Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Background Info: The Gaines Site is a vacant lot located in a mixed residential/commercial/industrial neighborhood. It has been used to store automobiles, drums, pressurized gas containers and other miscellaneous equipment. Surface samples collected found lead as high as 28,000 parts per million (ppm). No volatile or semivolatile organic compounds were detected at significant levels.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 08/14/1995
Comments: Approved RAP requiring removal of contamination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 07/21/1995
Comments: Approved PEA to define extent of contamination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 07/03/1995
Comments: Approved RIFS noted presence of contamination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 10/26/1992
Comments: Site screening noted presence of two sumps. Soil and groundwater samples detected TPH, lead and copper above remediation goals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 01/07/1999
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 08/15/2002
Comments: Signed VCA amendment for time only. Amendment to the May 10, 1994 VCA

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 05/10/1994
Comments: Signed VCA with Caltrans for Cypress Reconstruction. This property is part of the project.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Alternate Address: 700 MURMANSK STREET, SUITE 3
Alternate City,St,Zip: OAKLAND, CA 94607
Background Info: ase which wil be redeveloped by the City of Oakland with a variet
y of commercial and industrial uses as part of the Gateway Develo
pment Area. Also, close to 185 acres (plus roughly 56 acres of s
ubmerged lands) will be developed by the Port of Oakland for mari
time, rail and other port activities as part of the Port Developm
ent Area. No residential uses will be allowed on the former Oakl
and Army Base property under the Amended Reuse Plan. The Amended
Reuse Plan, draft RAP, and draft RMP are analyzed in the former
Oakland Army Base Area Redevelopment Environmental Impact Report
pursuant to the California Environmental Quality Act. The Army h
as been conducting site environmental investigations and selected
remedial actions since 1989. DTSC is the primary agency oversee
ing the investigation and cleanup of the former Oakland Army Base
, and the Regional Water Qulaity Control Board, San Francisico Ba
y Region regulates the removal and closure of petroleum fuel tank
s. The Army's remedial activities have included removal of above
ground petroleum storage tanks (ASTs) and underground petroleum s
torage tanks (USTs), excavation of contaminated soil and removed
petroleum hydrocarbons from monitoring wells at former tank locat
ions, excavation of pesticide-containing soil from the off-site w
etlands area, and replacement of many transformers and electrical
equipment containing polychlorinated biphenyls (PCBs).
On August 6, 2003, Governor Davis approved Early Transfer of the
former Oakland Army Base to the City of Oakland. The U.S. Army r
equested that the State of California approve the deferral of rem
ediation of hazardous substance contamination and approve the tra
nsfer of the 363.5 acre base to the Oakland Base Reuse Author- it
y and the City of Oakland acting by and through the Oakland Redev
elopment Agency via an Economic Development Conveyance process.
The City of Oakland will begin remediation of hazardous substance
s in soil and groundwater as required in the Remedial Action Play
(RAP). The early transfer advances economic development for Oak
land and the region by integrating redevelopment with remediation
. The RAP identifies preferred alternatives at seven sites which
have been fully investigated and characterized for release of haz
ardous substances and for which remediation would proceed upon fi
nal approval of the RAP. The Risk Management Plan (RMP), which is
an appendix to the RAP, addresses all other areas of known or po
tential contamination, which may not yet have been fully investig
ated or characterized. The RMP specifies health protective measur
es that must be follwed during and after redevelopment at these l
ocations. The RMP includes protocols for conducting inspections,
performing routine sampling, maintaining institutional and engine
ering controls, elevating RMP location to RAP sites as appropriat
e, and fulfilling reporting obligations. The former Oakland Arm
y Base comprises of approximately 425 acres. Much of the base pr
operty was originally tidal flats or shallow open water. During
the first half of 1900s, the area was filled to create the land s
ubsequently acquired by the Army 1941. The former Oakland Army B
ase served as a major Army cargo port and warehousing facility fr
om 1941 until it was closed under the Base Realignment and Closur
e program on September 30, 1999. Army activities supported the f
ormer Oakland Army Base's primary military mission as a distribut
ion center and included maintaining and fueling railroad locomoti
ve engines and trucks that transported cargo, draining fluids fro

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

	m vehicles for overseas shipment, and repairing and servicing veh icles equipment, and base facilities. The Amended Draft final Reu se Plan for the Oakland Army Base, Dated July 23, 2001 (Amended R euse Plan), incoudes about 189 acres of the former Oakland Army B

Completed Info:

Completed Area Name: RMP Locations 11, 75, 86, 93, 105, 106, 108,
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 04/05/2010
Comments: On April 5, 2010, DTSC determined that all appropriate removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109 by November 2010.

Completed Area Name: Package E-1
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/24/2010
Comments: On June 24, 2010, DTSC issued the Remedial Action Certification for the Package E-1 Area. On June 14, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package E-1 Area in accordance with the RAP and RMP.

Completed Area Name: Package B
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/29/2010
Comments: On June 29, 2010, DTSC issued the Remedial Action Certification for the Package B Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package B Area in accordance with the RAP and RMP.

