITLE 24, LOCAL CODE REQUIREMENTS, CITY REQUIREMENTS AND DESIGN INTENT OF THE ELEVATION STYLE AS FOLLOWS:

WINDOWS MAY BE MULLED TOGETHER TO ACHIEVE WIDER EXPANSES OF GLASS, BUT SHALL NOT EXCEED 12' IN TOTAL WIDTH. WINDOWS MAY HAVE DIVIDED LITES, A 2 OVER 2, 4 OVER 1, 4 OVER 4, 6 OVER 1, OR 6 OVER 6 MUNTIN PATTERN. TRUE DIVIDED LITES ARE PREFERRED, SIMULATED DIVIDED LITES, BETWEEN THE GLASS, ARE ACCEPTABLE, AND REMOVABLE DIVIDED LITES, ON TOP OF THE GLASS, ARE PROHIBITED. WOOD AND COMPOSITE TRIM MATERIALS ARE PERMITTED. FOAM TRIM IS NOT ALLOWED.

Chapter 17.101J - D-OK OAK KNOLL DISTRICT ZONES REGULATIONS**Sections:**

- 17.101J.010 - Title, intent, and description.
- 17.101J.020 - Required design review process, including preliminary and final development plan approval and Oak Knoll Design Guidelines.
- 17.101J.030 - Permitted and conditionally permitted activities.
- 17.101J.040 - Permitted and conditionally permitted facilities.
- 17.101J.050 - Property development standards.
- 17.101J.060 - Subdivision.
- 17.101J.070 - Conditional use permit criteria.
- 17.101J.080 - Other zoning provisions.
- 17.101J.090 – Definitions

17.101J.010 – Title, intent, and description.

- A. Title and Intent. The provisions of this Chapter shall be known as the D-OK Oak Knoll District Zones Regulations. The intent of the Oak Knoll District (D-OK) Zones is to implement the Oak Knoll District Planned Unit Development (OKPUD) permit. The OKPUD intends to establish and maintain a pedestrian-oriented neighborhood that contains a mix of housing types, community amenities, a retail area, passive and active recreational opportunities, and open spaces. These regulations shall apply to the six (6) zoning districts (the D-OK zones) in the OKPUD area.
- B. Description of Zones. This Chapter establishes land use regulations for the following six zones:
 1. **D-OK-1 Oak Knoll District Residential Zone - 1.** The D-OK-1 Zone is intended to create, maintain, and enhance areas suitable for low-density single-family home development that responds to the site's topography and includes appropriate landscaping.
 2. **D-OK-2 Oak Knoll District Residential Zone - 2.** The D-OK-2 Zone is intended to create, maintain, and enhance areas suitable for medium-low density single-family homes.
 3. **D-OK-3 Oak Knoll District Residential Zone - 3.** The D-OK-3 Zone is intended to create, maintain, and enhance areas suitable for medium-density residential units, such as townhomes.
 4. **D-OK-4 Oak Knoll District Commercial Zone - 4.** The D-OK-4 Zone is intended to create, maintain, and enhance areas that provide neighborhood-serving retail, such as supermarkets, banks, cafes, and dry-cleaners. Ground floor commercial uses and upper story office uses are encouraged in this zone.
 5. **D-OK-5 Oak Knoll District Amenity Community Commercial Zone - 5.** The D-OK-5 Zone is intended to create, maintain, and enhance areas for community activities and

commercial uses that provide a community amenity. Although this area is intended primarily to serve the community, spaces may be rented for non-community functions, including weddings and other organized events.

6. **D-OK-6 Oak Knoll District Active Open Space Zone – 6.** The D-OK-6 Zone is intended to create, maintain and enhance open space areas that provide opportunities for informal active recreation and park use. The programming of each individual open space will respond to its location and the needs of surrounding residents. This zone is appropriate for lawn and landscaped areas, tot lots, and street furniture, such as benches, tables, and ornamental fixtures.
7. **D-OK-7 Oak Knoll District Passive Open Space Zone - 7.** The D-OK-7 Zone is intended to create, maintain, and enhance open space areas that preserve natural features of the OKPUD area and provide opportunities for passive recreation and maintenance of visual buffers. The programming of each individual open space will respond to its location, natural resources, and topography. This zone is appropriate for management of vegetation and water features, hiking and walking trails, and enhancement of wildlife.

17.101J.020 – Required Design Review Process, Including Preliminary and Final Development Plan Approval and Oak Knoll Design Guidelines.

- A. All development within the Oak Knoll District is subject to an approved Planned Unit Development (PUD) permit pursuant to Chapters 17.140 and 17.142.
- B. Development within the District shall be consistent with the Oak Knoll Preliminary Development Plan (as it may be amended), in particular with the Oak Knoll Design Guidelines, which were adopted as part of the Preliminary Development Plan. Conformance to the Oak Knoll Design Guidelines is required for any change to the exterior of a building that requires a building permit in the Oak Knoll District.
- C. In addition, as applicable, development is subject to the following design review requirements:
 1. Original development of more than two lots at the same time shall require approval of, and be consistent with, a Final Development Plan in accordance with the procedures set forth in Chapter 17.140. For development requiring a Final Development Plan, a determination of consistency with the Final Development Plan shall take the place of, and be deemed equivalent to, the design review procedures in Chapter 17.136.
 2. Original development of two or fewer lots at the same time shall be subject to the design review procedures set forth in under 17.136.
 3. Subsequent approvals to existing development shall be subject to design review under Chapter 17.136, except where such projects are exempt from design review pursuant to Section 17.136.025. Where there is a conflict between the design review criteria contained in Section 17.136.070 and the design objectives contained in the Oak Knoll Design Guidelines, the design objectives in the Oak Knoll Design Guidelines shall prevail.
 4. Telecommunications facilities shall be subject to design review in accordance with Chapter 17.128 unless they have already been approved pursuant to a Final Development Plan.
 5. Signs other than those covered by a Final Development Plan shall be subject to design review in accordance with Chapter 17.104.

17.101J.030 – Permitted and conditionally permitted activities.

Table 17.101J.01 lists the permitted, conditionally permitted, and prohibited activities in the D-OK Zones. The descriptions of these activities are contained in Chapter 17.10. Section 17.10.040 contains permitted accessory activities.

"P" designates permitted activities in the corresponding zone.

"C" designates activities that are permitted only upon the granting of a Conditional Use permit (CUP) in the corresponding zone (see Chapter 17.134 and Section 17.101J.070 for the CUP procedure and criteria).

"L" designates activities subject to certain limitations or notes listed at the bottom of the table.

"—" designates activities that are prohibited except as accessory activities according to the regulations contained in Section 17.010.040.

Limitations on Table 17.101J.01:

L1. Residential Care is only permitted in a One-Family Dwelling Residential Facility. No Residential Care or Emergency Shelter Residential Activity shall be located closer than three hundred (300) feet from any other such Activity or Facility. See Section 17.103.010 for other regulations regarding Residential Care and Emergency Shelter Residential Activities.

L2. An Emergency Shelter Residential Activity is limited to the temporary housing of displaced people after a catastrophe, including earthquake, fire, flood, or other similar act of God, that makes residences uninhabitable. All other types of Emergency Shelter Residential Activities are prohibited.

L3. Community Assembly Civic Activities are allowed only in accordance with the requirements in Section 17.11.060 for parks designated Neighborhood Park (NP). Where Section 17.11.060 is inconsistent with Note L4, below, Note L4 controls.

L4. The following Recreational Assembly Civic Activities are permitted: playgrounds and playing fields; basketball courts, tennis courts, handball courts, lawn bowling, leisure areas, and similar outdoor park and recreational facilities; picnic areas; community gardens; dog run areas; and uses accessory to these permitted uses. The following Recreational Assembly Civic Activities are conditionally permitted: food service and other concessions; temporary nonprofit festivals; community outdoor swimming and wading pools, and other water play features; and permanent bleacher seating and outdoor field lighting.

L5. In addition to the Conditional Use Permit (CUP) criteria required under Section 17.134.050, as modified by Section 17.101J.070, the following additional criteria also must be met:

1. That the proposal will not interfere with the operations of the surrounding uses;
2. That the proposal will not exceed 5,000 square feet on the ground floor; and
3. That the proposal will not interfere with the movement of people along the sidewalk or pedestrian walkways.

L6. Temporary health clinics, including clinics for flu shots, vaccinations, eye health screening, and other similar activities, and temporary blood drives, are permitted. As used in Note L6, “temporary” means an event that lasts no longer than seven days. All other Health Care Civic Activities are prohibited.

L7. The total floor area devoted to these activities is limited to 5,000 square feet.

L8. See Section 17.102.170 for special regulations relating to massage services. Also, no new or expanded laundromat shall be located closer than five hundred (500) feet from any existing laundromat. See Section 17.102.450 for further regulations regarding laundromats.

L9. The total floor area devoted to these activities on the ground floor by any single establishment may only exceed five thousand (5,000) square feet upon the granting of a Conditional Use Permit (see Chapter 17.134 and Section 17.101J.070 for the CUP procedure and criteria).

L10. The total floor area devoted to Administrative Activities is limited to 5,000 square feet if located on the ground floor. There is no size limitation for such uses if not located on the ground floor.

L11. Except for media services, these activities are not permitted if located on the ground floor of a building.

L12. In areas with existing kitchen facilities, Custom Manufacturing Activities that require a kitchen, such as beverage and food production, are permitted. Temporary demonstrations, educational programs, and workshops about any custom manufacturing activity are permitted.

The permanent establishment of Custom Manufacturing Activities that do not require kitchens or in any area that does not contain existing kitchen facilities requires a Major Conditional Use Permit.

L13. Other than Community Gardens (see Note L14), Limited Agriculture is only permitted upon the granting of a Conditional Use Permit (see Chapter 17.134 and Section 17.101J.070 for the CUP procedure and criteria). In addition to the CUP criteria contained in Section 17.134.050 and Section 17.101J.070, this activity must meet the following use permit criteria:

1. The proposal will not adversely affect the livability or appropriate development of abutting properties and the surrounding neighborhood in terms of noise, water and pesticide runoff, farming equipment operation, hours of operation, odor, security, and vehicular traffic;
2. Agricultural chemicals or pesticides will not impact abutting properties or the surrounding neighborhood; and
3. The soil used in growing does not contain any harmful contaminants and the activity will not create contaminated soil.

L14. Community Gardens are permitted by right if they do not include the cultivation of animals, animal products, and/or livestock production, except for bee keeping involving no more than three (3) hives. The cultivation of animals, animal products and/or livestock production, except for bee keeping involving no more than three (3) hives, is only permitted upon the granting of a Conditional Use Permit (see Chapter 17.134 and Section 17.101J.070 for the CUP procedure and criteria).

17.101J.040 – Permitted and conditionally permitted facilities.

Table 17.101J.02 lists the permitted, conditionally permitted, and prohibited facilities in the D-OK Zones. The descriptions of these facilities are contained in Chapter 17.10.

"P" designates permitted facilities in the corresponding zone.

"C" designates facilities that are permitted only upon the granting of a Conditional Use Permit (CUP) in the corresponding zone (see Chapter 17.134 and Section 17.101J.070 for the CUP procedure and criteria).

"L" designates facilities subject to certain limitations listed at the bottom of the Table.

"—" designates facilities that are prohibited.

L1. Sidewalk cafes are allowed only as an accessory facility to an approved Full Service Restaurant or Limited Service Restaurant and Cafe. The sidewalk cafe may only operate within the hours of 7:00 a.m. to 10:30 p.m. See Section 17.103.090 for other regulations regarding Sidewalk Cafes; however, the regulations in this Section supersede any contradicting regulations in Section 17.103.090.

L2. Drive-through facilities are permitted for pharmacy and retail banking uses only. Drive-through facilities are prohibited for all other uses.

L3. All signs other than monument signs, which are defined in the OKPUD, shall comply with the regulations in Section 17.104.010. Monument signs shall comply with the regulations in Section 17.101J.020 and the OKPUD.

L4. Signs shall comply with the regulations in Section 17.101J.020, 17.104.020, or 17.104.070, as applicable.

17.101J.050 – Property development standards.

A. Zone Specific Standards. Table 17.101J.03 below prescribes development standards specific to individual zones. The number designations in the "Additional Regulations" column refer to the regulations listed at the end of the Table. "—" indicates that a standard is not required in the specified zone.

Table 17.101J.03: Property Development Standards

Additional Regulations for Table 17.101J.03:

1. No additional subdivisions other than what was approved in the OKPUD are permitted unless a new planned unit development (PUD) application is submitted pursuant to the procedures in Chapter 17.140.
2. The minimum frontage requirement does not apply to flag lots created as part of the original OKPUD.
3. For lots in the D-OK-1 Zone with a footprint slope of less than twenty (20) percent, the minimum front setback is fifteen (15) feet. For lots in the D-OK-1 Zone with a footprint slope equal to or greater than twenty (20) percent, the minimum front setback is five (5) feet.
4. For residences in the D-OK-2 Zone located off of a shared access facility, the minimum front setback is measured from the edge of the pavement of the common access drive.
5. The minimum front setback for a garage is eighteen (18) feet for lots in the D-OK-1 Zone with a footprint slope equal to or less than twenty (20) percent, and lots in the D-OK-3 Zone. In the D-OK-2 Zone, the minimum front setback for a garage is fifteen (15) feet. The minimum front setback for a garage is five (5) feet for lots in the D-OK-1 Zone with a footprint slope greater than twenty (20) percent.
6. In the D-OK-1, D-OK-2, and D-OK-3 Zones, covered porches are permitted in the front setback; in these zones, covered porches not exceeding one story and structures under 30 inches in height shall have a minimum front setback of three (3) feet. Stairs in these zones are permitted up to the front property line.

7. In the D-OK-2 Zone, the minimum interior side yard is three (3) feet except, for a single-family dwelling unit on a lot with two interior side yards, one of the two interior side yards can be reduced to zero (0) feet without a variance if the other interior side yard is at least five (5) feet. On the ground-floor, only a garage of a maximum length of twenty-four (24) feet is allowed on the interior side without a side yard. Habitable rooms are permitted over such a garage. On the interior side without a side yard, no windows, doors or upper floor balconies or decks are permitted less than three (3) feet of the property line.

8. In the D-OK-1 Zone, the minimum interior side yard is four (4) feet on lots less than six thousand (6,000) square feet. The minimum interior side yard is five (5) feet on all other lots in the D-OK-1 Zone. In the D-OK-4 Zone, there is no minimum interior side yard setback unless the interior side lot line is adjacent to a Residential Zone, in which case the minimum side yard setback is five (5) feet.

9. In the D-OK-2 Zone, the minimum rear setback can be reduced to five (5) feet over a maximum of one-half (1/2) the width of the developable portion of the lot (i.e., the width not including the applicable side yard setbacks), as shown in the following figure. In the D-OK-4 Zone, there is no minimum rear setback unless the rear lot line is adjacent to a Residential Zone, in which case the rear setback is five (5) feet.

10. If there is any ambiguity regarding the required setbacks, the setbacks in the Oak Knoll Design Guidelines shall control.

11. Where a Secondary Unit is permitted in the D-OK Zones (i.e., on a residential lot with only one (1) single-family dwelling unit), the requirements in Section 17.103.080 shall apply.

12. See Section 17.108.030 for allowed projections above height limits and Section 17.108.020 for increased height limits for civic buildings. See Table 17.101J.04 for height regulations for all lots with a footprint slope exceeding twenty (20) percent, or that are terraced or split. In the D-OK-5 Zone, the maximum height is measured from the ground level of the building, and the tower of Club Knoll is an allowed projection above the height limit. Also in the

D-OK-5 Zone, for any building other than Club Knoll or a replica of Club Knoll, the height limit is the same as in the D-OK-4 Zone.

13. The per unit Group Open Space requirement can be replaced by 70 square feet of dedicated Private Open Space per unit. All usable Group Open Space shall meet the requirements in Sections 17.126.030.A through 17.126.030.E. Usable Private Open Space shall meet the following requirements:

- a. **Usability.** A surface shall be provided which prevents dust and allows convenient use for outdoor activities. Such surface shall be any practicable combination of lawn, garden, flagstone, wood planking, concrete, asphalt, or other serviceable, dust-free surfacing. Slope shall not exceed ten percent (10%). Off-street parking and loading areas, driveways, and service areas shall not be counted as usable open space. Adequate safety railings or other protective devices shall be erected wherever necessary for space on a roof or balcony, but shall not be more than the minimum height required by the Oakland Building Code.
- b. **Location.** The space may be located anywhere on the lot. Above-ground-level space may be counted even though it projects beyond a street line. All spaces shall be adjacent to, and not more than four (4) feet above or below the floor level of, the living unit served.
- c. **Size and Shape.** An area of contiguous ground-level space shall be of such size and shape that a rectangle inscribed within it shall have no dimension less than ten (10) feet. An area of above-ground-level space shall be of such size and shape that a rectangle inscribed within it shall have no dimension less than five (5) feet. When space is located on a roof, the area occupied by vents or other structures which do not enhance usability of the space shall not be counted toward the above dimension.
- d. **Accessibility.** The space shall be accessible to only one living unit by a doorway to a habitable room or hallway.
- e. **Openness.** There shall be no obstructions over ground-level space except for devices to enhance its usability and except that not more than fifty percent (50%) of the space may be covered by a private balcony projecting from a higher story. Above-ground-level space shall have at least one exterior side open and unobstructed, except for incidental railings or balustrades, for eight (8) feet above its floor level.

Enclosures and landscaping for both usable Group and Private Open Spaces must be consistent with the requirements in the Oak Knoll Design Guidelines.

14. In the D-OK District Residential Zones, Section 2.6 of the Oak Knoll Design Guidelines applies. Parking and loading requirements in the D-OK-4 Zone are the same as in the CN-4 Zone, subject to the exceptions stated in Note 15 below.

15. Locker areas, storage areas, mechanical rooms, and other non-active spaces shall not be located within thirty (30) feet from the front of the principal building except for incidental entrances to such activities elsewhere in the building. Exceptions to this regulation may be permitted by the Planning Director for utilities and trash enclosures that cannot be feasibly placed in other locations of the building. Driveways, garage entrances, or other access to parking and loading facilities may be located in front of the principal building, as regulated by Note 12 to Table 17.33.03 in Planning Code Section 17.33.050.A. "Street" parking is allowed along either the principal street or principal private driveway in front of the principal building.

(An example of “street” parking is shown in Figure 1.5 in Chapter 2.3 of the Oak Knoll Design Guidelines.) Parking lots are not allowed in the front of the principal building.

16. The minimum percent transparency for the band between two (2) feet and eight (8) feet in height of any side of a commercial building facing a Principal Drive is forty (40) percent. The minimum percent transparency for the band between two (2) feet and eight (8) feet in height of any side of a commercial building facing a retail plaza is seventy (70) percent. An example of glazing treatment that meets these requirements is illustrated in the figure below.

17. The minimum height requirement applies only for new principal buildings and the height is measured from the sidewalk grade to the ground floor ceiling.

18. In the D-OK-1, D-OK-2, and D-OK-3 Zones, the regulations in Sections 17.116.050, 17.116.060 and 17.116.070 for the RH and/or RD Zones apply. In the D-OK-4 Zone, the regulations in Sections 17.116.050, 17.116.070, 17.116.080, 17.116.090, and 17.116.140 for the CN Zone apply. In the D-OK-5 Zone, the regulations in Sections 17.116.050, 17.116.070, 17.116.080, and 17.116.090, and 17.116.130 for “any other zone” apply. In the D-OK-6 and D-OK-7 Zones, the regulations in Section 17.116.050 through 17.116.100 for the OS Zone apply.

B. **Height Standards for Sloped, Terraced, or Split Lots.** Table 17.101J.04 below prescribes the height standards associated with different sloped, terraced, or split lots. The numbers in the "Additional Regulations" column refer to the regulations listed at the end of the Table.

Table 17.101J.04 Height Regulations for all Lots with a Footprint Slope of >20%, Terraced, or Split

Regulation	Downslope Lot Height Regulations With a Footprint Slope of:			Upslope Lot Height Regulations With a Footprint Slope of:	Additional Regulations
	> 20% and < 40%, and all terraced and split regardless of slope	> 40% and < 60%	> 60%	> 20%, terraced and split	

OAKLAND

Maximum Height for Detached Accessory Structures	15 ft.	15 ft.	15 ft.	15 ft.	1
Maximum Wall Height Primary Building	32 ft.	34 ft.	36 ft.	32 ft.	1, 2
Maximum Wall Height Primary Building with a CUP	36 ft.	38 ft.	40 ft.	35 ft.	1
Maximum Pitched Roof Height Primary Building	36 ft.	38 ft.	40 ft.	35 ft.	1, 2
Maximum Height Above Edge of Pavement	18 ft.	18 ft.	18 ft.	N/A	1
Maximum Height Above the Ground Elevation at the Rear Setback Line	N/A	N/A	N/A	24 ft.	1
Maximum Height from Finished or Existing Grade (whichever is lower) Within 20' of the Front Property Line	N/A	N/A	N/A	24 ft.	1, 3

Additional Regulations for Table 17.101J.04:

1. See Section 17.108.030 for allowed projections above height limits and Section 17.108.020 for increased height limits for civic buildings.
2. On a downslope lot greater than seventeen percent (20%) footprint slope, or that is terraced or split, the rear wall of an attached garage or carport may exceed the wall height and roof height by five (5) feet, but may not exceed eighteen (18) feet above ground elevation at edge of pavement, if the garage or carport conforms with all of the following criteria:
 - a. Maximum width is twenty-two (22) feet and maximum depth is twenty (20) feet; and
 - b. Garage or carport floor is at the same level as the edge of the street pavement resulting from the project at the center point of the driveway entrance or is at a lower level; and
 - c. Maximum height above the garage or carport floor is ten (10) feet for walls to the top of the plate or flat roof, and twelve (12) feet for pitched roofs (see Illustration for Table 17.17.06 [Additional Regulation 2], below).
3. The building height is measured from finished or existing grade, whichever is lower.

Downslope

C. **Additional Development Regulations in the D-OK-1 and D-OK-2 Zones.** Table 17.101J.05 below prescribes the standards for garage doors, retaining walls, stoops, and porches in the D-OK-1 and D-OK-2 Zones. The numbers in the "Additional Regulations" column refer to the regulations listed at the end of the Table.

**Table 17.101J.05 Additional Development Regulations
in the D-OK-1 and D-OK-2 Zones**

Facility	Zones		Additional Regulations
	D-OK-1	D-OK-2	
Garages			
Maximum Garage Door Width	16 ft.	16 ft.	
Maximum Garage Door Height	8 ft.	8 ft.	
Minimum Garage Door Recess	6 in.	6 in.	
Retaining Walls			
Maximum Front Retaining Wall Height	30 in.	30 in.	1
Maximum Side and Rear Retaining Wall Height	--	--	
Stoops			
Minimum Landing Depth	5 ft.	5 ft.	
Minimum Landing Width	6 ft.	6 ft.	
Porches			
Minimum covered area	30 sq. ft.	30 sq. ft.	
Minimum elevation above grade	8 in.	8 in.	

Additional Regulations for Table 17.101J.05:

1. Retaining walls, if used in the front, must be set back a minimum of two (2) feet from the sidewalk.

17.101J.060 – Subdivision

The OKPUD is approved for 935 residential dwelling units and 82,000 sf. of non-residential space. No additional residential subdivisions are permitted.

17.101J.070 – Conditional use permit criteria.

- A. The procedures in Chapter 17.134 apply in the D-OK Zones except for the criterion required by Section 17.134.050.D.
- B. In the D-OK Zones, the following criterion replaces the criterion found in Section 17.134.050.D: That the proposal conforms to all applicable design review criteria set forth in the design review procedure at Section 17.101J.020.C and the Oak Knoll Design Guidelines.

17.101J.080 – Other zoning provisions.

- A. Home Occupations. Home occupations shall be subject to the applicable provisions of the home occupation regulations in Chapter 17.112.
- B. Nonconforming Uses. Nonconforming uses and changes therein shall be subject to the nonconforming use regulations in Chapter 17.114.
- C. General Provisions. The general exceptions and other regulations set forth in Chapters 17.102, 17.104, 17.106, and 17.108 shall apply in the D-OK Zones to the extent not contrary to the standards specifically set forth in this Chapter and the Oak Knoll Design Guidelines.
- D. Recycling Space Allocation Requirements. The regulations set forth in Chapter 17.118 shall apply in the D-OK Zones.
- E. Landscaping and Screening Standards. The regulations set forth in Chapter 17.124 shall apply in the D-OK Zones to the extent not contrary to the standards specifically set forth in the Oak Knoll Design Guidelines.
- F. Buffering. All uses shall be subject to the applicable requirements of the buffering regulations in Chapter 17.110 with respect to screening or location of parking, loading, storage areas, control of artificial illumination, and other matters specified therein to the extent not contrary to the standards specifically set forth in the Oak Knoll Design Guidelines.
- G. Bicycle Parking. The bicycle parking requirements in Chapter 17.117 apply in the D-OK Zones.
- H. Special Regulations and Findings for Certain Use Classifications. The regulations set forth in Chapter 17.103 shall apply in the D-OK Zones to the extent noted in Table 17.101J.01.
- I. Performance Standards. The regulations set forth in Chapter 17.120 shall apply in the D-OK Zones.
- J. Hillside Subdivisions. The regulations set forth in Chapter 16.28 shall not apply in the D-OK Zones.

17.101J.090 – Definitions.

As used in Chapter 17.101J, the following words have the meanings defined below:

- A. **Developable Area.** The developable area is the lot area excluding required setbacks.
- B. **Footprint Slope.** Footprint slope means the grade across a lot from the front to back (or back to front) of the developable area.
- C. **Principal Drive.** Principal Drive is a private driveway in a commercial area that connects to secondary drives.
- D. **Secondary Drive.** Secondary Drive is a drive aisle located in a surface or structured parking lot.
- E. **Split Lot.** A split lot is a lot that was sloped and has been graded to have two different levels.

OAKLAND

- F. **Terraced Lot.** A terraced lot is a lot that was sloped and has been graded to have more than two levels.

1.0 INTRODUCTION

This document constitutes the Preliminary Development Plan (“PDP”) for the Planned Unit Development Permit (“PUD”) for the redevelopment and reuse of the Oak Knoll Naval Medical Center. This document includes the supplemental submittal requirements including a Preliminary Development Plan (“PDP”) required by the Oakland Planning Code (“OPC”) Section 17.140.020. Included as part of this document are the following:

- Discussion of General Plan Compliance
- Discussion of Proposed Oak Knoll Zoning District
- Oak Knoll Design Guidelines (separate document)

The applicant, Oak Knoll Venture Acquisitions, LLC (OKVA), is submitting additional applications to the City of Oakland related to the Oak Knoll PUD application including:

- Application for New Oak Knoll Zoning District
- Tree Removal and Preservation Permit Application
- Creek Protection Permit Application
- Vesting Tentative Map Application
- Development Agreement Application
- Final Development Plan (“FDP”) for Master Development Improvements
- FDP for Club Knoll Relocation and Rehabilitation

According to OPC 17.140.020 the PUD application is to be accompanied by the following:

- PDP showing the character of the entire development (see Section 3.0)
- Land use area tabulations and residential densities (see Table 2)
- Staged development plan/phasing (see Section 3.0)
- Schedule for submission of Final Development Plans (see Section 3.0)

Future development at Oak Knoll will be required to be consistent with the PDP. Design Guidelines have been prepared to accompany the PDP to provide planning, architectural, and landscape design guidance for the overall character and intent of development at Oak Knoll. Design Guidelines are intended to be the roadmap for future designers and builders to follow when submitting Final Development Plans (FDPs) to the City. The exact location, size, configuration and slopes of streets and lots will be controlled by the Vesting Tentative Map (VTM).

PROJECT LOCATION AND ACCESS

The Oak Knoll Project site is located in the South Hills area of the City of Oakland, California (see Figure 1). The site is located approximately 9 miles southeast of downtown Oakland and 12 miles from the Oakland-San Francisco Bay Bridge. Interstate-580 (I-580) is the nearest regional highway and varies from approximately 100 feet to 600 feet away from the Project site’s curved western boundary (Mountain Boulevard) that parallels the Highway. Highway access to the site is via the Keller Avenue off-ramp and Mountain Boulevard on-and off-ramps to I-580. Access to State Route 13 (SR-13) is located approximately 2 miles north of the site. The Oakland International Airport is located approximately 5.5 miles west of the site.

The Project site is currently accessible via Mountain Boulevard only. Other potential access points from the east-west segment of Keller Avenue and from Sequoyah Road/Barcelona Street to the south do not currently permit access.

PROJECT CONTEXT AND SETTING

The Project site is located in a largely residential setting in the southeast Oakland hills east of I-580 (See Figure 1). The Project site is bounded by Mountain Boulevard and Interstate 580 (I-580) to the west, Keller Avenue to the north and east, and Sequoyah Road, a City-owned property, and residential neighborhoods to the south. West of Mountain Boulevard is I-580 and a multi-family residential complex of 2 to 3 stories. To the north and east are upland hillside housing composed of both multi-family and single family homes up to two stories. Bordering the site in the northwest corner is Sequoia Community Church which occupies a relatively modern 3-story structure. Near the northeast corner of the site lies a small commercial center, Ridgemont Plaza, which borders the site. Access to Leona Regional Open Space lies approximately 1,000 feet north of Ridgemont Plaza. Neighborhoods to the south are larger lot single family one and two story homes in a wooded setting. An aerial photograph of the Project site and the surrounding vicinity is shown in Figure 2.

Existing site character is described in Section 3.0.

PROJECT SUMMARY

The Oak Knoll Project site consists of approximately 165 acres of the 183 acre former Oak Knoll Naval Medical Center Oakland (Navy) property, approximately 16 acres of an adjacent property (known as the “Hardenstine parcel”), approximately 1.6 acres of City-owned property, and 1.4 acres of East Bay Municipal Utilities District (EBMUD), for a site with a total size of approximately 186 acres. As currently proposed and described in this document, the Project is an integrated community plan of 918 residential units of varying types, 72,000 square feet of neighborhood commercial development, a 14,000 square foot community center/accessory commercial use building, approximately 85 acres of open space, parks and trails including the restoration of Rifle Range creek, and commensurate roads, infrastructure, and landscaping (See Table 1). The project is described more fully in Section 3.0 Preliminary Development Plan.

**TABLE 1
KEY OAK KNOLL PROJECT CHARACTERISTICS**

Land Use/Etc.	Proposed Project
Residential	918 dwelling units
Commercial	72,000 sf (square feet)
Open Space	84.7 acres
Club Knoll Relocation/Restoration	14,000 sf Civic/Commercial
Total Site Acreage	185.5
Creek Crossings (auto/pedestrian)	1/1
Trails	3.5 miles
Creek Restoration	17.8 acres

Figure 2 - Existing Conditions

PROJECT OWNERSHIP

The Project site consists of the following Alameda County assessor parcel numbers (See Figure 3), with current ownership indicated in parentheses:

- 043A-4675-003-21 (OKVA)
- 043A-4675-047-01 (OKVA, Hardenstine Property)
- 048-6870-001 (OKVA)
- 037-3152-008 (City of Oakland)
- 037A-3152-9 (EBMUD)

Two parcels are surrounded by the Oak Knoll project site. These include:

- 043A-4675-003-19 (Seneca Family of Agencies)
- 043A-4675-003-16 (Sea West Coast Guard Federal Credit Union)

These two parcels are not part of the project.

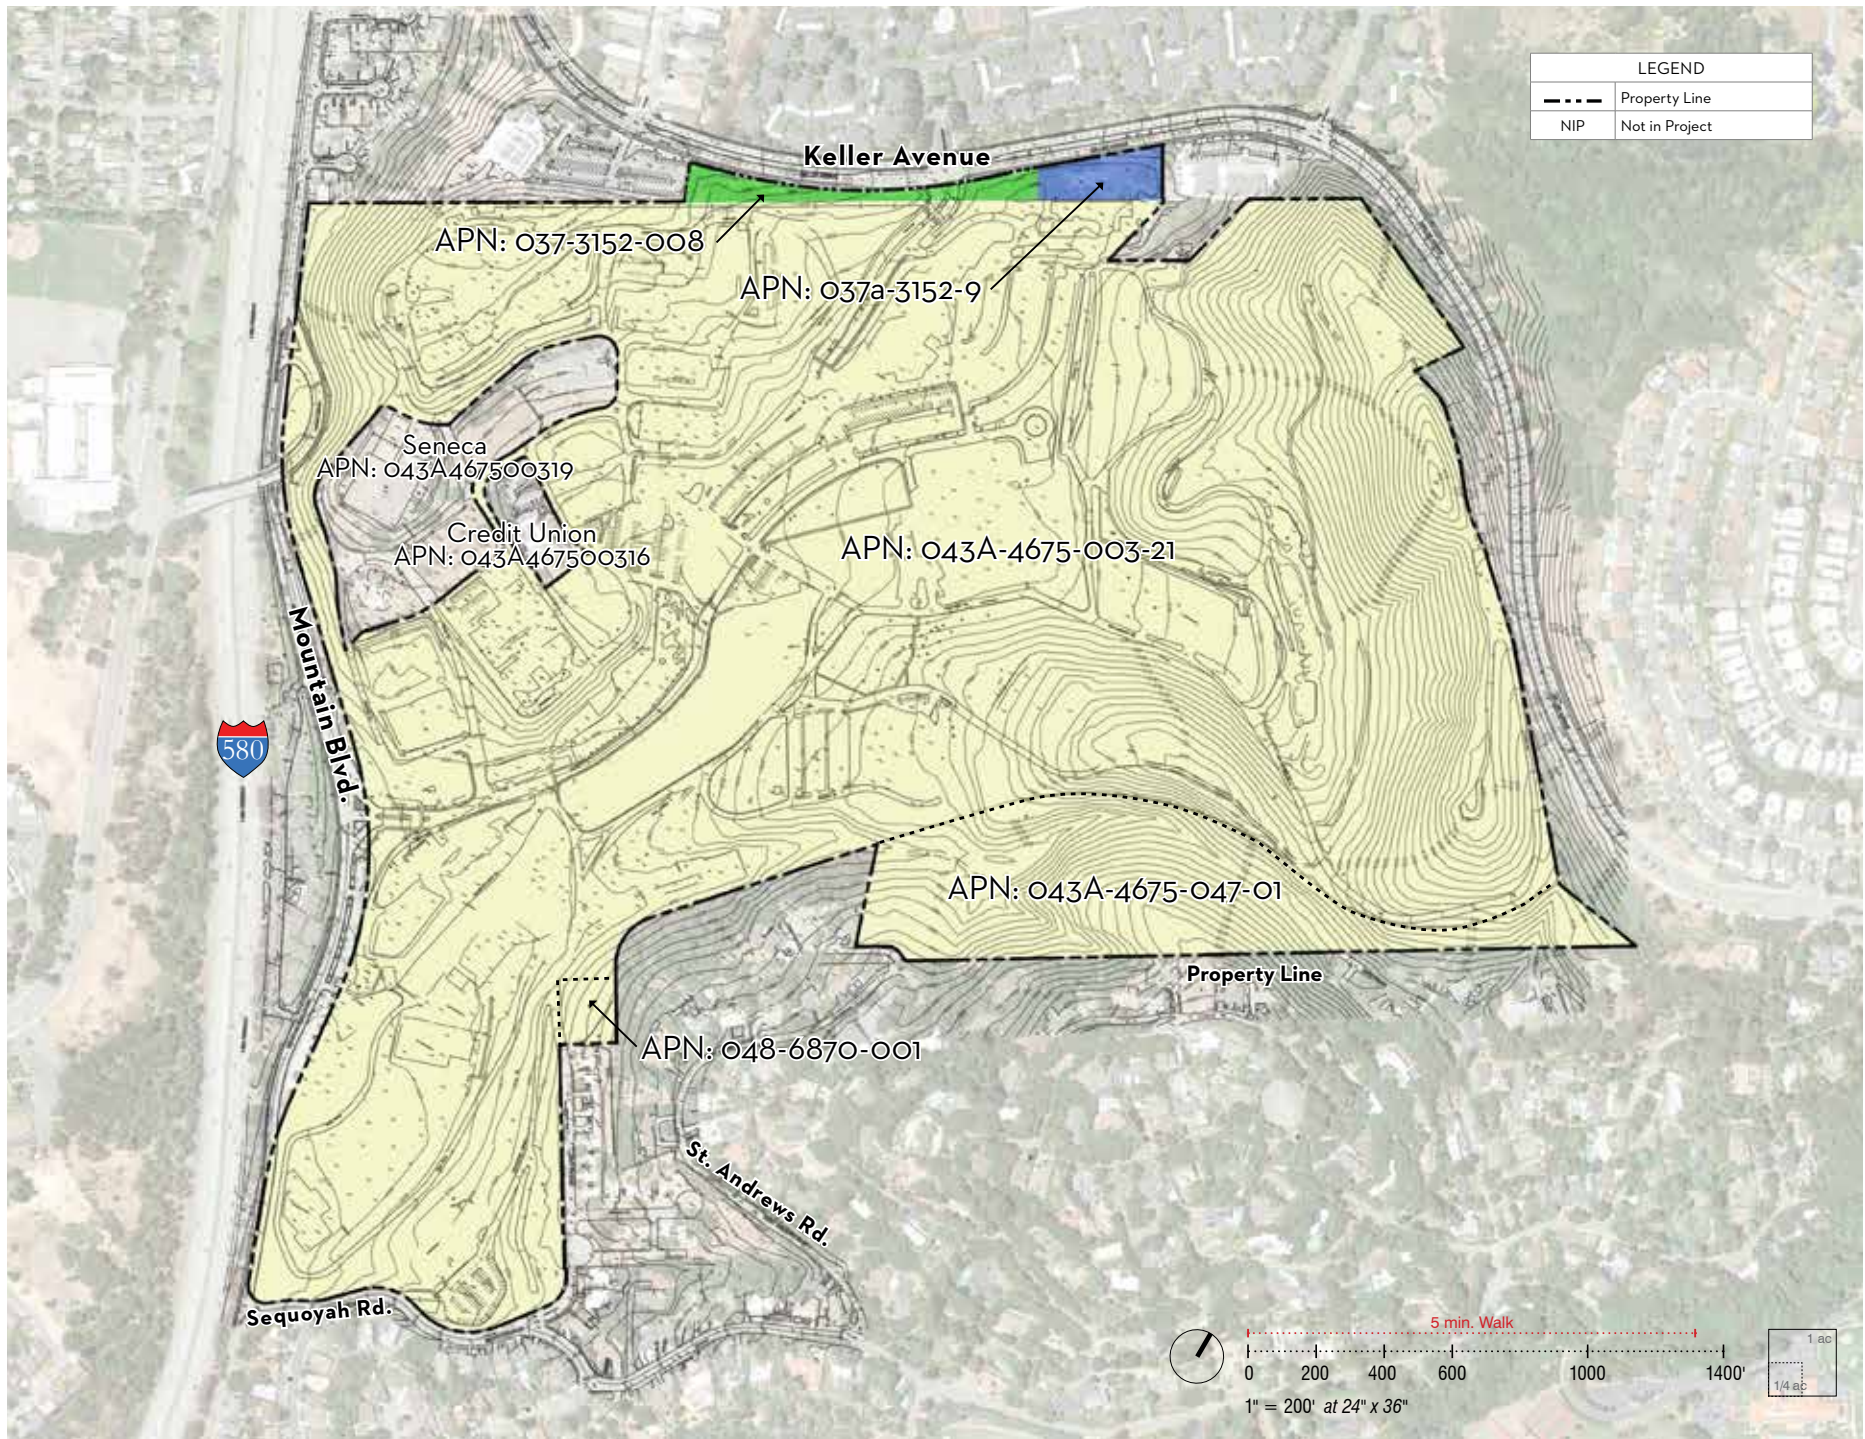

Figure 3 - Ownership

2.0 GENERAL PLAN AND ZONING

PRIOR 2006 GENERAL PLAN CONFORMITY DETERMINATION

In May of 2006, the City of Oakland reviewed the Oak Knoll Mixed Use Community Plan (i.e., the 2006 Oak Knoll Plan) as was then proposed, and determined that the 2006 Oak Knoll Plan was in substantial conformance with the Oakland General Plan land use designations.

