Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0600102114
Global Id: T0600102114
Latitude: 37.77475
Longitude: -122.233587
Status: Completed - Case Closed
Status Date: 01/21/2014
Case Worker: MYM
RB Case Number: 01-2298
Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: RO0000334
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: In November 1996, one 1,000-gallon UST and associated piping were removed. Site investigations were conducted at several times between 1997 and 1999. A risk assessment and receptor survey were performed in 2001. An ORC injection pilot study was performed in 2005. Soil, soil vapor, and groundwater sampling was conducted in 2009. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>

FINDS:

Registry ID: 110002665704

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110043561892

Environmental Interest/Information System

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type: Cleanup Program Site
Case Worker: Not reported
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: NA
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Arsenic, Lead
Site History: Metals were detected in the area of a former railway corridor beneath the Fruitvale BART station parking structure. The impacted soil was to be excavated or managed in place beneath paved areas and the parking structure. The case remains open pending confirmation of disposal and management of impacted soil.

 Name: WEST COAST VENDING INC
 Address: 2124 LIVINGSTON STREET
 City,State,Zip: OAKLAND, CA 94606
 Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
 Case Type: LUST Cleanup Site
 Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0600102157
 Global Id: T0600102157
 Latitude: 37.7815651303699
 Longitude: -122.240490317345
 Status: Open - Site Assessment
 Status Date: 04/25/2000
 Case Worker: JMJ
 RB Case Number: 01-2347
 Local Agency: Not reported
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Local Case Number: RO0000088
 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Gasoline
 Site History: In April 1998 one USTs was removed and confirmation soil samples detected significantly elevated levels of hydrocarbon contamination in soil. In May 2000, ACEH approved a work plan for site characterization; however the work plan was not implemented. A Revised Work Plan for site characterization was received in November 2011 and was conditionally approved but has not been implemented. Not all historic documents for the fuel leak case are available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

FINDS:

Registry ID: 110002947152

Environmental Interest/Information System

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

- . Waste code: 122
 - . Waste name: Alkaline solution without metals (pH > 12.5)

 - . Waste code: 181
 - . Waste name: Other inorganic solid waste

 - . Waste code: 212
 - . Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

 - . Waste code: 711
 - . Waste name: Liquids with cyanides > 1000 mg/l

 - . Waste code: 792
 - . Waste name: Liquids with pH < 2 with metals

 - . Waste code: D001
 - . Waste name: IGNITABLE WASTE

 - . Waste code: D002
 - . Waste name: CORROSIVE WASTE

 - . Waste code: D003
 - . Waste name: REACTIVE WASTE

 - . Waste code: D007
 - . Waste name: CHROMIUM

 - . Waste code: D010
 - . Waste name: SELENIUM

 - . Waste code: D011
 - . Waste name: SILVER

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Address: 3125 E 7th St
City: OAKLAND
Facility ID: San Francisco Bay 011009225
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 2
Facility Telephone: Not reported
Facility Contact: Not reported
Agency Name: GOLD SEAL PLATING
Agency Address: 3125 E. 7th St.
Agency City,St,Zip: Oakland 94512
Agency Contact: Gary Spencer
Agency Telephone: 5105366533
Agency Type: Private

Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CA BOND EXP. PLAN:

Responsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: The Port of Oakland owns the site and is in compliance with an order issued by DHS. Monsanto Company has also been identified as a potentially responsible party by DHS. DHS has budgeted \$50,000 for oversight/monitoring of cleanup efforts. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with remedial investigations and cleanup activities.
Site Description: The site is located on Embarcadero Street at the foot of Dennison Street in Oakland. For 60 to 70 years, the 1.3 acre site was leased to industrial tenants, including oil companies and formulators of pesticides and wood preservatives. It is now a vacant lot.
Hazardous Waste Desc: Pentachlorophenol (PCP), organochlorine pesticides and solvents have been discovered in soil and ground water at this site. About 8,000 cubic yards of soil and an unknown amount of ground water is contaminated. Dioxins and furans, impurities of PCP, have been found in low levels in soil and ground water.
Threat To Public Health & Env: Residential, industrial, commercial, recreational and military areas are adjacent to the site. The population within a three-mile radius is estimated at