Completed Area Name: USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/24/2010
Comments: On June 24, 2010, DTSC issued the Remedial Action Certification for

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

the USTs 11/12/13 and 11A/12A/13A RAP Site. One June 24, 2010, DTSC approved the Completion Report and concluded that the Port of Oakland (a) had investigated the site adequately, (b) had implemented the required remedial action, (c) had monitored the groundwater for four quarters, and (d) had demonstrated achievement of the remedial action objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in accordance with the RAP, RMP, and RDIP.

Completed Area Name:	Bldg 99 GW
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/25/2009
Comments:	On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Groundwater Remedial Action Plan (RAP) Site (also known as the VOCs in Groundwater near Building 99 RAP Site). In 2005, the Port of Oakland installed five wells and monitored the groundwater for four quarters. Soil data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential industrial/commercial human receptors.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction - Site Inspection/Visit
Completed Date:	04/20/2010
Comments:	On March 22, 2010 DTSC, City of Oakland, and Port of Oakland inspected the Oakland Gateway Development Area. DTSC found site activities consistent with the land use covenant.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence
Completed Date:	08/11/2008
Comments:	The Port of Oakland and City of Oakland are requesting five years extension for the following RAP Sites:

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence
Completed Date:	08/12/2008
Comments:	DTSC issued a letter identifying that the trigger date for a statutory five-year review was the mobilization date of Building 1 remedy implementation (i.e., November 28, 2005). Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. The letter specifies that the first Draft Five-Year Review Report is due in May 2010.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction Monitoring Report
Completed Date:	01/28/2009
Comments:	The City of Oakland and the Port of Oakland provided their Annual Certification letters for the Gateway Development Area (GDA) and the Port Development Area (PDA), respectively on 1/13/09 and 1/22/09. These letters certify compliance with the environmental restrictions

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

of the Oakland Gateway Development Area (OGDA) as required by the Covenant to Restrict Use of Property, Environmental Restriction Section 4.01(e). DTSC has reviewed and concurred with the Annual Certification letters.

Completed Area Name:	Bldg 807
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	10/19/2009
Comments:	DTSC approved the Remedial Design and Implementation Plan for VOCs in Groundwater at Eastern End of Building 807 RAP Site on 10/19/09. The overall remedial action sequence is as follows: 1.

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	05/26/2006
Comments:	DTSC approved the Plan Modification Request Number 1 for Section 2.8 of the Soil Treatment Process Plan for the Building 1 Area. DTSC concurs that the City of Oakland may use pH indicator test strips in the field for the pre-treatment samples from Organic Residue.

Completed Area Name:	Bldg 99 GW
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	03/30/2005
Comments:	DTSC approved the Pre-Design Investigation Memorandum on 3/30/05 for the Building 99 Groundwater Remedial Action Plan Site.

Completed Area Name:	Bldg 99 Soil
Completed Sub Area Name:	Not reported
Completed Document Type:	* Remedial Action Completion or Implementation
Completed Date:	07/16/2007
Comments:	On 7/16/07, DTSC approved the Completion Report for the Building 99 Soil Remedial Action Plan (RAP) Site, and four adjacent Risk Management Plan (RMP) Locations listed below: Potential Lead-Based Paint Impacted Soils outside of Building 99 (NAD83 Northing and Easting Coordinates: 2125825, 6039940), Hydraulic Lift Cylinders inside Building 99 (NAD83 Northing and Easting Coordinates: 2125712, 6039884), Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125570, 6039966), and Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent RMP Locations.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Newsletter
Completed Date:	04/15/2005
Comments:	The Community Update presents the cleanup status of the portion of the former Oakland Army Base, now known as the Former Oakland Army Base Economic Development Conveyance Area. The update also transmits a survey to solicit community inputs regarding the cleanup project.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/14/2006
Comments: DTSC concluded that there was no need for a formal draft final document.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 08/01/2008
Comments: DTSC confirmed that the City has responded and revised the Health and Safety Plan appropriately. DTSC s 7/29/08 letter serves as agency concurrence on the subject document.

Completed Area Name: Bldg 99 GW
Completed Sub Area Name: Not reported
Completed Document Type: * Remedial Action Completion or Implementation
Completed Date: 07/16/2007
Comments: On 7/16/07, DTSC approved the Completion Report, VOCs in Groundwater near Building 99 RAP Site. In 2005, the Port of Oakland installed five wells and monitored the groundwater for four quarters. Soil data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential industrial/commercial human receptors.

Completed Area Name: Bldg 807
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 10/24/2005
Comments: On 10/24/05, DTSC approved the Pre-Design Investigation Memorandum (PDIM) dated September 19, 2005 for volatile organic compounds in groundwater in the vicinity of Buildings 807, 808, and 823 at the Former Oakland Army Base Economic Development Conveyance Area. The PDIM proposes additional investigates to aid the Remedial Design and Implementation Plan preparation.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 02/14/2006
Comments: DTSC approved the Remedial Design and Implementation Plan which proposes detailed cleanup actions at the Former Oil Reclaiming Plant/Building 1 Area. The City of Oakland will remediate soils and sludge contaminated with organic chemicals, neutralize corrosive soils, stabilize lead in soils, and dispose all wastes at permitted land disposal facilities.