Uses and Facility Types

The uses and facility types of the 2006 Oak Knoll Plan was found to conform to the Land Use Transportation Element (LUTE) land use plan and diagram. The 2006 Oak Knoll Plan proposed a land use development program that did not change or introduce new or different land use designations for the property other than those shown on the LUTE Land Use Diagram. Boundaries of those land use designations were adjusted in part to reflect site conditions and environmental resources. The LUTE Land Use Diagram is intended to be general and broadly applied to areas without parcel-by-parcel specificity and illustrate the goals and policies of the General Plan. Existing site conditions were found to be in close correspondence with the boundaries proposed under the 2006 Oak Knoll Plan and the 2006 Oak Knoll Plan was found generally consistent with the adopted LUTE Land Use Diagram.

Density of Development

The density/intensity of the 2006 Oak Knoll Plan was found to be within the maximum limits set forth in the General Plan. The overall density of proposed residential development under the 2006 Oak Knoll Plan was found to be equal to or less than the density that would be realized under the LUTE land use designations.

- The LUTE Land Use Diagram designates approximately 91 acres of the Oak Knoll property as Hillside Residential, which has a maximum allowable density of 5 units per gross acre, enabling development of approximately 455 residential units. The 2006 Oak Knoll Plan proposed 416 residential units on properties designated Hillside Residential at a gross density of 4.57 dwelling units per acre, below the maximum gross density permitted under the General Plan.
- The LUTE Land Use Diagram also designates approximately 36.4 acres of the Oak Knoll property as Community Commercial, which has a maximum allowable density of as much as 125 units per gross acre, or a calculated density of approximately 167 units per net acre (using an average net-to-gross ratio of 75%). The 2006 Oak Knoll Plan proposed 544 residential units on properties designated Community Commercial at a net density of only 19.9 dwelling units per acre, well below the maximum residential density limits under the Community Commercial General Plan land use designation.

The total of 960 units as was proposed under the 2006 Oak Knoll Plan was found to be within the maximum density limits set forth in the General Plan.

General Plan Conformity Guidelines

The 2006 Oak Knoll Plan was found consistent with key General Plan policies cited in City-adopted guidelines, which were used at that time for determining General Plan conformity. The Oakland General Plan is comprised of numerous elements, including but not limited to, the Land Use and Transportation Element (LUTE), the Open Space Conservation and Recreation Element (OSCAR), the Housing Element, Safety Element and the Historic Preservation Element. Both the City's General Plan and case law interpreting general plan requirements recognize that the General Plan is a collection of competing goals and policies, which must be read together as a whole, and not in isolation. In reviewing a project for conformity with the General Plan, the City is required to balance these competing goals and policies. Case law has determined that a project "need not be in perfect conformity with each and every policy" and that "no project could completely

satisfy every policy stated in the General Plan, and state law does not impose such a requirement” (Sequoyah Hills Homeowners Association vs. City of Oakland - 1993).

After reviewing and weighing all pertinent goals and policies of the Oakland General Plan, the City issued a written determination concluding that the 2006 Oak Knoll Plan was in substantial compliance with the General Plan. ⁽ⁱ⁾

2016 Project Conformity with the General Plan Land Use Diagram

The current 2016 development plan for Oak Knoll differs slightly from the 2006 Oak Knoll Plan, but remains in substantial conformance with the prior 2006 Plan, thereby also meeting the same criteria for General Plan land use consistency.

The density of the current 2016 Oak Knoll Project is within the maximum limits set forth in the General Plan. The total residential development proposed under the current 2016 Oak Knoll Project is 918 residential units, less than the 960 units that were previously proposed in the 2006 Oak Knoll Plan and that were found to be within the maximum limits set forth in the General Plan.

Nonetheless, planning staff and the applicant believe it prudent to modify the General Plan Land Use to provide better guidance for future planning efforts. The proposed amendments to the boundaries of the existing classifications and the addition of two new land use classifications reflect three main changes to the Plan since 1998 and 2006: the addition of the 15-acre Hardenstine parcel to the project area, the relocation of the Club Knoll to the center of the site, and the desire by City staff to re-designate areas shown as Community Commercial on the 1998 diagram where townhomes and garden court homes are proposed under the 2017 Plan. These changes are briefly discussed below:

- The addition of the 15-acre Hardenstine parcel to the project site will allow a significant increase in the number of acres to be permanently preserved as open space and allows the adjustment of the site’s Urban Open Space designation to include the Hardenstine parcel, which had previously been designated as Hillside Development. This modification is consistent with OSCAR Policy OS-1.3, which states that “on large sites with subdivision potential, generally conserve ridges, knolls and other visually prominent features as open space.

Maintain development regulations which consider environmental and open space factors such as soil stability, plant and animal resources, earthquake and fire hazards, and visual impacts, in the determination of allowable density.” The Hardenstine parcel is a visually prominent, wooded, undisturbed area located along one of the project area’s lower ridgelines. It contains a stand of oak woodlands, and provides habitat to common wildlife species. The preservation of these 15 acres as open space better reflects the goals of OSCAR Policy OS-1.3 than providing fewer acres of open space near the corner of Mountain Blvd. and Sequoia Drive. Designating the Hardenstine parcel as open space and redesignating the area near the corner of Mountain and Sequoia for housing also reflects the current project’s proposed relocation of Club Knoll, discussed below, from this corner to the center of the site.

- The 2017 project proposes the relocation of Club Knoll from the southwestern corner of the project to a more central location in the development to better serve the new community, to provide an important focal point and visual amenity along the creek and to reduce potential land use conflicts with adjacent neighboring residential uses. This modification is also consistent with the General Plan Policy LU Policy N. 7 .1, Ensuring Compatible Development and LU Policy N5.2, Buffering Residential Areas.
 - As did the 2006 project, the 2017 project proposes townhomes in the area designated Community Commercial on the 1998 Land Use Diagram. Even though townhomes are allowed in areas designated Community Commercial, planning staff believes it prudent to redesignate these areas with a land use classification that more closely matches the proposed residential zoning for these areas. When Final Development Plans are submitted for these areas in the future, it will be clear that the City’s vision for these areas is not commercial but is residential.
- (i) Due to the economic downturn, the project sponsor withdrew the 2006 Oak Knoll Plan from further review in 2007. In 2011, at its own initiative, the City included the project site its City-wide zoning update effort but expressly recognized that the zoning districts it approved in 2011 (RH-4, with some pockets of RH-3) were intended to be “place-holder” zoning until there was a specific development plan to be implemented. See Draft SEIR at pp. 4.9-16-17.

PROPOSED ZONING DISTRICT

The Project proposes rezoning the Project site to better match the broad mix of land use types allowed under the General Plan Land Use Diagram, to accurately reflect the Oak Knoll PDP's proposed Land Use Plan, and to codify the specific development standards for new development under the Oak Knoll PUD permit.

New D-OK District Sub-Zones

The proposed rezoning would create site-specific D-OK Oak Knoll District Zone with a series of sub-zones. The intent of the regulations associated with the new Oak Knoll District Sub-zones are to:

- create, maintain, and enhance residential areas characterized by single family homes and townhouses at a mix of densities,
- allow different types and character of development where appropriate on the site,
- provide for appropriately scaled retail and commercial uses in a village center setting,
- allow neighborhood and community-serving assembly uses in the relocated and rehabilitated Club Knoll building, and
- identify areas best suited for recreation and conservation and permanently protect these areas as parks and open space.

The provisions of the new D-OK zoning district are similar to the City's existing RH-4, RM-4, CN-4, and OS zoning districts but with development standards that better accommodate the mix of development proposed by the Project. For example, the new D-OK zoning district will enable the Project to include a variety of residential development types. In addition, one or more of the D-OK sub-zones would allow commercial uses such as the neighborhood retail envisioned in the Village Center and any accessory commercial uses in the relocated and rehabilitated Club Knoll building. At least one of the D-OK sub-zones would result in generally smaller lots with smaller setbacks, and enable zero-lot line development. The proposed zoning district sub-zones are shown in Figure 4.

Figure 4 - Proposed Oak Knoll Zoning District

3.0 PRELIMINARY DEVELOPMENT PLAN

EXISTING SITE CHARACTER

The 190.9 acre Oak Knoll site has varied terrain and features including remnants of past Navy activity. Rifle Range Creek, a tributary of Arroyo Viejo Creek, flows from north to south through the central portion of the property, and is one of the most prominent natural features of the Project site. Through the north-central portion of the site, the Creek runs through an approximately 900-foot-long pipe beneath roadway and other paved areas. Two secondary drainages, Powerhouse Creek and Hospital Creek, join Rifle Range Creek in the east portion of the site.

Much of the Project site consists of hilly terrain with oak, eucalyptus, Monterey pine, and riparian and annual grassland habitats. Three ridge and hillside areas distinguish the site: 1) a broad ridge situated between Mountain Boulevard and Rifle Range Creek (which includes a prominent knoll at the northwest corner of the site); 2) a narrow ridge situated near the southern property line (which includes a second prominent knoll); and 3) a prominent ridge near the Project site's eastern property line.

In general, topography on the Project site is downsloping toward the west, from the Eastern Ridge. Elevations onsite range from a low of approximately 222 feet where Rifle Range Creek discharges from the site at Mountain Boulevard, to a high of about 665 feet on the Eastern Ridge. Most of the topography on the site has been altered by previous grading and slopes as steep as 1:1 (horizontal:vertical) have been created.

Although most of the Navy facilities on the site have been demolished and removed some features remain including:

- Club Knoll clubhouse
- Parking lots, pathways, and a pedestrian bridge over Rifle Range Creek
- Dormant underground utilities and piping

- Facilities associated with the Seneca and Navy Credit Union parcel which are not included in the project area.

The existing site character is depicted in photographs shown in Figure 5.

PROJECT VISION

The community at Oak Knoll is planned as a walkable collection of neighborhoods anchored by a village commercial center, neighborhood parks, a relocated and rehabilitated Club Knoll building, and natural accessible open space. The primary landscape features around which the land plan is shaped is the restored branch of Rifle Range Creek and the surrounding upland areas to the north, south and east of the Creek. Neighborhoods are woven together through an extensive system of trails and carefully designed streetscapes and "Complete Streets." (See Circulation and Complete Streets).

COMMUNITY MASTER PLAN

The overall community plan is organized to preserve major open space features such as the Oak Knoll on the eastern edge of the site and open spaces areas that flank the southeastern and northwestern corners of the site. An illustrative rendition of the master plan is shown in Figure 6. The project site is moderately sloped in the southern and western portions. These areas are most suitable for the village commercial center adjacent to the project entry along Mountain Boulevard. Higher density townhomes and small lot single family development are located within walking distance to the Village commercial center, restored Creek trails and open space and the Project's community center/clubhouse. See proposed project renderings at the end of Section 3.0

The existing Club Knoll building will be relocated to the center of the site and act as a focal point for the community. The building will be rehabilitated for community, HOA, and community commercial uses.

Per the City of Oakland's Public Art Ordinance the project will also include a public art component. This is discussed later in this Section.

Looking West From Site Over Interstate 580

Existing Paved Areas

Oak Knoll Looking West

Rifle Range Creek

Figure 5 - Existing Site Photos

Figure 6 - Illustrative Master Plan

PROJECT LAND USE AND PROGRAM

The project program includes 918 residential units and 72,000 square feet of commercial uses. An additional 10,000 square feet of community related commercial and 4,000 of community/HOA space may occupy the relocated Club Knoll building. Table 2 contains the Land Use and Density tabulations for the proposed project. Figure 8 shows the distribution of land uses on the site and proposed residential densities.

Land uses are organized such that the village commercial area and community center area (Club Knoll) are centrally located in the lower areas of the site. Both areas are accessible to Mountain Boulevard and Keller Avenue via collector streets. Adjacent to the Village Center and Community Center are medium density townhome developments and small lot single family neighborhoods to the east. Lower density single family residential areas occupy the upland areas of the site to the east and south. Protected open space, trails, and parks are woven throughout the site and are discussed later in this section.

Using a factor of 2.77 people per household based on Alameda County's average persons per household (U.S. Census, 2010), the site would have an approximate build-out population of 2,590 persons.

Village Center Commercial Areas

The Village Center commercial area represents the focal point of the Oak Knoll community and provides retail, services, a plaza, and space for community events (see Figure 7). It is connected to both transit, trails, and bike trails. The retail program may include a grocer, convenience retail, small office medical, restaurant(s), bank, and office uses. The Village Center will provide parking for commercial and public use. 72,000 square feet of gross leasable space is planned for the Village Center.

The character and organization of the Village Center is discussed in more detail in the Design Guidelines.

Figure 7 - Illustrative Rendering of Village Center

TABLE 2
LAND USE AND DENSITY

Land Use	Density	Gross Area (Acres)	Net Area (Acres)	Units	Net Density ⁽¹⁾ (du/ac)	Floor Area (SF) (approx.)
RESIDENTIAL						
Typical Single Family Detached Lots 42' x 90', 45' x 100', 55' x 90', 60' x 100'	Low	30.7	22.2	170	7.7	475,000
Small Lot Single Family Detached 42' x 50', 50' x 60'	Medium-Low	17.1	12.5	179	14.3	400,000
Townhomes 18'-25' Wide	Medium	33.3	33.3	569	17.1	1,150,000
subtotal		81.1	68.0	918	13.5	2,025,000
COMMERCIAL/COMMUNITY FACILITIES						
Village Center			8.4			72,000
Community Center			2.8			14,000
subtotal			11.2			86,000
OPEN SPACE						
Public Parks			7.6			
Undisturbed Open Space			39.0			
Revegetated Slope Banks			20.3			
Restored Creek Corridor			17.8			
subtotal			84.7			
STREETS						
Collector Streets			10.1			
Neighborhood Streets			11.5			
subtotal			21.6			
SITE TOTAL			185.5			2,111,000

Note (1) Net density is defined in Section 17.142.030 of the OPC as "land area within the development, excluding publicly dedicated streets, freeways, alleys and paths... land which is specifically devoted to non-residential facilities." Open space, parks and commercial areas are also excluded.

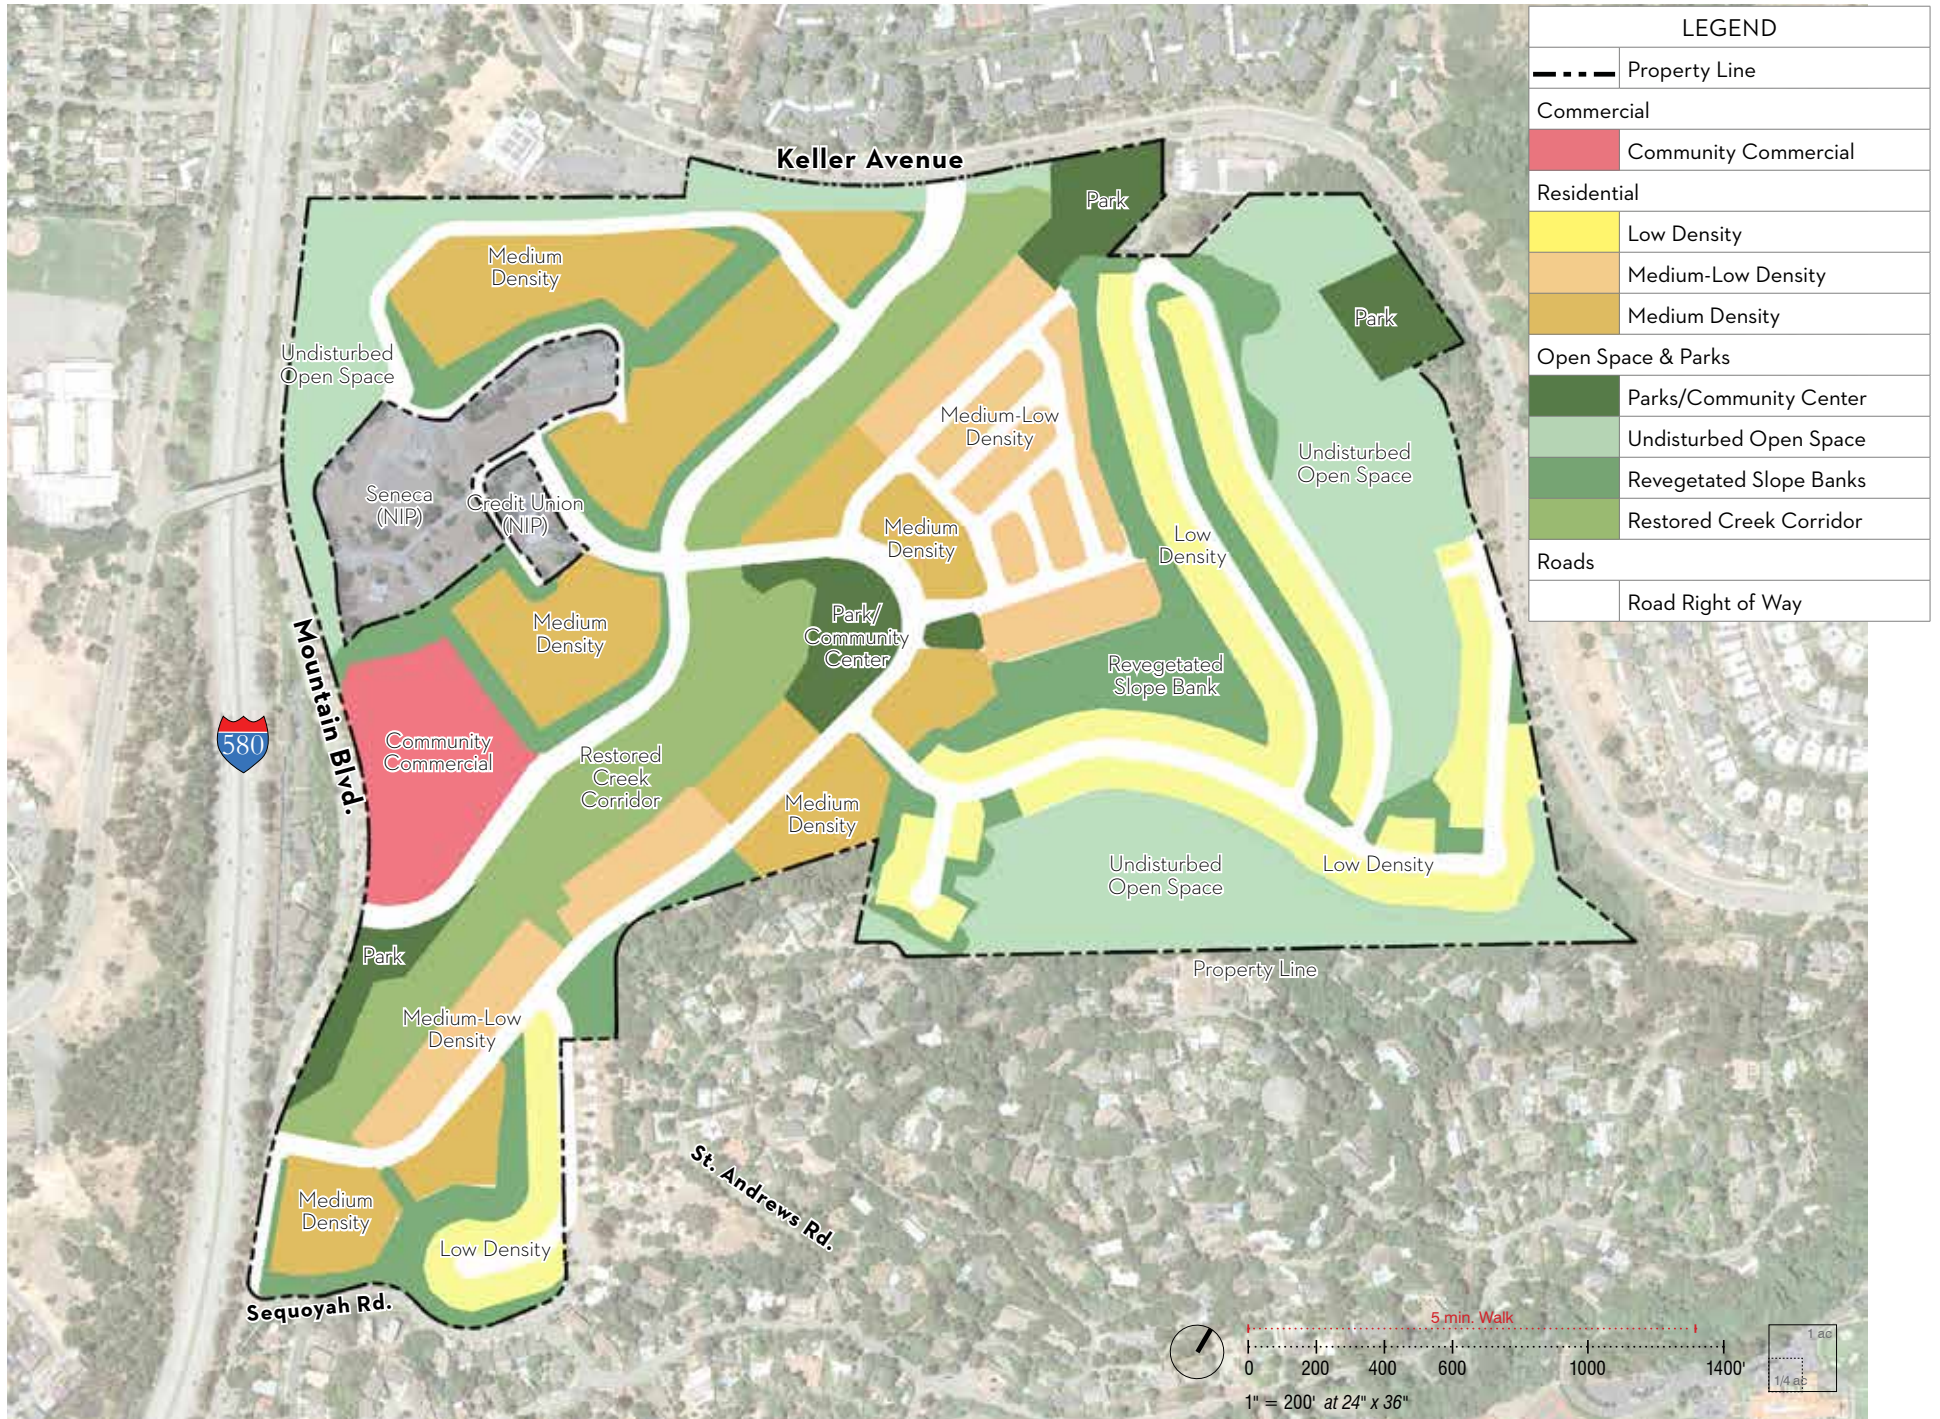

Figure 8 - Proposed Land Use

Relocation and Rehabilitation of Club Knoll

The Project proposes to relocate and rehabilitate the key historical portions of Club Knoll, a locally-designated historic resource constructed in 1924 as a clubhouse to the Oak Knoll Golf and Country Club and then used as an Officer's Club when the site was used as naval hospital. Club Knoll is located in the southwestern part of the Project site near Sequoyah Road (the site's southern boundary) and is currently in disrepair, having been vacant for many years. See Figure 9 for the existing location of Club Knoll and proposed relocation site. Also shown is a concept site plan and aerial illustrations of the future rehabilitated building.

The proposed Project would relocate and restore the key historic portions of Club Knoll in a central and publicly prominent portion of the site and reuse it as a community center with accessory commercial uses. The portions of the building to be relocated include the main hall, dining hall, lobby/mezzanine areas, building wings, courtyard and cupola. The components of the building proposed for demolition include the basement, and the additional third wing used for administrative/office purposes. The garage, which is not considered to be a historic resource, would also be demolished.

The Club Knoll building may provide space for community use, HOA offices and activities, and accessory commercial uses. Commercial uses may include a health club/fitness center, cafe or coffee/juice bar. The large rooms provided in the rehabilitated Club Knoll building may provide space for programmable activities which may include:

- Resident activities such as meetings, programmed events, and social activities
- Space available on rental basis for both residents and non-residents for events such as weddings and Bar Mitzvahs.

Outdoor activities and uses at the community center may include:

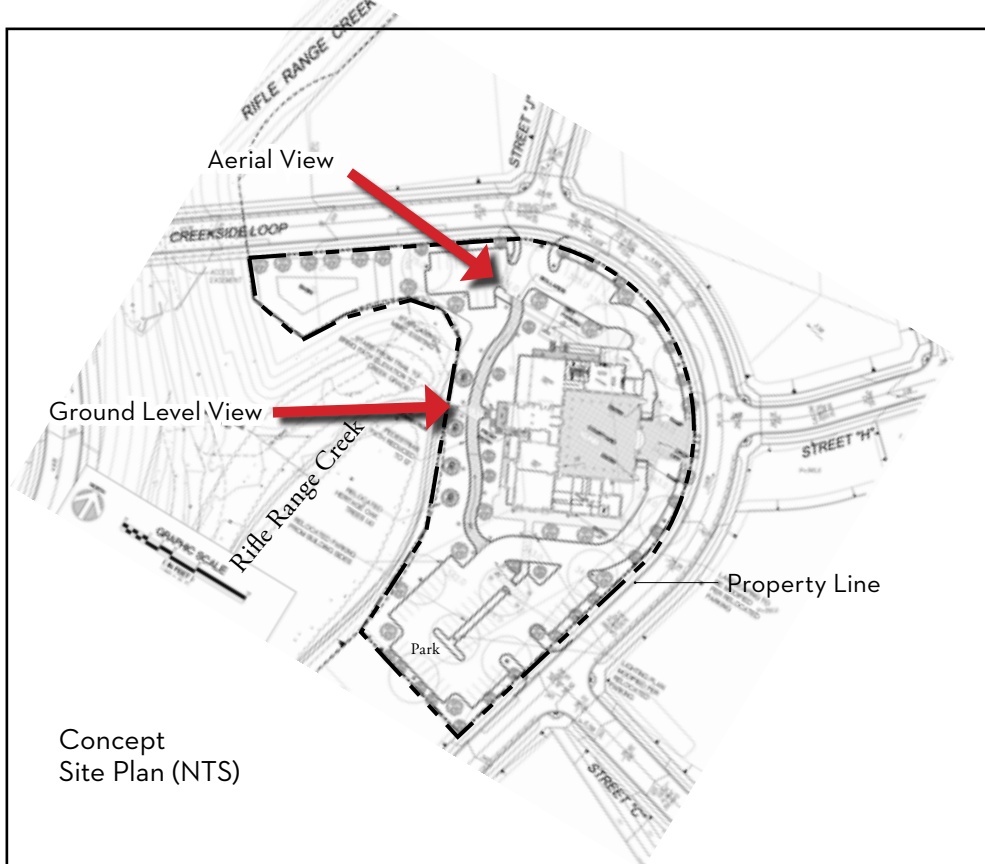

- Events and dining in a picnic/patio space
- Picnic and seating areas
- Potential public art location(s)
- Stormwater management

Ground Level View from West

Concept Site Plan (NTS)

Location of Existing Building and Relocation Site (NTS)

Figure 9 - Club Knoll Relocation and Rehabilitation

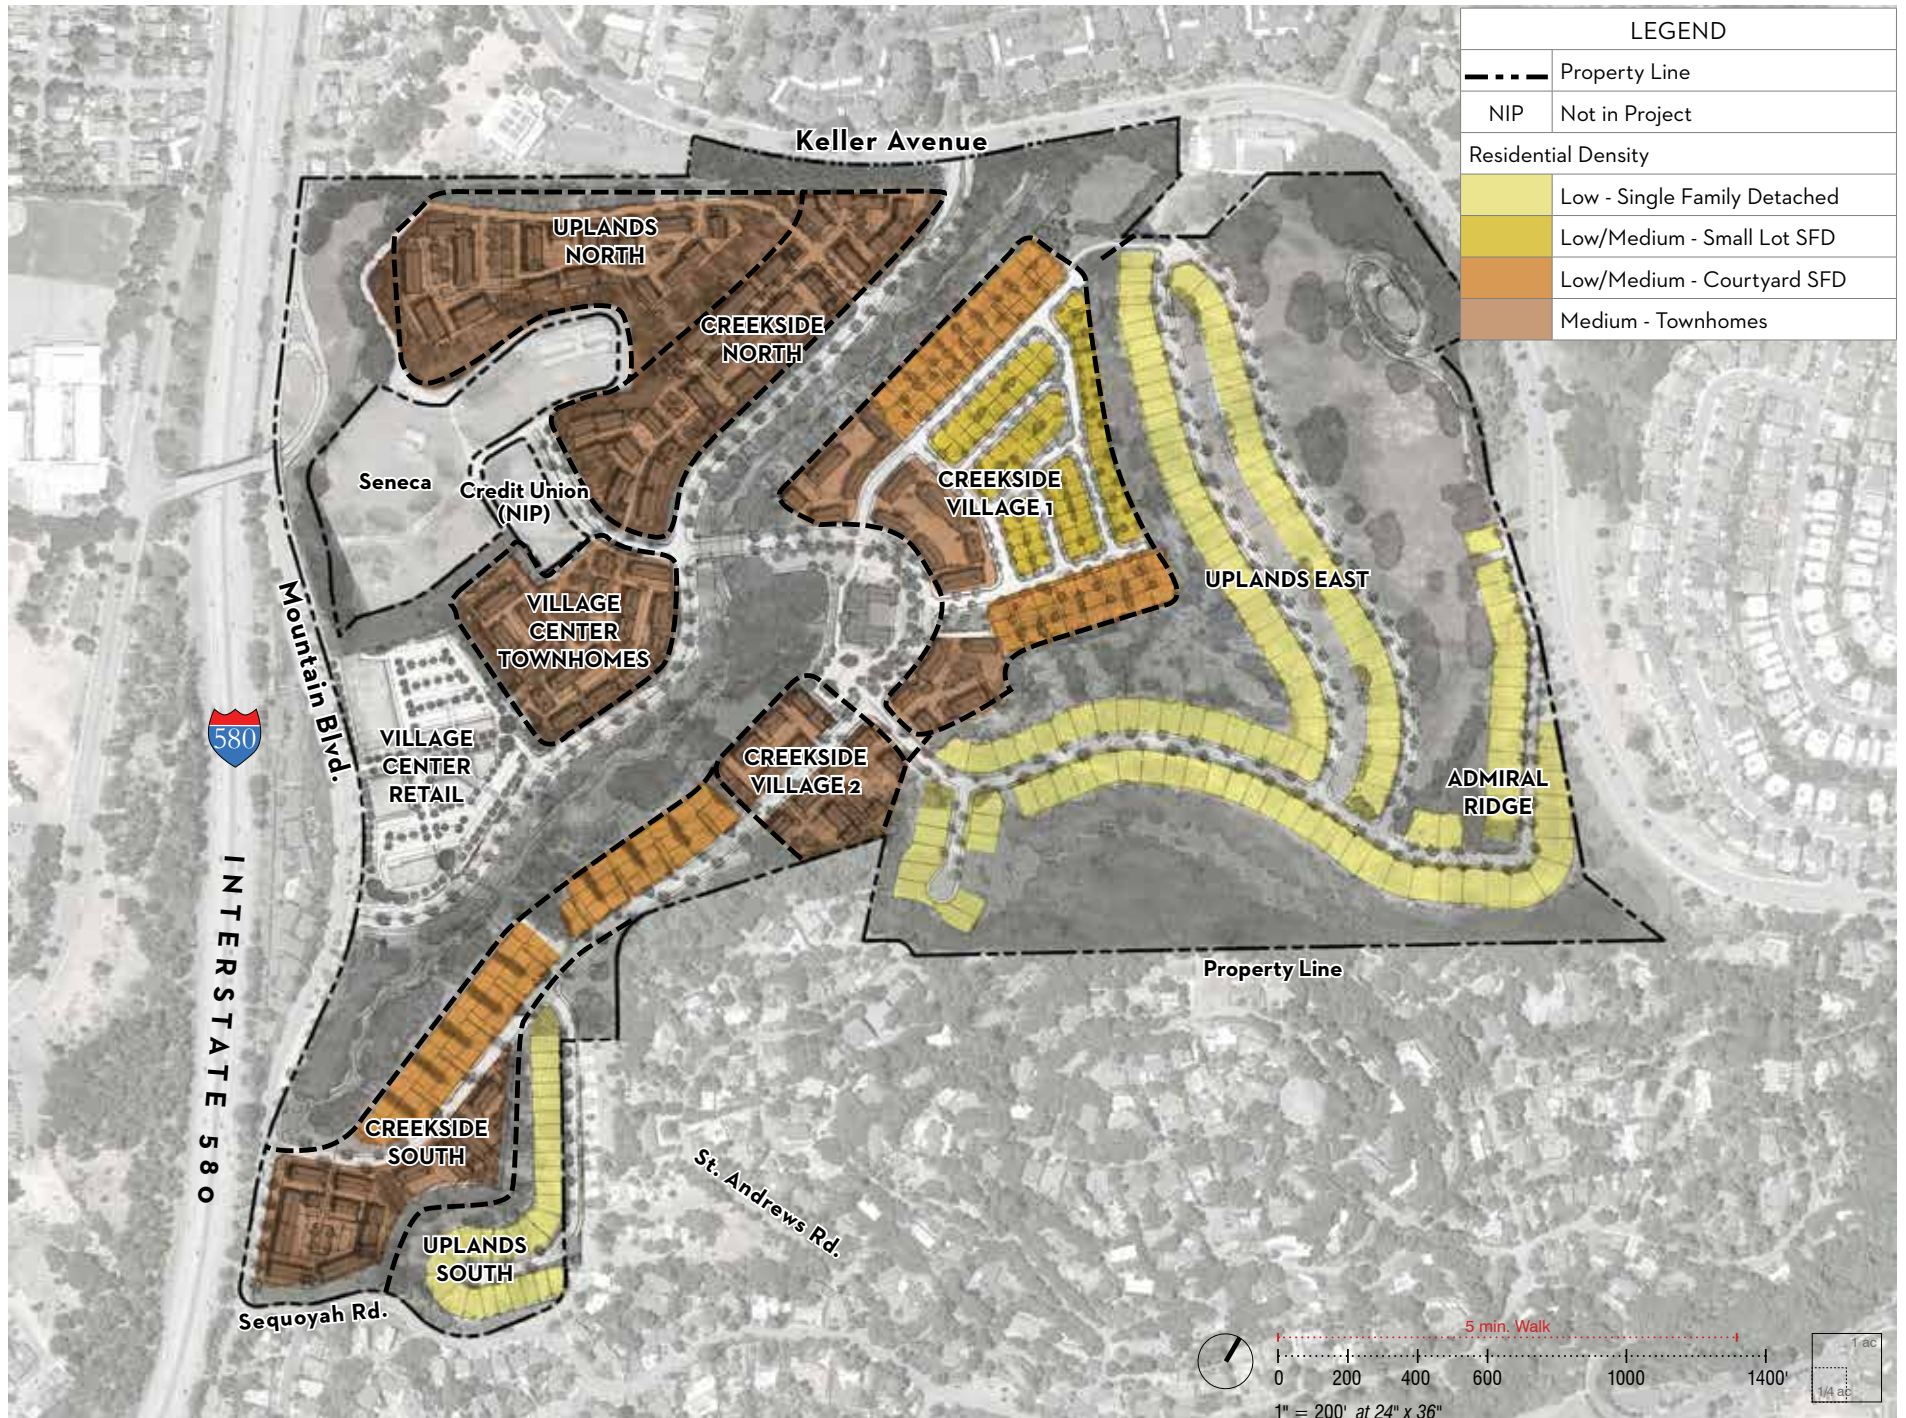

Figure 10 - Residential Neighborhoods

RESIDENTIAL NEIGHBORHOODS

To provide a diverse range of housing and residential opportunities for new residents there are three general housing types proposed at Oak Knoll; townhome, small lot single family detached (SFD) homes, and more conventional SFD homes. The three housing types are briefly described below. See Design Guidelines for additional information on building type, arrangement, massing, character and other features. For development standards that apply to these housing types, the Oak Knoll District Zoning should be consulted.