215,331 persons. PCP was not detected in shoreline sediment samples or at the box culvert outlet in the Bay at Dennison Street. The closest domestic well is about three-quarters of a mile away.
Site Activity Status: The final phase of remedial investigation is being conducted. Upon completion of that work, the feasibility study and RAP will be prepared.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: RCRA Facility Assessment Report
Completed Date: 09/01/1991
Comments: PA completed which identified 2 SWMUs and 2 AOC DRUM STORAGE AREA-This unit consists of a bermed concrete pad with a design capacity of 256 drums measuring approximately 20 feet by 40 feet that is enclosed by a chain-link fence. Drums of waste solvent were formerly stored here until 1988. This unit was located outside in the yard near the product storage building. According to the closure plan, this unit was used for hazardous waste storage beginning in September 1983 and has not been used to store wastes since 1988 At the time of the FIT site visit no drummed wastes were present and this unit was being steam-cleaned. Waste Managed: Drummed waste liquids including waste machine oil, spent solvent, paint sludge, waste hydrochloric acid solution, and waste copper sulfate (liquid) were stored here. Among the constituents in these wastes were methyl ethyl ketone, aromatic hydrocarbons, isopropanol, toluene, benzene, methanol, ethanol, copper sulfate, and hydrogen chloride. This unit is a bermed (6 inches) concrete pad surrounded by a chain-link fence (2,14). A removable plug at one end of the unit was used to drain rainwater. Drums were stored within the area on wooden pallets. No releases are known to have occurred from this unit. No sampling has been performed to determine whether or not there have been releases. SOLDER DROSS STORAGE AREA - The solder dross storage area is a section of the concrete railroad platform that is cordoned off with a chain-link fence. This unbermed unit has a design capacity of approximately 100 drums and measures approximately 40 feet by 8 feet (2,14). A raised roof (no walls) affords some protection from the elements for this unit. According to the closure plan, this unit was first used in 1983. This unit was being steam-cleaned at the time of the FIT site visit. Waste Managed: This unit was used to store drummed lead solder dross and baghouse dust which have a composition of 97 percent lead and 3 percent tin and antimony. The solder dross storage area is part of a converted railroad platform. There are no apparent release controls. No releases are known to have occurred from this unit. No sampling is known to have been performed to determine whether or not releases have occurred. AREA OF CONCERN - OLD BOILER FUEL TANK This area of concern is located on the east side of the property in a small area between the edge of the property and the building foundation. The old boiler fuel tank was installed probably before World War II. Fuel product is floating on the aquifer in this area and is being pumped out and disposed of by a contractor. This unit was filled with concrete instead of being removed because

1007156428

its awkward physical location (between the building foundation and East 8th Street) precluded removal. AREA OF CONCERN - SOLVENT PRODUCT TANK FARM Located on the west side of the property just south of the product storage building were six underground storage tanks that were removed in 1986 and 1987. Non-chlorinated solvents (including methyl ethyl ketone, toluene and xylene) used in the can coatings were stored in these tanks. Solvent-contaminated soil was excavated from the surrounding area during removal. Although according to ANCC post-removal sampling was conducted, specific information about the event does not appear to exist.

Site History: The NMCRC is located along the south side of the Oakland Inner Harbor at 2144 Clement Avenue, Alameda, California. The site is currently used as a training facility for Naval and Marine Corps reserve units and staff for the Navy Operational Support Center. As shown on figure 2, the site currently contains a training building (building 1), a training building addition (building 5), a Marine Corps supply warehouse (building 2), a vehicle maintenance garage (building 3), and a new vehicle maintenance building (building 4). A boat ramp and additions to buildings 2 and 4 are currently being constructed. In 1942, the U.S Government acquired title to the future NMCRC property for war time support of ship building. three graving docks (Graving Docks 2,3, and 4) were dredged to a depth of about 25 feet, and embankments were constructed adjacent to each. A fourth graving dock (Graving Dock 1) was positioned west of the site and appeared to be owned and operated by Pacific Bridge Company. Pacific Bridge Company also operated the government-owned shipyard during the war years. During the 1950s, ship building activities had been "mothballed", but the site continued to be used as a reserve center. Various structural improvements were conducted that included conversion of warehouses, administrative buildings, and shops to training facilities. some buildings that supported ship building were demolished during this time period between 1958 and 1960, existing wooden piers between the graving docks were removed and replaced with a single concrete pier between Graving Docks 3 and 4. At this time, the generator/boiler house was relocated to the western side of the embankment between Graving Docks 3 and 4 (figure 2). A new 1,200-gallon fuel oil UST was installed south of the generator/boiler house to fuel a boiler and generator that provided steam and electrical power to ships berthed at the new pier. During the 1950s, and at least through 1959, J.H. Baxter and Co. leased a portion of the landward side of the graving docks for storage of creosote-treated poles. J.H. Baxter and Co. owned the adjacent land east of the NMCRC and had conducted wood treatment operations at this site since 1923. the configuration of the "pole yard" east of the NMCRC included creosote wood treatment in the central-eastern portion of the property, and it included a tank farm for creosote and fuel oil products, a boiler room, and treatment tanks. During the 1960s, a new NMCRC campus was constructed at the site. Reserve activities continued and ships continued to be berthed at the pier. the generator/boiler house appeared to continue to be used. Graving Docks 3 and 4 were backfilled by 1963. the source of the backfill materials is not known. Graving Dock 2 was not