Completed Area Name: USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/24/2010
Comments: On June 24, DTSC approved the June 2010 Completion Report for USTs 11/12/13 and 11A/12A/13A RAP Site and concluded that the Port of

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Oakland (a) had investigated the site adequately, (b) had implemented the required remedial action, (c) had monitored the groundwater for four quarters, and (d) had demonstrated achievement of the remedial action objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in accordance with the RAP, RMP, and RDIP.

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	05/12/2009
Comments:	On May 12, 2009, DTSC concluded that the City of Oakland has implemented the remedy pursuant to the Remedial Action Plan (RAP) and Remedial Design Implementation Plan (RDIP) at the Building 1 RAP Site and has demonstrated achievement of the remedial action objectives. Approximately 11,642 tons of treated Building 1 remediation waste was disposed of as non-RCRA hazardous waste at the Kettleman Hills Landfill. Approximately 578 tons of overburden soil, that was deemed unsuitable for on-site reuse, was disposed of as non-hazardous daily cover at the Altamont Facility. Approximately 10,000 gallons of wastewater, which included decontamination water and water from utility demolition was discharged to the City of Oakland sewer system in accordance with the East Bay Municipal Utility District Wastewater Discharge Permit and City of Oakland Building Inspection Sewer Permit. No excavation dewatering was conducted. Approximately 1 ton of sediment removed from the decontamination tank during cleaning was sampled and analyzed, and subsequently disposed of as non-hazardous daily cover at the Altamont Facility.
Completed Area Name:	USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	08/23/2007
Comments:	DTSC approved the Remedial Design and Implementation Plan for USTs 11/12/13 and 11A/12A/13A RAP Site (RDIP) dated August 2007. The RDIP describes the remedial activities at the USTs 11/12/13 AND 11A/12A/13A RAP Site. The Remedy includes re-excavating the backfill of the former USTs 11/12/13 excavation to one to two feet below the groundwater table (approximately 30 x 37 x 8 depth), pumping out groundwater that accumulates in the excavation, collecting confirmation soil samples on the sidewalls and floor, introducing oxygen release compound to the bottom of the excavation, backfilling excavation, and conducting quarterly groundwater monitoring at the site for at least one year.
Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	11/21/2003
Comments:	DTSC approved the Pre-Design Investigation Memorandum on 11/21/03 for the Building 1 Area. The memorandum describes a focused, pre-design investigation to obtain additional visual descriptions of encountered soil and waste layers, soil physical parameter data, and limited chemical data that will be useful for finalizing design decisions and to provide information to bidding remediation contractors.
Completed Area Name:	RMP Location - Building 99 Debris Area
Completed Sub Area Name:	Not reported

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 02/14/2006
Comments: DTSC approved the Report on Phase I Investigation and Work Plan for Phase II Investigation of Debris Area near Building 99 on February 14, 2006. The Phase I Report summarizes findings on two test pits. The Phase II Work Plan proposes investigation to define the lateral and vertical extent of contamination at the Debris Area.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/22/2006
Comments: DTSC approved the Plan Modification Request Number 4 for a modification to the Soil Treatment Process Plan to include the use of the Caterpillar 330 excavator (as described in the plan Section 2.2), Front Loader (as described in the plan Section 2.2), and/or a Caterpillar D5 Dozer to mix the reagent with the Building 1 waste.

Completed Area Name: Bldg 808 and 823
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/08/2009
Comments: DTSC concludes that the City of Oakland (a) has implemented the selected remedy pursuant to the Remedial Action Plan and Pre-Design Investigation Memorandum and (b) has demonstrated achievement of the remedial action objectives for the Buildings 808 and 823 RAP Site. DTSC hereby approves the Completion Report. DTSC will change the status of the Buildings 808 and 823 RAP Site on its EnviroStor database to Certified with Ongoing Operation and Maintenance.

Completed Area Name: Bldg 99 Soil
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 04/27/2005
Comments: DTSC approved the Pre-Design Investigation Memorandum on 4/27/05 for the Building 99 Soil Remedial Action Plan Site. The memorandum is a sampling plan for additional soil investigation at the Building 99 area to supplement existing data.

Completed Area Name: Bldg 991
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/06/2005
Comments: DTSC approved the Pre-Design Investigation Memorandum on 6/6/05 for the Building 991 Remedial Action Plan Site.

Completed Area Name: RMP Locations
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 08/19/2008
Comments: DTSC reviewed sampling proposals for the Risk Management Plan (RMP) Locations at Packages E-1 and E-2 emailed on 3/16/07. Package E-1 contains RMP Locations 71, 72, 73, 79, 81, and 92. Package E-2 contains RMP Location 90. DTSC provided verbal comments on the sampling strategy during the 7/3/07 Environmental Technical Team Meeting (meeting minutes #37). DTSC forwarded a concurrence to the Port of Oakland stating that the Packages E-1 and E-2 sampling

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

proposals are consistent with the RMP (i.e., Appendix E of the 9/27/02 DTSC-approved Remedial Action Plan). The RMP itself is already a Remedial Design for all RMP Locations.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Workplan
Completed Date: 08/12/2008
Comments: DTSC concurs with the well destruction proposal for the following 40 groundwater monitoring wells: BB-3, EMW1, EMW2, EMW3, ICFMW216, ITMW237, ITMW238, ITMW239, ITMW241, ITMW242, ITMW245, ITMW246, ITMW247, ITMW248, ITMW251, K738BM01, K738DW01, K99BM01 or B99BM01, K99DW01 or B99DW01, K99DW02 or B99DW02, OBMW01, OBMW02, SMW-21, SMW-48, SMW-53, SMW-55, SMW-56, SMW-65, SMW-66, SMW-69, SMW-70, SMW-71, SMW-72, SMW-73, SMW-74, SMW-75, SMW-88, SMW-89, SMW-90, and SMW-92. DTSC requests the City of Oakland to destroy the wells in accordance with the procedures outlined in Appendix B, Section 2.6 of the DTSC-approved Quality Assurance Program Plan dated April 8, 2005.