Townhomes may be two or three stories. Townhomes should be organized in attached buildings of no more than 10 units. Townhome units will range from 1600 to 2400 square feet and each have garage space for two vehicles accessible from an alley or internal driveway. The front of the townhome units may face an internal driveway, paseo, or edge of parcel condition which may include open space or neighborhood street. Each townhome neighborhood has shared group open space and guest parking. Townhome neighborhoods are within the D-OK-3 Sub-zone of the Oak Knoll (OK) Zoning District (see Figure 4).

Small Lot Single Family Detached Homes are organized into coherent small scaled neighborhoods similar to those found in the lowland areas of Oakland and Berkeley. Lot sizes range between 2000 and 3500 square feet. These small homes are 2 or 3 stories. Floorplans range from 1600 to 2400 square feet and each unit has garage space for two vehicles accessible from the neighborhood street or a courtyard drive. The courtyard homes are arranged in clusters of 4 or 6 homes which share a “driveway” which is not a public street. Small lot neighborhoods are within the D-OK-2 Sub-zone of the OK Zoning District (see Figure 4).

Single Family Detached Homes are found in the eastern and southwestern uplands of the project site. Lot sizes range from 3750 to over 6000 square feet. These homes will not exceed 2 stories. Floorplans range from 2200 to 3500 square feet and each unit has garage space for two vehicles accessible from the neighborhood street. SFD neighborhoods are within the D-OK-1 Sub-zone of the OK Zoning District (see Figure 4).

For information on residential development standards see the proposed Oak Knoll District Zone Regulations.

These housing types are organized into distinct neighborhoods each representing a different character, response to topographic conditions, density, and mixture of housing types. The location of distinct neighborhoods and their associated densities are shown in Figure 10. Artist’s renderings showing the character of neighborhood areas are shown in Figure 11 and Figure 12.

Creekside Village Neighborhoods

The Creekside Village neighborhoods lie south of the restored Rifle Range Creek corridor on flatter areas of the site. The Community Center/Club Knoll building lies at the center of these neighborhoods and provides nearby community facilities. A vehicular bridge and pedestrian bridge connect these neighborhoods to the Village Center retail area and multi-use path along Creekside Parkway. Creekside Village neighborhoods have narrower street widths and smaller block patterns that reinforce the smaller lots single family homes and townhome character. A neighborhood park that includes active and passive uses lies just north of the Creekside 1 neighborhood. Creekside Village neighborhoods include:

- Creekside Village 1 (Townhomes, Small Lot and Courtyard SFD homes)
- Creekside Village 2 (Townhomes)
- Creekside South (Townhomes and Courtyard SFD homes)

Townhome Neighborhoods North of the Creek

These townhome neighborhoods all lie northwest of Rifle Range Creek. The townhomes are organized into coherent neighborhoods of 90 to 120 units on stepped terraces leading away from the creek. The graded terraces are remnants of building pads occupied by Navy buildings. Terraces will be separated by vegetation including mitigation oak trees. These neighborhoods include:

- Upland North
- Creekside North
- Village Center Townhomes

Small Lot SFD Neighborhood

Small Lot SFD Streetscape

Courtyard SFD Entry

Small Lot SFD Streetscape

Courtyard Homes
along Creek

Figure 11 - Illustrative Renderings Depicting Small Lot Neighborhood Character

Uplands Single Family Detached Neighborhoods

On the uplands east of Rifle Range Creek lie SFD neighborhoods. These neighborhoods support larger lots and homes often with dramatic views to the southwest and northwest. Upland areas closer to the high point of the site known as Admiral's Ridge (see Figure 10) have several hillside sloped lots which have finished graded slopes greater than 20%. Development standards for sloped lots over 20% are in the Oak Knoll District Zoning. Additional measures may be adopted for homes on Admiral's Ridge, which are visible from public viewpoints to the west. As shown in Figure 10 Upland Single Family neighborhoods include:

- Uplands East
- Uplands South
- Admiral's Ridge

Upland Frontyard Treatments

Upland Streetscape

Upland SFD Homes

Figure 12 - Illustrative Rendering Depicting Upland Neighborhood

Admiral's Ridge Focus Area

The Admirals Ridge focus area includes 18 single family lots on the eastern edge of the project flanking Keller Avenue. Due to the increased visibility of the 13 lots west of the project street, special height standards will be applied to two lot conditions; "terraced" lots and "sloped" lots. The third lot condition, on the east side of the road, does not have the same visibility issue as the lots on the west side of the street. The location of the Admiral Ridge focus area and three lot conditions are shown in Figure 13. Refer to Figure 15 for a section view showing the height limitations for each lot type. Figure 14 provides an artist's illustration of the height restrictions that apply to the terraced and sloped lot conditions.

KEY LOT TYPE

Terraced Lots. These lots have terraced building pads to better integrate homes into the hillside topography.

Sloped Lots. These lots are located in the steeper visible area to the north. The majority of the area within each lot's buildable envelope is sloped.

Padded Lots. These lots are padded to allow for a full flat building site and are not located in the highly visible areas west of the road.

Figure 13 - Admiral's Ridge Focus Area and Lot Type Locations

Figure 14 - Artist's Concept of Sloped and Terraced Lots

Figure 15 - Admiral's Ridge Section and Building Heights by Lot Type

OPEN SPACE, PARKS, AND TRAILS

A major defining feature of the Oak Knoll Plan is the extensive open space network. Approximately 85 acres of permanent open space is planned within the community. Open space areas include more sensitive areas of the site such as the Rifle Range Creek corridor, visible high points, and the wooded Hardenstine property. Also included are areas for active and passive parks, wildlife habitat, and visual slope buffers providing separation between neighborhoods. Trails and complete streets provide connections between open space and neighborhoods. Smaller neighborhood parks are provided in the public realm and group open space is planned within in-tract townhome parcels. The open space and park areas are separated in four categories and the acreages are summarized in Table 3. Figure 16 shows the extent of open space and park areas proposed within Oak Knoll.

The parks and open space types are summarized in the next sections. Hiking trails are addressed more fully in the Project Circulation section. For more information on the overall site landscape concept within open space and park areas and landscape treatments within neighborhoods and private lots see the Design Guidelines.

TABLE 3 OPEN SPACE AND PARKS	
Type	Acreage
Public Parks	7.6
Undisturbed Open Space	39.0
Revegetated Slope Banks	20.3
Restored Creek Corridor	17.8
Total	84.7

7	Detention Basin
8	Potential Public Art Location

Figure 18 - Creekside Park Concept

Public Parks (7.6 acres)

Active parks include four publicly accessible neighborhood parks and private parks within the Townhome neighborhoods Village Center. Public park locations are shown in Figure 17 and 18 with concept diagrams showing potential uses and activities within the parks. Park uses are further detailed in the proposed Oak Knoll zoning districts. Potential park uses and activities are summarized below:

Publicly Accessible Neighborhood Parks

Creekside Park

- Picnic and seating areas
- Trail connections along Creek
- Potential public art location
- Stormwater control

North Neighborhood Park

- Informal play field
- Picnic and seating areas
- Playground/Tot lot
- Dog play area
- Trailhead connections
- Stormwater control
- Potential public art location

Village Pocket Park

- Shaded seating areas
- Potential public art location

Oak Knoll Memorial Park

- Seating, view and picnic area
- Potential public art location
- Trailhead connections

Figure 19 - Illustrative Rendering of Village Center Plaza

Club Knoll Community Center (2.8 acres)

The relocated and renovated club knoll building sits on a 2.8 acre site (see Figure 9) providing publically accessible areas including:

- Seating areas
- Outdoor courtyard space for public and private events and gatherings
- Potential public art locations
- Walking paths/trailhead connections
- Stormwater management

Townhome Recreation Facilities

Townhome neighborhoods will provide recreation and open space areas for the use of townhome residents. Open space requirements per OPC require 170 square feet of group open space per unit or 70 square feet of private open space such as a porch or balcony (to a maximum of 50% of required group open space). Recreation areas and uses will be identified in the FDP submittals of townhome areas. Recreation and open space areas within townhome neighborhoods are not included in Table 3. Recreational activities and uses may include:

- Seating and picnic area
- Children plays area
- Paseos providing landscape areas for internal walkways
- Green space buffering adjacent development
- Recreation facilities such as a clubhouse or swimming pool
- Balconies, patios, or decks (private open space)
- Stormwater management

Village Center Plaza

Additional park and open space area will be provided within the Village Center. The Village Center will include spaces such as the village plaza which will include shade trees, both hardscape and softscape, benches, and other improvements. Figure 19 provides an illustrative rendering of the proposed Village Center plaza. The Village Center plaza area is not included in Table 3.

Uses and activities may include:

- Plaza which will serve public gathering and programmed events such as farmer's market, art fairs, etc.
- Informal seating and gathering in both Plaza and retail street
- Hardscape and softscape areas
- Shade and ornamental planting
- Potential public art location(s)
- Stormwater management

Undisturbed Open Space (39.0 acres)

The largely undisturbed areas of the site include the "Oak Knoll" area, the Hardenstine Parcel, and areas on the northwest and southeast borders of the site. Some parts of these open space areas are suitable for tree mitigation as described in the Tree Preservation and Removal Permit Application. Consult the Design Guidelines for more information on the tree mitigation planting. Publicly accessible activities and uses within this area may include:

- Passive recreation
- Hiking trails
- Wildlife habitat
- Stormwater management

Revegetated Slopes (20.3 acres)

Graded slopes between neighborhoods address grade changes, enhance both on-site and off-site views, provide neighborhood separation and opportunities for significant new vegetation. All of the revegetated slopes will receive landscape treatment including significant tree mitigation planting. These areas will not be publicly accessible and uses include:

- Visual buffer
- Wildlife habitat
- Stormwater management/erosion control

Existing Conditions

Proposed Conditions

LEGEND
--- CREEK CHANNEL
--- DEVELOPMENT BOUNDARY

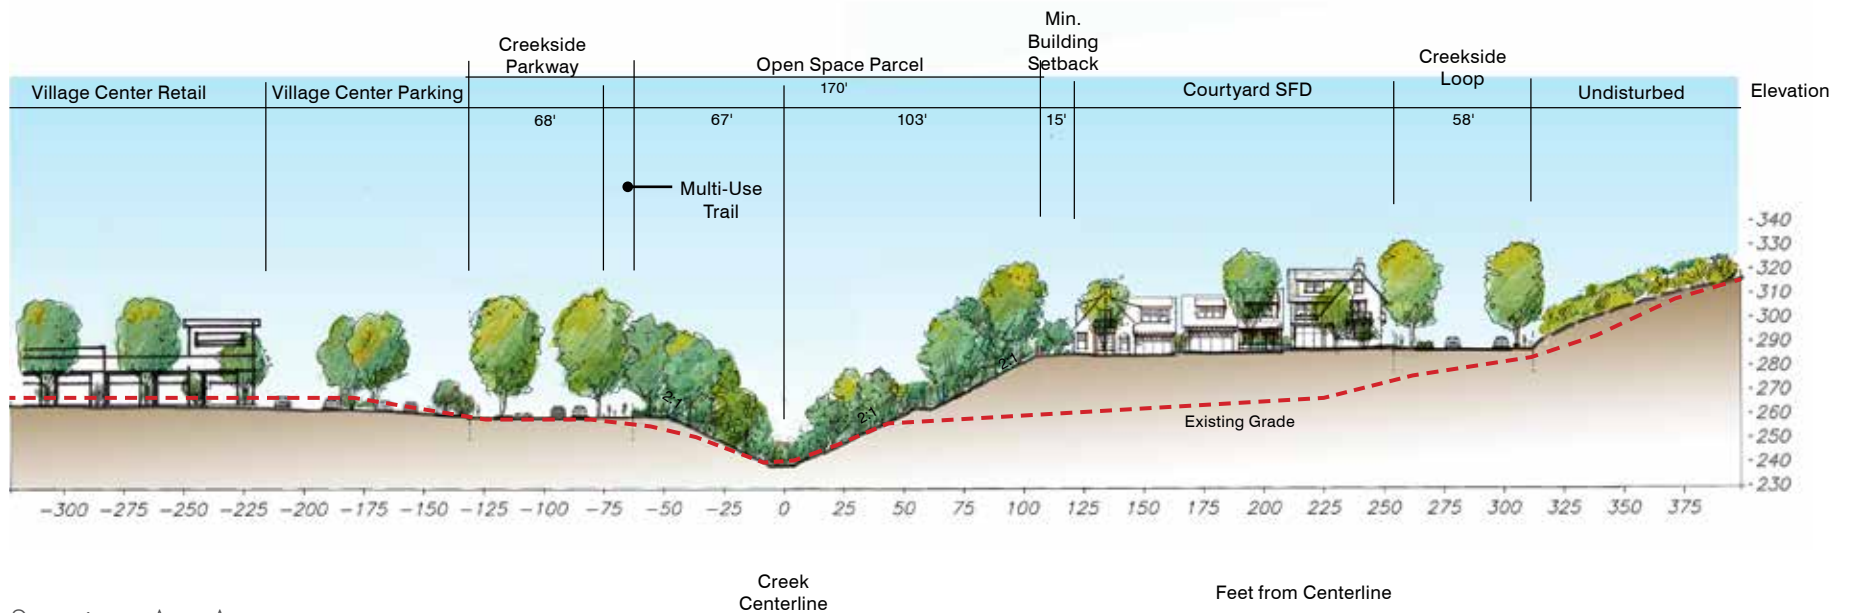

Figure 20 - Existing Rifle Range Creek Corridor and Proposed Restoration Area

Section Key

Restored Creek Corridor (17.8 acres)

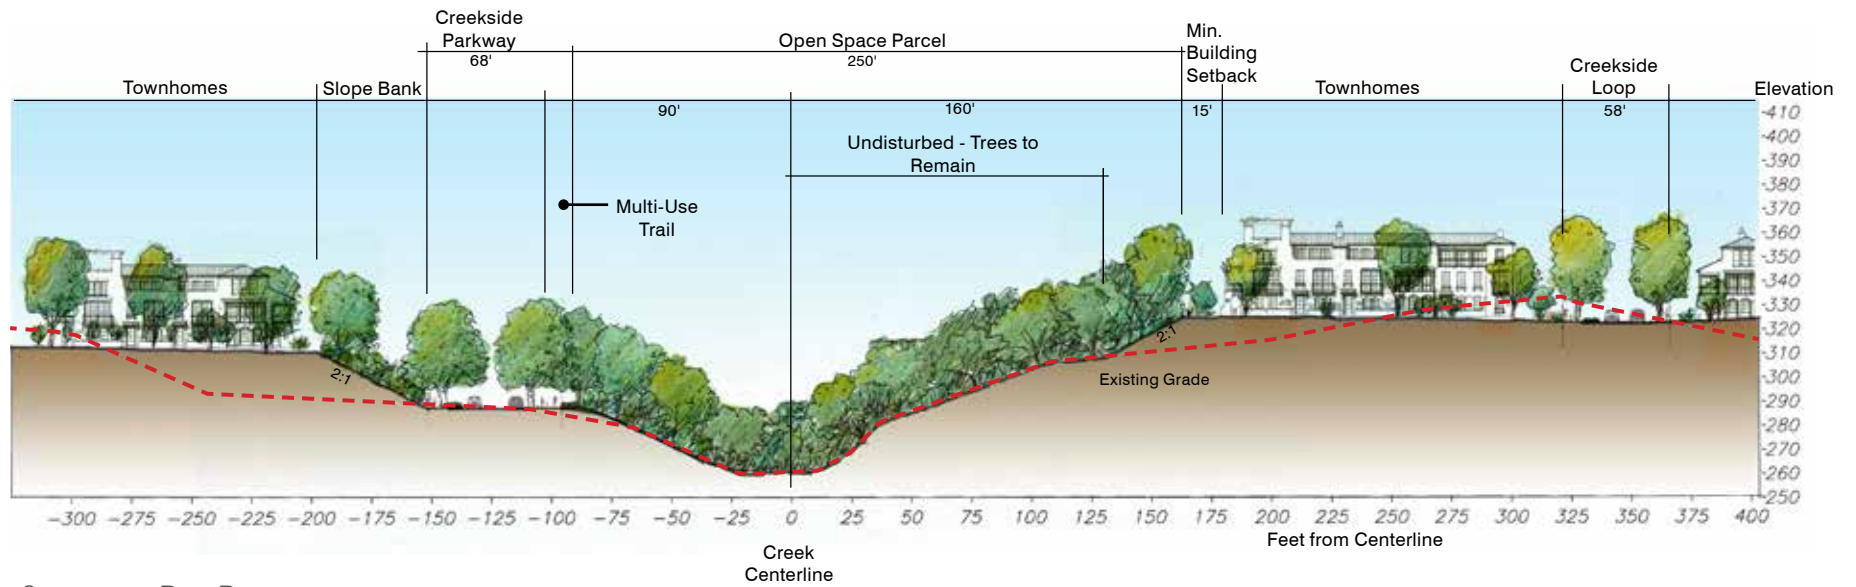

Two major defining open space features on the site are the existing creek environment and riparian area associated with Rifle Range Creek. Currently, the northern portion of this creek lies within a pipe under abandoned parking areas and roads. The southern portion includes open creekbed and riparian vegetation. This area of the creek is deeply eroded with an incised creekbed and unstable banks. Figure 20 shows the existing extend of the creek and the extent of the planned creek restoration area.

The creek will be daylighted, remedially graded, and restored for its length to include new creek bottom lands, riparian oak woodlands, other native species and public trail access. A shared multi-use trail runs parallel to the corridor on the north east side within the Creekside Parkway right-of-way (ROW). At the center of the restoration area beyond the eastern “top of bank” lies the community center/clubhouse. Shown in Figures 21 and 22 are

Section A - A

Figure 21 - Creek Section A

Section B - B

Section C - C

Figure 22 - Creek Sections B and C

proposed sections through the restored creek at three locations. The Creek Protection Permit Application should be consulted for detailed information on the proposed Creek restoration. Publicly accessible activities and uses in the restored creek area may include:

- Hiking/biking trails
- Wildlife habitat
- Possible public art locations along trails
- Stormwater treatment

Private Open Space in Single Family Neighborhoods

Open space is required within private residential lots either as private or group open space (see OPC, Section 17.126). These areas are not included in the public open space acreage summaries given in Table 3. Private open space is planned to be associated with each residential unit satisfying the requirement and providing both private and semi-private outdoor areas for each homeowner.

See proposed Oak Knoll District Zoning and Design Guidelines for more information on open space within private parcels.

CIRCULATION AND COMPLETE STREETS

Complete Streets are integral component of the Project. Complete Streets provide safe, convenient and comfortable travel and access for users of all ages and abilities regardless of their mode of transportation. Complete streets are designed, implemented and operated to also provide health benefits and improve economic and environmental outcomes within communities. Complete streets make it easier to access transit, bicycle to work or shopping, walk with children to parks and schools, and allow motorists to move safely and conveniently to their destination. A complete street also combines trees and landscape for shade, to modulate reflection, create wildlife habitat, and to treat stormwater. Complete streets are also beautiful streets. Complete streets shall meet all fire and accessibility requirements.

Complete Street Design

Complete streets integrate standard elements and additional components that are designed on a case-by-case basis depending on local conditions. Local conditions may include the land use the street serves, level of motorist traffic, pedestrian and bike usage, slope and curvature of street corridors, existing vegetation, and stormwater control requirements.

Standard elements include:

- Standard lane and sidewalk widths
- Accessible features including curb ramps and markings at crosswalks
- Street trees
- Pedestrian and bike accommodations
- Stormwater control (where feasible)

Additional components may include:

- Street parking accommodations appropriate to the location and demand
- Pedestrian signalization
- Corner curb extensions and bulb-outs

- Traffic calming devices such as a chicane
- Accommodations for transit
- Sidewalk planters/tree grates
- Special paving or materials
- Site furnishings, lighting, and signage
- Special connections to trails, parks, or other uses

Streetscape Context at Oak Knoll

Oak Knoll streets will be situated in a suburban setting in rolling to hilly terrain. The streets will serve a variety of users and land uses including neighborhoods of varying residential density, commercial and community hubs, and park and open space areas. Collector streets will serve vehicular traffic commuting on and off-site (there will be limited jobs and no schools at Oak Knoll), pedestrians and bikes accessing transit connections, and people moving between neighborhoods to shopping and parks. Neighborhood streets will serve the neighborhoods proper with little through-vehicular traffic. Additionally, smaller neighborhood streets will serve vehicular traffic and provide a “front yard” for people and children to walk and play in a shaded safe area.

Complete Street Strategies at Oak Knoll

Strategies implemented in the Project street designs include:

- Emergency and fire access should be paramount in street design and connectivity
- Vehicular lane widths should be narrow to control traffic speeds, conserve land, and free up space for other uses within the street corridor
- All streets should have pedestrian accommodations that connect to the internal open space and trails system and to off-site trails and transit connections
- The commercial village primary street should be urban in character, provide direct access to shops and plazas, accommodate short term parking, and be amenitized to be comfortable and inviting to pedestrians

- A major Class I bikeway should connect the main site gateways at Mountain Boulevard and Keller Avenue
- Street trees should be a major component of all streetscapes
- Street ROW stormwater should be detained within the ROW in landscaped infiltration basins. Where longitudinal slopes are too steep to allow for treatment in the ROW, centralized neighborhood basins should be utilized.

Typical Lane Widths

Proposed collector streets in Oak Knoll will employ a travel lane width of 11' consistent with the Urban Street Design Guide, National Association of City Transportation Officials, NY, NY, 2013. The 11' lane width provides adequate width for anticipated vehicular design speeds and provides traffic calming to encourage safety for pedestrian and bicyclists. Minor streets such as neighborhood streets and alleys may have a 10' travel lane width with no street parking.

Stormwater Detention

Stormwater falling within the street ROW will be detained locally in infiltration basins integrated into the street profile where possible. Infiltration basins are located at intervals in “bulb-outs” along the travel lanes within the street parking lanes. Stormwater from street pavements and sidewalks will flow into the infiltration basins and infiltrate into the soil. The bulb-outs also act as traffic calming devices and add greenscape to the street corridor. Additional information on the location and design of infiltration basins is presented in the Design Guidelines. Where segmented infiltration basins are not possible in the streets due to street grade or narrow lots requiring curb cuts and area for on-street parking, more localized infiltration basins will be utilized.

Additional information on street alignments, intersections, project grading, and stormwater details are contained in the Vesting Tentative Map.

PROPOSED PROJECT CIRCULATION

The Oak Knoll site will be served by a multi-modal circulation system using the Complete Street network. In addition, there will be walking and bike trails independent of the Complete Street network integrated into open space areas and connected to the street network. The proposed project circulation is shown in Figure 20.

OAK KNOLL COMPLETE STREETS

Project circulation is based on two types of streets:

- Collectors providing site access and connectivity to Project neighborhood and community amenities, and
- Local neighborhood streets connecting residential areas internally and externally.

All project sidewalks and parkways (tree planters) are five to six foot in width. All public streets include street trees on both sides of the street. Figure 23 should be referenced for the proposed street circulation network. Public street types are discussed below with typical sections shown in Figures 24, 25, 26, and 27:

Public Collector Street (Figure 24)

A: Creekside Parkway is the major project thoroughfare that connects the project gateways, Mountain Boulevard to Keller Avenue. It also connects to the Village commercial center and internal project and neighborhood streets. This street will have a dedicated shared trail for bikes (Class I) and pedestrians that runs parallel to the preserved Creek Corridor. There is on-street parking integrated between the bioretention basins on both sides of the street. There will not be residential driveway access or cuts on Creekside Parkway.

Local Neighborhood Streets (Figures 24, 25, 26 and 27)

B: Creekside Loop is a local street that runs roughly parallel to Creekside Parkway on the eastern side of the creek corridor. This street provides

a second project entrance from Mountain Boulevard and connects to all neighborhoods east of the Creek and the community center/clubhouse. There is on-street parking integrated between bioretention basins on one side of the street. There will be no driveway cuts on Creekside Parkway (private drive courts will connect to Creekside Loop).

C1: Creekside Village Primary is a local street serving the small lot single family homes and courtyard homes neighborhoods east of the creek. There is on-street parking integrated on one side of the street.

C2: Creekside Village Secondary is a smaller local street serving the small lot single family homes east of the creek. There is no on-street parking on this street.

D1: Uplands Primary This local street serves the eastern areas of the site and includes bioretention basins and on-street parking on both sides of the street. In areas that are too steep for bioretention basins localized retention basins are reserved within the ROW but outside of street pavements and sidewalk area.

D2: Uplands Secondary This local street serves the single loaded single family lots in upland areas of the site and includes on-street parking on one side of the street, adjacent to the home lots. The street roadbed is “super-elevated” towards the inboard, upland area of the site where stormwater from the ROW follows into a bio-retention swale that runs parallel to the street.

E: Uplands North This local street connects the Townhome Neighborhoods north of the Creek and also provides secondary access to the Seneca property.

Private Neighborhood Streets

Additional “private streets” provide access within smaller neighborhood clusters and townhome areas. These include driveways, alleys and drive courts. All private streets will meet fire accessibility standards where applicable. These private streets are described in the Landscape Design Guidelines.

Figure 27 - Local Neighborhood Streets

PEDESTRIAN, BIKE, AND TRANSIT CIRCULATION

On-Site Pedestrian and Bike Circulation

A significant feature of the site is a system of walking trails and bike ways connecting neighborhoods and open space areas within the site and also existing and future trails/bike ways that lie outside the site. Figure 28 shows proposed on-site trails and bike ways and connections to off-site trails, bike paths, and transit connections. Proposed trails on-site include:

- Hiking trails through open space areas and parks
- Hiking trails through the restored creek corridor
- Shared-use trail paralleling the creek corridor along Creekside Parkway
- Neighborhood paths that use a combination of sidewalks and paths through local parks and open space areas.

Proposed on-site bike paths serve neighborhoods, connections to the Village Center, and connections to off-site trails, bike paths, and transit connections. Proposed bike paths on-site include:

- Class I bike path occupying the shared multi-use path along Creekside Parkway
- Class III bike way integrated within Creekside Loop
- Low traffic volume neighborhood streets, which have been traffic-calmed with Complete Street strategies, do not require formal bike way designations.

Off-Site Pedestrian, Bike, and Transit Circulation/Connections

The Oak Knoll site will be served by existing and proposed off-site multi-modal transportation options including vehicular, pedestrian, bike, and transit. Critical to developing a multi-modal transportation concept are connections to off-site transportation facilities that exist today and those that are proposed in the future. Connectivity to adjacent neighborhoods include vehicular, bike paths, sidewalks, and hiking trails. Off-site connections, both existing and planned, are shown in Figure 28.

Figure 28 - Transit, Bike and Pedestrian Trails/Connections

Existing and proposed off-site trail and pedestrian connections include:

- Cross-walk at Creekside Parkway and Keller Avenue to connect the on-site shared-use trail and the Leona Canyon Regional Open Space trails. This connection requires walkers to use the sidewalk on the north side of Keller Avenue and cyclists to use the Keller roadway. A future Class III bikeway is planned for Keller Avenue.
- Trail/walking connections across and along Mountain Boulevard ultimately connecting to Knowland Park in the southern direction
- The connection of the northern on-site walking trail along the projects northern boundary with the vehicular bridge crossing both Mountain Boulevard and I-580 and connecting with Fontaine Street. This gives pedestrians a safe and clear connection to neighborhoods west of the site with Oak Knoll and Keller Avenue.
- Off-site pedestrian connections utilizing the planned project EVA at Barcelona Street
- An easterly connection from the Upland portion of the project with Keller Avenue east of Oak Knoll.

Off-site bike ways include a connection to the existing Class III bike way along Mountain Boulevard. Off-site project improvements include creating a Class II bike way along Mountain Boulevard for a portion of the project frontage.

Existing Alameda County (AC) transit serves the project site. Two local AC Transit bus lines run on Mountain Boulevard directly in front of the site. The 46 and 46L run east west from the Oakland Zoo to the Coliseum BART station. There is a bus stop at the project’s current entry and it would be anticipated that this stop would continue at the new project entry at Creekside Parkway. There is no direct transit connection from the site to downtown Oakland. However, an express bus (NX4) that originates in Castro Valley connects to the Transbay Terminal in San Francisco. An NX4 stops lies about a 10 minute walk north of the site along Mountain Boulevard.

PARKING

The anticipated parking program for the site is summarized in Table 4. The parking meets off-street parking and loading requirements stated in Section 17.116 of the Oakland Planning Code.

Parking Type	Spaces
On-Street	500
Off-Street Village Commercial/ Community Center	400
Off-Street Residential (includes garages and townhome guest parking)	2,500
Off-Street Trailhead/Park	6
Total (approximate)	3,406

SITE GRADING AND UTILITIES

Site Grading

Corrective (remedial) grading will be required prior to any new development to accommodate past naval activities and facilities which often lie on poor soils. Corrective grading is required for most developed areas which consist of unconsolidated (poorly compacted) soils which will need to be excavated and re-compacted. The majority of Rifle Range Creek will need to be over-excavated, reconstructed with the installation of new keyways to create slope stability. To meet the City of Oakland's street design standards grading will be required to support safe street design in some upland residential areas. Graded areas will be contoured and planted primarily with native oak trees so that in time they appear natural and well vegetated. The VTM and Final Development Plan (FDP) as well as the Final Grading Permit should be consulted for information on proposed site grading.

The site may be graded in phases, largely coinciding with the project construction phases presented in the next section. Phase 1 may include a "borrow" area from Phase 2 to provide additional fill material to create a balance of cut and fill in Phase 1. Over all three phases the project is anticipated to balance cut and fill.

Utilities

Proposed project infrastructure and utilities are addressed in the FDP as well as the Final P-job Permit. Stormwater management within the public ROW was discussed earlier as part of the Complete Street strategy. All stormwater generated within private lots (SFD lots, townhome parcels, and Village Center) will be handled within localized infiltration basins or street swales in the case of some upland streets.

Stormwater

Project stormwater will be detained on-site and released as treated stormwater into the creek corridor and off-site stormwater facilities. As mentioned in the Complete Streets section of this document, street stormwater falling in the ROW will be treated in "rain gardens" or in localized treatment basins (see Design Guidelines). The public parks will also have detention basins within the park boundaries. Stormwater from private parcels, including the Club Knoll parcel, will be treated either in on-site detention areas or in localized detention basins. Reference the project VTTM for more details on the storm water system.

All detention basins visible from project streets, neighborhoods, and parks will be graded to soften the geometric shape of the basins and be screened with trees and shrubs. Localized basins will also be fenced for security. The basins and fencing will be screened with shrubs and groundcover. See Figures 29 and 30 for typical detention basin planting treatments.

PUBLIC ARTS PROGRAM

The City ordinance requiring public art will apply to the Oak Knoll project. Funds for public art are derived based on building development costs declared on building permit applications and may be exercised in two ways. The developer can acquire and install publicly accessible works of art on the development site, or the developer can make an in-lieu contribution to the City of Oakland Public Art Project Account for the acquisition and placement of public art throughout the city.

OKVA plans to engage artists during the design phase of development. OKVA and project designers will work in a collaborative manner to ensure that the artist-provided engineering and/or design essentials are embedded in the development construction documents. Furthermore, in an effort to maximize the art budget, OKVA will be seeking site contractor bids that include any public art infrastructure requirements.

Following approval of the PDP, a project art master plan will be developed and submitted to the City of Oakland's public art advisory committee.

TYPICAL DETENTION BASIN SHOWING SOFTENED GRADES AND SCREEN PLANTING TO REDUCE VISUAL IMPACTS

- BASIN BOTTOM PLANTED WITH WATER TOLERANT NATIVE GRASS PLUGS
- 3:1 BASIN SLOPE PLANTED WITH WATER TOLERANT TREES AND SHRUBS SUCH AS JUNCUS AND BIG-LEAF MAPLE
- DENSE NATIVE STRUBS AND GROUNDCOVER FOR BASIN SCREENING IN FRONT OF FENCE
- SECURITY FENCE LINE; WOOD POST WITH METAL FABRIC MESH

Figure 29 - Typical Detention Basin Plan

Figure 30 - Typical Detention Basin Section

PROJECT ARCHITECTURE AND LANDSCAPE

The character of the Oak Knoll community, as defined by building architecture and landscape, is presented in the Design Guidelines which are a companion document to this PDP.

FDP SUBMITTALS SCHEDULE

Master Developer Project Improvements FDP

A Final Development Plan (FDP) has submitted by the Master Developer in conjunction with this PDP to describe the project land development and amenities associated the master community development. These improvements allow the necessary infrastructure and access for home builder parcels. Improvements in this Master Developer FDP package include:

- Streets, street lighting and streetscape plantings for Creekside Parkway, Creekside Loop, and local street extensions
- Site grading, retaining walls, including side yard retaining walls
- Master utilities including sewer, water, storm drainage and franchise utilities
- Rifle Range Creek restoration
- Public parks, open space planting, and trails
- Monumentation and signs
- Slope erosion control/planting
- Club Knoll relocation and rehabilitation

Club Knoll Relocation and Rehabilitation FDP

A FDP has submitted by Master Developer for the Relocation and Rehabilitation of Club Knoll.

Home Builder and Village Center FDPs

Individual FDPs will be submitted by home builders for each of the townhome and single family detached neighborhoods. Additionally, an FDP will be

submitted by the developer of the the Village Center commercial area. The submittal of home builder FDPs are anticipated to follow the sequence of master site development. However, the submittal of home builder FDPs are subject to market conditions so the timing and rate of submittals may vary.

It is anticipated that the home builders will be submitting their FDP in conjunction with building permit submissions. More than one FDP may be submitted for individual residential neighborhoods. It is possible that multiple FDPs will be submitted by homebuilders including a subsequent phase of development that may also be underway at the same time.

FDP'S REQUESTING EXCEPTIONS

The City of Oakland's current entitlement and approval process for new development will adequately address any future developer that seeks exceptions to the approved Oak Knoll Preliminary Development Plan (PDP) and/or the Proposed Oak Knoll District zoning ordinance. The approved plans and code provides the necessary guidance for the City to review and assess the conformance of future developer Final Development Plans with the approved PDP, as required by the PUD permit. Minor changes to an approved PDP or FDP may be approved administratively by the Planning Director.

Where a future developer seeks an exception, either the City determines the exception is substantially in compliance with the approved PDP or zoning code; or the major changes would require the developer to amend the PDP and potentially amend the zoning ordinance, or seek a zoning variance, respectively. Such amendments require discretionary action required by the Planning Commission, and in the event of an amendment to the zoning ordinance, by the City Council.

