

Ways that CPRA Adds Allegations

At Intake – CPRA Intake Technicians notice that OPD missed allegations

- Examples: Racial Profiling; Body Worn Camera activation
- Not historically tracked, so our evidence here is anecdotal

During Investigation – CPRA Investigator sees a new allegation IAD did not initially

- Examples: Search and Seizure; Use of Force
- We made a good faith hand-count for 2020: roughly 39 allegations added AND sustained over 19 cases; only about 1 in every 10 cases assigned to an Investigator
- We used these allegations to check the equity impact of our work

At end of case, CPRA and IAD disagree as to finding on added allegation.

- Not historically tracked, either, if IAD agrees with CPRA's finding
- Examples: Search and Seizure; Use of Force