backfilled at this time, and plans identify the southern portion of this graving dock as a "Contractor Disposal Area" (Figure 2). Graving Dock 2 was backfilled by 1966. Most of the remaining original ship building structures landward of the graving docks appear to have been removed with the construction of the training building (building 1) and the Vehicle Maintenance Garage/Rifle Range Building (now USMC Supply Warehouse - Building 2). The area of the former graving docks was unpaved and appeared to be leased out for equipment storage and repair during the period of 1966 to 1967. Reserve activities continued throughout the 1970s; although, the lack of larger training ships (destroyers and submarines) berthed at the pier suggests that the generator /boiler house was no longer used. Between 1979 and 1984, Standard oil Company of Ohio leased the area of the former graving docks for module fabrication of North Slope Alaska oil exploration structures. the Large (920-ton) modules were moved with crawler transport westward to the adjoining property for loading onto barges for transport to Alaska. The generator/boiler house may have been removed by this time. During the 1990s, the New Vehicle Maintenance Building (Building 4) and the Training Building Addition (Building 5) were constructed. It was during the construction of these building that the environmental issue of the West Vault area was discovered. Paving the former graving docks area during the 1990's for the North Parking Lot revealed the former fuel oil UST associated with the generator /boiler house. A southeastern portion of the site was leased to the City of Alameda for transformer storage. Three site improvement projects are currently being implemented at the NMCRC. A boat ramp is being constructed in the vicinity of the former embankment/roadway and adjacent to the former wooden trestles between Graving Docks 2 and 3 (figure 2). An addition to building 4 is being constructed at the eastern end of the existing Building 4, and a new building just east of building 2 is being constructed. All of these construction projects began in the summer of 2011, and they are scheduled to be completed by the end of 2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 12/18/2017
Comments: Voluntary Cleanup Agreement signed between DTSC and Oakland 5 Inv, LLC on December 18, 2017 for DTSC oversight of investigative and removal activities to address lead- and arsenic-impacted soil.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: OPEA Consultation
Completed Date: 01/19/2018
Comments: DTSC consulted internally to determine what California Environmental Quality Act related documents would need to be prepared for the project. It was determined that the scope of work for this project may allow a Notice of Exemption to be prepared.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Request for Tribal Outreach
Completed Date: 02/23/2018
Comments: DTSC submitted a request to the Native American Heritage Commission for assistance with outreach efforts to the Native American tribes in the area of the project.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/28/2018
Comments: Annual DTSC oversight cost estimate letter to City Ventures for fiscal year 2018/2019 (July 1, 2018 - June 30, 2019).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 10/23/2017
Comments: Stantec Consulting Services Inc. (Stantec) performed a Phase II Environmental Site Assessment for the Site in order to evaluate the extent and presence of total petroleum hydrocarbons, metals, and volatile organic compounds. Arsenic was found at concentrations ranging from 2.95 milligrams per kilogram (mg/kg) to 43.2 mg/kg in soil, and lead was found at concentrations between 6.85 mg/kg and 336 mg/kg in soil. Stantec indicated in the Phase II Environmental Site Assessment Report that soil impacts are limited to approximately 2 feet in depth, and provided an estimate for how much soil containing lead and arsenic should be excavated from the Site. Stantec also recommended seeking regulatory oversight from DTSC for remediation and excavation of impacted soils. The investigation was performed and the report was prepared before City Ventures submitted an application requesting agency oversight. Stantec later performed an Additional Phase II Environmental Site Assessment to further delineate the extent of impacted soils prior to requesting agency oversight.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 10/05/2018
Comments: DTSC released the Draft Removal Action Workplan (RAW) for public review and comment from August 17 to September 17, 2018. Only one comment was received during the public review and comment period, and DTSC prepared a responsiveness summary which includes a response to this comment. A California Environmental Quality Act Notice of Exemption was prepared for this project. The remedy selected in the RAW consists of excavating approximately 2,100 cubic yards of metals-impacted soil from select locations at the Site, and disposing the excavated soil at an off-site permitted facility. Cleanup levels have been established to allow for unrestricted future residential usage. Soil confirmation sampling will occur after excavation to verify residential cleanup levels have been achieved. The excavated areas will be backfilled with approximately the same amount of imported clean materials.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 08/28/2018
Comments: The Community Profile describes the community and potential community concerns regarding the possible health risks associated with the Site, and anticipated public participation activities to take place at the Site.