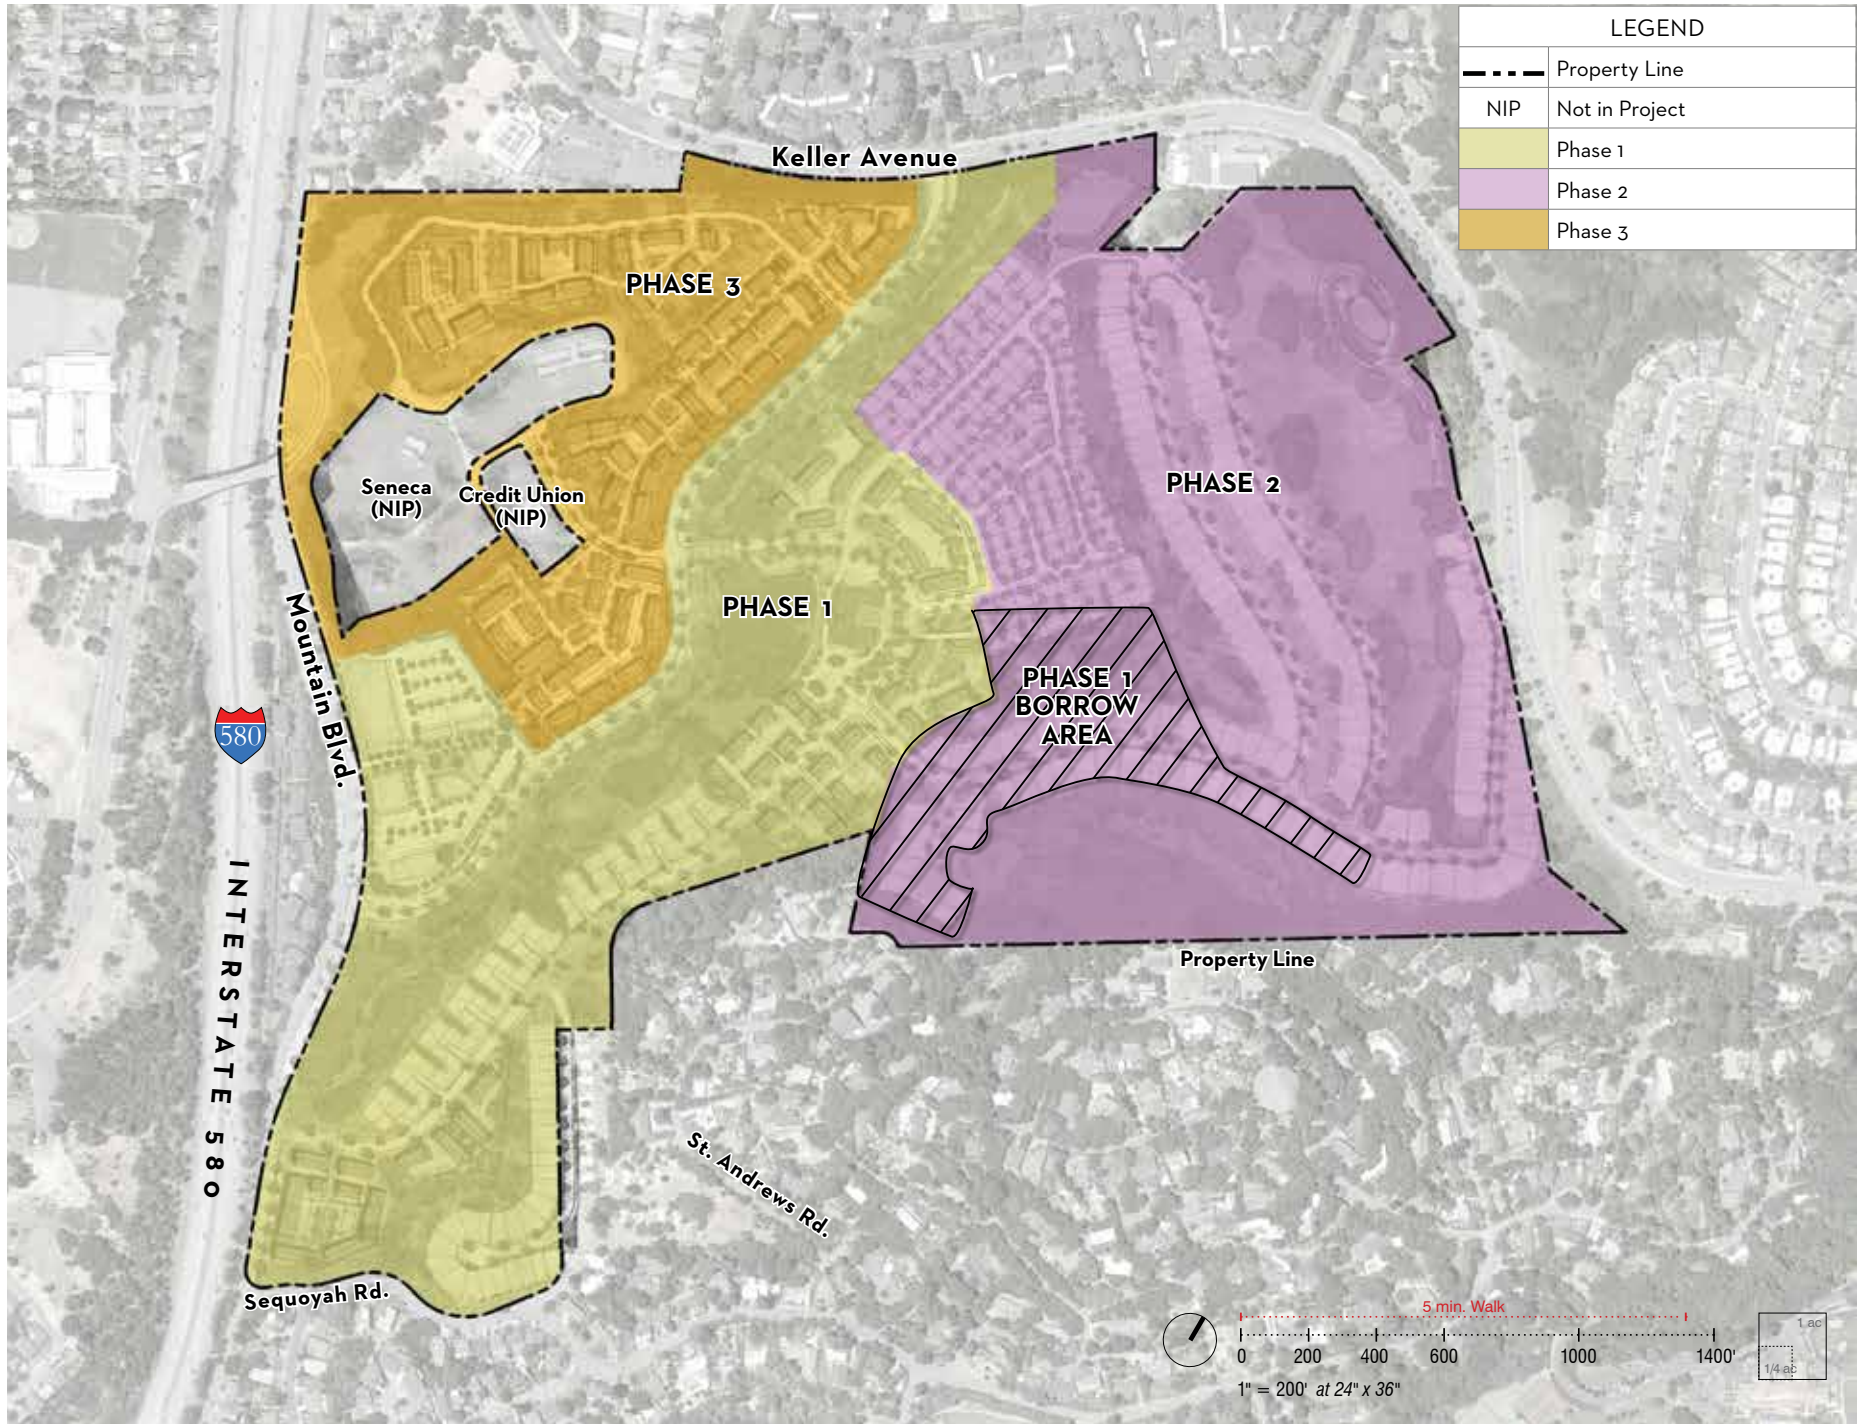

Figure 31 - Project Phasing

PROJECT DEVELOPMENT PHASING

Refer to Figure 31 for the anticipated construction phasing. The phasing plan accommodates earthwork balance activities, logical extensions of streets and utility services, circulation and access considerations, project open space amenities, and the anticipated market timing of the home builder activity.

Within the project phases the master developer and home builder activities are anticipated to include the following. Neighborhood areas identified below can be found in Figure 10.

Phase 1 is anticipated to include the following:

- Phase 1 site grading and utilities including soil material borrow area located in Phase 2
- Master Developer Project Improvements listed on page 42 to provide streets, access and infrastructure to Phase 1 amenities and neighborhoods.
- Rifle Range Creek restoration
- Club Knoll relocation and rehabilitation
- Village Center commercial area
- Parks, open space and trails within Phase 1 areas
- Townhome parcels including Creekside South, Creekside Village 1, Creekside Village
- Single Family Detached neighborhoods including Creekside South and Uplands South parcels

Phase 2 is anticipated to include the following:

- Phase 2 site grading and utilities
- Neighborhood streets serving Creekside and Upland neighborhoods
- Neighborhood park north of Creekside Village 1 neighborhood
- Single Family Detached neighborhoods including Creekside Village 1 small lot homes and Upland East homes
- Parks, open space and trails within Phase 2 areas including Club Knoll Memorial Park (see Figure 32)

Phase 3 is anticipated to include the following:

- Phase 3 site grading and utilities
- Neighborhood streets and access way serving Village Center, Creekside North and Uplands North neighborhoods
- Townhome parcels including Village Center, Creekside North and Uplands North
- Parks, open space and trails within Phase 3

Phasing may be adjusted due to market conditions or other factors that may cause variations in both the sequencing and timing of development.

1.0 INTRODUCTION

View looking east from new bridge over Rifle Range Creek

1.1 COMMUNITY VISION

The Community at Oak Knoll is planned as a walkable system of neighborhoods anchored by a community scale retail village, neighborhood parks, and natural and accessible open space. The neighborhoods are woven together through an extensive system of trails and carefully designed streets. The primary landscape feature around which the land plan is shaped is the restored branch of the Rifle Range Creek and the surrounding upland areas to the north, south and east of the creek.

The local climate at Oak Knoll is characterized by temperate weather and is considered one of California's finest for habitation as well as horticulture. Because of this, the masterplan and residences are organized around the outdoors and integration with the landscape. In addition to the architectural features of the homes that provide links to the outdoors (porches, stoops, verandas, courtyards, decks, etc.), the abundance of trees and plants produces a vibrant natural setting.

Integrated into this landscape and streetscape vision, the residential neighborhoods will have a diverse mix of residential sizes and types and are planned to be executed in a range of architectural styles appropriate to the setting.

Retail Village

Community Open Space and Trails

OAK KNOLL DESIGN GUIDELINES | JULY 2017

Figure 1.1- Illustrative Master Plan

1.2 HOW TO USE THESE GUIDELINES

These Design Guidelines provide design principles to future builder/ applicants. Final Development Plans shall be substantially consistent with the Preliminary Development Plan. The Design Guidelines refine and clarify the direction in the Planned Unit Development and Preliminary Development Plan.

Where the Design Guidelines are silent or vague, the Preliminary Development Plan shall be used for the purposes of interpretation, and/or directly applied as appropriate.

This book is divided into three chapters: Planning, Architecture and Landscape, each of which addresses topics critical to achieving the community vision. The appendices to this book include materials, color, and plant palettes. Final Development Plans will be reviewed for their consistency with the principles and regulations set forth in these three chapters. Below is an outline of the content of each chapter:

PLANNING

The Planning chapter addresses the selection of an appropriate plan type, the placement of the building on the lot, driveway and garage design, and building façade regulations as they relate to general neighborhood planning principles.

ARCHITECTURE

The Architecture chapter introduces the principles of Oak Knoll architecture and how they are applied in the detailed design of a home or building. This includes the massing, roof forms, components, details, and finishes of all vertical improvements.

LANDSCAPE

The Landscape chapter addresses landscape elements within community streetscapes, community open spaces and residential lots. This includes fences and site walls, , planting requirements, plant lists and signage regulations.

Oak Knoll Community

Typical Residential Neighborhood

Hillside Residential

2.0 PLANNING GUIDELINES

OAK KNOLL DESIGN GUIDELINES | JULY 2017

Figure 1.2- Neighborhoods Plan

2.1 OAK KNOLL NEIGHBORHOODS

The site at Oak Knoll features three upland areas surrounding a lowland valley with a creek running through it. The neighborhoods that make up this community are defined as the Retail Village, Creekside Village, and the Uplands areas. See Figure 1.2 Neighborhoods Plan on the facing page.

RETAIL VILLAGE

The Retail Village area is designed as a modestly-sized gathering spot to provide basic needs to the community (such as groceries, restaurants, banking). It is envisioned as a cluster of buildings at varying scales fronting a 'Principal Drive' and a 'Plaza'. It will feature landscape and street furnishings that give it a distinct identity similar to other neighborhood centers in the Oakland hills.

CREEKSIDE VILLAGE

The Creekside Village neighborhoods are medium density residential areas laid out in the lowland areas flanking the restored Rifle Range Creek corridor. These neighborhoods are compact and walkable and feature a framework of parks and open space which connect to the creek. The Creekside Village will offer a range of residential product types from townhomes to single family detached residences as well as the relocated and refurbished Club Knoll at its center. Club Knoll will serve as a 'community center' gathering spot.

THE UPLANDS

Residential development in the Uplands is designed to maximize views as well as provide a pleasing appearance as viewed from adjacent areas. The Uplands neighborhoods offer a range of residential product types from townhomes to single family detached residences. The Uplands connect to the surrounding community via a system of trails and preserved open space.

Retail Village - Main Street and Plaza

Club Knoll- Community Center

2.2 NEIGHBORHOOD STREETSCAPES

The Oak Knoll neighborhood streets are designed to be pedestrian friendly in both function and appearance. A line of street trees flanks either side of the street, with a generous sidewalk. Planting and fences in the front yard zone between the sidewalk and the homes is designed to define an appropriate transition to the semi-private yard and porch zone. Porches will be designed as outdoor rooms and lighted to provide a sense of security to the pedestrian. Please refer to the Landscape Chapter of these Design Guidelines for specific proposed street sections.

Typical Neighborhood Streetscape

Integrated Stormwater Treatment - "Rain Gardens"

Street Trees

Figure 1.3- Circulation Plan

HIGH VISIBILITY FACADES - STREET FACING

All facades which are visible from the street, including setback garages and all sections of side facing façades which are in front of garages must follow High Visibility standards as defined in the Architectural Guidelines of this book.

HIGH VISIBILITY FACADES -OPEN SPACE FACING

The intention for an open space facing home is to present a pleasing appearance towards the open space and to take advantage of views towards the surrounding creek or woodland areas. These facades must follow High Visibility standards as well.

ARCHITECTURAL DIVERSITY AND ‘THE MONOTONY CODE’

The purpose of the Monotony Code is to create variation and hierarchy within the Oak Knoll streetscape, giving the community an appearance of growth over time. This can be done by designing a range of home layouts and sizes that respond to the location of the lot within the overall neighborhood. The Monotony Code will be enforced through the use of a matrix tracking the following:

For each single-family detached lot type, there must be a minimum of three unique floor plan types, with three façade variations each;

- A different porch or stoop type will be considered a façade variation;
- No two detached homes of the same design may be repeated within two adjacent lots on a given Block Face or a facing Block Face;
- Homes on corner lots are encouraged to have architectural features such as wrapped porches, side porches, or bay windows facing the secondary street.
- Both the front as well as side facing facade on corner lots will be considered High Visibility Facades.

The Monotony Code aims to produce neighborhoods that have diverse streetscapes and architectural features like the images on the facing page.

The Monotony Code aims to prevent uniform streetscapes and architecture like the image to the left.

Typical Streetscapes - Creekside Village

Typical Streetscapes - Uplands

Typical Streetscapes - Uplands

2.3 COMMERCIAL

The Retail Village at Oak Knoll will provide public gathering spots and convenience shopping for local residents. It is envisioned as urban in character similar to other local neighborhood commercial corridors (such as sections of Park Boulevard or Lakeshore Avenue) and shall feature retail facades on the Principal Drive. The following guidelines will apply to the Retail Village:

Design Objectives:

- Building placement that reinforces the concept of the Plaza and orients service areas away from the Plaza while keeping them screened from view from Mountain Blvd.
- 70% glazing on facades directly fronting the plaza and 50% glazing on facades fronting pedestrian pathways
- Awnings and trellis overhead canopies to provide outdoor shade and shaded gathering areas
- Sidewalk widths at primary retail facades sufficient to provide tree planting, signage, furnishings, lighting and outdoor seating areas where appropriate to adjacent retail use
- Hardscape and Planting that reinforces the outdoor pedestrian realm, but provides equal access to vehicular traffic

A final design for the retail village will be submitted by a retail developer. Retail signage locations and design shall be reviewed at the Final Development Plan submittal stage, and a Signage Master Plan will be submitted as part of that application.

Retail Village

Retail Facade Treatment Example

RETAIL PLAZA

The Retail Village shall be designed around a centrally-located plaza. The plaza should be located at the intersection of the two primary vehicular circulation paths: one that connects Mountain Blvd and the proposed Creekside Pkwy; and one that circulates vehicles around the perimeter of the site. The plaza should be centrally located to establish the image for the project, and serve as the gathering area flanked on all sides by retail uses.

The Principal Drive section adjacent the plaza should be designed so that it may be closed off to allow for neighborhood activities such as weekend markets and street fairs. The perimeter route will continue to provide vehicular access to the surrounding retail shops and parking.

Buildings directly fronting the plaza shall orient towards the plaza. All other buildings shall orient towards the nearest primary pedestrian path.

ARCHITECTURAL AND LANDSCAPE CHARACTER

The Character of the Retail village should be inspired by the open-air neighborhood shopping districts typical to the Bay Area. These districts are typified by simple facades with ample glazing, clerestory windows, awnings and shade structures. Recommended materials, colors and plant palettes are similar to the residential guidelines and are contained in Appendix A. The photo references on the following two pages show the features showing appropriate character for the retail buildings.

Figure 1.6- Facade Treatments, Architectural Elements,

This example of Retail Village Conceptual Layout is intended to show compliance with the design objectives of a 'Principal Drive' and 'Plaza'. Actual site and building configuration may vary.

Figure 1.5- 'Principal Drive' Conceptual Section

Awnings and Shading Devices

Simple Facades

Lighting and Signage

Trees and plantings informally integrated into public areas

Arcades

2.4 TOWNHOMES

Townhome development at Oak Knoll will be designed to create functional and pedestrian friendly streetscapes. The orientation and layout of buildings should create ‘addresses’ and a sense of place for individual homes. Townhomes will feature required open space as defined in the City of Oakland’s Zoning Ordinance. Final design of towhhome parcels will be submitted to the City of Oakland in a form of a Final Development Plan, and designs will be evaluated using these guidelines.

Design Objectives:

- Create a ‘sense of address’ and a front door for each unit by providing ‘door yards’, gates, and access to public streets and paseos;
- All units should feature covered entry areas either in the form of a stoop or entry porch;
- Variation of design is encouraged, and corner units should be treated differently than middle units;
- End facades should be treated as high visibility and should feature windows, entries where appropriate, and other design features normally on the front facade.
- Odd numbers of units in a row are encouraged;
- Stepping between units is encouraged to provide private balconies and a varied building frontage as viewed from the street.
- Landscape planting should be integrated in with streetscapes and provide screening for parking & alleys. Please refer to the Preliminary Development Plan for example designs for Paseos and Pocket Parks.

‘Door yards’ and orientation of entry onto a street or pedestrian path

Typical Elevation Example

Corner 'End Facades'

Stepped Massing

Balconies and Individualized Unit Designs

Typical Elevation Example

Typical Elevation Example

2.5 BUILDING MASSING AND PLACEMENT

Building setback and height requirements are contained in Zoning Ordinance and vary according to lot size and building type. In addition to those standards, the intent of these guidelines is to address additional massing considerations such as 'under the roof' or 'attic' 1/2 stories, and setback garages. These considerations are described further in the Architectural chapter.

Within the small lot area (lots of less than 4000 sf), a one story covered porch is allowed to encroach into the front yard setback as defined in the Zoning Ordinance.

Figure 1.7, Porch and Garage Placement

2.5 DRIVEWAYS AND GARAGE PLACEMENT

Driveways and garages within Oak Knoll should be designed to reinforce the dominance of a tree-lined streetscape.

Limiting curb cuts to 16' in width is strongly encouraged, where feasible, for front loaded lots.

Driveway width in front of 2 car garages should be 18' wide at garage entry allowing for two off-street parking spaces in front of garage. Refer to adjacent Figure 1.8.

Refer to Chapter 4.0, Landscape Guidelines, for allowable paving materials for driveways

Figure 1.8, Small Lot Typical Siteplan

An architectural sketch of a building facade, rendered in a light brown or sepia tone. The drawing shows a multi-story structure with a prominent gable roof on the left side. The gable contains a window. Below the gable, there is a large window with a decorative frame. To the right of this, there are several more windows of varying sizes and styles, some with decorative elements like flower boxes or small balconies. The sketch is detailed, showing window panes, frames, and roof lines. The background is a solid, light brown color. The text "3.0 ARCHITECTURAL GUIDELINES" is overlaid in the center of the image.

3.0 ARCHITECTURAL GUIDELINES

3.1 THE 'BAY AREA' REGIONAL STYLE

The Bay Area has a unique and home-grown residential character which has evolved in response to the local climate, cultural history, and lifestyle of its inhabitants. Many respected names in the field of architecture, landscape design and development have contributed to this character throughout history. The East Bay's early development phase included names like Bernard Maybeck, Julia Morgan, Walter Ratcliff, Henry Gutterson, Mason/McDuffie, and Frederick Law Olmsted; the mid-century included names like Joseph Eichler, William Wurster, Joe Esherick, Charles Moore, and many others. While the styles that make up this character are diverse, they are bound by common themes that form a sense of place and will inform the identity of Oak Knoll. Among these themes are:

- Buildings which connect to and are inspired by the natural setting
- Simple building mass with additive elements
- Natural Materials (wood, stone, terra cotta, stucco)
- Subdued earth-tone paint colors and light colored stuccos

Bay Area Regional Style - Shingle

Bay Area Regional Style - Contemporary

Bay Area Regional Style - Mid Century Modern

For the purposes of style classification, the following styles are identified as typical to the area and considered appropriate to Oak Knoll:

ARTS & CRAFTS

- Craftsman Bungalow
- Shingle
- Tudor
- Arts and Crafts

MEDITERRANEAN

- Spanish Colonial
- Mission
- Tuscan

CALIFORNIAN

- Farmhouse
- California Modern (mid-century modern)
- California Contemporary

Bay Area Regional Style - Arts and Crafts

Bay Area Regional Style - Spanish Colonial

THE HISTORIC PRECEDENTS

The style of the architecture at Oak Knoll draws from examples of the historic styles typical in the area. These images show inspirational historic 'ancestors'; new homes will not be replications of these but rather derived from similar design principles. These principles will then be applied to current designs taking into consideration today's materials, construction practices, and modern lifestyles.

Bay Area Regional Style - Craftsman Bungalow

Bay Area Regional Style - Tuscan

Bay Area Regional Style - Arts and Crafts

Bay Area Regional Style - Contemporary

3.2 ARCHITECTURAL STYLE MATRIX - BY FAMILY

	Massing / Roof Form	Windows and Doors	Porches / Balconies and Details	Materials and Color*
ARTS AND CRAFTS				
Craftsman Bungalow	<ul style="list-style-type: none"> Lower pitch gable roofs (4/12 - 8/12) Broad eaves with exposed rafters Wide shed dormers 1/2 story upper floors 	<ul style="list-style-type: none"> Double hungs, single or grouped Casements, single or grouped Bay windows Wide panelled entry doors 	<ul style="list-style-type: none"> Wide porches, often covered by primary roof form, integrated into primary mass Thick porch columns 	<ul style="list-style-type: none"> Wood or composite siding and trim Cast stone brick used as accent materials Subdued earth tone colors with warm accent colors
Shingle	<ul style="list-style-type: none"> Medium pitch gable and hip roofs (6/12 - 12/12) Gable and shed dormers 1/2 story upper floors 	<ul style="list-style-type: none"> Cottage style double hungs Casements, single or grouped Bay windows Panelled entry doors 	<ul style="list-style-type: none"> "innie" porches, often covered by primary roof form, integrated into primary mass 	<ul style="list-style-type: none"> Wood shingle with wood or composite trim Natural stained base color with darker accent color on trim
Tudor Arts and Crafts	<ul style="list-style-type: none"> Steeper pitch gable roofs (8/12 - 18/12) Cross-gables and dormers 1/2 story upper floors Assymetric massing 	<ul style="list-style-type: none"> Casements, single or grouped Bay windows Arched entry doors, pointed or round 	<ul style="list-style-type: none"> Assymetric entry features (stoops or porches) integrated into primary bldg mass 	<ul style="list-style-type: none"> Wood and stucco walls Brick used as accent material White or rich earth tone base color with darker accent color on trim
MEDITERRANEAN				
Spanish Colonial Mission Revival	<ul style="list-style-type: none"> Lower pitch hip roofs (4/12-8/12) Secondary shed roofs Secondary flat roofs areas with shaped parapets 	<ul style="list-style-type: none"> Casements, single or grouped Tall double hungs Arched entry doors 	<ul style="list-style-type: none"> Covered entry arcades Juliet balconies Painted metal railings and window grilles 	<ul style="list-style-type: none"> Stucco walls Terra cotta roof tiles Colored glazed tile and cast ornamental details as accents Light colored walls

3.3 MASSING – PRIMARY VOLUMES

BUILDING ORIENTATION

A variety of symmetrical and asymmetrical massings can be used when laying out an Oak Knoll home. First, it is important to determine the building orientation based on lot conditions. Typically, this will be perpendicular to the street.

SECONDARY VOLUMES

Next, an assessment of secondary volumes -- garages and additional building wings -- will help determine the appropriate roof profile. This may be gable, gambrel, hip, shed, or a combination thereof. For further information on roof profiles, see Section 3.3: Roofs.

ADDITIVE BUILDING ELEMENTS

Ultimately, the massing should be simple and understated, and should provide a backdrop to unique building elements like porches, dormers, and other details while logically shaping the interior spaces.

Primary and Secondary Volumes

3.4 ROOFS

ROOF TYPES AND SLOPES

Acceptable roof types include front-facing and side-facing gable, gambrel, hip, and shed roofs, or some combination thereof. Flat roofs are permissible but will be reviewed during the Final Development Plan (FDP) process for their visual impact on adjacent properties. Please refer to the Architectural Style Matrix on page 30 for roof design recommendations by style.

As appropriate to the chosen style, 'under the roof' style upper levels are encouraged to diminish the bulk of 2 and 3 story homes. These are referred to 1.5 or 2.5 story homes in this document.

Flat roofs

12/12 steeper pitch roof with dormers

3/12 shed roof

12/12 steeper pitch roof with dormers

4/12 tile roof

1. PRIMARY VOLUME

2. SECONDARY VOLUME

DETACHED LOTS

- Most small lots will have Primary Volumes that are oriented perpendicular to the street.
- May be one to 2.5 stories.

- Most Secondary Volumes on small lots will be oriented perpendicular to Primary Volumes
- Shall be setback from the Primary Volume a minimum of two (2) feet
- May be one to 2.5 stories.
- May be detached from the Primary Volume.

ATTACHED UNITS - TOWNHOMES

- Primary Volumes oriented parallel to the street or entry walk
- May be three stories

- Create secondary volumes to differentiate roofscape where appropriate
- Corner Units should be differentiated

3. COMPONENTS/FEATURES

4. PORCHES

DETACHED LOTS

- Dormers, chimneys, bay windows, and other facade components shall be added to provide facade interest.

- Porches may be single-bay, full-width, wraparound or stacked.
- Refer to pages 46 and 47 for examples of porch types.

ATTACHED LOTS - TOWNHOMES

- Dormers, chimneys, bay windows, and other facade components shall be added to provide facade interest.

- Porches may be single-bay, full-width, wraparound or stacked.
- Refer to pages 46 and 47 for examples of porch types.

ROOF MATERIALS

Please refer to the Appendix A for acceptable roof materials.

SUCCESSFUL ROOF DESIGNS

While a variety of roof types suit the Oak Knoll home, successful designs will support the simple massing of primary and secondary volumes and interior spaces, visually reduce the scale of the home, and provide adequate shading.

DORMER SIZING

Dormers are an important element that allow upper stories of a home to be usable as well as visually diminishing the scale of the upper level. Dormers may contain one window, or a string of windows, depending on the functional needs of the spaces within.

Dormer eaves and overhang details should be scaled accordingly, and should be consistent with the overall roof details.

All dormers shall be functional and bring light into occupiable interior spaces.

DORMER SIDING

Siding may be applied on the side or front walls of dormers either horizontally or sloped to match the adjacent roof.

1/2 Story 2nd floor with dormers

3.5 HIGH VISIBILITY FACADES

High Visibility Facades are visible from the street and from open space. High Visibility Facades are entry facades; hillside rear facades (facing the view); and corner lot facades. The High Visibility Facade of all homes should welcome residents, be inviting to neighbors and guests, and must follow guidelines defined in this section.

HIGH VISIBILITY FACADES - OPEN SPACE

While the entry facades of all homes in Oak Knoll shall be considered High Visibility Facades, select facades that face the Open Space shall also be considered High Visibility Facades. Use of porches and balconies are encouraged on these facades, and they should be designed with their visibility in mind, as well as the privacy of the homeowner.

CORNER LOT FACADES

Corner lot facades should carry distinct compositional and material elements from the entry facade to the side facade, to create a dynamic perspective of the home from the street. Corner lot facades shall have consistent details and elements on elevations facing both streets. The rhythm of openings established on the entry facade shall continue on the side facade that faces the street, and divided window patterns shall be consistent on both elevations. If shutters are incorporated on the entry facade they shall likewise be incorporated on the side facade that faces the street.

ADDITIVE FACADE ELEMENTS

Once the design of the High Visibility Facade openings has been determined, additive building elements like porches and dormers should follow the rhythm of the facade composition. Wraparound porches are encouraged on corner lots, as well as projected window bays. Porch columns should be spaced equally to either side of facade openings. Satellite dishes and external antennas are not permitted on High Visibility Facades.

SUCCESSFUL EXECUTION OF SECONDARY FACADES

Secondary Facades that successfully follow the above guidelines will support a composition of the Bay Area home that is balanced and continuous rather than one-sided and fragmented.

Secondary Facades

3.6 OPENINGS - WINDOWS

WINDOW TYPES

Homes may have single-hung, double-hung, triple-hung, awning, and casement windows. Slider style windows are also permissible where appropriate to the chosen style (see style matrix on page 30). Square transom windows are allowed on Secondary Facades, and may be used in bedrooms, bathrooms, stairwells, etc. Arch windows shall be permitted where appropriate to the style. Please refer to the Architectural Style Matrix on page 30 for window recommendations by style. Bay windows may encroach into front and rear yard as permitted by zoning and building codes. All windows shall be fully trimmed on the exterior with appropriate head, side, and sill details. Mitered joints are not permitted.

WINDOW PROPORTIONS AND TRIM

Windows may be mulled together to achieve wider expanses of glass, but shall not exceed 12' in total width. Windows may have no muntins, a 2 over 2, 4 over 1, 4 over 4, 6 over 1, or 6 over 6 muntin pattern. True divided lites are preferred, simulated divided lites are acceptable, and removable muntins are prohibited. Wood and composite trim materials are permitted and foam trim is not allowed.

SHUTTERS

If shutters are incorporated in Primary Facades they should likewise be incorporated in High Visibility Facades. Each shutter shall be a minimum of half of the window dimension. Louvered or panelized shutters are acceptable.

Casement Style Windows

Double-hung Windows

Casement Style Windows

Casement Style Windows

6 over 1; 4 over 4; and 2 over 2 muntin patterns

3.7 EXTERIOR DOORS

Exterior Main Entry doors can be flat or traditionally paneled doors. Please refer to the Architectural Style Matrix on page 30 for design recommendations by style.

3.8 PORCHES & STOOPS

TYPES

The porch or stoop is the signature element of an Oak Knoll home. As such, all homes must have either a porch or stoop. Multiple types are acceptable and encouraged, from single-bay to full-width, wraparound, and stacked. Pages 41 and 42 illustrate examples of porch and stoop types. Entry Courts are also an entry feature of certain styles of homes and are addressed in the landscape section.

PORCH DIMENSIONS

All porches or stoops on detached homes shall have a minimum covered area as defined in the Zoning Ordinance, and designed in a manner appropriate to the style of architecture.

Single story covered porches are allowed encroachments into front yard setbacks as defined in the Zoning Ordinance.

Entry Porches

PORCH DETAILS

Porch columns should be with round or square profiles, and shall have a minimum dimension of six (6) inches. Columns shall have defined capitals and bases. Porch design should be consistent with the chosen style of the house. Please refer to the Architectural Style Matrix on page 30 for design recommendations by style.

Porch beams shall align over supporting columns. Porch eaves and rakes should extend beyond porch beams. Porch ceilings must be fully trimmed.

Porch railings and balusters where required by code should be designed in a manner appropriate to the chosen style.

STOOPS

Stoops should be detailed in a similar way to porches, but are smaller in size and may be in the form of a recessed entry that indents into the building wall. The landings and covered areas of stoops shall have minimum dimensions as defined in the Zoning Ordinance.

Entry Porch

Wraparound porch with hip roof

Side porch with shed roof

Full-width porch

Single-bay porch

Standard Stoop

Full-width porch

Single-bay porch with flat roof; side porch with shed roof

Inset Stoop

PORCH MATERIALS

Porches may be constructed from wood, wood-like composites, stucco, or concrete faced with brick or stone veneer. Entry stoops, porches, and stairs that are constructed with wood shall be screened with wood or manufactured wood trim or lattice.

Entry stoops or porches constructed of masonry may have stair risers and treads constructed of masonry and may be finished with brick pavers. When finished walking surfaces, including stair treads, are brick pavers, all vertical surfaces from the top of the porch deck to grade shall be of brick. Bare or painted concrete is also a permitted finish material.

The porch ceiling may be composite bead-board planks or wood with appropriate molding.

Composites, and fiberglass trim moldings are allowed on a case-by-case basis as reviewed in Design Review. Vinyl or foam trim is prohibited. Refer to Chapter 4.0: Landscape for planting requirements at base of porch.

3.9 GARAGES

GARAGE DIMENSIONS

The design and placement of garages is important to the creation of a pleasing streetscape and a domestic 'neighborhood' feel. A minimum setback is required to allow a parked car in front of garage within the lot and not overlapping with adjacent sidewalks or common drive aisles. Exceptions may be granted through the Design Review process to allow the garage face closer to the front lot line.

Garages preferably will have individual carriage doors, but double garage doors are permissible as well. Garage doors must abide by the minimum and maximum dimensions defined in the Zoning Ordinance. Garage doors should be traditionally panelled, and windows courses at the upper panel are desirable features. Single car garages and tandem garages are also encouraged where circumstances favor this layout on the lot.

GARAGE DETAILS

Where the garage is not integrated into the primary mass of the home, they shall be considered a Secondary Volume, and shall have the same or shallower roof pitch than that of the Primary Volume of the home, and set back from the Primary Volume. Garage doors should incorporate details that complement the design of Entry and Secondary Facades, such as windows, patterned paneling, trellis and roof details.

3.10 LIGHTING

ARCHITECTURAL LIGHTING

A well-lighted porch or stoop is a critical element to the Oak Knoll streetscape. As such, all homes must have porch lighting appropriate to the style of the house.

Garages should also have exterior lighting integrated over or adjacent to the door bays, and should be shielded.

No uplighting of buildings is permitted.

4.0 LANDSCAPE GUIDELINES

View looking east from new bridge over Rifle Range Creek

4.1 LANDSCAPE VISION

The landscape design for Oak Knoll is intended to integrate the new community into an existing context of hillsides, creeks and drainages, and oak woodland. Proposed landscape elements will reinforce the new patterns of buildings, roads, public spaces, and recreational and open space amenities, creating a framework for the new community while also providing for habitat restoration and sustainability.

The proposed landscape elements are also intended to celebrate the rich heritage and historic context of the North Oakland communities, celebrating historic community values of respect for land, nature, and a tradition of craftsmanship that was expressed by neighborhood community designs at the turn-of-the century in the East Bay neighborhoods of Berkeley, Claremont, Piedmont, and Rockridge.

The community landscape is shaped to provide accessible open space and access to nature, and to encourage active and healthy outdoor living. Neighborhoods are woven together with natural open space settings and carefully designed streets with generous sidewalks, punctuated by neighborhood and pocket parks. Landscape materials emphasize the use of native materials and plant communities within natural settings, intended to restore the site's ecology and benefit wildlife, while presenting a unique, nature-rich environment for the residents of the community.

In order to promote the conservation and efficient use of water, landscaping shall comply with the provisions established in the California Code of Regulations Title 23, Division 2, Chapter 2.7 Model Water Efficient Landscape Ordinance (MWELO).

4.2 STREETScape DESIGN

Street trees are important thematic elements of the neighborhoods, where strong patterns reinforce the neighborhood identity, define road edges and provide a shaded overstory. A strong overhead tree canopy will modify the climate and bring streets into a more balanced scale with the overall landscape.

The community streetscape features a natural setting of Coastal Oak woodland, comprised of native London Plane and Coast Live Oak along street edges. Plantings are low groundcovers in composed drifts, using selections from the Approved Plant List. (Refer to the Preliminary Development Plan (PDP) for public street sections.)

The Creekside Village, Retail Village, Creekside Townhomes and Garden Court neighborhoods utilize native Oak woodland as the predominant framework plantings, with London Plane, Trident Maple, Red Maple and Brisbane Box as canopy street or parking lot trees.

4.3 OPEN SPACE DESIGN

The open space network consists of a range of open spaces including existing undisturbed open space, the restored Rifle Range Creek Corridor, revegetated hillsides and publicly accessible neighborhood parks.

- The existing grassland on the upper hillside and areas of existing preserved oak woodland are protected natural resources.
- The lower hillside will be extensively planted as a restored oak woodland natural setting, consisting of several native oak species, Toyon and California Buckeye.
- The restored Rifle Range Creek will be revegetated with an appropriate and diverse native plant community to recreate a natural setting that benefits wildlife, and includes a multi-use trail serving the community. Refer to the Oak Knoll Mixed Use Community Development Project Regulatory Permit Application Package.
- Tree mitigation occurs site-wide in a variety of locations. Refer to the Tree Removal Permit Package for recommended mitigation locations and species.