Completed Area Name: USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name: Not reported
Completed Document Type: Remedy Constructed: Operating Properly & Successfully
Completed Date: 04/22/2010
Comments: On 4/22/10, DTSC approved the Technical Report for Implementation of Remedial Action at UST 11/12/13 and 11A/12A/13A RAP Site (Technical Report) dated April 2010. The Port of Oakland commenced remediation in August 2007 and completed field activities in October 2007. The Technical Report documents the cleanup activities pursuant to the DTSC-approved Remedial Design and Implementation Plan dated August 23, 2007.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 11/25/2008
Comments: On 11/25/08, DTSC approves the revised Operations and Maintenance Plan, Former ORP/Building 1 Area Remediation Project, Former Oakland Army Base Economic Development Conveyance Area (O&M Plan). The O&M Plan proposes (a) groundwater monitoring at the Building 1 Remedial Action Plan Site and (b) compliance reporting pursuant to the 8/8/03 Covenant to Restrict Use of Property, Environmental Restriction. The City of Oakland has satisfactorily responded to DTSC s 5/12/08 comments and revised the O&M Plan accordingly.

Completed Area Name: RMP Location - Building 99 Debris Area
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 12/12/2007
Comments: The investigation work plan presents a general approach to performing exploratory investigation activities and collecting soil samples to further define the extent of the debris containing layer and fill data gaps from prior investigations. The plan addresses the Building 99 Debris Area as a Risk Management Plan Location to be remediated in accordance with the DTSC-approved 2002 Final Remedial Action Plan / Risk Management Plan.

Completed Area Name: RMP Location - Building 99 Debris Area

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	01/19/2011
Comments:	The Phase II Report concludes that further investigation and remediation are necessary, both within and outside of the EDC Area. The Port of Oakland and City of Oakland own separate portions of off-site areas potentially contaminated with hazardous substances from the Debris Area. DTSC has requested the Port and City to provide a schedule for subsequent investigation and remediation for the Debris Area within the EDC Area and adjacent off-site areas.

Completed Area Name:	RMP Location - Building 99 Debris Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	04/13/2011
Comments:	The Investigation Report confirms the presence of contamination within the EDC Area. This contamination is likely impacting off-site areas west of the Debris Area.

Completed Area Name:	RMP Locations 3, 4, 5, and 6
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	04/29/2009
Comments:	The City of Oakland (a) has adequately investigated Risk Management Plan (RMP) Locations 3, 4, 5, and 6, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name:	Package E-1
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/14/2010
Comments:	On June 14, 2010, DTSC approved the June 2010 Completion Report for the Package E-1 Area. Based on the information presented in the Completion Report, DTSC concluded that the Port of Oakland (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package E-1 Area in accordance with the Remedial Action Plan and Risk Management Plan.

Completed Area Name:	Package E-2
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/29/2010
Comments:	On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of remedial action objectives, and (c) had implemented the required remedies for the Package E-2 Area in accordance with the RAP and RMP.

Completed Area Name:	RMP Location 96
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	02/09/2011
Comments:	On February 9, 2011, DTSC issued the Remedial Action Certification for Risk Management Plan (RMP) Location 96. On February 2, 2011, DTSC approved the Request for Completion and concluded that the City of

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Oakland (a) had documented the removal of impacted-soil from RMP Location 96, (d) had presented investigation results to demonstrate the achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the project site including RMP Location 96.

Completed Area Name: RMP Locations 27, 28, and 89
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/07/2011
Comments: On 6/1/2011, DTSC issued a Remedial Action Certification for RMP Locations 27, 28, and 89 attesting that the Port of Oakland (a) had adequately investigated RMP Locations 27, 28, and 89, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name: RMP Locations 7, 22, and 29
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 03/17/2011
Comments: On March 17, 2011, DTSC issued the Remedial Action Certification for Risk Management Plan (RMP) Locations 7, 22, and 29. On March 15, 2011, DTSC approved the Request for Completion and concluded that the City of Oakland (a) had adequately investigated RMP Locations 7, 22, and 29, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name: RMP Locations 48-51, 83, 115, 116, 119, and 1
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/01/2011
Comments: On 6/1/2011, DTSC issued a Remedial Action Certification for RMP Locations 48, 49, 50, 51, 83, 115, 116, 119, and 120 attesting that the Port of Oakland (a) had adequately investigated RMP Locations 48, 49, 50, 51, 83, 115, 116, 119, and 120, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name: RMP Locations 23, 24, 25, 87, 88, 113, 114, a
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 07/19/2010
Comments: On July 19, 2010, DTSC determined that all appropriate removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123 by November 2010.