Comments: DTSC had a public notice published in the Alameda Times Star that announced the public comment period on the draft Removal Action Workplan, from August 17 to September 17, 2018.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 08/17/2018
Comments: A Community Update was mailed out to announce that DTSC was making the draft Removal Action Workplan available for public review and comment. The Community Update gives a brief history of the Site and a summary of the proposed removal action alternative and next steps, as well as DTSC staff contact information.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 10/13/2017
Comments: Stantec Consulting Services Inc. (Stantec) performed an Additional Phase II Environmental Site Assessment for the Site in order to evaluate the extent and presence of total petroleum hydrocarbons, metals, and volatile organic compounds. Arsenic was found at concentrations ranging from 2.2 milligrams per kilogram (mg/kg) to 79.5 mg/kg in soil, and lead was found at concentrations between 5.63 mg/kg and 336 mg/kg in soil. Stantec indicated in the Additional Phase II Environmental Site Assessment Report that soil impacts are limited to approximately 2 feet in depth, and provides an estimate for how much soil containing lead and arsenic should be excavated from the Site. The investigation was performed and the report was prepared before City Ventures submitted an application requesting agency oversight.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 10/23/2017
Comments: Stantec Consulting Services Inc. (Stantec) performed a Phase I Environmental Site Assessment (ESA) as part of a due diligence prior to City Ventures purchasing the property and prior to submittal of an application requesting agency oversight. Stantec summarized the Site history and reviewed all relevant files and documents to determine the condition of the Site. Stantec concluded that additional soil and soil vapor sampling would be required to determine whether the historical usages at the Site resulted in releases of hazardous materials including volatile organic compounds and petroleum hydrocarbons. The Stantec Phase I ESA contains Photographs of the Property and the surroundings, a previous Phase I ESA performed in 2000 by RGA Environmental Inc as Appendix B, Environmental Agency Database reports as Appendix C, and agency records as well as user provided records and interview forms.

 Completed Date: 10/13/2017
 Comments: Stantec Consulting Services Inc. (Stantec) performed an Additional Phase II Environmental Site Assessment for the Site in order to evaluate the extent and presence of total petroleum hydrocarbons, metals, and volatile organic compounds. Arsenic was found at concentrations ranging from 2.2 milligrams per kilogram (mg/kg) to 79.5 mg/kg in soil, and lead was found at concentrations between 5.63 mg/kg and 336 mg/kg in soil. Stantec indicated in the Additional Phase II Environmental Site Assessment Report that soil impacts are limited to approximately 2 feet in depth, and provides an estimate for how much soil containing lead and arsenic should be excavated from the Site. The investigation was performed and the report was prepared before City Ventures submitted an application requesting agency oversight.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Phase 1
 Completed Date: 10/23/2017
 Comments: Stantec Consulting Services Inc. (Stantec) performed a Phase I Environmental Site Assessment (ESA) as part of a due diligence prior

to City Ventures purchasing the property and prior to submittal of an application requesting agency oversight. Stantec summarized the Site history and reviewed all relevant files and documents to determine the condition of the Site. Stantec concluded that additional soil and soil vapor sampling would be required to determine whether the historical usages at the Site resulted in releases of hazardous materials including volatile organic compounds and petroleum hydrocarbons. The Stantec Phase I ESA contains Photographs of the Property and the surroundings, a previous Phase I ESA performed in 2000 by RGA Environmental Inc as Appendix B, Environmental Agency Database reports as Appendix C, and agency records as well as user provided records and interview forms.