Figure 4.2- Open Space and Parks

4.4 PARKS AND PLAZA DESIGN INTENT

There are three kinds of public parks offering active and passive recreational opportunities as described in the PDP. Larger more active community parks (see Figure 4.2) include the park areas at the Club Knoll community center and the neighborhood park near the project's northern boundary. Smaller more passive neighborhood parks are planned near the Community Center and within the townhome in-tract parcels. The plaza at the retail Village Center will serve as a social gathering and event space for the community, with decorative hardscape, benches, informal seating and canopy shade trees. Landscape guidelines for parks and plazas include:

- The parks should emphasize use of native trees, shrubs, and groundcovers in both organic and formal settings. Refer to the Neighborhood Streetscape Plant List for Proposed Plants.
- Parks should incorporate community-wide furnishings and signage consistent with other design elements in the community.
- Parks should provide shaded seating areas, picnic tables, and trash receptacles.
- Hardscape areas should avoid asphalt and large expanses of concrete. Natural stone, pavers, high quality stamped concrete, and decomposed granite should be utilized in the appropriate settings.
- A tot lot with play structures and picnic benches and lawn areas will be located at two locations and should include play equipment that is durable, safe, appropriately scaled, shaded and maintainable.
- Recreation areas such as playfields and multi-use courts should employ high quality turf and/or hardscape surfaces. Site drainage shall be extensively utilized on playfields and other higher impact natural areas.
- All fencing should be natural in character and follow these design guidelines, see Appendix B.
- Parks should provide connections and wayfinding to the project-wide trail and bikeway system.
- Where public art is included in park settings, designers should coordinate with artists prior to park design to ensure art elements are well integrated, accessible and compliment other elements of the park design.

COMMUNITY PARK

RETAIL VILLAGE

NEIGHBORHOOD PARKS

4.5 COMMUNITY TRAILS AND RECREATION

An extensive network of trails extend throughout the community, affording a range of experiences, challenges levels and activity options, including running, hiking, walking, dog walking and accessibility.

- Emphasis is on use of natural materials and simple treatments that are intended to integrate fully with the natural setting.
- Use of reclaimed timber for benches, signage, and trail markers with opportunities to incorporate hand-crafted artisan designs.

Trails for Oak Knoll are classified as follows:

- Hiking Trails
- Multi-Use Path (Walking/ Running/Biking)
- Neighborhood Path
- Bike Route

Location of the trails systems should meet the following design objectives:

- Safety
- Connectivity to on-site and off-site destinations
- Diversity in experiences and user types
- Conforms to site attributes, opportunities and constraints

Wayfinding Sign

Trailhead Signage

Bay View telescope at Vista Point

Soil cement surface

Unique wood benches

Figure 4.3- Bike and Pedestrian Trails and Connections

4.6 SIGNAGE AND MONUMENTATION

Stone piers with historic details are envisioned for use to celebrate the main entry points and secondary neighborhood entry points. A hierarchy of scale will differentiate the entry and neighborhood monuments, while incorporating unique details and establishing a common approach. Materials and craftsmanship will employ a unified approach to unify the community design, including stone details at the vehicular bridge crossing the creek and community center entrance.

The vision for the main entry monument on Mountain Boulevard and Keller Avenue is for a collection of native trees (oaks, manzanita, etc) in a naturalized composition with stone piers marking the entry. Community signage may be integrated into the piers similar to the tradition of the neighborhood street names at neighborhood entries.

Community Entry Monument Concept

Stone Neighborhood Entry Piers

Community Entry Conceptual Plan - Mountain Boulevard and Creekside Parkway (NTS)

Figure 4.4 - Signage and Monumentation Plan

4.7 WALLS

SITE RETAINING WALLS

Retaining walls will be needed due to the sloping topography of the site. See the Appendices for Approved Retaining Wall. Low shrubs are required where space between the face of retaining walls and right of way or swale exceeds 2'. Retaining walls greater than 4' tall require top of wall planting, Retaining walls greater than 6' tall shall have vines planted on the face of walls in drifts of single species; each drift of vine planting should not exceed 50' before blending into another species.

Retaining walls taller than 30" shall incorporate a 42" guardrail. See figure and detail in Appendix B. Fences shall be set behind the top of wall (or top of wall swale where occurs) 4' to allow for shrub massing.

The Approved Plants include the following:

Vines for Retaining Walls (plant on face in drifts of single species, 8' spacing to achieve 50% cover when mature):

- Parthenocissus tricuspidata 'Veitchii'/Dwarf Boston Ivy
- Solanum rantonetti/Potato vine

Shrub massing for base of walls, where planting area (clear of drainage swales) measures 2'-4':

- 40% Ceanothus gloriosus 'Valley Violet'/Valley Violet Wild Lilac
- 40% Westringia fruticosa 'Grey Box' or 'Jervis Gem'
- 20% Erysimum Bowle's Mauve'

Shrub massing for base of walls (clear of drainage swales) where planting area measure 4' to 10':

- 40% low shrub massings:
- Ceanothus maritimus cultivars planted in drifts alternating with Manzanita:
- "Frosty Dawn", 'Valley Violet' and/or 'Point Sierra'
- 30% Arctostaphylos hookeri 'Wayside'
- 30% Feijoa sellowiana/Pineapple Guava (taller shrub massings where walls exceed 7 feet)

The Approved Site Retaining Wall is:

- Pavestone 'Anchor Diamond Pro' Retaining Wall
- Face Style: Straight
- Color: Sandstone Blend

Vines planted on face of retaining wall

4.8 RESIDENTIAL LANDSCAPE DESIGN

The following principles embedded in the landscape design philosophy closely mirror the architectural design principles:

- Oak Knoll landscapes and gardens are versatile, imaginative and offer a range of expressions.
- Landscapes encourage a relaxed, informal and practical approach while accommodating contemporary lifestyles.
- Landscapes are designed to respond to unique characteristics, such as lot configuration, topography, existing vegetation, and the design and location of the house and ancillary structures.

Residential landscaping will be the responsibility of the individual Homeowners and Builders and shall be thoughtfully designed according to these guidelines. A palette of plant and landscape materials is established in these guidelines to ensure visual unity within visible lot areas while allowing room for individual creative design solutions.

4.9 SINGLE FAMILY RESIDENTIAL

Landscape guidelines and requirements within this Section address unique landscape conditions that occur for the single family residential lots found at Oak Knoll.

OBJECTIVES

- Integrate the built environment with a dominant landscape.
- Blend landscapes between lots and neighborhood streets as a unified community landscape setting.
- Establish a healthy, sustainable and natural landscape environment.
- Prioritize front yard landscapes to reinforce neighborhood streets as livable, walkable places. The combination of front porches and front yard gardens within the private frontages activate the streetscape, and shall contribute to a consistent, high quality neighborhood landscape.
- Low groundcovers have low water requirements and are composed in drifts, using selections from the Approved Plant (see Appendices).

Three general landscape zones have been defined for each home site. Objectives and guidelines regarding landscaping, planting, paving, walls and fencing within each zone are described in this chapter. The three landscape zones are described as follows:

FRONT YARD ZONE

The front yard is defined by the area between the front property line and the front face of the building, extending to the side property lines. The objectives within this zone are to reinforce and enrich the neighborhood street scene and to provide a transition from the street to the private landscape. All plantings within this zone are to occur prior to home occupation.

SIDE YARD ZONE

The side yard areas maintain privacy for indoor and outdoor living spaces while also providing access around the home. A range of creative solutions such as using architectural site walls and fences combined with neat vertical plantings and groundcovers are encouraged. Sensitivity to neighboring lots is required in the design of side yards in order to avoid blocking light or creating maintenance and nuisance issues, while protecting for privacy.

REAR YARD ZONE

This area is defined as the area between the rear property line and the rear face of the building, extending to the side property lines. The objective within this zone is to provide privacy, pleasant outdoor living spaces and shade for building western exposures. Sensitivity to neighboring lots is required in the design of the rear yard areas in order to avoid blocking light or creating maintenance and nuisance issues.

Refer to Figure 4.5: Typical Home Site Planting Diagram for planting requirements for each zone.

PLANTING PALETTE

Small Trees

(4) 15 gallon total

- Arbutus unedo/Strawberry Tree (compact form)
- Magnolia x s. 'Lilliputian'/ Saucer Magnolia (dwarf form)

Medium Trees

(1) 15 gallon total

- Quercus agrifolia/Coast Live Oak
- Arbutus 'Marina'/ 'Marina' Madrone

Planting Type 1

(perennials, low shrubs and groundcover)

Lavandula angustifolia 'Hidcote'/English Lavender (dwarf cultivars) qty:10

- Arctostaphylos 'Point Reyes'/Manzanita
- Ceanothus gloriosus 'Frosty Dawn'/Wild Lilac
- Rhamnus 'Seaview'/Seaview Coffeeberry
- Festuca rubra 'Molate'/Creeping Red Fescue

Planting Type 2

(rain garden grasses/perennials, accent taller shrubs and fence vine)

- Festuca rubra 'Molate'/Creeping Red Fescue
- Ribes sanguineum/Pink winter Currant
- Pacific Coast Iris cultivars
- Hardenbergia comptoniana/Lilac Vine

Planting Type 3

(lawn, meadow grasses, groundcovers and low shrubs)

- Dwarf Tall Fescue lawn sod or seed
- Carex pansa/California Meadow Sedge pots or plugs
- Calamagrostis foliosa/Feather Reed Grass
- Rhamnus 'Leatherneck'/Coffeeberry

Figure 4.5: Typical Home Site Planting Diagram

FRONT YARDS ON SLOPED LOTS

Lots located on streets with slopes greater than 10% shall be completely vegetated and may use a combination of low walls and plantings to achieve changes in grade. Plants that aid in erosion control are recommended.

GUIDELINES

- Front yard slopes may not exceed 2:1.
- Retaining walls, if used, should be terraced where possible and not exceed a maximum height as set forth in the Zoning Ordinance.
- Retaining walls shall be integrated with shrub planting to soften and screen walls.

See Section 4.11 Retaining Walls on Lots for Approved Materials.

Sloped Lot Planting

Combination of Planting and Retaining Walls at Sloped Lots

4.10 SIDE AND REAR YARD FENCING

Side yard fencing is required for functional and safety reasons. All fencing shall use quality materials and follow the Approved Standard Fence Details in Appendix B.

GUIDELINES

- All fencing may either slope with grades or adjust as a vertical offset between panels. Offsets shall not exceed 12 inches.
- All fencing between adjoining lots shall have a height of 6 feet. Corner lots and end lots are encouraged to reduce fence heights at side yards to allow views with a minimum height of 4 feet.
- All fencing shall be softened with flowering vines and shrubs to soften their visual appearance where visible from public areas.
- A few upper hillside home sites with sloped rear yards in excess of 20% shall utilize the Approved Hillside Fence in the rear yard.
- Lots with pools and spas require fencing and gates that meet all applicable codes.
- Typical side and rear yard fencing is a solid cedar or redwood fence with a stained finish.
- For upland lots with rear yards with onsite and offsite visibility, rear yard fencing, if used, shall use the Approved Hillside Fence to ensure visual consistency.
- For lots with side or rear yards that front on the creek corridor, a neighborhood park or open space, please refer to appropriate wall design examples in Appendix B.

Typical Side Yard Board-on Batten Style Privacy Fence

Typical Hillside Fence where slopes exceed 20% (stepped or sloping rear yard conditions)

4.11 RETAINING WALLS ON LOTS

Retaining walls may be needed due to sloping topography on individual lots. Retaining walls shall be minimized and designed to fit the topography. Retaining walls in the side or rear yard shall use the Approved Retaining Wall design shown in the Appendices.

GUIDELINES

- Use of stucco, brick, painted brick or natural stone veneer may be used for site walls in front and side yards that are visible from public areas. Materials shall complement the building architecture.
- Wall heights shall be appropriate to context and shall not exceed 6' in height per Code.
- Tiered walls shall be integrated landscape design.
- Tops of walls may either slope or step with the topography as required. Walls may slope at 1:8 maximum or use vertical offsets of 12" maximum.
- Use of vines, trailing evergreen groundcovers and shrub massings are encouraged to soften walls.
- Retaining walls in side and rear yards- Walls not closely associated with the architecture and not visible from public areas may use the Approved Standard Wall System described in the Appendices.
- Retaining walls in rear yards shall be located a minimum of 4' from the property line to allow room for fencing.
- Retaining walls and steps at front walkways are allowed to resolve site grading.

- The following retaining wall materials are allowed:
 - Brick
 - Painted brick
 - Natural stone veneer
 - Approved concrete block wall system in rear and side yards (refer to Appendices)
 - Gabions
 - Pressure-treated wood
- The following retaining wall materials are **not** allowed:
 - Railroad ties
 - Metal cribs
 - Concrete pylons

APPENDICES

APPENDIX A

The following colors and materials have been assembled to give developers guidance. They are intended to communicate the vision of the Oak Knoll character. Nonetheless, creativity is encouraged, and alternatives to these materials, which adhere to the spirit of these guidelines will be considered by the DRC. A more detailed and design-specific palette of colors and materials shall accompany all FDP applications and be reviewed by the DRC.

APPENDIX B

APPROVED STANDARD RETAINING WALL SYSTEM ON LOTS

- 'Anchor Highland Stone Retaining Wall 6" Combo' (Product 876) by Pavestone, Inc. : 3 piece system, sizes 18"x12"x6", 12"x12"x6", and 6"x12"x6". Color to be determined. Cap #819. (<http://www.pavestone.com/anchor-highland-stone-retaining-wall-6-combo/>)

STANDARD APPROVED SIDE YARD AND REAR YARD FENCES

- Minimum Standard Material: #1 grade Western Red Cedar or Redwood
- Stain finish: Cabot 'Red Cedar'
- Note: Both sides are finished equally
- 4x6 posts Western Red Cedar posts 6' apart
- Boards: 1x8, Battens: 1x3 (both sides), Cap: 1x6 with 1x4 facer
- Height: 6'-0"
- add low plants at base like a low grass or lirioppe

STANDARD APPROVED GUARDRAIL

APPENDIX C

The following Approved Plant List and Prohibited Plant List are intended to communicate the vision of the Oak Knoll landscape character. Nonetheless, creativity is encouraged, and alternatives to these materials, which adhere to the spirit of these guidelines will be considered.

PROHIBITED PLANT LIST

The following list of invasive species are prohibited. As information is constantly changing, this list may be updated from time to time. This list is derived from Cal-IPC.

Latin binomial / Common names

Acacia dealbata / Silver wattle

Acacia melanoxylon / Blackwood acacia

Acanthus mollis / Bears breech

Agapanthus spp. / Lily of the Nile

Ailanthus altissima / Ailanthus, Tree-of-heaven

Albizia julibrissen / Silk floss

Alhagi maurorum / Camelthorn

Aptenia cordifolia / Red apple, Baby sun rose

Arcotrocha calendula / Capeweed, Cape dandelion

Arundo donax / Giant reed, Giant cane

Atriplex semibaccata / Australian saltbush

Avena barbata / Slender oat

Avena fatua / Wild oats

Bassia hyssopifolia / Five-hook bassia, Thorn orache

Bellardia trixago / Bellardia, Mediterranean linseed

Brassica spp. / Mustards

Bromus madritensis ssp. *rubens* / Foxtail chess

Bromus tectorum / Cheatgrass, Downy brome

Cardaria chalepensis / Lens-podded hoary cress

Cardaria draba / Heart-podded hoary cress, White-top

Cardaria pubescens / Hairy whitetop

Carduus spp. / Thistles

Carpobrotus edulis / Highway iceplant

Centaurea spp. / Hardheads, Knapweed

Centranthus rubra / Valarian

Cirsium spp. / Thistles

Cistus ladanifer / Crimson spot rock rose

Conicosia pugioniformis / Narrow-leafed iceplant

Conium maculatum / Poison hemlock

Cortaderia spp. / Pampasgrass

Cotoneaster spp. / Cotoneaster

Crataegus monogyna / Singleseed hawthorn

Cynara cardunculus / Artichoke thistle, Cardoon

Cytisus spp. / Broom

Delairea odorata / Cape ivy, German ivy

Digitalis purpurea / Foxglove

Dimorphotheca sinuata / African daisy

Drosantemum spp. / Ice plant

Echium candicans, *E. fastuosum* / Pride-of-Madeira

Egeria densa / Brazilian egeria

Ehrharta spp. / Veldtgrass

Eichhornia crassipes / Water hyacinth

Elaeagnus angustifolia / Russian olive, Oleaster

Elaeagnus pungens / Silverberry

Erechtites spp. / Fireweed

Eucalyptus camaldulensis / Red gum

Eucalyptus globulus / Bluegum

Euphorbia spp. / Spurge

Festuca arundinacea / Tall fescue

Ficus carica / Edible fig, Common fig

Foeniculum vulgare / Fennel, Sweet anise

Gazania linearis / Gazania

Genista spp. / Broom

Halogeton glomeratus / Halogeton

Hedera helix / English ivy

APPENDIX C - APPROVED PLANT LIST

Hedera canariensis / Algerian ivy
Helichrysum petiolare / Licorice plant
Holcus lanatus / Common velvet grass
Hydrilla verticillata / Hydrilla, Water thyme
Hypericum spp. / St. John's Wort
Ilex aquifolium / English holly
Iris pseudacorus / Yellow flag iris
Juniperus spp. / Juniper
Lampranthus spp. / Ice plant
Lepidium latifolium / Perennial pepperweed
Leucanthemum vulgare / Ox-eye daisy
Ligustrum lucidum / Glossy privet
Ludwigia hexapetala / Creeping water primrose
Ludwigia peploides / California water primrose
Lythrum hyssopifolium / Hyssop loosestrife
Lythrum salicaria / Purple loosestrife
Malephora spp. / Ice plant
Marrubium vulgare / Horehound
Maytenus boaria / Mayten
Mentha pulegium / Pennyroyal
Mesembryanthemum spp. / Iceplant
Myoporum laetum / Ngaio tree
Myriophyllum aquaticum / Brazilian watermilfoil
Myriophyllum spicatum / Spike watermilfoil
Nandina spp. / Bamboo
Olea spp. / Olive
 *Except Fruitless cultivar 'Swan Hill'
Pennisetum spp. / Fountain grass
Pistacia chinensis / Chinese pistache
 *Except Fruitless cultivar 'Keith Davey'
Phalaris aquatica / Harding grass

Pittosporum spp. / Mock orange
Platanus acerifolia / Bloodgood plane tree
Pyracantha spp. / Firethorn
Retama monosperma / Bridal veil broom
Ricinus communis / Castor bean
Robinia pseudoacacia / Black locust
Rubus armeniacus / Himalayan blackberry
Saponaria officinalis / Bouncing bet
Schinus terebinthifolius / Brazilian pepper tree
Schismus spp. / Mediterranean grass, Arabian grass
Senecio jacobaea / Tansy ragwort, Ivy
Sesbania punicea / Scarlet wisteria
Silybum spp. / Thistles
Spartina spp. / Cord grass, Marsh grass
Spartina patens / Salt marsh hay
Stipa manicata / Tropical needlegrass
Taeniatherum caput-medusae / Medusahead
Tamarix parviflora / Tamarisk, Saltcedar
Ulex europaeus / Common gorse
Verbena bonariensis / Tall vervain
Verbascum spp. / Mullein
Vinca spp. / Periwinkle
Zantedeschia aethiopica / Calla lily

APPENDIX D

ADMIRALS RIDGE HILLSIDE GUIDELINES

The Admirals Ridge area includes 18 single family lots on the eastern edge of the project flanking Keller Ave. Due to the increased visibility of the 13 lots west of the road, special height standards will be applied (see section diagrams on facing page).

Terraced Lots. These lots have terraced building pads to better integrate into the hillside topography, height limits are applied as shown in figure 4.6.

Sloped Lots. These lots are located in the most visible area to the north and the majority of the area within the buildable envelope is sloped, height limits are applied as shown in figure 4.6.

Padded Lots. These lots are padded to allow for a full flat building site and are not located in the highly visible areas west of the road.

ADMIRALS RIDGE LOT TYPES

ADMIRALS RIDGE FOCUS AREA

Figure 4.6: Section and Building Height diagrams at hillside lots.

**PART 1: STANDARD CONDITIONS OF APPROVAL –
GENERAL ADMINISTRATIVE CONDITIONS**

1. Approved Use

The project shall be constructed and operated in accordance with the authorized use as described in the approved application materials dated June 21, 2017 and as amended through October 18, 2017 and included in the Planning Commission staff report, and as may be amended in the final City Council decision, as also amended by the following conditions of approval and mitigation measures, if applicable (“Conditions of Approval” or “Conditions”).

This action by the City Council (“this Approval”) includes the approvals set forth below. This Approval includes:

- a. General Plan Land Use Diagram amendment for the area covered by the Oak Knoll PUD permit (October 18, 2017)
- b. Amended zoning text (June 2017) and zoning diagram (October 18, 2017) for the area covered by the Oak Knoll PUD permit
- c. Oak Knoll PUD permit, including Oak Knoll Preliminary Development Plan (September 2017) and Oak Knoll Design Guidelines (January 2017), Final Development Plans for the Master Developer Improvements (May 30, 2017), and Final Development Plans for Club Knoll (April 3, 2017).
- d. Transportation Demand Management (TDM) Plan, as included in the April 27, 2017 Final Supplemental EIR
- e. Greenhouse Gas Reduction Plan (GGRP), as included in the April 27, 2017 Final Supplemental EIR
- f. Creek Protection Permit and Creek Restoration Plan (February 2016)
- g. Vesting Tentative Tract Map No 8320 (September 2017)
- h. Conditional Use Permit for Shared Access Facilities (October 18, 2017)

2. Effective Date, Expiration, Extensions and Extinguishment

Pursuant to the City’s Subdivision Code, an approved tentative tract map expires two years after its approval, but may be extended for an additional year, for a maximum for a three-

year period. The California Subdivision Map Act, however, specifies that an approved tentative map expires two years after its approval and that upon application of the subdivider prior to the expiration of the approved tentative map, the life of the tentative map may be extended for an additional six years. Case law indicates that these provisions in the California Subdivision Map Act preempt the City's Subdivision Code. The applicant has requested that a Vesting Tentative Tract Map (VTTM) for the project be extended the additional six-years pursuant to the California Subdivision Map Act, and has requested permission to file phased final maps. Accordingly, the VTTM shall expire at least eight years after the date of this approval. Nothing herein shall be in derogation of any additional extensions to the VTTM arising by the operation of law under the California Subdivision Map Act or other provision of state law. All Approvals, including but not limited to the Preliminary Development Plan (PDP) and Final Development Plans (FDPs) for the Planned Unit Development Permit, the Creek Protection Permit and Creek Restoration Plan and the Conditional Use Permit for Shared Access Facilities, shall expire at the same time as the VTTM.

Upon written request and payment of appropriate fees submitted no later than the expiration date of this Approval, the Director of City Planning or designee may grant a one-year extension of expiration dates, with additional extensions subject to approval by the approving body. Expiration of any necessary building permit or other construction-related permit for this project may invalidate this Approval if said Approval has also expired. If litigation is filed challenging this Approval, or a development moratorium affecting the Project is imposed, or its implementation, then the time period stated above for obtaining necessary permits for construction or alteration and/or commencement of authorized activities is automatically extended for the duration of the litigation or development moratorium affecting the Project.

3. Compliance with Other Requirements

The project applicant shall comply with all other applicable federal, state, regional, and local laws/codes, requirements, regulations, and guidelines, including but not limited to those imposed by the City's Bureau of Building, Fire Marshal, and Public Works Department. Compliance with other applicable requirements may require changes to the approved use and/or plans. These changes shall be processed in accordance with the procedures contained in Condition #4.

4. Minor and Major Changes

Minor changes to the approved project, plans, Conditions, facilities, or use may be approved administratively by the Director of City Planning.

Major changes to the approved project, plans, Conditions, facilities, or use shall be reviewed by the Director of City Planning to determine whether such changes require submittal and approval of a revision to the Approval by the original approving body or a new independent permit/approval. Major revisions shall be reviewed in accordance with

the procedures required for the original permit/approval. A new independent permit/approval shall be reviewed in accordance with the procedures required for the new permit/approval. Major Changes include but are not limited to changes to any of the following: density or intensity of uses in the project, changes to relocation and rehabilitation of Club Knoll, increases to building heights along roadways 26' wide or less, reduction in the amount of stormwater treatment capacity, diminution of the acreage proposed for public access, or changes that will result in any of the circumstances requiring further environmental review pursuant to CEQA Guidelines section 15162 or Public Resources Code section 21166. Refinements to engineering plans resulting in minor adjustments in lot sizes, and lot shapes are not considered to be major changes.

5. Compliance with Conditions of Approval

- a. The project applicant and property owner, including successors and subsequent merchant builders or homebuilders, (collectively referred to hereafter as the “project applicant” or “applicant”) shall be responsible for compliance with all the Conditions of Approval and any recommendations contained in any submitted and approved technical report at his/her sole cost and expense, subject to review and approval by the City of Oakland.
- b. The City of Oakland reserves the right at any time during construction to require certification by a licensed professional at the project applicant’s expense that the as-built project conforms to all applicable requirements, including but not limited to, approved maximum heights and minimum setbacks. Failure to construct the project in accordance with the Approval may result in remedial reconstruction, permit revocation, permit modification, stop work, permit suspension, or other corrective action.
- c. Violation of any term, Condition, mitigation measure or project description relating to the Approval is unlawful, prohibited, and a violation of the Oakland Municipal Code. The City of Oakland reserves the right to initiate civil and/or criminal enforcement and/or abatement proceedings, or after notice and public hearing, to revoke the Approval or alter these Conditions if it is found that there is violation of any of the Conditions or the provisions of the Planning Code or Municipal Code, or the project operates as or causes a public nuisance. This provision is not intended to, nor does it, limit in any manner whatsoever the ability of the City to take appropriate enforcement actions. The project applicant shall be responsible for paying fees in accordance with the City’s Master Fee Schedule for inspections conducted by the City or a City-designated third party to investigate alleged violations of the Approval or Conditions.

6. **Compliance with the Terms of this Approval**

Ongoing

For the duration of the project, the Director of Planning and Building or his/her designee shall have the authority to determine whether the Project Applicant and the project comply with the terms and conditions of this approval, including, without limitation, these Conditions of Approval, and shall have the authority to suspend further Project approvals, including without limitation, final subdivision maps, grading permits, building permits or certificates of occupancy for the duration of such noncompliance. =

The City shall take reasonable steps to promptly notify, in writing, the Project Applicant of any request (including a request by City staff or by the public) that the Director Planning and Building make a determination of noncompliance, and shall provide the Project Applicant a copy of all public documents related to such requests and a reasonable amount of time to respond and to cure any such alleged noncompliance. The City further shall take reasonable steps to promptly notify, in writing, the Project Applicant of any noncompliance determination by the Director of Building and Planning and, as applicable, shall provide the Project Applicant a copy of all documents used or relied upon in making such determination. On or before June 30 of each year, the Project Applicant shall submit to the Director of Planning and Building for review and approval the Compliance Matrix described in Condition 14 demonstrating that the legal entities implementation of its portion(s) or phase(s) of the Project comply with the terms and conditions of the Project Approvals. Such matrix may be used by the Director of Planning and Building to evaluate the Project Applicant's and the Project's compliance with the terms and conditions of the Project Approvals. The Project Applicant's obligation to submit such matrix shall terminate only upon the City's written determination that the Project, or the part or phase being undertaken by that legal entity, is completed.

Any failure by the City or Project Applicant to perform any action specified herein, or failure of any party timely to execute any agreement specified herein shall not be construed to limit any right or obligation otherwise specified in these Conditions of Approval. Any failure by City to insist upon the strict or timely performance of any obligation of Project Applicant, including, without limitation compliance with these Conditions of Approval, regardless of the length of time for which failure continues, shall not constitute a waiver of City's right to demand strict compliance with such requirements in the future. No waiver by City of any failure of performance with these Conditions of Approval or other requirements associated with the Project Approval or any law or regulation shall be effective or binding upon City unless made in writing by City, and no such waiver shall be implied from any delay or omission by City to take any action with respect to such failure.

7. **Enforcement**

It is recognized that separate legal entities may own and develop different phases or parts of the Project, and that these separate legal entities will be responsible for compliance with

all Conditions of Approval applicable to each such phase, part or facility as stated in Condition 5 above and Condition 8 below. The City shall enforce these Conditions against each legal entity/owner separately and independently from each other as long as the entities are not in common ownership and as long as the violation does not prevent compliance with Conditions on other phases or parts of the Project.

8. Signed Copy of the Approval/Conditions

A copy of the Approval letter and Conditions shall be signed by the project applicant, attached to each set of permit plans submitted to the appropriate City agency for the project, and made available for review at the project job site at all times. The Project Applicant and its agents, heirs, successors (including, without limitation, any successive owner of any portion of the Project Site) and assigns (collectively, "Project Applicant") shall be bound by these Conditions of Approval, any other terms and conditions and any other applicable legal requirements for implementation of the Project. The Project Applicant shall be responsible for assuring that any agent, heirs, successors and assigns are fully informed of, and bound by, the terms and conditions of this Approval.

9. Blight/Nuisances

The project site shall be kept in a blight/nuisance-free condition. Any existing blight or nuisance shall be abated within 60 days of approval, unless an earlier date is specified elsewhere.

10. Indemnification

- a. To the maximum extent permitted by law, the project applicant shall defend (with counsel acceptable to the City), indemnify, and hold harmless the City of Oakland, the Oakland City Council, the Oakland Redevelopment Successor Agency, the Oakland City Planning Commission, and their respective agents, officers, employees, and volunteers (hereafter collectively called "City") from any liability, damages, claim, judgment, loss (direct or indirect), action, causes of action, or proceeding (including legal costs, attorneys' fees, expert witness or consultant fees, City Attorney or staff time, expenses or costs) (collectively called "Action") against the City to attack, set aside, void or annul this Approval or implementation of this Approval. The City may elect, in its sole discretion, to participate in the defense of said Action and the project applicant shall reimburse the City for its reasonable legal costs and attorneys' fees.
- b. Within ten (10) calendar days of the filing of any Action as specified in subsection (a) above, the project applicant shall execute a Joint Defense Letter of Agreement with the City, acceptable to the Office of the City Attorney, which memorializes the above obligations.

- c. These obligations and the Joint Defense Letter of Agreement shall survive termination, extinguishment, or invalidation of the Approval. Failure to timely execute the Letter of Agreement does not relieve the project applicant of any of the obligations contained in this Condition or other requirements or Conditions of Approval that may be imposed by the City.

11. Severability

The Approval would not have been granted but for the applicability and validity of each and every one of the specified Conditions, and if one or more of such Conditions is found to be invalid by a court of competent jurisdiction this Approval would not have been granted without requiring other valid Conditions consistent with achieving the same purpose and intent of such Approval.

12. Special Inspector/Inspections, Independent Technical Review, Project Coordination and Monitoring

The project applicant may be required to cover the full costs of independent third-party technical review and City monitoring and inspection, including without limitation, special inspector(s)/inspection(s) during times of extensive or specialized plan-check review or construction, and inspections of potential violations of the Conditions of Approval. The project applicant shall establish a deposit with the Bureau of Building, if directed by the Building Official, Director of City Planning, or designee, prior to the issuance of a construction-related permit and on an ongoing as-needed basis.

13. Public Improvements

The project applicant shall obtain all necessary permits/approvals, such as encroachment permits, obstruction permits, curb/gutter/sidewalk permits, and public improvement (“p-job”) permits from the City for work in the public right-of-way, including but not limited to, streets, curbs, gutters, sidewalks, utilities, and fire hydrants. Prior to any work in the public right-of-way, the applicant shall submit plans for review and approval by the Bureau of Planning, the Bureau of Building, and other City departments as required. Public improvements shall be designed and installed to the satisfaction of the City. The Applicant shall offer public improvements for dedication to the City as further described in Condition No. 54.

14. Compliance Matrix

The Project Applicant shall submit a Compliance Matrix, in both written and electronic form, for review and approval by the Bureau of Planning and the Bureau of Building that lists each Condition of Approval (including each mitigation measure if applicable) in a sortable spreadsheet. The Compliance Matrix shall contain, at a minimum, each required Condition of Approval, when compliance with the Condition is required, and the status of compliance with each Condition. For multi-phased projects, the Compliance Matrix shall

indicate which Condition applies to each phase. The project applicant shall submit the initial Compliance Matrix prior to the issuance of the first construction-related permit and shall submit an updated matrix upon request by the City.

15. Construction Management Plan

Prior to the issuance of each construction-related permit and project phase, the project applicant or his/her general contractor shall submit a Construction Management Plan (CMP) for review and approval by the Bureau of Planning, Bureau of Building, and other relevant City departments such as the Fire Department and the Public Works Department as directed. The CMP shall contain measures to minimize potential construction impacts including measures to comply with all construction-related Conditions of Approval (and mitigation measures if applicable) such as dust control, construction emissions, hazardous materials, construction days/hours, construction traffic control, waste reduction and recycling, stormwater pollution prevention, noise control, complaint management, and cultural resource management (see applicable Conditions below). The CMP shall provide project-specific information including descriptive procedures, approval documentation, and drawings (such as a site logistics plan, fire safety plan, construction phasing plan, proposed truck routes, traffic control plan, complaint management plan, construction worker parking plan, and litter/debris clean-up plan) that specify how potential construction impacts will be minimized and how each construction-related requirement will be satisfied throughout construction of the project.

16. Standard Conditions of Approval / Mitigation Monitoring and Reporting Program (SCAMMRP)

All mitigation measures identified in the *Oak Knoll Mixed Use Community Plan Project Supplemental EIR* are included in the Standard Condition of Approval / Mitigation Monitoring and Reporting Program (SCAMMRP) which is included in these Conditions of Approval and are incorporated herein by reference, as Attachment N, as Conditions of Approval of the project. The Standard Conditions of Approval identified in the *Oak Knoll Mixed Use Community Plan Project Supplemental EIR* are also included in the SCAMMRP, and are, therefore, incorporated into these Conditions by reference but are not repeated in these Conditions. To the extent that there is any inconsistency between the SCAMMRP and these Conditions, the more restrictive Conditions shall govern. In the event a Standard Condition of Approval or mitigation measure recommended in the *Oak Knoll Mixed Use Community Plan Project Supplemental EIR* has been inadvertently omitted from the SCAMMRP, that Standard Condition of Approval or mitigation measure is adopted and incorporated from the *Oak Knoll Mixed Use Community Plan Project Supplemental EIR* into the SCAMMRP by reference. The project applicant and property owner and subsequent merchant builders or developers, shall be responsible for compliance with the requirements of any submitted and approved technical reports, all applicable mitigation measures adopted, and with all Conditions of Approval set forth herein at his/her sole cost and expense, unless otherwise expressly provided in a specific mitigation measure or Condition of Approval, and subject to the review and approval by the City of Oakland.

The SCAMMRP identifies the timeframe and responsible party for implementation and monitoring for each Standard Condition of Approval and mitigation measure. Monitoring of compliance with the Standard Conditions of Approval and mitigation measures will be the responsibility of the Bureau of Planning and the Bureau of Building, with overall authority concerning compliance residing with the Environmental Review Officer. Adoption of the SCAMMRP will constitute fulfillment of the CEQA monitoring and/or reporting requirement set forth in section 21081.6 of CEQA.

Prior to the issuance of the first construction-related permit, the project applicant shall pay the applicable mitigation and monitoring fee to the City in accordance with the City's Master Fee Schedule.

17. Payment of Fees

- a. Prior to issuance of a building permit, the project Applicant shall submit payment for all applicable and required fees including but not limited to the School fees, transportation fees, etc.
- b. Within one year following the Effective Date, the Project Applicant shall enter into an agreement to specify how fees and deposits will be managed to implement the Project. The City and the Project Applicant acknowledge the Standard Conditions of Approval/Mitigation Monitoring and Reporting Program (SCAMMRP) requires the Project Applicant to directly contract with a number of independent experts monitoring construction or operation activities, including but not limited to biological, historic architectural and tribal monitors. In addition, the Project Applicant shall fund the full costs of all independent technical and other consultants the City reasonably deems necessary to comply with the Conditions of Approval, the Project Approvals and the SCAMMRP, as the final design and building permit plans for each Development Phase are submitted. All work performed pursuant to this Condition of Approval shall be under the direct supervision and direction of the City. Accordingly, the Applicant shall deposit funds in amounts acceptable to the City to cover the full costs of such consultants and other types or review, monitoring and inspection, including, without limitation, third-party plan check fees.

PART 2: PROJECT SPECIFIC STANDARD CONDITIONS OF APPROVAL

Recommended Measures from Supplemental EIR

18. Star Tulip: Recommendation BIO-1

Prior to construction, the following measures shall be implemented:

- a. A qualified botanist shall flag the location of Oakland star tulip plants during the flowering period prior to site grading. Under the direction of the qualified botanist, bulbs and associated soil plugs shall be harvested from 100 percent of the Oakland star tulip plants within the Project site following flowering and withering of leaves.
- b. Harvested bulbs shall be replanted on site in an area designated for passive open space preservation.
- c. The Project sponsor shall prepare a Monitoring Plan for relocated/transplanted Oakland star tulip plants within the Project site. The plan shall detail methods and location for relocating or reintroducing Oakland star tulip population, annual monitoring for successful establishment, and reporting protocols. The success criteria for relocated plants is 0.5:1 ratio [number of plants established: number of plants impacted] after two years.
- d. Contingency measures such as obtaining bulbs from other locations should be included in the plan if it appears the success criterion will not be met after two years.
- e. The plan shall be developed in consultation with the appropriate agencies prior to the start of local construction activities.
- f. Monitoring reports shall include photo-documentation, planting specifications, a site layout map, descriptions of materials used, and justification for any deviations from the monitoring plan.

