

Seminary Avenue Rapid Response Program

OakDOT mobilizes its Rapid Response Program primarily in response to fatal traffic crashes, with a focus on crashes involving people walking and biking. The Program includes an engineering assessment of improvements focused on the prevention of future loss of life. Identified improvements are delivered through the Rapid Response Program (via a maintenance treatment or quick-build improvement) or through other existing programs, such as the Paving Program or capital improvements when there are existing plans for improvements as part of a larger project.

In response to the fatal crash on September 26, 2023 involving Mara Delaney near the intersection of Seminary Avenue and Outlook Avenue, OakDOT will be implementing the treatments in this document.

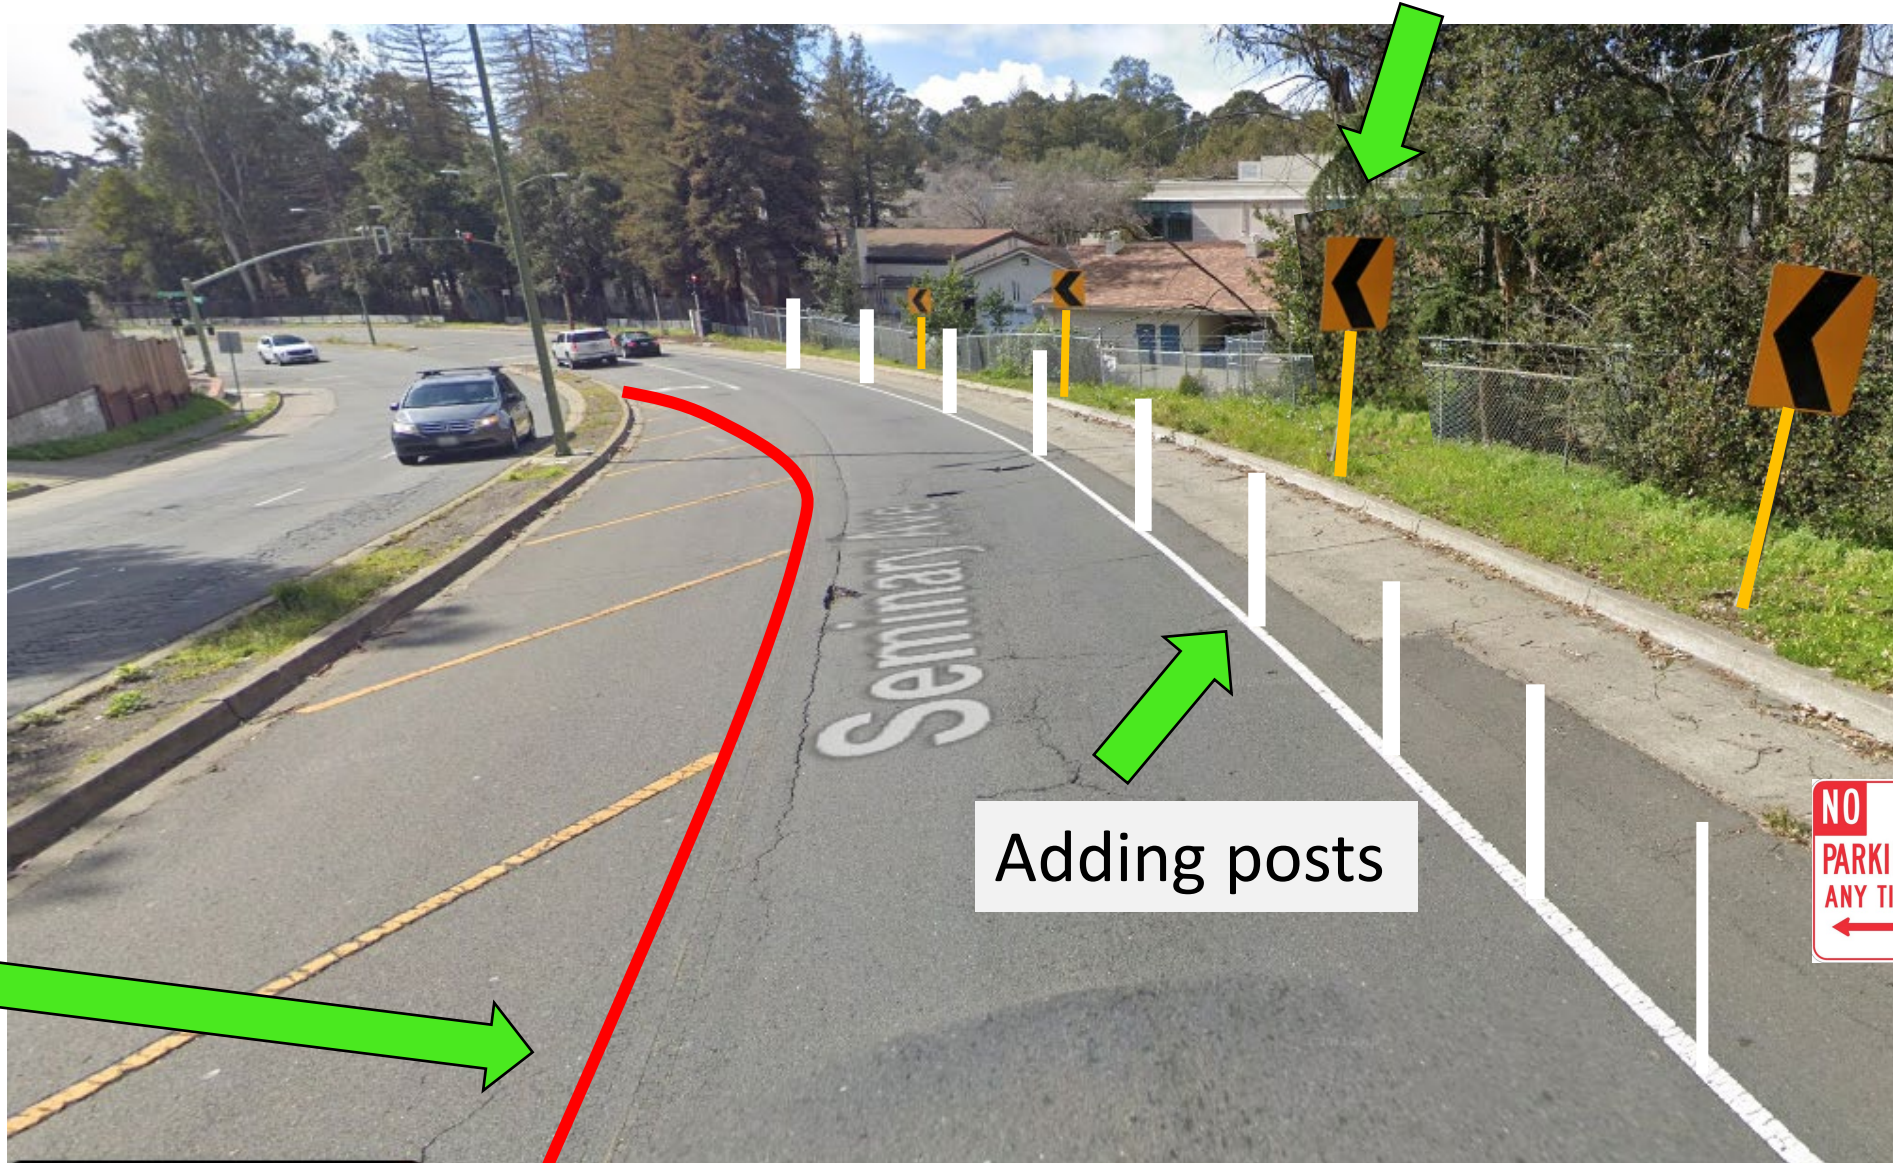

Oakland
DEPARTMENT OF
TRANSPORTATION

3/26/24

Downhill approach to Outlook

Adjusting spacing of chevron curve warning signs, adding reflective materials on sign posts

Refreshing edge line to Oakdale, as needed

Adding posts

Outlook intersection

Installing continental crosswalks

Downhill from Outlook

Refreshing
edge line to
Laird, as
needed