Background Info: The site was once part of large wood treatment facility operated by J. H. Baxter and Co. Baxter treated wood utilized for poles, posts, and railroad ties with coal tar derived creosote and fuel oil. Creosote and fuel were stored in above ground storage tanks. Several treatment pits and separation sumps were located on the property. Various other chemicals were stored and generated at the site. DTSC collected surface soil samples at an area within the former wood treatment operations area in August 2003. Analysis of the samples indicated the presence of polynuclear aromatic hydrocarbons such as benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluranthene, dibenz(a,h)anthracene, and indeno(1,2,3-c,d) pyrene at concentrations up to 27 mg/kg, 24 mg/kg, 84 mg/kg, 3mg/kg, and 13 mg/kg, respectively. Metals such as arsenic, chromium, and lead were detected at concentrations up to 95 mg/kg 199 mg/kg, and 8170 mg/kg,

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 09/12/2016
Comments: This Voluntary Cleanup Agreement, executed September 12, 2016 applies to the property located at 2100 Clement Avenue, Alameda, in Alameda County, California 94501 (Site), identified by Alameda County Assessor's Parcel Numbers 71-228-1-2, and any off-site area to which hazardous substances have or may have migrated from the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Application
Completed Date: 08/24/2016
Comments: DTSC was identified as the lead oversight agency for the Site located at 2100 Clement Avenue, Alameda CA 94501. The Application cites sub-slab soil gas PCE and TCE concentrations that exceeded DTSC screening levels and were reportedly mitigated by excavation, as documented in a Preliminary Endangerment Assessment (PEA) to be reviewed by DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 11/07/2016
Comments: The Site s commercial buildings have been demolished and the Site has

been graded in preparation for redevelopment into residential use. Remedial excavations have been completed in areas where the presence of volatile organic compounds in sub-slab and/or soil vapor could have posed a vapor intrusion risk to future residential receptors. Post-remediation soil and soil gas sampling confirm that the potential risk has been mitigated. The PEA has determined that no further action is required at the Site to address hazardous substances releases.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lower
Actual:
24 ft.

CA BOND EXP. PLAN:
 Responsible Party: COST RECOVERY/OPERATION AND MAINTENANCE SITE
 Project Revenue Source Company: Not reported
 Project Revenue Source Addr: Not reported
 Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: The responsible party funded the characterization and remedial action at the site. State Bond funds were used for oversight of the RPs activities. DHS will seek cost recovery for its direct costs including staff costs and overhead related to the RI/FS and implementation of the RAP. DHS has budgeted \$5,000 per year for oversight of operation and maintenance of the ground water extraction and treatment system during a forecasted 15 year period.
 Site Description: The Clorox Company manufactures bleach and other products at this site. The ground water contains mercury.
 Hazardous Waste Desc: Mercury (Hg) has been found in the ground water at a concentration of up to 9,600 parts per billion (ppb).
 Threat To Public Health & Env: Contaminated ground water eventually discharges to the Alameda Estuary, which leads to the San Francisco Bay. Potential receptors to exposure of contaminants in ground water include aquatic life in San Francisco Bay.
 Site Activity Status: The responsible parties completed their investigation at the site to determine the extent of contamination in October, 1985. The RAP was received by the Department in March, 1986. DHS issued a RAO in October, 1986 and the RPs completed the design of the treatment plant in June, 1987. Clorox began construction of the ground water treatment plant in October, 1987 and DHS granted the RPs a variance in December, 1987 to operate the plant starting in January, 1988. Clorox was issued waste discharge requirements from the Oakland RWQCB and met their discharge requirements in May, 1988. The site was certified in late June, 1988.

Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Benzene, Other Solvent or Non-Petroleum Hydrocarbon, Vinyl chloride, Diesel, Gasoline, Other Petroleum, Waste Oil / Motor / Hydraulic / Lubricating
Site History: Site used for oil recycling from 1925-1981. Current owners Lawrence and Diane Webster purchased the site from Ekotek Inc in 1983 but never operated on-site; they are named as sole dischargers to the current Final SCR for the site. Investigations indicate that oil-water sump, USTS, and above-ground tank farms are sources of TPH gas, diesel, and motor oil, PCBs and CVOCs in soil and groundwater. Most ASTs and USTs demolished and removed in 1995-96; site was then graded and paved. Current Final SCR conditionally establishes groundwater monitoring/separate phase recovery wells around site perimeter as cleanup method, along with a risk management plan.

unable to pay for remediation, another source of funds will need to be identified.