19. Sudden Oak Death (during relocation of existing trees within the Project site or introduction of new trees): Recommendation BIO-2)

The following measures shall be implemented during relocation of existing trees within the Project site or introduction of new trees to the Project site through mitigation plantings to prevent the spread of *Phytophthora ramorum*, the pathogen that causes SOD.

- a. Before working:
 - i. Provide crews with sanitations kits. (Sanitation kits should contain the following: Chlorine bleach [10/90 mixture bleach to water], or Clorox Clean-up®, scrub-brush, metal scraper, boot brush and plastic gloves).
 - ii. Ensure that work crews have properly cleaned and sanitized pruning gear, trucks and chippers prior to entering the Project Area.
 - iii. Clean and sanitize shoes, pruning gear and other equipment before working in an area with susceptible species (i.e. coast live oak, canyon live oak and California bay).

- b. While working:
 - i. When possible, conduct all tree work on *P. ramorum*-infected and susceptible species during the dry season (June - October). The pathogen is most likely to spread during periods of high rainfall especially in spring (April and May). Working during wet conditions should be avoided.
 - ii. If working in wet conditions cannot be avoided, keep equipment on paved or dry surfaces and avoid mud.
 - iii. Work in disease-free areas before proceeding to suspected-infestation areas.
 - iv. All debris from California bay trees, the primary vector of the pathogen, shall be mulched and spread in place, moved to a sunny dry area free of coast live oak, or disposed of offsite in a permitted disposal facility in accordance with state and federal regulations.
 - v. When removing California bay trees, all mulch and debris shall be segregated from other species when chipping, and all pruning gear and equipment, including chippers and trucks shall be cleaned and sanitized before working on coast live oaks.

- c. After working:
 - i. Use all reasonable methods to clean and sanitize personal gear and crew equipment before leaving a *P. ramorum*-infested site. Scrape, brush and/or hose off accumulated soil and mud from clothing, gloves, boots and shoes. Remove mud and plant debris, especially California bay, by blowing it out or power washing chipper trucks, chippers, buckets trucks, fertilization and soil aeration equipment, cranes, and other vehicles.
 - ii. Restrict the movement of soil and leaf litter under California bay trees as spores are most abundant on California bay leaves. Contaminated soil, particularly mud, and plant debris on vehicle tires, workers boots, shovels, chippers, stump grinders, trenchers, etc., may result in pathogen spread if moved to a new, un-infested site. Thoroughly clean all equipment and remove or wash soil, mud and plant debris from these items before use at another site. If complete on-site sanitation is not possible, complete the work at a local power wash facility.
 - iii. Tools used in tree removal/pruning may become contaminated and should be cleaned thoroughly with a scrub brush and disinfected with Lysol® spray, a 70% or greater solution of alcohol, or a Clorox® solution (1 part Chlorox® to 9 parts water or Clorox Clean-up®).

- d. When planting:

- i. Replanting should occur in the early fall when the pathogen is less active, and in order to take advantage of seasonal rains. Replanting activities should avoid late winter and spring.
- ii. Planting sites for susceptible species including coast live oak and canyon live oak should be selected in areas that are at least 20 yards away from California bay trees, brush and/or plant material.
- iii. California bay shall not be used as mulch for new plantings.
- iv. Small, non-protected (less than 9 inches diameter) California bay trees and brush should be cleared within a 20-yard or greater buffer where feasible to protect susceptible oak trees that are selected for preservation.

20. CPTED: Recommendation PSR-1

As part of the City's standard development review process, the Project Applicant should submit the Project plans for Crime Prevention through Environmental Design (CPTED) review by the Oakland Police Department and Bureau of Planning staff. The Project should consider design features included on the City's CPTED Checklists for residential, commercial, and civic uses. The Project Applicant shall incorporate the Police Department's recommendations into the final Project design and shall implement the design measures to an extent generally consistent with this Project Approval. CPTED review and recommendations may address points of access to the Project site or adjacent parcels, adequate public lighting, landscaping and buffering that provides visual access, particularly in parks, open spaces, and pedestrian and bicycle facilities, etc.

21. Pedestrian Safety (Crosswalks)

- a. Recommendation TRANS-1: Provide high-visibility crosswalks (meaning denoted with reflective striping or other high-visibility pavement markings) across Mountain Boulevard at Creekside Parkway, across Mountain Boulevard at Sequoyah Road, across Keller Avenue at Creekside Parkway, and at the unsignalized or uncontrolled movements at intersections within the site, consistent with City of Oakland's guidelines in place at the time of final design.
- b. Recommendation TRANS-3: Provide sidewalk along southbound Mountain Boulevard to close the existing gap between the Oak Knoll Heights exit driveway and the intersection of Sequoyah Road and Mountain Boulevard.

22. Off-site Transportation Improvements and Capital Improvements

- a. Applicant shall design and install the off-site intersection improvements described as intersections #2, 3, 12, 13, 16, 38, and 40 in the Final EIR, provided that Caltrans and City issue all necessary permits for such improvements.

- b. Applicant shall complete installation of all such off-site improvements in accordance with the timing provisions as set forth in the EIR. The EIR's timing requirements are expressed below, in terms of Equivalent Housing Units ("EHU's"), defined in Exhibit A to these Conditions.
- i. #2: I-580 Eastbound On-Ramp/Seminary Avenue/Kuhnle Avenue (390th EHU)
 - ii. #3: I-580 Westbound Off-Ramp/Seminary Avenue/Kuhnle Avenue (940th EHU)
 - iii. #12: I-580 Eastbound Off-Ramp/Fontaine Street/Keller Avenue (280th EHU)
 - iv. #13: Mountain Boulevard/Keller Avenue (60th EHU)
 - v. #16: I-580 Westbound Off-Ramp/Mountain Boulevard/Shone Avenue (500th EHU)
 - vi. #38: Improvements to Golf Links Road/I-580 Eastbound off ramp/98th Avenue (230th EHU)
 - vii. #40: Mountain Boulevard/Golf Links Road/I-580 WB Ramp (230th EHU)
- c. Applicant shall design and install public parks and trails in accordance with this Approval and shall dedicate such parks and trails, as well as certain open space areas ("Parks and Open Space Facilities") to the City or the Geologic Hazard Abatement District ("GHAD") in accordance with Exhibit B.
- d. These off-site transportation improvements and onsite parks and open space facilities may be considered "developer constructed facilities" (i.e., transportation or capital facilities that would otherwise be funded in whole or in part by the City's Transportation and Capital Improvements Impact Fee program (Oakland Municipal Code section 15.74) if approved by the City. The Applicant may seek a Credit and Reimbursement Agreement (Agreement) with the City (pursuant to Municipal Code section 15.74.120), whereby the Applicant may receive credit against the amount of the impact fee due, and possibly reimbursement from impact fees paid by other development projects. The applicant may also apply to the City Administrator for reductions or waivers of the impact fees (pursuant to Municipal Code section 15.74.080), whereby the City Administrator may find the Project will not generate a need for transportation or capital improvements infrastructure or the need will be limited so as to justify a reduced impact fee, because the Project will instead provide for these transportation or capital infrastructure improvements. The ultimate approval of any credits, reductions or waivers are at the sole discretions of the City.

Planned Unit Development Permit, Preliminary Development Plan and Final Development Plan**23. Phase 1 Public Improvements**

Multiple final maps may be filed for the Project, subject to the Phasing Schedule set forth in Oak Knoll Preliminary Development Plan, and a more fully set forth below. Modifications to this Phasing Schedule are subject to the review and approval of the Development Director, and at his/her sole discretion; any modifications may be subject to review of the Planning Commission. The Oak Knoll Preliminary Development Plan anticipates that the property will be developed in three phases, as shown in **Exhibit C**. The Developer shall have the right to develop the Project at such time as Developer deems appropriate; however, Developer may not proceed with development of Phase 2 or 3 until all public improvements for Phase 1 (see **Exhibit D**) are complete, as further described below for specific Phase 1 public improvements.

- a. Prior to issuance of the first building permit for Phase 1, Developer shall obtain all necessary permits and shall commence construction of all **Rifle Range Creek improvements**, consistent with the Hydrology Report (Restoration Plan and Preliminary Creek Protection Plan, ESA, as revised February 24, 2016) and Master Developer Site Improvements for Creek Restoration Planting Plan and Restoration Sections (FDP Sheets L043 through L045), and including City-issued conditions of approval pursuant to the Creek Permit for Rifle Range Creek, and all applicable EIR mitigation measures. All Rifle Range Creek improvements must be deemed complete and satisfactory by City and any other applicable regulatory agencies prior to issuance of a certificate of occupancy for the final unit in Phase 1, and prior to issuance of any building permits for Phases 2 or 3. The term “all Rifle Range Creek improvements” include the following:
 - i. The **Creekside Loop Vehicle Bridge**, consistent with Master Developer Site Improvements FDP, Sheets L012 through L014
 - ii. The **Pedestrian Bridge** across Rifle Range Creek, consistent with Master Developer Site Improvements FDP, Sheets L012 through L014
 - iii. Trail improvements and trail signage through Open Space Parcel A (i.e., the **Rifle Range Creek Creekside Trail**), connecting from Creekside Parkway to the relocated Club Knoll parcel, consistent with Master Developer Site Improvements FDP Sheet L005.
- b. To facilitate orderly development, the construction of primary access roadways (see Creekside Parkway and Creekside Loop, below) may be individually phased to meet initial Phase 1 development requirements. Prior to issuance of the first certificate of occupancy for the first residential unit within any individual portion of Phase 1, any sub-phased roadway improvements shall meet the requirements of the City of Oakland Subdivision Ordinance and the provisions of the Subdivision

Map Act, and shall be approved by the Oakland Fire Department as providing two acceptable means of access, inclusive of construction of the Creekside Loop Vehicle Bridge.

- c. Prior to issuance of any building permits for Phases 2 or 3, Developer shall grade and construct all remaining **Creekside Parkway** improvements from Mountain Boulevard to Keller Avenue, consistent with Master Developer Site Improvements FDP Sheets L002 and L003, inclusive of intersection improvements at Mountain Boulevard, streetlights, entry monuments and streetscape landscape improvements. The Creekside Parkway shall be designed and installed design fully consistent with the Creekside Parkway Design Details as presented in Master Developer Site Improvements FDP Sheet L007. These improvements shall include the following:
 - i. A 68-foot right-of-way inclusive of **Class I bikeway and multi-use trail along Rifle Range Creek**.
 - ii. Installation of a new traffic signal at the **Mountain Boulevard/Creekside Parkway intersection**
 - iii. Installation of an all-way-stop control at the **Keller Avenue/Creekside Parkway intersection**
 - iv. Design and relocation of the **bus stop and bus shelter** near the Mountain Boulevard/Creekside Parkway intersection
- d. Prior to issuance of any building permits for Phases 2 or 3, Developer shall grade and construct all remaining **Creekside Loop** improvements, from Mountain Boulevard to Creekside Parkway (or to the Seneca parcel, if the Seneca parcel is operating), consistent with Master Developer Site Improvements FDP Sheets L003, inclusive of streetlights and streetscape landscape improvements. The Creekside Loop design shall be fully consistent with the Creekside Loop Design Details as presented in Master Developer Site Improvements FDP Sheet L008.
 - i. The Developer shall install improvements as necessary at the **Mountain Boulevard/Creekside Loop intersection** to ensure right-in/right-out only access.
- e. Prior to issuance of any development-related permit for VTTM Parcel 7, Developer shall commence relocation of the Club Knoll building, including obtaining a necessary demolition permit, grading of the new building receiver site (VTTM Parcel H), disassembly of the existing Club Knoll building, and moving all disassembled building components to safe storage at VTTM Parcel 7, consistent with **Club Knoll Relocation and Rehabilitation** FDP (Architectural Dimensions, April 03, 2017), and all applicable EIR mitigation measures. Prior to issuance of any building permits for Phases 2 or 3, or within 2 years from issuance of the Club Knoll demolition permit for relocation, whichever comes

first, Developer shall complete (via City issuance of a certificate of occupancy) restoration of Club Knoll.

- f. Prior to issuance of a certificate of occupancy for any residential units on VTTM Parcel 7, Developer shall install street and sidewalk improvements, including approved *Emergency Vehicle Access* (EVA) improvements through the “Barcelona” property, with EVA-only connection to Sequoyah Road.
- g. Prior to issuance of the 100th residential building permit in Phase 1, Developer shall construct the *Creekside Entry Park* improvements (including trail and trail signage), consistent with Master Developer Site Improvements FDP, Sheets L027 through L028.
- h. Prior to issuance of a certificate of occupancy for any development within the Retail Village that is adjacent to the public plaza, Developer shall install the *Public Plaza* as indicated in the Preliminary Development Plan. The proposed grocery store site can be constructed first, without the plaza.

24. Phase 2 and 3 Public Improvements

The Developer shall have the right to develop Phases 2 and 3 of the Project at such time as Developer deems appropriate; however, Developer may not proceed with development of Phases 2 or 3 until all public improvements for Phase 1 (see Condition #23 above) are completed, and as further described below for specific Phase 2 and 3 public improvements.

- a. Developer shall construct the *North Neighborhood Park*, consistent with Master Developer Site Improvements FDP, Sheets L029 through L031, prior to issuance of a certificate of occupancy for any residential units on VTTM Parcels 21 and/or 25.
- b. Developer shall construct the *Village Pocket Park*, consistent with Master Developer Site Improvements FDP, Sheets L032 through L034, prior to issuance of the final certificate of occupancy for residential units on VTTM Parcels 19 or 20.
- c. Developer shall construct the *Oak Knoll Memorial Park* including the trail and trail signage through Open Space Parcel J, consistent with Master Developer Site Improvements FDP, Sheets L035 and L038, prior to issuance the first certificate of occupancy for residential units on VTTM Parcel 15, or prior to the dedication of Open Space Parcel J.
- d. Developer shall construct the *Emergency Vehicle Assess* improvements to VTTM Parcels 16 and 17 as shown on the VTTM, prior to issuance of a certificate of occupancy for any residential units on VTTM Parcels 16 or 17.

- e. Developer shall implement trail improvements and trail signage through *Open Space Parcel I* (i.e., the Hardenstein property), prior to issuance of a certificate of occupancy for any residential units on VTTM Parcels 13 or 14.
- f. Developer shall implement trail improvements and trail signage through *Open Space Parcels B and R* (i.e., adjacent to lower Keller Avenue and Mountain Boulevard), prior to issuance of a certificate of occupancy for any residential units on VTTM Parcels 1 or 2.

25. Club Knoll Work Plan, Approval and Monitoring

Prior to approval of a construction-related permit for Club Knoll

A Final Work Plan for Club Knoll Relocation and Rehabilitation shall be prepared and submitted for City review and approval. The contents of the Final Work Plan shall include:

- a. Final Relocation Travel Route Plan
- b. Complete Baseline Building Conditions Study, Structural
- c. Complete Building Features Inventory and Plan
- d. All identified Specific Relocation/ Rehabilitation Measures as included in the SEIR

At City's discretion, City may retain third-party independent professional consultants to review and make recommendation on the Final Work Plan prior to approval. The Final Work Plan shall be submitted to LPAB for their review and approval prior to implementation. A third-party independent professional preservation architect and structural engineer (as defined in the Carey & Co. report dated May 3, 2016) shall be on site to monitor dismantlement and reassembly of Club Knoll.

26. Owner's Completion Bond

Prior to issuance of a construction-related permit

Consistent with Municipal Code Section 15.44.030, the project applicant or their designated representative shall file with the Building Inspector a surety company bond executed by owner or lessee as principal, and conditioned as follows:

- a. That all of the work required to be done to complete the relocation and rehabilitation shall be as set forth in the Final Work Plan for Club Knoll pursuant to the conditions of approval set forth herein.

- b. Such bond shall be in principal amount equal to the estimated cost of the work proposed to be done, plus ten percent, and shall name the City of Oakland as obligee.
- c. If the Building Inspector determines that the conditions and obligations of the Club Knoll relocation and rehabilitation permit as set forth in the Final Work Plan have not been met by the property owner or lessee, the Building Inspector may notify the property owner of the obligations with a 60-day opportunity to cure. If such cure is not effected, the City may proceed at the property owner's expense to complete all remaining obligations under the Final Work Plan. Remaining relocation and rehabilitation work may be done by private contractors, and the Building Inspector shall keep an itemized account of all such reasonable costs.
- d. Upon completion of the work, the City Manager or his or her designee shall provide written notice to the owner or lessee, showing the itemized reasonable cost of such work and giving notice of the day, hour and place when the City Council will hear and pass upon a report by the Building Inspector or his or her representative of said costs.

27. Surety Bond

Prior to issuance of a construction-related permit

Consistent with Municipal Code Section 15.44.070 and 080, the project applicant shall file a surety bond with the City Clerk, executed by the project applicant and by a surety company authorized to do business in California as surety.

- a. The surety bond shall name the city of Oakland as obligee, and shall be a principal amount as may be fixed by the City Manager based upon the facts and conditions of the proposed relocation and rehabilitation of Club Knoll.
- b. The surety bond shall be conditioned as to the following:
 - i. That the project applicant (or their designated representative) shall well, truly, honestly and faithfully perform and execute the duties of a building mover as regulated by the Oakland Municipal Code.
 - ii. That the project applicant (or their designated representative) shall strictly comply with all the applicable conditions and requirements of the Oakland Municipal Code regulating the moving of buildings.
 - iii. That the project applicant (or their designated representative) shall pay any and all losses or damages that may result from moving the Club Knoll building, to any property owned or controlled by the city or for which it may be responsible, and to any property belonging to any public utility company or public carrier.

- iv. That the project applicant (or their designated representative) shall save, indemnify and keep harmless the city against all liabilities, judgments, costs and expenses which may in any way accrue against the city as a consequence of the granting of the permit to move the building.
- v. That the project applicant (or their designated representative) shall file an insurance policy of public liability and property damage with the City Clerk that satisfies all City requirements.

28. Club Knoll Relocation

The relocation of Club Knoll shall follow all building permit procedures including but not limited to noticing requirements, as applicable.

29. Historic Maintenance

Ongoing

The project applicant and/or successors shall keep in good repair all exterior and interior portions of Club Knoll, the maintenance of which is necessary to prevent deterioration and decay of the building. The Covenants, Conditions and Restrictions (CC&Rs) approved for the operation of the HOA shall include:

- a. a requirement to contract with a professional property management firm to operate and maintain the Club Knoll building on their behalf, potentially off-setting these management expenses through revenue derived from commercial lease of certain space within the building.
- b. a provision requiring the HOA to maintain the exterior façades of the building and the landscaping around the building at commercially reasonable standards of repair and appearance (which standards shall be defined in the CC&Rs)
- c. a provision stating that, after adequate notice to the HOA and an opportunity for the HOA to cure any alleged failure to maintain, the City shall have the right to perform the required maintenance and repairs in the event the HOA fails to do so,
- d. a written procedure for the reimbursement of costs incurred by the City in so maintaining to the standard set forth in the CC&Rs;
- e. a provision stating that the City shall have the right to enforce the Club Knoll maintenance provisions contained in the CC&Rs as a third-party beneficiary.

30. Public Art for Private Development Condition of Approval (Commercial)

The commercial portions of the Project are subject to the City's Public Art Requirements for Private Development, adopted by Ordinance No. 13275 C.M.S. ("Ordinance"). As a

non-residential project, the public art contribution requirement is equivalent to one percent (1%) of building development costs for the project. The contribution requirement can be met through the commission or acquisition and installation of publicly accessible art on the development site, payment of an in-lieu contribution to the City's established public art fund, or satisfaction of alternative compliance methods described in the Ordinance. The applicant shall provide proof of full payment of the in lieu contribution, or provide proof of installation of artwork on the development site prior to the City's issuance of a final certificate of occupancy for the applicable Phase in which the public art is located unless a separate, legal binding instrument is executed ensuring compliance within a timely manner, subject to City approval. On-site art installation shall be designed by independent artists, or artists working in conjunction with arts or community organizations, that are verified by the City to either hold a valid Oakland business license or be an Oakland-based 501(c)(3) tax designated organization in good standing. If the applicant or owner desires to install art created by an artist not verified by the City, the applicant or owner shall pay a verification fee to the City in accordance with the Master Fee Schedule.

When Required: Prior to issuance of Final Certificate of Occupancy and Ongoing

Initial Approval: Bureau of Planning; Bureau of Building

Monitoring/Inspection: Bureau of Building

31. Public Art for Private Development Condition of Approval (Residential)

The residential portions of the Project are subject to the City's Public Art Requirements for Private Development, adopted by Ordinance No. 13275 C.M.S. ("Ordinance"). As a residential project, the public art contribution requirement is equivalent to one-half percent (0.5%) of building development costs for the project. The contribution requirement can be met through the commission or acquisition and installation of publicly accessible art on the development site, payment of an in-lieu contribution to the City's established public art fund, or satisfaction of alternative compliance methods described in the Ordinance. The applicant shall provide proof of full payment of the in lieu contribution, or provide proof of installation of artwork on the development site prior to the City's issuance of a final certificate of occupancy for each Phase unless a separate, legal binding instrument is executed ensuring compliance within a timely manner, subject to City approval. On-site art installation shall be designed by independent artists, or artists working in conjunction with arts or community organizations, that are verified by the City to either hold a valid Oakland business license or be an Oakland-based 501(c)(3) tax designated organization in good standing. If the applicant or owner desires to install art created by an artist not verified by the City, the applicant or owner shall pay a verification fee to the City in accordance with the Master Fee Schedule.

The project sponsor is encouraged to allocate the public art funds to hire Oakland-based artists to provide public art on or near the site.

When Required: Prior to issuance of Final Certificate of Occupancy for the first unit and Ongoing

Initial Approval: Bureau of Planning; Bureau of Building

Monitoring/Inspection: Bureau of Building

32. Club Knoll Hours of Operation and Operations

Hours of Operation for community events, commercial operations and Home Owner's Association (HOA) use shall be included and specifically outlined in the CC&R's for HOA. In addition, the Club uses shall operate within the Performance Standards outlined in Planning Code Section 17.120. Furthermore, any potential Alcohol and Beverage Sales shall meet Planning Code Section 17.103.030.

33. Club Knoll Restaurant/Kitchen Uses

Prior to issuance of a building permit, the project Applicant shall "plumb" Club Knoll for restaurant/kitchen uses including grease interceptors and exhaust, subject to the requirements of the Historic Building Code.

34. Plug-In Electric Vehicle (PEV) Charging Infrastructure

- a. PEV-Ready Parking Spaces: For on-site parking, the project applicant shall comply with of the requirements of Chapter 15.04 of the Oakland Municipal Code for the installation of parking spaces equipped with full electrical circuits designated for future PEV charging (i.e. "PEV-Ready) per requirements of Chapter 15.04 of the Oakland Municipal Code. Building electrical plans shall indicate sufficient electrical capacity to supply the required PEV-Ready parking spaces.

When Required: Prior to building permit final

Initial Approval: Bureau of Building

Monitoring/Inspection: Bureau of Building

- b. PEV-Capable Parking Spaces: For residential and non-residential projects with more than 11 onsite parking spaces, the project applicant shall comply with requirements of Chapter 15.04 of the Oakland Municipal Code for the installation of ADA-inaccessible conduit to supply PEV-capable parking spaces. The Building electrical plans shall indicate sufficient electrical capacity to supply the required PEV-capable parking spaces.

When Required: Prior to building permit final

Initial Approval: Bureau of Building

Monitoring/Inspection: Bureau of Building

- c. ADA-Accessible Spaces: For public buildings, public accommodations, commercial buildings, and publicly funded housing, the project applicant shall indicate the location of future accessible EV parking spaces as required under Title 24 Chapter 11B Table 11B-228.3.2.1, and specify plans to construct all future accessible EV parking spaces with appropriate grade, vertical clearance, and accessible path of travel to allow installation of accessible EV charging station(s).

When Required: Prior to building permit final

Initial Approval: Bureau of Building

Monitoring/Inspection: Bureau of Building

35. Bike Lane Requirements.

Commensurate with required traffic intersection improvements, the following adjacent or proximate bike lanes shall be installed, confined within existing roadbeds through the restriping of traffic lanes. Modifications to the City's standard lane widths may be required to install these bike lanes. The installation of these bike lanes shall not require any modifications to any roadbeds, curb, gutter, bridge or other structures, other than restriping. The plans will be reviewed by the Department of Transportation's Bicycle & Pedestrian Facilities Program. If these bike lanes are not feasible under the foregoing limitations or result in new traffic impacts that were not studied in the City's Bicycle Master Plan or the Oak Knoll Project Supplemental EIR, they shall not be required to be installed as a Condition of Approval.

- a. Mountain Blvd (Maynard Ave/I-580 WB on-ramp to Golf Links Rd): If engineering studies indicate bike lanes are feasible, install bike lanes through restriping in each direction on Mountain Blvd from Maynard Ave to Golf Links Rd. Minimize the elimination of on-street parking from Shone Ave to Keller Ave by having one northbound lane. If a second northbound lane is deemed necessary to meet City traffic standards on the approach to Keller Ave., and is feasible to construct, minimize its length to what is necessary for the traffic signal operations. From Sequoyah Rd to Golf Links Rd, maintain the northbound on street parking that is immediately in front of private residences. This will leave some gaps in the bike lanes. Eliminate the parking that is not in front of private residences in order to install the bike lanes. As part of the intersection design for Mountain Blvd/Golf Links Rd, include bike lanes in both directions on Mountain Blvd between Golf Links Rd and the point approximately 400 feet north of the intersection where the curb-to-curb width of Mountain Blvd narrows.

- b. Golf Links Rd (Mountain Blvd to 98th Ave) and 98th Ave (Golf Links Rd to Stanley Ave): Install bike lanes in each direction on Golf Links Rd (Mountain Blvd to 98th Ave) and on 98th Ave (Golf Links Rd to Stanley Ave). On 98th Ave, maintain the existing on-street parking at the frontage of the Bishop O’Dowd High School parking lot, resulting in a short bike lane gap.
- c. Edwards Ave (Mountain Blvd/I-580 WB on-ramp to I-580 EB off-ramp): Install bike lanes in each direction on this one block of Edwards Ave (Mountain Blvd/I-580 WB on-ramp to I-580 EB off-ramp) to improve bicyclist safety on the existing bike route in the Mountain Blvd corridor. Specifically, the freeway overpass creates low light conditions and visibility issues that may be ameliorated by separating bicyclists from motor vehicles with dedicated bicycle lanes.
- d. Kunhle Ave (Mountain Blvd to Seminary Ave/Sunnymere Ave): In conjunction with the installation of two traffic signals, redesign through restriping the one block of Kunhle Ave from Mountain Blvd to Seminary Ave as follows: one travel lane per direction, left turn pockets, and one bike lane per direction. This redesign will eliminate one travel lane per direction.

36. North Neighborhood Park along Keller

No sports field lighting or permanent field striping shall be installed in the play lawn (informal ball field).

Design Guidelines

37. Facade Materials

No foam materials are appropriate as a façade, trim, parapet or detail material.

38. Wall Design along Mountain

Prior to issuance of a Building Permit, the project Applicant shall submit the design of the privacy wall, consistent with the entitlement documents, along Mountain Boulevard to the Bureau of Planning for review and approval with the Final Development Plan submitted for that area of the Project.

39. Master Signage Program

The applicant for the Retail Village FDP shall submit a master signage program for the Village Retail Center for review and approval per the Planning Code. No signage shall be visible from the freeway without subsequent CEQA review for affects to a scenic highway.

40. Retail Signage

No retail or commercial signage shall be visible from I-580, a scenic highway.

41. Trail, Creek, and Bike Lane Signage / Markers

The applicant shall submit construction drawings of trail, creek and bike lane signage and markers prior to the issuance of grading and building permits for each phased FDP. The construction drawings shall be consistent with the signage program submitted as part of the Master Developer FDP.

Vesting Tentative Tract Map

42. City Surveyor Conditions

Prior to recording of each map

Multiple phased final maps may be filed subject to the Phasing Schedule set forth in Oak Knoll Preliminary Development Plan. Modifications to the Phasing Schedule are subject to the review and approval of the Development Director, and at his/her sole discretion; any modifications may be subject to review of the Planning Commission.

- a. All street shall have monuments installed for each Final Map as follows:
 - i. Monuments shall be shown on the tentative map at all BC's, PC's PRC's, Intersections (with other monument lines) and Center of Cul-de Sacs or within 25 feet of the end of a road.
 - ii. This requirement is for ALL roads and driveways, public or private.
 - iii. Monuments shall be coordinated to be parallel with the right of way and equally offset from the centerlines. No utility lines shall be allowed to be placed within 3 feet on either side of the monument lines.
 - iv. Monuments shall be no greater than 600 feet apart on tangent sections. Within tangent sections greater than 600' the monuments shall be evenly spaced.
 - v. All monuments shall comply with the Standard City Monument drawings in use at that time which will be available from the City Surveyor.
 - vi. All monuments not in place at the time of the submission of the first final map shall be bonded to insure installation.
 - vii. Any existing monuments by the federal government or others shall be mapped, identified and the appropriate Record of Survey or Corner Record filed with the County. Castings and disks shall be salvaged and delivered to the City of Oakland.
- b. Benchmarks (BMs) shall be installed with the installation of improvements at the time of the filing of each final map at intersections or mid-block as follows:
 - i. BMs shall be spaced at approximately a 1/4 mile (a 1250 to 1500 foot) radii throughout the entire site.

- ii. All BMs shall be established on City of Oakland datum
 - iii. For Each BM, when set, the surveyor shall prepare an official ‘card’ (electronic) which will be provided by the City Surveyor’s office which will include level notes, descriptions, elevation, etc.
 - iv. Benchmarks not in place at the time of the submission of each final map shall be bonded to insure installation.
 - v. The approximate locations of all BM’s shall be shown upon the tentative map.
- c. All perimeter property corners shall be field established by each submitted final map. Corners shall be established with 1/1/2”x4’ iron pipes (and tags) in a concert collar and will be clearly identified by fiberglass posts (Carsonite or equal) corner markers acceptable to the City Engineer.

Fire Department Conditions

43. Fire Prevention Bureau Requirements

Ongoing.

The project shall comply with all the requirements from the Fire Marshall memo dated September 29, 2017 (Attachment T).

Public Works Agency Conditions

44. Pedestrian Bridge

The pedestrian bridge shall be a minimum of 8’ in width. The cross section shall be submitted for review and approval by the Department of Transportation. The pedestrian bridge shall be dedicated to and owned by the City of Oakland and shall be used solely for public pedestrian access. The pedestrian bridge shall include adequate lighting in accordance with the City of Oakland Outdoor Street Lighting Standards.

45. FEMA Regulations

All final design of buildings and structures, public or private, shall meet any applicable FEMA regulations to the satisfaction of the City Engineer in consultation with City Building Official, and the City’s Floodplain Administrator.

46. Vehicle Bridge

The new Vehicle Bridge should include new sidewalks that are a minimum of 6’ in width on both. The Vehicle Bridge shall include adequate lighting in accordance with the City of Oakland Outdoor Street Lighting Standards.

47. **Bulb-outs Design**

Bulb-outs within the City right-of-way shall be curved and designed to accommodate street sweeping trucks.

48. **Sanitary Sewers Design**

The sanitary sewer design for the project shall be gravity flow.

49. **Geotechnical Peer Review**

Prior to issuance of a grading permit

At the discretion of the City Engineer or the City Building Official, the applicant shall provide a Geotechnical Peer Review by a licensed Geotechnical Engineer. The recommendations provided in the peer review report shall be responded to in writing by the Geotechnical Engineer. The recommendations provided in the peer review shall be incorporated into improvement plans to the satisfaction of the City Engineer and City Building Official prior to issuance of related grading and/or building permits. The developer shall be responsible for the costs of any Geotechnical peer review as required by the City.

50. **Construction, Ownership and Maintenance of Certain Improvements**

Ownership and maintenance of certain improvements will be as set forth in the “Oak Knoll Development Ownership, Funding Sources and Maintenance Responsibilities” (“Oak Knoll Matrix”) attached hereto as **Exhibit B**. The Applicant shall dedicate, and the City shall accept, all facilities designated for City of Oakland ownership on Exhibit B, and which, in the City’s discretion, are completed in accordance with approved improvement plans, including but not limited to public parks and trails, public roads, bio-retention swales and stormdrain. For parks to be dedicated to the City, park improvement plans shall be subject to review by the Bureau of Planning. Except for public parks, Applicant shall retain the right to maintain ornamental landscaping on any City-owned property, including but not limited to street trees, street planters, and decorative signage.

Prior to approval of the first final map for the Project:

- a. **Formation of Community Facilities District**: City shall establish a community facilities district (“CFD”) pursuant to the Mello-Roos Community Facilities Act of 1982, as amended (the “CFD Act”). The CFD will include within its boundaries all of the Oak Knoll Development Project. All costs of forming and implementing such CFD, including, without limitation, costs for consultants, elections and any legal challenge, shall be at Applicant’s sole costs, and the Project Applicant shall make an initial advance payment to the City for formation costs of the CFD, and shall advance additional amounts within fifteen (15)

business days after the written request by the City, subject to subject to reimbursement out of the proceeds of bonds or facilities special taxes collected in the CFD. All contractors and consultants paid or reimbursed by the CFD or the City shall be subject to the direction of the City. The CFD shall have full responsibility for improvements and maintenance, which obligations shall be responsibilities of Applicant until such time as the CFD is fully formed and financed to City satisfaction and City approves Applicant's release from such obligations. The CFD shall be advanced by the Project Applicant, The CFD will contain two separate special taxes, described as follows:

- i. Facilities Special Tax. The facilities special tax shall be levied to finance the construction and acquisition of the Facilities (defined below) and to secure bonds issued to finance the construction and acquisition of the Facilities. The facilities special tax will be pre-payable and will escalate annually by 2%.
 - ii. Services Special Tax. The services special tax shall be levied to finance the maintenance of the Maintained Facilities (defined below). The services special tax will be levied in perpetuity and will not be pre-payable. The services special tax will escalate annually by 2%.
- b. Authorized Facilities. The CFD, through the facilities special taxes, shall be authorized to finance all of the following facilities (herein, the "Facilities"), irrespective of the geographic location of the improvements financed:
 - i. Project capital improvements such as streets, utility lines, grading and drainage.
 - ii. Affordable Housing Fees of the City of Oakland, as may be used for designated capital improvements.
 - iii. Capital fees of East Bay Municipal Utilities District.
 - iv. Capital fees of the Oakland Unified School District.
- c. Authorized Services. The CFD, through the services special taxes, which shall be based on an amount determined by the City Council as necessary to maintain public facilities within the CFD, to meet City-defined standards and cost parameters, shall be authorized to maintain the following improvements (herein, the "Maintained Facilities"), which are in or adjacent to the CFD:
 - i. Publicly-owned parks
 - ii. Publicly-owned bridges
- d. Joint Community Facilities Agreements. Under the CFD Act, City may be required to enter into one or more joint community facilities agreements with other governmental entities that will own or operate any of the Facilities to be financed by the CFD. The City and Project Applicant agree that they will take all

steps necessary to procure the authorization and execution of any required joint community facilities agreements with other governmental entities before the issuance of any CFD Bonds that will finance the construction or acquisition of Facilities that will be owned or operated by such other governmental entities.

- e. The RMA. In setting the tax rates in the Rate and Method of Apportionment (the “RMA”) for the CFD, the Total Tax Obligation (as defined below) on any residential unit within the CFD will not exceed two percent (2.00%) of the market value of that residential unit at the time the bonds are sold, secured by Special taxes of the CFD (the “2.00% Limitation”). The appraised value of a residential unit shall be determined by appraisal within no more than 90 days prior to the sale of bonds secured by such residential unit. The term “Total Tax Obligation” means, with respect to a residential unit at the time of calculation, the sum of: (a) the ad valorem taxes actually levied or projected to be levied at the time of calculation; (b) the assigned facilities special tax rates and the services special tax rates levied or projected to be levied at the time of calculation; and (c) all other special taxes (based on assigned special tax rates) or assessments secured by a lien on the residential unit levied or projected to be levied at the time of calculation. The RMA for the CFD will provide that the facilities special taxes will be levied on parcels of Developed Property (property for which a building permit has been pulled) at the maximum assigned rates both before and after bonds have been issued, and any facilities special taxes collected that are not needed for debt service on the bonds, administrative expenses, or replenishment of reserve funds will be available to finance the Facilities.

- f. Issuance of CFD Bonds. City, on behalf of the CFD, intends to issue one or more series of CFD Bonds for purposes of financing the Facilities. Project Applicant may submit written requests that City issue CFD Bonds, specifying requested issuance dates, amounts, and main financing terms. Following Project Applicant’s request, Project Applicant and City will meet with City’s public financing consultants to determine reasonable and appropriate issuance dates, amounts, and main financing terms that are consistent with these conditions of development and the CFD Goals. The CFD Bonds shall be issued pursuant to an indenture, trust agreement, or fiscal agent agreement (however denominated, an “Indenture”) between the CFD and a fiscal agent or trustee (however denominated, the “Fiscal Agent”). CFD Bonds will have a term of not less than thirty (30) years and not more than thirty-five (35) years unless Project Applicant and City agree otherwise.