Completed Area Name: Bldg 808 and 823
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/18/2009
Comments: On October 24, 2005, DTSC approved the Pre-Design Investigation Memorandum (PDIM) for additional four quarters of groundwater monitoring to better define the plume boundary and to aid preparation of the remedial design document. Vinyl chloride is the only COC for the Buildings 808 and 823 RAP Site. The maximum detected concentration of vinyl chloride in groundwater from four recent quarterly monitoring events was 26 g/L, which is below the remediation goal of 32 g/L. All other VOCs were below the respective remediation goals. On March 20, 2009, DTSC issued the Risk Management Plan Modification letter specifying new language for RMP, Section 6.2 regarding vapor intrusion mitigation measures. This RMP Modification requires additional evaluation and consultation with DTSC if new buildings were to be constructed at the Buildings 808 and 823 RAP Site and vicinity areas. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for the Buildings 808 and 823 RAP Site. The trigger date for a statutory five-year review was the mobilization date of first remedy implementation for the Oakland Gateway Development Area project (i.e., Building 1 RAP Site on November 28, 2005). Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. As a result, DTSC shall receive the first Draft Five-Year Review Report in May 2010.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/18/2009
Comments: On February 14, 2006, DTSC approved the Remedial Design and Implementation Plan (RDIP) for the Building 1 RAP Site. The RDIP detailed cleanup procedures for contaminated soil and treatment for the Building 1 remediation waste. The City of Oakland commenced site preparatory activities on November 28, 2005, excavated soils and treated hazardous wastes on-site in 2006, and completed site restoration in early 2007. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for this site. The trigger date for a statutory five-year review was the mobilization date of the Building 1 remedy implementation, November 28, 2005. Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. As a result, DTSC shall receive the first Draft Five-Year Review Report in May 2010.

Completed Area Name: Package E-2
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/29/2010
Comments: On June 29, 2010, DTSC issued the Remedial Action Certification for the Package E-2 Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of remedial action objectives, and (c) had implemented the required remedies for the Package E-2 Area in accordance with the RAP and RMP.

Completed Area Name: Bldg 99 Soil
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/25/2009
Comments: On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Soil Remedial Action Plan (RAP) Site, and four adjacent Risk Management Plan (RMP) Locations listed below: Potential Lead-Based Paint Impacted Soils outside of Building 99 (NAD83 Northing and Easting Coordinates: 2125825, 6039940), Hydraulic Lift Cylinders inside Building 99 (NAD83 Northing and Easting Coordinates: 2125712, 6039884), Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125570, 6039966), and Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent RMP Locations.

Completed Area Name: Bldg 807
Completed Sub Area Name: Not reported
Completed Document Type: Remedy Constructed: Operating Properly & Successfully
Completed Date: 10/14/2010
Comments: On 10/14/10, DTSC approved the Remedial Action Implementation Report for the Building 807 RAP Site. DTSC concurred that the Port of Oakland had successfully constructed the remedy which included injecting Hydrogen Releasing Compound at 76 locations at the Building 807 RAP Site. The Port of Oakland will begin groundwater monitoring program as scheduled.

Completed Area Name: RMP Locations 7, 22, and 29
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 03/15/2011
Comments: DTSC approved the Request for Completion and concluded that the City of Oakland (a) had adequately investigated RMP Locations 7, 22, and 29, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name: Bldg 991
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 01/26/2011
Comments: DTSC approved the Tech Memo proposing the soil remediation goals for dieldrin, endrin, and lindane to be 0.13, 0.021, and 0.10 mg/kg,

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

respectively, for the Building 991 RAP Site only.

Completed Area Name: Package D-1/C-1
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/14/2011
Comments: DTSC approved the Completion Report and concluded that the Port of Oakland (a) had adequately investigated and remediated the Package D-1/C-1 Area, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject areas.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence - Received
Completed Date: 10/27/2010
Comments: On 10/27/10, DTSC approved the waiver request allowing the City of Oakland s sub-lessee, Anka Behavioral, to use the interior of Building 821 as an emergency winter shelter for homeless individuals from November 1, 2010 through April 30, 2011.

Completed Area Name: Sites With No Operable Unit

Comments: Not reported

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence - Received
Completed Date: 10/10/2008
Comments: On 10/10/2008, DTSC approved the City of Oakland s request allowing Anka Behavioral to use the interior of Building 821 as an emergency winter shelter for homeless individuals from November 1, 2008 through April 30, 2009.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence - Received
Completed Date: 10/31/2006
Comments: On 10/31/06, DTSC approved the Interim Land Use Waiver request allowing Operation Dignity to use the interior of Building 821 as an emergency winter shelter for homeless individuals from November 2006 through April 2007, and from November 2007 through April 2008.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence - Received
Completed Date: 03/27/2007
Comments: On 3/27/07, DTSC approved an Interim Land Use Waiver request allowing CEDA to use the Building 821 Lot as a winter encampment area as specified in CEDA s February 8, 2007 request letter. This Interim Land Use Waiver allows CEDA to operate the Building 821 Lot from April through August 2007. The wavier does not apply to any date not specified. This Interim Land Use Waiver expires on August 31, 2007.