Site Description: Ekotek is a waste oil recovery and recycling facility. Waste oil and Stoddard's solvent were treated and stored onsite. Some of the hazardous waste may have spilled onto the soil.

Hazardous Waste Desc: Waste oil or solvents may contaminate soil and may contain benzene, toluene, phenol and lead.

Threat To Public Health & Env: Over 100,000 people live within a two mile radius of the site. A coastal wetland is located 4,000 feet away. Arrowhead Marsh is 1.4 miles away. The depth to ground water is from 5 to 28 feet. Approximately 18 irrigation and industrial wells are within 3 miles. The site is securely fenced and posted.

Site Activity Status: The RP has indicated an interest in rehabilitating the facility as a unit for treatment of oily waste water.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: N/A
Date Made Active in Reports: 05/14/2019	Last EDR Contact: 07/02/2019

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Number of Days to Update: 32	Next Scheduled EDR Contact: 09/09/2019
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/17/2018	Source: Environmental Protection Agency

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

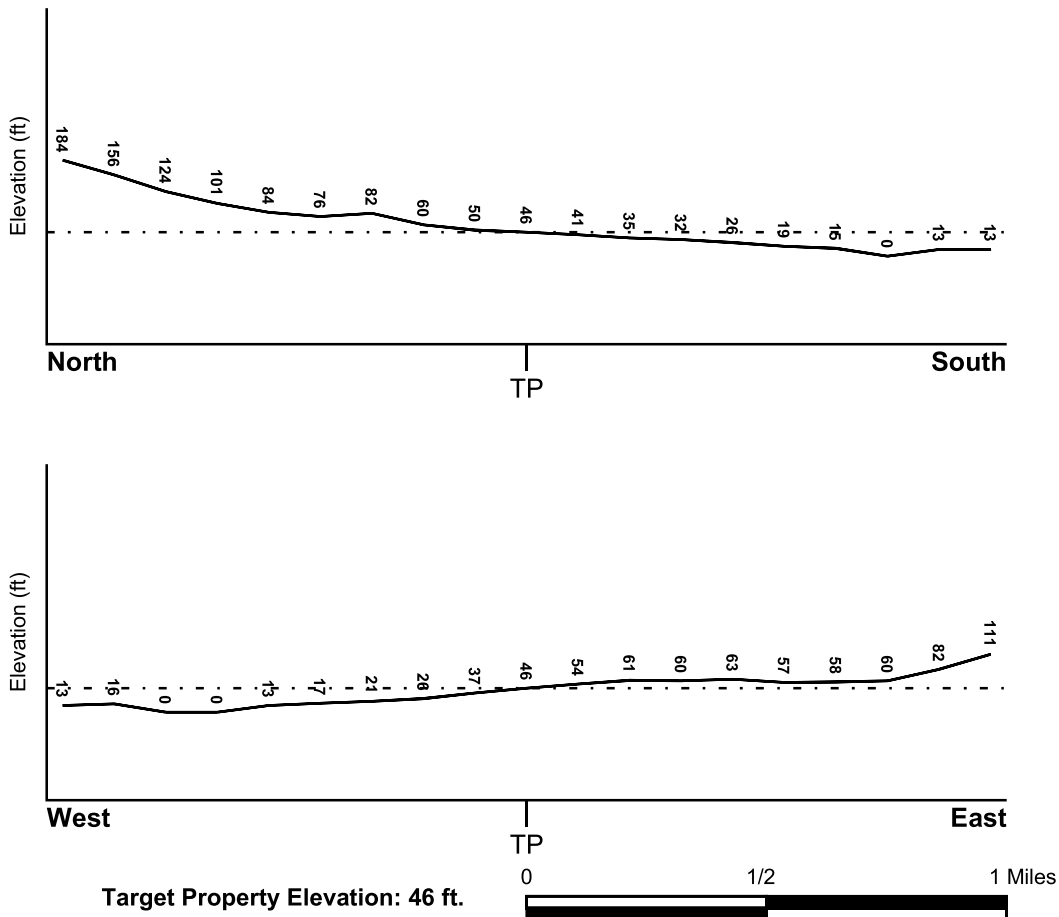

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
OAKLAND EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Tierra

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
2	11 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
3	31 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.