- g. Maintenance of Facilities. The RMA will provide that the services special taxes will be used to finance the Maintained Facilities. The annual amount of the services special taxes to be levied will depend on the budgetary process described below:

- i. Services special taxes shall be levied to create a reserve fund to provide for restoration, maintenance, replacement repair or other work associated with the Maintained Facilities.
 - ii. The Project Applicant shall provide start-up funds for the CFD in an amount to be determined by the City Engineer in accordance with the approved capital development and maintenance plan, which shall be provided no later than recordation of the first final map for the Project. The Project Applicant shall also assume financial responsibility for all related work for a warranty period determined by the Public Works Director.
 - iii. The services special taxes shall be authorized to finance both on-going maintenance activities as well as a plan for unexpected maintenance and events, including events or damages that could occur as the result of site improvements associated with geotechnical, drainage or related matters. This work shall be based on the final grading, site soils conditions and specifications for improvements unless otherwise covered by the GHAD.
 - iv. The services budget shall separately identify the projected costs associated with standard annual operation, administration and maintenance work on the Maintained Facilities; long-term operation and maintenance including life cycle replacement costs of major features including but not limited to the Roadway and Pedestrian Bridge;—and the reserve fund debt service requirements described in item 1 above.
- h. Other Obligations and Requirements:
- i. The CFD shall submit an annual report to the City Council detailing compliance with Minimum Maintenance Standards, and budgetary and other financial information relevant to the CFD operations.
 - ii. The CFD shall obtain general liability insurance and directors' insurance for the Board of Directors to the extent that the CFD Board determines in its sole discretion that such insurance is available at commercially reasonable rates.
 - iii. The assessments or taxes necessary to fund the above requirements must be determined following a thorough financial analysis and must include adequate funding for indemnity and insurance obligations. The City's attorney and Risk Manager shall also review the adequacy of the funding for the indemnity and insurance and may make recommendations regarding such funding.
 - iv. The taxes or assessments shall be fully authorized and imposed on the project site prior to approval of the first final map.

51. Annexation of Project Area into Oakland Area Geological Hazard Abatement District (GHAD)

At Developer's request and sole cost, the City shall annex all of the properties within the boundary of the Project into the Oakland Area Geological Hazard Abatement District ("GHAD") and shall cooperate in the preparation of all documents and plans necessary for the GHAD's ownership and maintenance of the open space facilities within the Project, as set forth in Exhibit B, including but not limited to any Resolution(s) of Annexation, Engineer's Report(s) and Plan(s) of Control. To the extent the City is the fee owner of the parcels to be included within the GHAD, City shall fully cooperate with the Developer in the annexation of these parcels into the GHAD and with the implementation of all of the GHAD's operations and activities. The Applicant shall dedicate to the GHAD all facilities and land areas indicated to be owned in fee by the GHAD on Exhibit B, subject to a reservation of rights by Applicant for the purpose of maintenance of ornamental landscaping.

52. Confirmation of Substantial Compliance with Vesting Tentative Tract Maps

Prior to the recordation of each Final Map

Prior to recordation of each Final Map, site improvement plans and a title report shall be submitted for the review and approval of the City Planning Director or his/her designee demonstrating substantial compliance with the approved VTTM and the "Project Plans" as set forth in Condition of Approval 1, as well as any subsequent permit received from a responsible or other agency with authority over the project site.

53. Financing and Conveyance Maps

As used in these conditions of approval, "final map" means only those final maps filed for construction purposes.

- a. An Ordinance for accepting and processing Finance and Conveyance Maps, (F&C Maps) has not been adopted by the City at the time of the approval of this project. Any tentative and final F&C Maps submitted for this project shall be processed in the same manner as a Tentative Parcel Map application and Parcel Map application, respectively, and fees owed per the City's adopted Master Fee Schedule for Tentative Parcel Map applications and Parcel Map applications shall apply, respectively, unless an Ordinance for F&C Maps has been adopted and the Master Fee Schedule updated to include specific fees for F&C Maps.
- b. After approval of a Tentative F&C Map, any application for a Final F&C Map shall be submitted to the Department of Transportation, Engineering Services, and the appropriate fees shall be paid in full by the applicant prior to Staff beginning any review.

- c. The following statements shall be clearly printed in a prominent and easily legible on the face of each proposed Tentative and Final F&C Map:
 - i. “FOR FINANCE AND CONVEYANCE PURPOSES ONLY.”
 - ii. “THIS MAP DOES NOT CREATE A LEGAL BUILDING SITE. FURTHER APPLICATIONS ARE NECESSARY TO DEVELOP THIS PROPERTY.”
 - iii. “THIS MAP DOES NOT REMOVE ANY DEVELOPMENT REQUIREMENTS SET FORTH WITH APPROVAL OF THE VESTING TENTATIVE MAP 8320 AND CITY’S PLANNING PROJECT NUMBER PLN15378 WHICH MUST BE SATISFIED WITH CONTINUED DEVELOPMENT OF THE PROPERTY.”
- d. Tentative F&C Maps shall provide sufficient information on future uses and feasibility of future uses to ensure consistency with the approved vesting tentative tract map number 8320 and the project conditions of approval, including the project’s environmental mitigation measures, to the satisfaction of the Planning Director and the City Engineer.
- e. All parcel lines shown on tentative and final F&C Maps shall not conflict with any existing easements or proposed easements as identified on the approved vesting tentative map number 8320.
- f. No building permits shall be issued for development of any parcel or parcels presented in any recorded F&C Map until a Final Tract Map or Parcel Map is recorded with the County.
- g. Prior to recording any final F&C Map it shall conform to and meet the requirements of the Subdivision Map Act and the City’s Municipal Code as determined by the City Engineer.
- h. Parcels identified on the approved vesting tentative tract map 8320, 1) for which, a Final Parcel or Tract Map is already recorded with an executed Subdivision Improvement or Public Infrastructure Agreement, or 2) included in a mylar map signed by the Owner(s) and delivered to the City but not yet recorded by the County, shall be excluded, removed from, any F&C Map application as determined by the City Engineer.

54. Offers of Dedications at time of Final Map

Prior to recordation of each Final Map

Prior to recordation of each Final Map, all reservations and offers for dedications of easements, parcels and improvements and all other easements deemed necessary for all existing and proposed utilities shall be identified, to the satisfaction of the Transportation

and Right of Way Management Division, for the portion of the project included in the Final Map. The Applicant shall prepare all required documentation for such reservations and offers of dedication, including, but not limited to, deeds, legal descriptions and plat maps as requested by the City in its absolute discretion. Closure calculations for all easements, except the public utility easements (PUE) located adjacent to streets, shall be submitted for review and approval by the Transportation and Right of Way Management Division.

55. Selection of Street Names

Prior to the recordation of each Final Map

Prior to recordation of each Final Map, street names shall be selected and submitted for approval by the Bureau of Building, PWA Engineering Services, Fire Department and Police Department.

56. Subdivision Conditions, Covenants & Restrictions (CC&Rs)

Prior to the recordation of the first Final Map for the first Project Phase

Conditions, Covenants, and Restrictions (CC&Rs) for the total master planned community shall be prepared and submitted with an application for the first Final Map and shall be reviewed and approved by the Planning and Zoning Division and the City Attorney's Office. Such CC&Rs shall: (1) reserve all necessary nonexclusive easements for private streets, public utility easements or private utility access easements for pedestrian and vehicular ingress and egress, emergency vehicular access, and any necessary emergency exiting and/or public utility purposes identified by the City; and (2) include a covenant prohibiting any permanent improvements (with the exception of those shown on approved improvement plans or otherwise approved by the City) that may obstruct private streets, public utility easements, or private utility easements so as to restrict emergency vehicle ingress or egress or access to public utilities.

- a. The master community CC&Rs may include procedures whereby property within the development may be added to the CC&Rs by means of annexation as subsequent Final Maps are processed.
- b. In addition, neighborhood CC&Rs for any sub-project common interest developments shown on a Final Map (whether condominium projects or planned developments or shared access facilities) shall be prepared and submitted prior to the issuance of building permits for those individual merchant builders, and shall be reviewed and approved by the Planning and Zoning Division and the City Attorney's Office with respect to that Final Map. It is acknowledged by the City that common interest development CC&Rs are be subject to review and approval of the California Bureau of Real Estate (CalBRE) and may, subsequent to City review, be subject to revision as directed by CalBRE or as otherwise necessary to

comply with California Subdivided Lands Act, related regulations, and California common interest development laws.

- c. Neighborhood CC&Rs which include common interest of shared access facilities shall provide for shared maintenance responsibilities for any such shared access facilities.

57. Subdivision Improvement Plans for Each Final Map

Engineered subdivision improvement plans in accordance with this Approval shall be prepared to meet all of the requirements of the City of Oakland Subdivision Ordinance and the provisions of the Subdivision Map Act and shall include the following: water, storm water drainage, sanitary sewer, street improvement, traffic and utility service plans. The Subdivision Improvement Agreement shall include requirements for security for all public improvements required as a condition of approval of the corresponding Tentative Subdivision Map (or the Tentative F&C Map pursuant to Condition No. 50, as applicable) not completed as of the time of Final Map (or Final F&C Map, as applicable), as described in the California Subdivision Map Act and Title 16 of the Municipal Code.

58. Subdivision Improvement Agreement

Prior to recordation of each Final Map, a subdivision agreement, in a form acceptable to the Design and Construction Services Division and the City Attorney's Office, shall be prepared and executed for the construction of all public improvements.

59. Cost Estimates for Improvements

Prior to the City Engineer's acceptance of each Final Map, an Engineer's Estimate shall be submitted for the cost of all public improvements. The estimate shall be subject to approval by the Design and Construction Services Division. Based on the engineer's estimate, bonds or other approved securities must be furnished to the City in accordance with the Subdivision Improvement Agreement to ensure completion of public ~~and private~~ improvements.

60. Final Grading Plan for Mass Grading or for Individual Project Phases

Prior to the issuance of a grading permit related to a building permit(s) or execution of a subdivision improvement agreement, Applicant shall file a final grading plan that is to accompany the subdivision improvements plans that shall be prepared and submitted with the grading permit application, and shall include the following:

- a. The grading plan shall show all proposed and existing contours as well as proposed drainage improvements.
- b. As applicable to the grading phase, final grading, drainage and foundation plan shall be prepared in accordance with the recommendations of the geotechnical

report (including recommendations of the soil engineer) and supplemental letters. These reports shall identify the specific amount of fill material, if any, that is to be imported on the site. Retaining walls shall be a split-face or scored concrete block, or consistent with the approved PDP, FDP, and Design Guidelines, and shall not exceed the heights as specified on the approved Vesting Tentative Map, and shall require separate building permits.

- c. The final grading plan of all pads shall substantially comply with the preliminary grading presented on the approved Vesting Tentative Map, and shall include any inconsistencies between the contours and numeric grade shown on the Vesting Tentative Map and the final grading plan shall be subject to the approval of the City Engineer and Building Official.
- d. No mass grading shall occur between October 15th and April 15th unless approved by the City Engineer and Building Official.

61. Construction Plans for Fire Apparatus Access Roads, Off-street Parking and Access to Lots.

Prior to recordation of a final map for each project phase the improvement plans for each Final Map shall be submitted to the Fire Department for review and approval. These construction plans shall show for fire apparatus access roads, off-street parking and fire access to all lots/parcels within the Oak Knoll community. These plans shall include the following:

- a. Construction documents. Construction plans for fire access roads and plans for the water supply and distribution. CFC 501.3 and 501.4.
- b. Construction of buildings. Access roads and on-site hydrants shall be installed, operating and available prior to and during construction unless approved otherwise by the Fire Department.
- c. Fire apparatus access road widths shall adopt the Fire Department's access guidelines as adopted in the CFC Appendix D.
- d. Fire watch and fire apparatus access shall be provided per CFC Chapter 5 and Appendix C during all phases of construction, especially upon delivery of combustible construction materials at the site.
- e. All fire apparatus access roads shall not exceed 18%. The apparatus turnaround shall not exceed a 5% slope.

62. Additional Required Information on Final Map(s)

Prior to recordation, the Final Map prepared and submitted for each project phase shall include the following information, as applicable:

- a. All easements to be maintained shall be clearly indicated and easements to be abandoned shall be memorialized on the map by written notation of each easement to be abandoned, shown by reference to the recording data that created the easement.
- b. All existing utilities not intended for future use in the subdivision, and not serving other off-site areas shall be abandoned, and new utilities shall be established and dedicated as needed to serve on-site and off-site areas.
- c. The Fontaine Overpass approach ramp is within the property lines with a notation on the ALTA survey that abutters rights have been relinquished to the State of California. Prior to the recordation of the first Final Map, the parcel of land underlying and separated from the main portion of the site by Fontaine shall be offered for dedication to the State of California.
- d. Provide documentation to show that permission, conditioned or not, has been granted by EBMUD, or that there is no restriction or limitation, under the EBMUD easement, to the construction of the roadway and the proposed housing on the EBMUD tunnel easement (766 OR 472).
- e. The extension of Barcelona Street shall be designed and shown across APN 048-6870-002, from the Project boundary to the existing terminus of Barcelona Street, including an emergency vehicle access for public street and utilities purposes, and for the work necessary to accomplish these purposes.

63. Changes to the Vesting Tentative Tract Map

Ongoing

Any final map must substantially comply with the approved Vesting Tentative Tract Map (VTTM) per required findings. Significant changes to an approved VTTM shall require re-approval of the VTTM. Significant changes would be nonconformance with the Conditions of Approval for the VTTM as well as the following: increases in the lot count, reconfiguration of the site that alters the grading concept, road widths, road slopes that exceed Fire Department requirements, and major changes to creek parcel widths, or any change deemed significant by the City Surveyor and/or the Engineering Services Division. Minor changes to the approved VTTM shall be administratively approved by the City Surveyor and/or the Engineering Services Division prior to final map approval and recordation.

64. Street Lighting Plan and Photometric Analysis

Prior to issuance of a building permit or recordation of a Final Map for each Neighborhood or Project Phase, whichever occurs first:

- a. The applicant shall submit a detailed street lighting plan and photometric analysis for review and approval, with the improvement plans for construction of all new roadways. Planning Division review shall ensure that the lighting plan and photometric analysis comply with the requirements set forth in Mitigation Monitoring Program and in the Oak Knoll Design Guidelines.
- b. Construction documents shall meet the City of Oakland Public Works Agency Outdoor Street Lighting Standards.

65. Transportation - Installation of AC Transit Bus Stop and Shelter/Landscaping

- a. Improvement plans for the Mountain Boulevard/Creekside Parkway intersection shall incorporate design and development of a relocated bus stop and bus shelter. The location, design and specifications for the bus stop and shelter shall be to the satisfaction of the City of Oakland Transportation Services Division and AC Transit.
- b. The project Applicant and its successors shall landscape and maintain the parkway area of northbound Mountain Boulevard along the adjacent Project frontage. The parkway area is defined as the area between the back of curb shown on the VTTM and the Project property line and shall be considered part of the public street so long as the City of Oakland continues to own such right of way. The landscape improvements and maintenance obligations shall continue until such time that the City of Oakland no longer owns the right of way in whole or part in which the parkway is located. The landscape improvements shall be consistent with the existing landscaping along Mountain Boulevard.

66. Gated Entries

All roads and streets shall be dedicated to the City and accepted as public streets. As such, no such roads/streets shall be gated. Exceptions will only be granted for emergency vehicle access.

67. Barcelona Street Extension/Improvement as a Public Street

As shown on **Exhibit E**, the Applicant shall improve the “Barcelona Road Reservation” as a public street across APN 048-6870-002. This street shall run from the project boundary to a designated emergency vehicle access point to be located at the existing terminus of Barcelona Street. The improvements shall include tree removal, foundation removal, etc., to prepare the area for grading to create the roadbed, installation of utilities that are appurtenant to a public street, and installation of an appropriate emergency vehicle access gate or bollards. The City shall grant Applicant all access rights necessary for the installation of the improvements, including but not limited to an encroachment permit and shall maintain the street as a public street.

68. EBMUD and Right of Way Easements

Ongoing

EBMUD owns and operates water supply tunnels and pipelines along the northern edge of the development site in the EBMUD right-of way (R/W 206 and R/W 1634) and property (506 and 217-A). The integrity of these tunnels and pipelines needs to be maintained at all times. Any proposed construction activity in EBMUD rights-of-way and property would be subject to the terms and conditions determined by EBMUD including relocation of water mains and/or rights-of-way at the project sponsor's expense. The Community Park (North Neighborhood Park) to be developed by Oak Knoll on EBMUD property is subject to the execution of the land exchange between Oak Knoll and the District. If the land exchange does not occur, the applicant shall submit revised plans to exclude the EBMUD parcel from the North Neighborhood Park.

69. EBMUD Water Service

When development plans are finalized the applicant shall contact EBMUD's New Business Office and request a water service estimate to determine costs and conditions for providing water service to the proposed development. The project applicant shall comply with the Landscape Water Conservation Section, Article 10 of chapter 7 of the Oakland Municipal Code. The applicant should be aware that Section 31 of EBMUD's Water Service Regulations requires that water service shall not be furnished for new or expanded service unless all applicable water-efficiency measures described in the regulation are installed at the project applicant's expense.

70. Open Space Dedication and Trail Construction

Prior to the recordation of the Final Map that contains the trails

All areas designated as Open Space (VTTM Parcels A (the creek), B, D, E J and O) shall be dedicated to the City or the GHAD as set forth in Exhibit B. Prior to acceptance of open space parcels, all trails through these open space areas shall be constructed.

- a. Trail designs shall be based on the standards and practices of the East Bay Regional Park District for width and surfacing of multi-use trails, and shall include applicable ADA criteria
- b. Trails shall have a public access easements, restrictive covenant or other method to ensure ongoing and continued access for benefit of the public.

Creek Permit and Stormwater

71. Regulatory Agencies

Prior to issuance of a Grading Permit

Consistent with SCAMMPR Condition of Approval, SCA GEN-1: Regulatory Permits and Authorizations from Other Agencies (#15), the project applicant shall obtain all necessary regulatory permits and authorizations from applicable resource/regulatory agencies related to the creeks. If these permits necessitate changes to the design of the creek parcel, the Conditions regarding major and minor changes apply and might necessitate re-review.

72. Final Stormwater Control Plan

Prior to issuance of a Grading Permit

The Final Stormwater Control Plan, including narrative, shall be submitted for approval prior to the issuance of the Grading Permit. The treatment devices shall be located in accordance with the VTTM.

73. Creek Maintenance

After Creek Restoration and Ongoing

Upon sign off of the creek restoration by the Regulatory Agencies, the project applicant and successors shall submit a creek maintenance plan to ensure the successful and ongoing long-term maintenance of the creek parcels including the creek channel, and banks, stability, erosion, and infrastructure (bridges, culverts, stormwater facilities, etc.) Long term creek maintenance shall be guaranteed through the formation of a Geologic Hazard Abatement District or other means approved by the Bureau of Planning, Engineering Services and Watershed Division.

74. Trash Capture Devices

Requirement: Plans shall be submitted for review and approval by the Director of Public Works or his/her designee that show a full trash capture device installed at all private storm drain inlets or catch basins located on the property and on the public storm drain inlets in adjacent right of way area(s) – as applicable. The plans shall show the design of the device and must meet requirements of the Regional Water Quality Control Board for full trash capture. The applicant shall install these devices according to the approved plans.

When Required: Plans shall be approved prior to approval of any construction-related permit. Installation shall be completed prior to issuance of certificate of occupancy or final permit approval.

Initial Approval: City Engineer or Designee

Monitoring/Inspection: Owner of private storm drain must maintain the full trash capture device in accordance with the requirements in the Municipal Regional NPDES Permits. Records of Inspections and maintenance must be made available to the City upon request.

Upon pre-approval of the City, project applicant may pay an annual fee to maintain devices installed in the public right-of-way.

75. Stormwater Treatment Devices

Prior to issuance of a building permit

In the event stormwater pollution prevention control devices shown on the approved vesting tentative map do not qualify as FTC devices, prior to approval of the first Final Map submittal or issuance of related construction permits, the design for stormwater pollution prevention control devices must meet C.3 requirements and include separate trash capture devices. All storm drainage improvements shall be designed and constructed to meet C.3 requirements to the satisfaction of the City Engineer. To “qualify” as FTC devices, the device design must receive approval from the Water Board.

Tree Permit

76. Tree Permit (T1500124) and Removal by Phase

Prior to issuance of building permits

A Tree Removal/Preservation permit application shall be approved by the Tree Services Division for removal or preservation of all protected trees on the site and adjacent properties. The applicant shall abide by all Conditions of Approval of that permit.

77. Tree Relocation

Prior to issuance of a grading permit

The applicant shall retain a qualified arborist to survey the project site and identify 20 mature oak trees that shall be transplanted. The arborist shall submit a report for review and approval that includes the following information: trees to be relocated, removal procedures, storage area for the trees, watering and care during the timeframe that the trees are out of the ground, transplant procedures, and care and timeframe of care to ensure the tree survival. The arborist report shall be submitted to the Bureau of Planning for review and approval. The trees shall be located in the Village Center, around Club Knoll and at the main entrances.

Other

78. Pre-Construction Meeting with the City

Prior to issuance of a grading, demolition, or building permit

A pre-construction meeting shall be held with job inspectors and the general contractor/on-site project manager with the City’s project building coordinator to conform that conditions

of approval that must be completed prior to issuance of a grading, demolition, or building permit have been completed (including pre-construction meeting with neighborhood, construction hours, neighborhood notification, posted signs, etc.) The project applicant will coordinate and schedule this meeting.

79. Transportation and Parking Demand Management

The Project applicant has submitted a final master Transportation and Parking Demand Management (TDM) Plan. The subsequent merchant builders and successor's will submit a final plan noting the specific TDM measures, implement the plan, and achieve the required twenty percent (20%) vehicle traffic reduction (VTR) and reduced parking demand generated by the project. The TDM Plan indicates the estimated VTR for each identified strategy based on published research or guidelines where feasible.

80. Native American Tribal Monitor

During creek grading

At least seven days before ground-disturbing activities in the creek corridor are scheduled to begin, one tribal monitor of the choosing of the tribes that have expressed interest in the Project shall be invited to monitor such ground-disturbing activities, and shall be afforded the opportunity to monitor such activities if the tribal monitor chooses to be present. If there is a change in the construction schedule or an unscheduled need to undertake a ground-disturbing activity in the creek corridor, the tribal monitor shall be notified as soon as feasible.

OAK KNOLL SUPPLEMENTAL EIR

Standard Conditions of Approval / Mitigation Monitoring and Reporting Program (SCA/MMRP)

This Standard Conditions of Approval and Mitigation Monitoring and Reporting Program (SCA/MMRP) is based on the findings identified in the Oak Knoll Mixed Use Community Project Supplemental EIR (Oak Knoll SEIR), published April 27, 2017.

This document is in compliance with Section 15097 of the CEQA Guidelines, which requires that the Lead Agency (City of Oakland) “adopt a program for monitoring or reporting on the revisions which it has required in the project and the measures it has imposed to mitigate or avoid significant environmental effects.” The SCA/MMRP lists mitigation measures recommended in the Oak Knoll SEIR. The SCA/MMRP also lists the City’s Standard Conditions of Approval (“SCAs”) identified in the Oak Knoll SEIR to ensure the conditions are implemented and monitored. The SCAs are measures that would minimize potential adverse effects that could result from the project. The SCA/MMRP also identifies the implementation and monitoring requirements for each mitigation measure and SCA.

While not required to mitigate or avoid significant environmental effects, the SCA/MMRP includes implementation and monitoring guidance as “SCA Implementation Measures” identified in the Oak Knoll SEIR and to which the project sponsor has agreed. These are included in the SCA/MMRP for ease of tracking by City staff.

To the extent that there is any inconsistency between any mitigation measures and/or SCAs, the more restrictive conditions shall govern. To the extent any mitigation measure and/or SCA identified in the Oak Knoll SEIR were inadvertently omitted from this SCA/MMRP, they are automatically incorporated herein by reference.

The SCA/MMRP is organized by environmental topic, in the order they are presented in the Oak Knoll Draft SEIR.

- The first column of the table identifies the impact statement (for internal reference throughout the document).
- The second column states in full the mitigation measure and SCA (or SCA Implementation Measure) applicable to each impact. To avoid repetition, while a mitigation measure or SCA (or SCA Implementation Measure) can apply to more than one impact or topic, it is

listed in its entirety only under its primary environmental topic (as indicated in the designator, e.g., “AES” for Aesthetics).

- The SCAs are numbered as identified in the Oak Knoll SEIR, and for convenience, the reference number to the same or similar SCA as listed in the City’s Standard Conditions of Approval document¹ is included in parenthesis, e.g. (#17), for cross-reference purposes.
- The third column identifies the schedule or timing for all implementation activities required for each mitigation measure or SCA (or each SCA Implementation Measure).
- The fourth column specifies the implementation action and responsibility required of the Project applicant(s).
- The fifth column specifies the party(ies) responsible for monitoring or verifying that the actions are implemented, and specifies the monitoring and verification actions.
- The sixth column will identify the date and signature to confirm implementation of each action over time.

The Project sponsor is responsible for compliance with any recommendations identified in City-approved technical reports and all applicable mitigation measures adopted, and with all SCAs set forth herein at its sole cost and expense, unless otherwise expressly provided in a specific mitigation measure, SCA, Oak Knoll conditions of approval (separate document), and subject to the review and approval of the City of Oakland. Overall monitoring and compliance with the SCA/MMRP will be the responsibility of the Bureau of Planning and the Bureau of Building - Zoning Inspections Division. Prior to the issuance of a demolition, grading, and/or construction permit, the Project sponsor shall pay the applicable mitigation and monitoring fee to the City in accordance with the City’s Master Fee Schedule.

¹ Adopted November 3, 2008, as amended and/or supplemented through April 11, 2017.

OAK KNOLL STANDARD CONDITIONS OF APPROVAL, MITIGATION MONITORING AND REPORTING PROGRAM (SCA/MMRP)

Impact (for Reference)	Mitigation Measures and/or Standard Condition of Approval (SCA), and SCA Implementation Measures	Timing	Implementation Responsibility & Action	Monitoring Responsibility & Action	Date Completed / Signature
4.1 Aesthetics					
<p>Impact AES-1: The proposed Project could adversely affect an existing scenic vista or substantially damage scenic resources within a state or locally designated scenic highway. (Criteria a and b) (Potentially Significant)</p>	<p>SCA AES-2: Landscape Plan (#17).</p> <p>a. Landscape Plan Required. <i>Prior to approval of construction-related permit.</i> The project applicant shall submit a final Landscape Plan for City review and approval that is consistent with the approved Landscape Plan. The Landscape Plan shall be included with the set of drawings submitted for the construction-related permit and shall comply with the landscape requirements of chapter 17.124 of the Planning Code.</p>	<p>SITEWIDE MASTER PLAN</p> <ul style="list-style-type: none"> Prior to approval/issuance of grading permit for the Master Grading Plan, per the Oak Knoll "Final Development Plan: Master Developer Site Improvements" (Master Developer FDP). <p>FDP PROJECTS</p> <ul style="list-style-type: none"> Prior to approval/issuance of grading permit for each project FDP. 	<p>SITEWIDE MASTER PLAN</p> <p>Master Developer:</p> <ul style="list-style-type: none"> Submit to the Bureau of Planning a final "Master Landscape Plan" that is consistent with the Master Developer FDP (excepting the Community Center area per New Mitigation Measure CUL-1.5 and certain Eastern Ridge lots per Mitigation Measure AES-1[c]). <p>FDP PROJECTS</p> <p>Each FDP Project Applicant:</p> <ul style="list-style-type: none"> Submit to the Bureau of Planning a final Landscape Plan for each project FDP (excepting the Community Center area and certain Eastern Ridge lots, as specified above). 	<p>City of Oakland, Bureau of Planning:</p> <ul style="list-style-type: none"> Review and approve final landscape plans (sitewide and each project FDP). <p>City of Oakland, Bureau of Planning; Bureau or Building – Zoning Inspections:</p> <ul style="list-style-type: none"> Verify submittal of the landscape plans with or prior to submittal of grading plans (sitewide and each project FDP). 	
	<p>b. Landscape Installation. <i>Prior to building permit final.</i> The project applicant shall implement the approved Landscape Plan unless a bond, cash deposit, letter of credit, or other equivalent instrument acceptable to the Director of City Planning, is provided. The financial instrument shall equal the greater of \$2,500 or the estimated cost of implementing the Landscape Plan based on a licensed contractor's bid.</p>	<p>SITEWIDE MASTER PLAN</p> <ul style="list-style-type: none"> Prior to the first building permit for the first project FDP in Phase 1; or Prior to approval/issuance of Master Grading Plan permit, if a City-accepted funding instrument is secured by the Master Developer. <p>FDP PROJECTS</p> <ul style="list-style-type: none"> Prior to final inspection of building permit for each project FDP, if landscaping is implemented by an FDP Project Applicant; or 	<p>SITEWIDE MASTER PLAN</p> <p>Master Developer:</p> <ul style="list-style-type: none"> Implement the final Master Landscape Plan per the Master Developer FDP; or Present a City-accepted funding instrument. <p>FDP PROJECTS</p> <p>Each FDP Project Applicant:</p> <ul style="list-style-type: none"> Implement the final Landscape Plan for each project FDP (excepting the Community Center area and the certain Eastern Ridge lots, as specified above); or 	<p>City of Oakland, Bureau of Building - Zoning Inspections:</p> <ul style="list-style-type: none"> Verify that landscape materials are planted and comply with the SCA, the final Master Landscape Plan, and/or each project FDP; or Verify that a City-accepted funding instrument is in place and Landscape Plan is implemented by a licensed contractor.

Impact (for Reference)	Mitigation Measures and/or Standard Condition of Approval (SCA), and SCA Implementation Measures	Timing	Implementation Responsibility & Action	Monitoring Responsibility & Action	Date Completed / Signature
4.1 Aesthetics (cont.)					
Impact AES-1 (cont.)	<p>architects meet the community standards while providing flexibility to enable site specific alternatives for each lot. While not each of the specific principles will be applicable to each lot or building, the whole of this mitigation measure in concert with the Oak Knoll Design Guidelines direct the architect to combine form, bulk, scale, texture, and color in a manner which ensures the overall building and site design will meet City standards. The project applicant shall demonstrate alignment with the applicable standards through the Design Review and Final Development Plan (FDP) approval process prior to the issuance of any building permit for these lots.</p> <p>The Preliminary Development Plan (PDP) for the Oak Knoll Project shall incorporate the following measures to be applied at the time of approval of an FDP for single family homes on the Eastern Ridge, which include applicable methods and techniques specified primarily in the <i>Oakland Interim Design Review Manual for One- and Two-Unit Residences</i> (2005). These measures that shall specifically be implemented, as applicable, to each development lot proposed for the custom homes on the Eastern Ridge to ensure careful siting and design of new construction on custom home lots and to require specified landscaping on the lots.</p> <p>A. General Site Design</p> <p>Design structures to minimize the appearance of an monotonous row of ridgetop development visible from off-site vantage points; clustering structures is one appropriate technique.</p> <p>(1) On sloped lots, use courtyards and other spaces to organize building volumes and create transitions from house to land. Avoid filling up side yards with concrete stairs or paved areas that limit landscape and potential usable space. Maintain openness between structures to the extent feasible given the lot configurations and sizes. Avoid long and high building walls close to side lot lines. Provide sufficient side yard setbacks, especially at the front and rear elevations, to allow plantings between the structures to help the perceived mass.</p>				

OAK KNOLL STANDARD CONDITIONS OF APPROVAL, MITIGATION MONITORING AND REPORTING PROGRAM (SCA/MMRP)

Impact (for Reference)	Mitigation Measures and/or Standard Condition of Approval (SCA), and SCA Implementation Measures	Timing	Implementation Responsibility & Action	Monitoring Responsibility & Action	Date Completed / Signature
4.1 Aesthetics (cont.)					
<p>Impact AES-1 (cont.)</p>	<p>(2) On sloped lots, major shifts in siting from the neighborhood pattern may be warranted to help break-up continuous walls of downslope facades and minimize their collective bulk.</p> <p>(3) On sloped lots, step building massing with terrain. Step or slope rooflines with the terrain and avoid large gables on downslope lots.</p> <p>(4) On sloped lots, position the building on the site to minimize height on the downslope side.</p> <p>(5) At the time of FDP approval for each custom lot created on the Eastern Ridge, designate a "buildable development zone" and a "landscape zone" for each sloped lot which shall be delineated to minimize loss of existing vegetation and ensure existing and new vegetation around and between new structures, except as limited for wildfire risk management.</p> <p>B. Building Design</p> <p>(1) Where applicable, adhere to all special height restrictions and measuring methods for buildings and retaining walls on sloped lots on the Eastern Ridge, which are established in Sections 17.108.020(B) and 17.09.040 of the Oakland Planning Code, as consistent with the approved PUD for the project, pursuant to Section 17.122.110c.</p> <p>(2) Use materials and colors having naturalistic quality that will blend into the surrounding landscape.</p> <p>(3) Avoid blank or under-designed walls from the street. Use multiple materials and/or detailing to break up walls and make large surfaces seem smaller.</p> <p>(4) On front elevations on upslope lots, emphasize eave lines/roof planes as visually dominant features, group windows horizontally within all planes and at building corners.</p> <p>(5) On sloped lots, break the building into multiple volumes with staggered setbacks to reflect the irregularity of hillside terrain.</p>				

OAK KNOLL STANDARD CONDITIONS OF APPROVAL, MITIGATION MONITORING AND REPORTING PROGRAM (SCA/MMRP)

Impact (for Reference)	Mitigation Measures and/or Standard Condition of Approval (SCA), and SCA Implementation Measures	Timing	Implementation Responsibility & Action	Monitoring Responsibility & Action	Date Completed / Signature
4.1 Aesthetics (cont.)					
Impact AES-1 (cont.)	<p>(6) On sloped lots, place floor levels close to and/or partially inset into grade to avoid or minimize tall skirt walls and other tall support structures. Deemphasize skirt walls where they cannot be avoided, as follows:</p> <ul style="list-style-type: none"> a) Incorporate a strong horizontal molding or cap at the top of the skirt wall; b) Change materials and/or colors at the skirt wall to contrast with primary building volume c) Outwardly taper the skirt wall to create a buttress effect d) Recess skirt wall from the face of the upper floors <p>(7) On rear elevations on downslope lots, symmetrically organize windows, decks (etc.) within individual building masses and aligned floor-to-floor, and incorporate windows that appear as "punch-outs" with adequate wall space between windows and balcony columns that read as a lighter open frame.</p> <p>(8) Provide strong shadow patterns on downslope elevations.</p> <p>(9) Consider the visual impact on neighborhood appearance and natural in the siting and design of long fences. Fences should not be dominant visual elements on hillsides. Tall fences around the property perimeter are often discouraged.</p> <p>(10) Discourage placement of antennas on roofs.</p> <p>C. Landscaping and Open Space</p> <ul style="list-style-type: none"> (1) Maintain ample open space between houses or cluster development to increase open space areas as feasible given lot sizes and configuration to assist in reducing building bulk. (2) Incorporate landscaping that is consistent with the more natural appearing vegetation on the surrounding hills to provide some screening and shade for new buildings. 				