Completed Area Name: Sites With No Operable Unit

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Sub Area Name: Not reported
Completed Document Type: Correspondence - Received
Completed Date: 07/11/2007
Comments: On 7/11/07, DTSC approved an extension request allowing CEDA to use the Building 821 Lot from September 1, 2007 through April 30, 2008.

Completed Area Name: RMP Location 96
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 02/02/2011
Comments: On February 2, 2011, DTSC approved the Request for Completion and concluded that the City of Oakland (a) had documented the removal of impacted-soil from RMP Location 96, (d) had presented investigation results to demonstrate the achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the project site including RMP Location 96.

Completed Area Name: Bldg 807
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 11/15/2010
Comments: DTSC acknowledged the receipt of the September 2010 Quarterly Groundwater Monitoring Data Report. Formal regulatory review on the data report is not necessary at this time. A completion report with data interpretation is forth coming at an appropriate time.

Completed Area Name: Package B
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/29/2010
Comments: On 6/29/10, DTSC approved the Completion Report for the Package B Area and concluded that the Port of Oakland (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package B Area in accordance with the RAP and RMP.

Completed Area Name: RMP Locations 11, 75, 86, 93, 105, 106, 108,
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 10/20/2009
Comments: Based on the information presented in the Completion Request, DTSC concludes that environmental data do not suggest evidence of contamination. DTSC hereby concurs that the City of Oakland (a) has adequately investigated RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required institutional control remedy for the subject RMP Locations. DTSC requested the City of Oakland to collect a grab groundwater sample at RMP Location 107 (UST-19) to fill a data gap. The City of Oakland has agreed to collect additional groundwater data at RMP Location 107 and defer the completion request for this location.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 04/20/2010
Comments: On March 22, 2010 DTSC, City of Oakland, and Port of Oakland

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

inspected the Oakland Gateway Development Area. DTSC found site activities consistent with the land use covenant.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 03/01/2011
Comments: DTSC reviewed the Annual Certification letters for the Oakland Gateway Development Area covering the Gateway Development Area (GDA) and Port Development Area (PDA), dated 2/4/11 and 1/6/11, respectively. DTSC has no comment.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 10/22/2009
Comments: The City of Oakland conducted quarterly monitoring events in August 2008, November 2008, February 2009, and May 2009 at five monitoring wells B1MW001 through B1MW005. The results of four quarters of groundwater monitoring at the Building 1 Area indicate that the groundwater monitoring objectives have been met. No volatile COCs are present in groundwater at concentrations above remediation goals, and no significant increases in concentrations of metals or other non-volatile COCs are occurring. Based on the information presented in the July 24, 2009 Report, DTSC concurs with the City of Oakland s request to terminate groundwater monitoring at the Building 1 Area.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 11/16/2009
Comments: DTSC has received the Port of Oakland s September 23, 2009 letter proposing Risk Management Plan (RMP) implementation protocols for storm drains and sanitary sewers (SD/SS). The September 27, 2002 DTSC-approved RMP includes SD/SS within the RMP Implementation Area. However, the RMP does not address implementation for "SD/SS without suspected or known contamination." DTSC issued a letter on 11/16/09 clarifying Section 2.2.2.7 of the RMP and specifying implementation protocols for "SD/SS without suspected or known contamination."

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Workplan
Completed Date: 05/11/2010
Comments: On 5/11/10, DTSC completed initial review of a draft section from the draft Five-Year Review Report regarding remediation goals (RGs) for lead and total petroleum hydrocarbons (TPHs) at the Oakland Gateway Development Area (aka: Former OARB - EDC Area). DTSC agrees with the lead RG but disagrees with the TPH RGs.

Completed Area Name: RMP Locations 20, 99, and 100
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 03/04/2008
Comments: Based on the information presented in the 4/10/07 letter report, DTSC concluded that environmental data do not suggest potential of contamination. On 3/4/08, DTSC concurred that the City of Oakland (a)

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

has adequately investigated RMP Locations 20, 99, and 100, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required remedies for the subject RMP Locations. In addition, DTSC agreed with decommission of well ITMW241 associated with RMP Location 20.

Completed Area Name:	RMP Locations 23, 24, 25, 87, 88, 113, 114, a
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	07/19/2010
Comments:	On July 19, 2010, DTSC approved the City of Oakland s Completion Request and concluded that the City of Oakland (a) had investigated RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123 adequately, (b) had removed 842 cubic yards of impacted-soil from RMP Locations 23, 113, and 123, (c) had demonstrated achievement of the remedial action objectives, and (d) had implemented the required institutional control remedy for the subject RMP Locations. DTSC also approved the identification of RMP Location 159 to be addressed during future site redevelopment.

Completed Area Name:	RMP Locations 8, 10, 19/107, and 97
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	07/15/2010
Comments:	DTSC reviewed the Site Health and Safety Plan and concurred that the City of Oakland may proceed with field investigation at RMP Locations 8, 10, 19, 97, and 107 as schedule pursuant to the DTSC-approved Risk Management Plan.

Completed Area Name:	RMP Locations 27, 28, and 89
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	02/02/2011
Comments:	DTSC concurred with the sampling proposal for RMP Locations 27, 28, and 89.