OAK KNOLL STANDARD CONDITIONS OF APPROVAL, MITIGATION MONITORING AND REPORTING PROGRAM (SCA/MMRP)

Impact (for Reference)	Mitigation Measures and/or Standard Condition of Approval (SCA), and SCA Implementation Measures	Timing	Implementation Responsibility & Action	Monitoring Responsibility & Action	Date Completed / Signature
4.1 Aesthetics (cont.)					
<p>Impact AES-1 (cont.)</p>	<p>(3) At the skirt walls, intersperse native species' of trees and/or other landscaping with City-approved, non-native species.</p> <p>(4) Use irregular plant spacing and plant trees in undulating groups to achieve a grove effect. Especially consider native, fire-resistant species such as coast live oaks, etc. Plant shrubs of varying heights and sizes among trees. (Guideline 10.8, text and figure)</p> <p>(5) On sloped portions of lots, either maintain natural topography or use a series of stepped terrace/retaining walls to create grade transition between the street and the houses.</p> <p>(6) Fully landscape all graded surfaces and buffer the structure using quantities of vegetation beyond the basic landscaping requirements of the Oak Knoll Design Guidelines Aim for a natural appearance on graded slopes.</p> <p>(7) Plant feature trees to diffuse building mass.</p> <p>(8) Preference should be given to planting and encouraging the growth of desirable low-combustion plant types found in the area. Contrived, non-native landscaping, such as cactus gardens, extreme plant shaping, etc., are inappropriate. Whenever removal of ordinance protected live trees, especially oaks and oak woodlands, is necessary, they shall be replaced by planting, prior to building occupancy, of trees, elsewhere on the property within view from public vantage points.</p> <p><i>Implementation.</i> Prior to the issuance of any single family residential building permit for the Project, the applicant shall submit FDP project plans that specify "detailed building and landscaping plans and elevations" pursuant to the City's Planned Unit Development (PUD) procedures for review and approval of Final Development Plans (Chapter 17.140 of the Oakland Planning Code), as well as the City's Residential Design Review and approval process (Chapter 17.136 of the Oakland Planning Code). The City Planning Commission will review the FDP and determine whether it conforms to the approved PDP and Oak Knoll Design Guidelines and to these enhanced design measures.</p>

4.2 Air Quality					
<p>Impact AIR-1: Demolition and construction associated with the Project would not result in average daily emissions that would exceed the City's construction significance thresholds of 54 pounds per day of ROG, NOX, or PM_{2.5} or 82 pounds per day of PM₁₀. (Criterion a) (Less than Significant with SCA)</p>	<p>SCA AIR-1: Construction-Related Air Pollution Controls (Dust and Equipment Emissions) (#19).</p> <p><i>During Project Construction.</i> The project applicant shall implement all of the following applicable air pollution control measures during construction of the project:</p> <p><i>Basic Controls:</i></p> <ol style="list-style-type: none"> Water all exposed surfaces of active construction areas at least twice daily. Watering should be sufficient to prevent airborne dust from leaving the site. Increased watering frequency may be necessary whenever wind speeds exceed 15 miles per hour. Reclaimed water should be used whenever feasible. Cover all trucks hauling soil, sand, and other loose materials or require all trucks to maintain at least two feet of freeboard (i.e., the minimum required space between the top of the load and the top of the trailer). All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited. Pave all roadways, driveways, sidewalks, etc. within one month of site grading or as soon as feasible. In addition, building pads should be laid within one month of grading or as soon as feasible unless seeding or soil binders are used. Enclose, cover, water twice daily, or apply (non-toxic) soil stabilizers to exposed stockpiles (dirt, sand, etc.). Limit vehicle speeds on unpaved roads to 15 miles per hour. Idling times on all diesel-fueled commercial vehicles over 10,000 lbs. shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to five minutes (as required by the California airborne toxics control measure Title 13, Section 2485, of the California Code of Regulations). Clear signage to this effect shall be provided for construction workers at all access points. 	<p>Implementation:</p> <ul style="list-style-type: none"> Ongoing, throughout demolition, grading and/or construction. 	<p>Master Developer and Each FDP Project Applicant:</p> <ul style="list-style-type: none"> Require/ensure construction contractor to implement all the applicable measures identified in the SCA. Submit an Oak Knoll Dust Control Program as part of the Construction Management Plan to the Bureau of Building-Zoning Inspections, per <i>Enhanced Controls</i> condition (e). 	<p>City of Oakland, Bureau of Planning:</p> <ul style="list-style-type: none"> Review and approve Dust Control Program. <p>Applicant:</p> <ul style="list-style-type: none"> Ensure regular verification of the implementation of dust control measures and equipment and vehicle operation protocols and the Oak Knoll Dust Control Program. Verify that a designated dust control monitor is on-call during construction periods, per <i>Enhanced Controls</i> condition (e). <p>City of Oakland, Bureau of Building - Zoning Inspections:</p> <ul style="list-style-type: none"> Conduct periodic site visits to verify dust control measures and equipment and vehicle operation protocols and the Oak Knoll Dust Control Program are being implemented.

Impact (for Reference)	Mitigation Measures and/or Standard Condition of Approval (SCA), and SCA Implementation Measures	Timing	Implementation Responsibility & Action	Monitoring Responsibility & Action	Date Completed / Signature
4.2 Air Quality (cont.)					
Impact AIR-4 (cont.)	ii. Installation of diesel generators with an EPA-certified Tier 4 engine or engines that are retrofitted with a CARB Level 3 Verified Diesel Emissions Control Strategy, if feasible.				
Impact AIR-5: Construction of the Project would not expose proposed sensitive receptors to substantial levels of toxic air contaminants (TACs). (Criterion e) (Less than Significant with SCAs)	SCA AIR-1: Construction-Related Air Pollution Controls (Dust and Equipment Emissions) (<i>See under Impact AIR-1</i>) SCA AIR-2: Exposure to Air Pollution (Toxic Air Contaminants) (<i>See under Impact AIR-4</i>)				
4.3 Biological Resources					
Impact BIO-1: The Project could have a substantial adverse effect, either directly or through habitat modifications, on any plant or animal species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service. (Criterion a) (Potentially Significant).	SCA BIO-1: Tree Removal during Breeding Bird Season (#26). <i>Prior to removal of trees.</i> To the extent feasible, removal of any tree and/or other vegetation suitable for nesting of birds shall not occur during the bird breeding season of February 1 to August 15 (or during December 15 to August 15 for trees located in or near marsh, wetland, or aquatic habitats). If tree removal must occur during the bird breeding season, all trees to be removed shall be surveyed by a qualified biologist to verify the presence or absence of nesting raptors or other birds. Pre-removal surveys shall be conducted within 15 days prior to the start of work and shall be submitted to the City for review and approval. If the survey indicates the potential presence of nesting raptors or other birds, the biologist shall determine an appropriately sized buffer around the nest in which no work will be allowed until the young have successfully fledged. The size of the nest buffer will be determined by the biologist in consultation with the California Department of Fish and Wildlife, and will be based to a large extent on the nesting species and its sensitivity to disturbance. In general, buffer sizes of 200 feet for raptors and 50 feet for other birds should suffice to prevent disturbance to birds nesting in the urban environment, but these buffers may be increased	Conduct Pre-Removal Surveys: • Within 15 days prior to removal of any trees and/or other vegetation suitable for nesting of birds. Agency Consultation for Nesting Raptors/Birds: • Prior to the start of work involving ground disturbance or building dismantling, relocation or demolition.	Master Developer and Each FDP Project Applicant: • Conduct pre-removal surveys by a qualified biologist if work occurs during the bird breeding season. • Submit pre-removal surveys to City of Oakland.	City of Oakland, Bureau of Planning; Bureau of Building - Zoning Inspections: • Review and accept pre-removal surveys. Applicant: • Ensure regular verification of the implementation of this SCA during breeding season. City of Oakland, Bureau of Building - Zoning Inspections; qualified biologist approved by the Bureau of Planning: • Conduct periodic site visits during bird breeding season to verify compliance per the SCA.

4.4 Cultural Resources (cont.)					
<p>Impact CUL-3: The Project could result in significant impacts to unknown archaeological resources. (Criterion b) <i>(Less than Significant with SCAs)</i></p>	<p>SCA CUL-1: Archaeological and Paleontological Resources – Discovery During Construction (#29).</p> <p><i>During construction.</i> Pursuant to CEQA Guidelines section 15064.5(f), in the event that any historic or prehistoric subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant shall notify the City and consult with a qualified archaeologist or paleontologist, as applicable, to assess the significance of the find. In the case of discovery of paleontological resources, the assessment shall be done in accordance with the Society of Vertebrate Paleontology standards. If any find is determined to be significant, appropriate avoidance measures recommended by the consultant and approved by the City must be followed unless avoidance is determined unnecessary or infeasible by the City. Feasibility of avoidance shall be determined with consideration of factors such as the nature of the find, project design, costs, and other considerations. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery, excavation) shall be instituted. Work may proceed on other parts of the project site while measures for the cultural resources are implemented.</p> <p>In the event of data recovery of archaeological resources, the project applicant shall submit an Archaeological Research Design and Treatment Plan (ARDTP) prepared by a qualified archaeologist for review and approval by the City. The ARDTP is required to identify how the proposed data recovery program would preserve the significant information the archaeological resource is expected to contain. The ARDTP shall identify the scientific/historic research questions applicable to the expected resource, the data classes the resource is expected to possess, and how the expected data classes would address the applicable research questions. The ARDTP shall include the analysis and specify the curation and storage methods. Data recovery, in general, shall be limited to the portions of the archaeological resource that could be impacted by the proposed project. Destructive data recovery methods shall not be applied to portions of the archaeological resources if nondestructive</p>	<p>Implementation:</p> <ul style="list-style-type: none"> Ongoing, throughout all construction activities. 	<p>Master Developer and Each FDP Project Applicant:</p> <ul style="list-style-type: none"> Adhere to conditions and standards regarding the discovery of historic or prehistoric subsurface cultural resources and paleontological resources; avoidance measures; excavation plans; preparation of an ARDTP; and qualifications of consulting archaeologists and paleontologists. 	<p>City of Oakland, Bureau of Planning – OCHS; Bureau of Building – Zoning Inspections:</p> <ul style="list-style-type: none"> Verify qualifications of as-needed consulting archeologist and/or paleontologist. Review and approve the ATDTP if one is required under conditions of the SCA. Verify all applicable conditions in the SCA are implemented. 	

OAK KNOLL STANDARD CONDITIONS OF APPROVAL, MITIGATION MONITORING AND REPORTING PROGRAM (SCA/MMRP)

Impact (for Reference)	Mitigation Measures and/or Standard Condition of Approval (SCA), and SCA Implementation Measures	Timing	Implementation Responsibility & Action	Monitoring Responsibility & Action	Date Completed / Signature
4.4 Cultural Resources (cont.)					
Impact CUL-3 (cont.)	<p>methods are practicable. Because the intent of the ARDTP is to save as much of the archaeological resource as possible, including moving the resource, if feasible, preparation and implementation of the ARDTP would reduce the potential adverse impact to less than significant. The project applicant shall implement the ARDTP at his/her expense.</p> <p>In the event of excavation of paleontological resources, the project applicant shall submit an excavation plan prepared by a qualified paleontologist to the City for review and approval. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by a qualified paleontologist, as appropriate, according to current professional standards and at the expense of the project applicant.</p>				
	<p>SCA CUL-2: Archaeologically Sensitive Areas – Pre-Construction Measures (#30).</p> <p><i>Prior to approval of construction-related permit; during construction.</i> The project applicant shall implement either Provision A (Intensive Pre-Construction Study) <u>or</u> Provision B (Construction ALERT Sheet) concerning archaeological resources.</p> <p>Provision A: Intensive Pre-Construction Study. The project applicant shall retain a qualified archaeologist to conduct a site-specific, intensive archaeological resources study for review and approval by the City prior to soil-disturbing activities occurring on the project site. The purpose of the site-specific, intensive archaeological resources study is to identify early the potential presence of history-period archaeological resources on the project site. At a minimum, the study shall include:</p> <ol style="list-style-type: none"> Subsurface presence/absence studies of the project site. Field studies may include, but are not limited to, auguring and other common methods used to identify the presence of archaeological resources. A report disseminating the results of this research. 	<p>Implementation:</p> <ul style="list-style-type: none"> Provision A: Prior to approval of any construction-related permit. 4.6 Greenhouse Gas Emissions and Climate Change (cont.)					
Impact GHG-1 (cont.)	<p><i>Corrective Procedure.</i> If the third Annual Report, or any report thereafter, indicates that, in spite of the implementation of the GHG Reduction Plan, the project is not achieving the GHG reduction goal, the project applicant shall prepare a report for City review and approval, which proposes additional or revised GHG measures to better achieve the GHG emissions reduction goals, including without limitation, a discussion on the feasibility and effectiveness of the menu of other additional measures (“Corrective GHG Action Plan”). The project applicant shall then implement the approved Corrective GHG Action Plan. If, one year after the Corrective GHG Action Plan is implemented, the required GHG emissions reduction target is still not being achieved, or if the project applicant fails to submit a report at the times described above, or if the reports do not meet City requirements outlined above, the City may, in addition to its other remedies, (a) assess the project applicant a financial penalty based upon actual percentage reduction in GHG emissions as compared to the percent reduction in GHG emissions established in the GHG Reduction Plan; or (b) refer the matter to the City Planning Commission for scheduling of a compliance hearing to determine whether the project’s approvals should be revoked, altered or additional conditions of approval imposed.</p> <p>The penalty as described in (a) above shall be determined by the City Planning Director or his/her designee and be commensurate with the percentage GHG emissions reduction not achieved (compared to the applicable numeric significance thresholds) or required percentage reduction from the “adjusted” baseline.</p> <p>In determining whether a financial penalty or other remedy is appropriate, the City shall not impose a penalty if the project applicant has made a good faith effort to comply with the GHG Reduction Plan.</p> <p>The City would only have the ability to impose a monetary penalty after a reasonable cure period and in accordance with the enforcement process outlined in Planning Code Chapter 17.152. If a financial penalty is imposed, such penalty sums shall be used by the City</p>

4.10 Noise and Vibration (cont.)					
Impact NOI-1 (cont.)	Any construction activity proposed outside of the above days and hours for special activities (such as concrete pouring which may require more continuous amounts of time) shall be evaluated on a case-by-case basis by the City, with criteria including the urgency/emergency nature of the work, the proximity of residential or other sensitive uses, and a consideration of nearby residents'/occupants' preferences. The Project applicant shall notify property owners and occupants located within 300 feet at least 14 calendar days prior to construction activity proposed outside of the above days/hours. When submitting a request to the City to allow construction activity outside of the above days/hours, the Project applicant shall submit information concerning the type and duration of proposed construction activity and the draft public notice for City review and approval prior to distribution of the public notice.				
	<p>SCA NOI-2: Construction Noise (#59).</p> <p><i>During construction.</i> The Project applicant shall implement noise reduction measures to reduce noise impacts due to construction. Noise reduction measures include, but are not limited to, the following:</p> <ol style="list-style-type: none"> a. Equipment and trucks used for project construction shall utilize the best available noise control techniques (e.g., improved mufflers, equipment redesign, use of intake silencers, ducts, engine enclosures and acoustically-attenuating shields or shrouds) wherever feasible. b. Except as provided herein, impact tools (e.g., jack hammers, pavement breakers, and rock drills) used for project construction shall be hydraulically or electrically powered to avoid noise associated with compressed air exhaust from pneumatically powered tools. However, where use of pneumatic tools is unavoidable, an exhaust muffler on the compressed air exhaust shall be used; this muffler can lower noise levels from the exhaust by up to about 10 dBA. External jackets on the tools themselves shall be used, if such jackets are commercially available, and this could achieve a reduction of 5 dBA. Quieter procedures shall be used, such as drills rather than 	<p>Implementation:</p> <ul style="list-style-type: none"> • Ongoing, throughout all construction activities. 	<p>Master Developer and Each FDP Project Applicant:</p> <ul style="list-style-type: none"> • Require construction contractors limit standard construction activities. 	<p>City of Oakland, Bureau of Planning; Oakland Department of Transportation Engineering Services Unit (for subdivision improvements); Bureau of Building – Zoning Inspections (for single lot developments):</p> <ul style="list-style-type: none"> • Verify construction activity noise is appropriately controlled.

Projects subject to these requirements include all new construction, renovations/alterations/modifications with construction values of \$50,000 or more (except R-3 type construction), and all demolition (including soft demolition) except demolition of type R-3 construction. The WRRP must specify the methods by which the project will divert construction and demolition debris waste from landfill disposal in accordance with current City requirements. The WRRP may be submitted electronically at www.greenhalosystems.com or manually at the City's Green Building Resource Center. Current standards, FAQs, and forms are available on the City's website and in the Green Building Resource Center.</p>	<p>Submit WRRP:</p> <ul style="list-style-type: none"> • Prior to approval of any construction-related permit. <p>Conduct Work Per Approved Plan:</p> <ul style="list-style-type: none"> • Ongoing, throughout all construction activities. 	<p>Master Developer and Each FDP Project Applicant:</p> <ul style="list-style-type: none"> • Submit Construction and Demolition Waste Reduction and Recycling Plan (WRRP). 	<p>City of Oakland, Bureau of Planning; Public Works – Environmental Services:</p> <ul style="list-style-type: none"> • Review and approve WRRP. 	

OAK KNOLL STANDARD CONDITIONS OF APPROVAL, MITIGATION MONITORING AND REPORTING PROGRAM (SCA/MMRP)

Impact (for Reference)	Mitigation Measures and/or Standard Condition of Approval (SCA), and SCA Implementation Measures	Timing	Implementation Responsibility & Action	Monitoring Responsibility & Action	Date Completed / Signature
4.14 Utilities and Service Systems (cont.)					
<p>Impact UTIL-4 (cont.)</p>	<p>SCA UTIL-3: Recycling Collection and Storage Space (#76). <i>Prior to approval of construction-related permit.</i> The project applicant shall comply with the City of Oakland Recycling Space Allocation Ordinance (chapter 17.118 of the Oakland Planning Code). The project drawings submitted for construction-related permits shall contain recycling collection and storage areas in compliance with the Ordinance. For residential projects, at least two cubic feet of storage and collection space per residential unit is required, with a minimum of ten cubic feet. For nonresidential projects, at least two cubic feet of storage and collection space per 1,000 square feet of building floor area is required, with a minimum of ten cubic feet.</p>	<p>Submit Plans:</p> <ul style="list-style-type: none"> • Prior to approval of any construction-related permit. <p>Conduct Work Per Ordinance:</p> <ul style="list-style-type: none"> • Ongoing, throughout all construction activities and project operations. 	<p>Each FDP Project Applicant:</p> <ul style="list-style-type: none"> • Submit and implement project plans demonstrating compliance with the Oakland Recycling Space Allocation Ordinance. 	<p>City of Oakland, Bureau of Planning:</p> <ul style="list-style-type: none"> • Review and approve project plans for compliance with the Ordinance. 	
<p>Impact UTIL-5: The proposed Project would not violate applicable federal, state and local statutes and regulations relating to energy standards nor would it result in a determination by the energy provider that it would not have adequate capacity to serve the Project's projected demand. (Criteria g and h) (Less than Significant)</p>	<p>SCA GHG-1: Greenhouse Gas (GHG) Reduction Plan (GGRP) (<i>See under Impact GHG-1</i>)</p> <p>SCA GHG-2: Green Building Requirements – Bay Friendly Landscape (<i>See under Impact GHG-1</i>)</p>				
<p>Impact UTIL-6: The Project would not have a considerable contribution to any cumulative impacts related to utilities and service systems, considering the combined effect of the Project, and past, present, approved, pending, and reasonably foreseeable future projects in the area and citywide. (Less than Significant with SCAs)</p>	<p>SCA AIR-1: Construction-Related Air Pollution Controls (Dust and Equipment Emissions) (<i>See under Impact AIR-1</i>)</p> <p>SCA BIO-1: Tree Removal During Bird Breeding Season (<i>See under Impact BIO-1</i>)</p> <p>SCA BIO-3: Creek Protection Plan (<i>See under Impact BIO-2</i>)</p> <p>SCA BIO-4: Dewatering/Diversion (<i>See under Impact BIO-4</i>)</p> <p>SCA CUL-2: Archaeological and Paleontological Resources – Discovery During Construction (<i>See under Impact CUL-3</i>)</p>

OAK KNOLL STANDARD CONDITIONS OF APPROVAL, MITIGATION MONITORING AND REPORTING PROGRAM (SCA/MMRP)

Impact (for Reference)	Mitigation Measures and/or Standard Condition of Approval (SCA), and SCA Implementation Measures	Timing	Implementation Responsibility & Action	Monitoring Responsibility & Action	Date Completed / Signature
4.14 Utilities and Service Systems (cont.)					
General SCA Applicable to the Project	<i>During construction.</i> The project applicant shall place underground all new utilities serving the project and under the control of the project applicant and the City, including all new gas, electric, cable, and telephone facilities, fire alarm conduits, street light wiring, and other wiring, conduits, and similar facilities. The new facilities shall be placed underground along the project's street frontage and from the project structures to the point of service. Utilities under the control of other agencies, such as PG&E, shall be placed underground if feasible. All utilities shall be installed in accordance with standard specifications of the serving utilities.				
4.15 Energy					
Impact ENER-1: Construction and operation of the proposed Project would not result in the wasteful, inefficient or unnecessary use of energy resources (Criterion 1). (Less than Significant with SCAs)	<p>SCA AIR-1: Construction-Related Air Pollution Controls (Dust and Equipment Emissions) (<i>See under Impact AIR-1</i>)</p> <p>SCA GHG-1: Greenhouse Gas (GHG) Reduction Plan (GGRP) (<i>See under Impact GHG-1</i>)</p> <p>SCA GHG-2: Green Building Requirements – Bay Friendly Landscape (<i>See under Impact GHG-1</i>)</p> <p>SCA TRA-4: Parking and Transportation Demand Management (<i>See under Section 4.13, Transportation/Traffic - Detailed Policies, Plans or Programs Supporting Alternative Transportation</i>)</p>				

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
2.0 Planning Guidelines		
2.1 Oak Knoll Neighborhoods		
Retail Village area is designed as a modestly-sized gathering spot to provide basic needs to the community (such as groceries, restaurants, banking).	Not applicable	<i>Parcel 10 is not located in a Retail Village. This guideline is intended for development that "a cluster of buildings at varying scales fronting a 'Principal Drive' and a 'Plaza.'"</i>
Creekside Village neighborhoods are medium density residential areas laid out in the lowland areas flanking the restored Rifle Range Creek corridor.	Complies	<i>Parcel 10 is located in a Creekside Village neighborhood.</i>
The Uplands is the residential development designed to maximize views as well as provide a pleasing appearance as viewed from adjacent areas.	Not applicable	<i>Parcel 10 is not located in The Upland neighborhood.</i>
2.2 Neighborhood Streetscape		
High Visibility Façades -- Street Facing	Complies	Proposed residences comply with this guideline and corresponding Arch. Guideline #3.3 Massing Primary Volumes - Building Orientation
High Visibility Façades -- Open Space Facing	Complies	Proposed townhomes comply with this guideline and corresponding Arch. Guideline #3.3 Massing Primary Volumes - Building Orientation

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
Architecture Diversity and 'The Monotony Code' - For each single-family detached lot type, there must be a minimum of three (3) unique floor plan types, with three (3) façade variations each:	Complies	The proposal complies with this guideline for the proposed court homes by featuring three different floor plan types
A different porch or stoop type will be considered a façade variation;	Complies	Rear patios have been incorporated into the design to achieve façade variation.
No two (2) detached homes of the same design may be repeated within two (2) adjacent lots on a given Block Face or a facing Block Face;	Complies	The court homes have been placed so that no two adjacent lots contain the same architectural design.
Homes on corner lots are encouraged to have architectural features such as wrap porches, side porches, or bay windows facing the secondary street.	Complies	The corner lots propose covered porches with arched openings and second floor decks with wrought iron railings.
Both the front as well as side facing façade on corner lots will be considered High Visibility Facades.	Complies	The proposal highlights compliance this requirement on the site plans.
2.3 Commercial		
Building placement that reinforces the concept of the Plaza and orients and service areas away from the Plaza while keeping them screened from view from Mountain Blvd.	Not applicable	This is a proposal for a residential development.
70% glazing on facades directly fronting the plaza and 50% glazing on facades fronting pedestrian pathways.	Not applicable	This is a proposal for a residential development.
Awning and trellis overhead canopies to provide outdoor shade and shaded gathering areas.	Not applicable	This is a proposal for a residential development.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
Sidewalk widths at primary retail facades sufficient to provide tree planting, signage, furnishings, lighting, and outdoor seating areas where appropriate to adjacent retail use.	Not applicable	This is a proposal for a residential development.
Hardscape and Planting that reinforces the outdoor pedestrian realm, but provides equal access to vehicular traffic.	Not applicable	This is a proposal for a residential development.
Retail Plaza	Not applicable	This is a proposal for a residential development.
Architectural and Landscape Character - The Character of the Retail village should be inspired by the open-air neighborhood shopping districts typical to the Bay Area	Not applicable	This is a proposal for a residential development.
2.4 Townhomes		
Create a 'sense of address' and a front door for each unit by providing 'door yards,' gates, and access to public streets and paseos.	Not applicable	This is a proposal for detached court homes, not townhomes.
All units should feature covered entry areas either in the form of a stopp or entry porch.	Not applicable	This is a proposal for detached court homes, not townhomes.
Variation of design is encouraged and corner units should be treated differently than middle units.	Not applicable	This is a proposal for detached court homes, not townhomes.
End facades should treated as high visibility and should feature windows, entries where appropriate, and other design features normally on the front façade.	Not applicable	This is a proposal for detached court homes, not townhomes.
Odd numbers of units in a row are encouraged.	Not applicable	This is a proposal for detached court homes, not townhomes.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
Stepping between units is encouraged to provide private balconies and a varied building frontage as viewed from the street.	Not applicable	This is a proposal for detached court homes, not townhomes.
Landscape planting should be integrated in with streetscapes and provide screening for parking and alleys. Please refer to the Preliminary Development Plan for example designs for Paseos and Pocket Parks.	Not applicable	This is a proposal for detached court homes, not townhomes.
2.5 Building Massing and Placement		
Building setback and height requirements are contained in Zoning Ordinance and vary according to lot size and building type. In addition to those standards, the intent of these guidelines is to address additional massing considerations such as ‘under the roof’ or ‘attic’ 1/2 stories, and setback garages. Massing, building setback and height are considered in more detail in the Architectural Guidelines	Does not comply	The applicant seeks an exception to allow the garage face to be five feet from the front lot line.
2.5 (aka 2.6) Driveways and Garage Placement		
Driveways and garages within Oak Knoll should be designed to reinforce the dominance of a tree-lined streetscape...Refer to Chapter 4.0, Landscape Guidelines, for allowable paving materials for driveways.	Does not comply	The applicant seeks an exception to allow the garage face to be five feet from the front lot line.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
3.0 Architectural Guidelines		
3.1 The 'Bay Area' Regional Style		
Building which connect to and are inspired by the natural setting.	Complies	The court homes connect well with the natural setting.
Simple building mass with additive elements	Complies	The court homes incorporate several additive elements.
Natural materials (wood, stone, terra cotta, stucco)	Complies	Exterior materials such as wood, stucco, stone veneer and board and batten siding are proposed.
Subdued earth-tone paint colors and light colored stuccos.	Complies	The exterior colors incorporate earth-tone paint colors, stuccos, s-tiled roofs, and stone.
3.2 Architectural Style Matrix - By Family		
Arts & Crafts: Craftsman Bungalow; Shingle; Tudor; Arts and Craft	Complies	The proposal includes Craftsman styled court homes.
Mediterranean: Spanish Colonial; Mission; Tuscan	Complies	The proposal includes Mission styled court homes.
Californian: Farmhouse; California Modern (mid-century modern); California Contemporary	Not applicable	The proposal includes Farmhouse styled court homes.
3.3 Massing - Primary Volumes		
<i>Building orientation</i>		
Secondary Volumes	Complies	Mostly gable roof profiles.
Additive Building Elements	Does not comply	More additive elements should be incorporated at the sides of the homes.
3.4 Roofs		
Roof materials	Complies	Flat concrete tile, standing seam metal, s-tile roofs are proposed.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
Successful roof designs	Complies	The proposed design complies with this guideline by proposing gable roofs and roof slopes that complement each architectural style of building.
Dormer sizing	Complies	The proposed design and sizing are appropriate for the architectural designs and comply with this guideline
Dormer siding	Complies	The proposed design and sizing are appropriate for the architectural designs and comply with this guideline
<i>3.5 High Visibility Façades</i>		
High Visibility Façades - Open Space - Use of porches and balconies are encouraged on these facades, and they should be designed with their visibility in mind, as well as the privacy of the homeowner.	Complies	Porches and balconies have been included on high visibility façades.
Corner lot façades - Corner lot façades shall have consistent details and elements on elevations facing both streets. The rhythm of openings established on the entry façade shall continue on the side façade that faces the street, and divided window patterns shall be consistent on both elevations.	Complies	Entrances that face the street and have been enhanced with high quality design elements such as stone veneer columns with wide pedestals to add to the exterior material changes for visual impact.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
<p>Additive façade elements - Once the design of the High Visibility Façade openings has been determined, additive building elements like porches and dormers should follow the rhythm of the facade composition. Wraparound porches are encouraged on corner lots, as well as projected window bays. Porch columns should be spaced equally to either side of facade openings.</p>	<p>Complies</p>	<p>Porches and balconies have been included on high visibility façades of corner lots.</p>
<p>Successful execution of second façade - Secondary Facades that successfully follow the above guidelines will support a composition of the Bay Area home that is balanced and continuous rather than one-sided and fragmented.</p>	<p>Complies</p>	<p>The proposed design has been revised to increase articulation to the wall façades such as using a mix of contrasting exterior materials.</p>
<p><i>3.6 Openings - Windows</i></p>		
<p>Window types</p>	<p>Complies</p>	<p>Casement, single-hung, true or simulated divided lite windows with wood trim.</p>
<p>Window proportions and trim</p>	<p>Complies</p>	<p>The proposed design provides details on window proportions and trim and complies with this guideline.</p>

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
Shutters - If shutters are incorporated in Primary Facades they should likewise be incorporated in High Visibility Facades.	Not applicable	This guideline does not apply. Shutters are not incorporated into the proposed designs. Shutters are listed as exterior materials for enhanced elevations, but they are not used as a design element.
<i>3.7 Exterior Doors</i>		
Exterior main entry doors can be flat or traditionally paneled doors. Please refer to the Architectural Style Matrix on page 30 for design recommendations by style.	Complies	Exterior main entry doors are traditionally paneled.
<i>3.8 Porches and Stoops</i>		
Types - The porch or stoop is the signature element of an Oak Knoll home. As such, all homes must have either a porch or stoop.	Complies	The proposed design complies with this guideline.
Porch Dimensions	Complies	The proposed design complies with this guideline.
Porch Details	Complies	The proposed design complies with this guideline.
Stoops	Complies	The proposed design complies with this guideline.
Porch Materials	Complies	The proposed design complies with this guideline.
<i>3.9 Garages</i>		
Garage Dimensions	Complies	The proposed design complies with this guideline.
Garage Details	Complies	The proposed design complies with this guideline.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
<i>3.10 Lighting</i>		
Architectural Lighting	Complies	The proposed design complies with this guideline.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
4.0 Landscape Guidelines		
<i>4.1 Landscape Vision</i>		
<i>4.2 Streetscape Design</i>		
<i>4.3 Open Space Design</i>		
The existing grassland on the upper hillside and areas of existing preserved oak woodland are protected natural resources.	Not applicable	Not applicable to this parcel.
The lower hillside will be extensively planted as a restored oak woodland natural setting, consisting of several native oak species, Toyon and California Buckeye.	Not applicable	Not applicable to this parcel.
The restored Rifle Range Creek will be revegetated with an appropriate and diverse native plant community to recreate a natural setting that benefits wildlife, and includes a multi-use trail serving the community. Refer to Oak Knoll Mixed Use Community Development Project Regulatory Permit Application Package.	Not applicable	Not applicable to this parcel.
Tree mitigation occurs site-wide in a variety of locations. Refer to the Tree Removal Permit Package for recommended mitigation locations and species.	Not applicable	Not applicable to this parcel.
<i>4.4 Parks and Plaza Design Intent</i>		
The parks should emphasize use of native trees, shrubs, and groundcovers in both organic and formal settings. Refer to the Neighborhood Streetscape Plant List for Proposed Plants.	Not applicable	Not applicable to this parcel.
Parks should incorporate community-wide furnishings and signage consistent with other design elements in the community.	Not applicable	Not applicable to this parcel.
Parks should provide shaded seating areas, picnic tables, and trash receptacles.	Not applicable	Not applicable to this parcel.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
Hardscape areas should avoid asphalt and large expanses of concrete. Natural stone, pavers, high quality stamped concrete, and decomposed granite should be utilized in the appropriate settings.	Complies	Hardscape areas will avoid large expanses of concrete and natural pavers and other high quality materials are proposed.
<i>4.5 Community Trails and Recreation</i>		
Emphasis is on use of natural materials and simple treatments that are indeed to integrate fully with the natural setting.	Complies	The proposed design complies with this guideline.
Use of reclaimed timber for benches, signage, and trail markers with opportunities to incorporate hand-crafted artisan designs.	Not applicable	Not applicable to this parcel.
Trails for Oak Knoll are classified as follows: Hiking Trails; Multi-Use Path (Walking/Running/Biking); Neighborhood Path; Bike Route	Not applicable	Not applicable to this parcel.
Location of the trails system should meet the following design objectives: Safety; Connectivity to on-site and off-site destinations; Diversity in a experiences and user types; conforms to site attributes, opportunities, and constraints.	Not applicable	Not applicable to this parcel.
<i>4.6 Signage and Monumentation</i>		
<i>4.7 Walls</i>		
Site Retaining Walls		
The approved site retaining wall is: Pavestone 'Anchor Diamond Pro' Retaining Wall; Face Style; Straight; Color: Sandstone Blend.	Complies	The proposed design complies with this guideline.
<i>4.8 Residential Landscape Design</i>		
Oak Knoll landscapes and gardens are versatile, imaginative, and offer a range of expressions.	Complies	The proposed design complies with this guideline.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
Landscapes encourage a relaxed, informal, and practical approach while accommodating contemporary lifestyles.	Complies	The proposed design complies with this guideline.
Landscapes are designed to respond to unique characteristics, such as lot configuration, topography, existing vegetation, and the design and location of the house and ancillary structures.	Complies	The proposed design complies with this guideline.
<i>4.9 Single Family Residential</i>		
Integrate the built environment with a dominant landscape	Complies	The proposed design complies with this guideline.
Blend landscapes between lots and neighborhood streets as a unified community landscape setting.	Complies	The proposed design complies with this guideline.
Establish a healthy, sustainable, and natural landscape environment.	Complies	The proposed design complies with this guideline.
Prioritize front yard landscapes to reinforce neighborhood streets as livable, walkable places. The combination of front porches and front yard gardens within the private frontages activate the streetscape, and shall contribute to a consistent, high quality neighborhood landscape.	Complies	The proposed design complies with this guideline.
Low groundcovers have low water requirements and are composed in drifts, using selections from the Approved Plant (see Appendices).	Complies	Climate adapted and drought tolerant groundcover and low shrubs are proposed for ornamental planting.
Three general landscape zones have been defined for each home site: front yard zone, side yard zone, and rear yard zone.	Complies	The proposed design complies with this guideline.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
<p>Front yards on sloped lots guidelines: Front yard slopes may not exceed 2:1; Retaining walls, if used, should be terraced where possible and not exceed a maximum height as set forth in the Zoning Ordinance; and Retaining walls shall be integrated with shrub planting to soften and screen walls.</p>	<p>Complies</p>	<p>The proposed design complies with this guideline.</p>
<p>4.10 Side and Rear Yard Fencing</p>		
<p>All fencing may either slope with grades or adjust as vertical offset between panels. Offsets shall not exceed 12-inches.</p>	<p>Complies</p>	<p>The proposed design complies with this guideline.</p>
<p>All fencing between adjoining lots shall have a height of 6-feet. Corner lots and end lots are encouraged to reduce fence heights at side yards to allow views with a minimum height of 4-feet.</p>	<p>Complies</p>	<p>The proposed design complies with this guideline.</p>
<p>All fencing shall be softened with flowering vines and shrubs to soften their visual appearance where visible from public areas.</p>	<p>Complies</p>	<p>The proposed design complies with this guideline.</p>
<p>A few upper hillside home sites with sloped rear yards in excess of 20% shall utilize the Approved Hillside Fence in the rear yard.</p>	<p>Not applicable</p>	<p>Not applicable to this parcel.</p>
<p>Lots with pools and spas require fencing and gates that meet all applicable codes.</p>	<p>Not applicable</p>	<p>Not applicable to this parcel.</p>
<p>Typical side and rear yard fencing is a solid cedar or redwood fence with a stained finish.</p>	<p>Not applicable</p>	<p>Not applicable to this parcel.</p>
<p>For upland lots with rear yards with onsite and offsite visibility, rear yard fencing, if used, shall use the Approved Hillside Fence to ensure visual consistency.</p>	<p>Not applicable</p>	<p>Not applicable to this parcel.</p>
<p>4.11 Retaining Walls on Lots</p>		

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
Use of stucco, brick, painted brick, or natural stone veneer may be used for site walls in front and side yards that are visible from public areas. Materials shall complement the building architecture.	Complies	The proposed design complies with this guideline.
Wall heights shall be appropriate to context and shall not exceed 6 feet in height per code.	Complies	The proposed design complies with this guideline.
Tiered walls shall be integrated landscape design.	Complies	The proposed design complies with this guideline.
Tops of walls may either slope or step with the topography as required. Walls may slope at 1:8 maximum or use vertical offsets of 12-inch maximum.	Complies	The proposed design complies with this guideline.
Use of vines, trailing evergreen groundcovers and shrub massings are encouraged to soften walls.	Complies	The proposed design complies with this guideline.
Retaining walls in side and rear yards. Walls not closely associated with the architecture and not visible from public areas may use the Approved Standard Wall System described in the Appendices.	Not applicable	Not applicable to this parcel.
Retaining walls in side and rear yards. Walls not closely associated with the architecture and not visible from public areas may use the Approved Standard Wall System described in the Appendices.	Not applicable	Not applicable to this parcel.
Retaining walls in rear yards shall be located a minimum of four feet from the property line to allow room for fencing.	Not applicable	Not applicable to this parcel.
Retaining walls and steps at front walkways are allowed to resolve site grading.	Complies	The proposed design complies with this guideline.

DESIGN GUIDELINES COMPLIANCE MATRIX - PARCEL 10

Design Guideline	Compliance Analysis	Discussion
The following retaining wall materials are allowed: brick; painted brick; natural stone veneer; approved concrete block wall system in rear and side yards (refer to Appendices); gabions; and pressure-treated wood.	Complies	The proposed design complies with this guideline.
The following retaining wall materials are not allowed: railroad ties; metal cribs; and concrete pylons.	Complies	The proposed design complies with this guideline.