Completed Area Name:	RMP Locations 48-51, 83, 115, 116, 119, and 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/01/2011
Comments:	DTSC approved the Completion Report and concluded that the Port of Oakland (a) had adequately investigated RMP Locations 48, 49, 50, 51, 83, 115, 116, 119, and 120, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name: RMP Locations 11, 75, 86, 93, 105, 106, 108,
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 04/05/2010
Comments: On April 5, 2010, DTSC determined that all appropriate removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109 by November 2010.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Area Name:	Package E-1
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/24/2010
Comments:	On June 24, 2010, DTSC issued the Remedial Action Certification for the Package E-1 Area. On June 14, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package E-1 Area in accordance with the RAP and RMP.

Completed Area Name:	Package B
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/29/2010
Comments:	On June 29, 2010, DTSC issued the Remedial Action Certification for the Package B Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package B Area in accordance with the RAP and RMP.

Completed Area Name:	USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/24/2010
Comments:	On June 24, 2010, DTSC issued the Remedial Action Certification for the USTs 11/12/13 and 11A/12A/13A RAP Site. One June 24, 2010, DTSC approved the Completion Report and concluded that the Port of Oakland (a) had investigated the site adequately, (b) had implemented the required remedial action, (c) had monitored the groundwater for four quarters, and (d) had demonstrated achievement of the remedial action objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in accordance with the RAP, RMP, and RDIP.

Completed Area Name:	Bldg 99 GW
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/25/2009
Comments:	On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Groundwater Remedial Action Plan (RAP) Site (also known as the VOCs in Groundwater near Building 99 RAP Site). In 2005, the Port of Oakland installed five wells and monitored the groundwater for four quarters. Soil data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential industrial/commercial human receptors.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction - Site Inspection/Visit
Completed Date:	04/20/2010
Comments:	On March 22, 2010 DTSC, City of Oakland, and Port of Oakland inspected the Oakland Gateway Development Area. DTSC found site activities consistent with the land use covenant.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence
Completed Date:	08/11/2008
Comments:	The Port of Oakland and City of Oakland are requesting five years extension for the following RAP Sites:
Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence
Completed Date:	08/12/2008
Comments:	DTSC issued a letter identifying that the trigger date for a statutory five-year review was the mobilization date of Building 1 remedy implementation (i.e., November 28, 2005). Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. The letter specifies that the first Draft Five-Year Review Report is due in May 2010.
Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction Monitoring Report
Completed Date:	01/28/2009
Comments:	The City of Oakland and the Port of Oakland provided their Annual Certification letters for the Gateway Development Area (GDA) and the Port Development Area (PDA), respectively on 1/13/09 and 1/22/09. These letters certify compliance with the environmental restrictions of the Oakland Gateway Development Area (OGDA) as required by the Covenant to Restrict Use of Property, Environmental Restriction Section 4.01(e). DTSC has reviewed and concurred with the Annual Certification letters.
Completed Area Name:	Bldg 807
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	10/19/2009
Comments:	DTSC approved the Remedial Design and Implementation Plan for VOCs in Groundwater at Eastern End of Building 807 RAP Site on 10/19/09. The overall remedial action sequence is as follows: 1.
Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	05/26/2006
Comments:	DTSC approved the Plan Modification Request Number 1 for Section 2.8 of the Soil Treatment Process Plan for the Building 1 Area. DTSC concurs that the City of Oakland may use pH indicator test strips in the field for the pre-treatment samples from Organic Residue.
Completed Area Name:	Bldg 99 GW
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	03/30/2005
Comments:	DTSC approved the Pre-Design Investigation Memorandum on 3/30/05 for the Building 99 Groundwater Remedial Action Plan Site.
Completed Area Name:	Bldg 99 Soil
Completed Sub Area Name:	Not reported

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Document Type: * Remedial Action Completion or Implementation
Completed Date: 07/16/2007
Comments: On 7/16/07, DTSC approved the Completion Report for the Building 99 Soil Remedial Action Plan (RAP) Site, and four adjacent Risk Management Plan (RMP) Locations listed below: Potential Lead-Based Paint Impacted Soils outside of Building 99 (NAD83 Northing and Easting Coordinates: 2125825, 6039940), Hydraulic Lift Cylinders inside Building 99 (NAD83 Northing and Easting Coordinates: 2125712, 6039884), Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125570, 6039966), and Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent RMP Locations.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Newsletter
Completed Date: 04/15/2005
Comments: The Community Update presents the cleanup status of the portion of the former Oakland Army Base, now known as the Former Oakland Army Base Economic Development Conveyance Area. The update also transmits a survey to solicit community inputs regarding the cleanup project.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/14/2006
Comments: DTSC concluded that there was no need for a formal draft final document.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 08/01/2008
Comments: DTSC confirmed that the City has responded and revised the Health and Safety Plan appropriately. DTSC s 7/29/08 letter serves as agency concurrence on the subject document.

Completed Area Name: Bldg 99 GW
Completed Sub Area Name: Not reported
Completed Document Type: * Remedial Action Completion or Implementation
Completed Date: 07/16/2007
Comments: On 7/16/07, DTSC approved the Completion Report, VOCs in Groundwater near Building 99 RAP Site. In 2005, the Port of Oakland installed five wells and monitored the groundwater for four quarters. Soil data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential industrial/commercial human receptors.

Completed Area Name: Bldg 807
Completed Sub Area Name: Not reported

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Document Type:	Design/Implementation Workplan
Completed Date:	10/24/2005
Comments:	On 10/24/05, DTSC approved the Pre-Design Investigation Memorandum (PDIM) dated September 19, 2005 for volatile organic compounds in groundwater in the vicinity of Buildings 807, 808, and 823 at the Former Oakland Army Base Economic Development Conveyance Area. The PDIM proposes additional investigates to aid the Remedial Design and Implementation Plan preparation.

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	02/14/2006
Comments:	DTSC approved the Remedial Design and Implementation Plan which proposes detailed cleanup actions at the Former Oil Reclaiming Plant/Building 1 Area. The City of Oakland will remediate soils and sludge contaminated with organic chemicals, neutralize corrosive soils, stabilize lead in soils, and dispose all wastes at permitted land disposal facilities.

Completed Area Name:	USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/24/2010
Comments:	On June 24, DTSC approved the June 2010 Completion Report for USTs 11/12/13 and 11A/12A/13A RAP Site and concluded that the Port of Oakland (a) had investigated the site adequately, (b) had implemented the required remedial action, (c) had monitored the groundwater for four quarters, and (d) had demonstrated achievement of the remedial action objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in accordance with the RAP, RMP, and RDIP.

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	05/12/2009
Comments:	On May 12, 2009, DTSC concluded that the City of Oakland has implemented the remedy pursuant to the Remedial Action Plan (RAP) and Remedial Design Implementation Plan (RDIP) at the Building 1 RAP Site and has demonstrated achievement of the remedial action objectives. Approximately 11,642 tons of treated Building 1 remediation waste was disposed of as non-RCRA hazardous waste at the Kettleman Hills Landfill. Approximately 578 tons of overburden soil, that was deemed unsuitable for on-site reuse, was disposed of as non-hazardous daily cover at the Altamont Facility. Approximately 10,000 gallons of wastewater, which included decontamination water and water from utility demolition was discharged to the City of Oakland sewer system in accordance with the East Bay Municipal Utility District Wastewater Discharge Permit and City of Oakland Building Inspection Sewer Permit. No excavation dewatering was conducted. Approximately 1 ton of sediment removed from the decontamination tank during cleaning was sampled and analyzed, and subsequently disposed of as non-hazardous daily cover at the Altamont Facility.

Completed Area Name:	USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Date: 08/23/2007
Comments: DTSC approved the Remedial Design and Implementation Plan for USTs 11/12/13 and 11A/12A/13A RAP Site (RDIP) dated August 2007. The RDIP describes the remedial activities at the USTs 11/12/13 AND 11A/12A/13A RAP Site. The Remedy includes re-excavating the backfill of the former USTs 11/12/13 excavation to one to two feet below the groundwater table (approximately 30 x 37 x 8 depth), pumping out groundwater that accumulates in the excavation, collecting confirmation soil samples on the sidewalls and floor, introducing oxygen release compound to the bottom of the excavation, backfilling excavation, and conducting quarterly groundwater monitoring at the site for at least one year.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 11/21/2003
Comments: DTSC approved the Pre-Design Investigation Memorandum on 11/21/03 for the Building 1 Area. The memorandum describes a focused, pre-design investigation to obtain additional visual descriptions of encountered soil and waste layers, soil physical parameter data, and limited chemical data that will be useful for finalizing design decisions and to provide information to bidding remediation contractors.

Completed Area Name: RMP Location - Building 99 Debris Area
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 02/14/2006
Comments: DTSC approved the Report on Phase I Investigation and Work Plan for Phase II Investigation of Debris Area near Building 99 on February 14, 2006. The Phase I Report summarizes findings on two test pits. The Phase II Work Plan proposes investigation to define the lateral and vertical extent of contamination at the Debris Area.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/22/2006
Comments: DTSC approved the Plan Modification Request Number 4 for a modification to the Soil Treatment Process Plan to include the use of the Caterpillar 330 excavator (as described in the plan Section 2.2), Front Loader (as described in the plan Section 2.2), and/or a Caterpillar D5 Dozer to mix the reagent with the Building 1 waste.

Completed Area Name: Bldg 808 and 823
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/08/2009
Comments: DTSC concludes that the City of Oakland (a) has implemented the selected remedy pursuant to the Remedial Action Plan and Pre-Design Investigation Memorandum and (b) has demonstrated achievement of the remedial action objectives for the Buildings 808 and 823 RAP Site. DTSC hereby approves the Completion Report. DTSC will change the status of the Buildings 808 and 823 RAP Site on its EnviroStor database to Certified with Ongoing Operation and Maintenance.

Completed Area Name: Bldg 99 Soil

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	04/27/2005
Comments:	DTSC approved the Pre-Design Investigation Memorandum on 4/27/05 for the Building 99 Soil Remedial Action Plan Site. The memorandum is a sampling plan for additional soil investigation at the Building 99 area to supplement existing data.
Completed Area Name:	Bldg 991
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	06/06/2005
Comments:	DTSC approved the Pre-Design Investigation Memorandum on 6/6/05 for the Building 991 Remedial Action Plan Site.
Completed Area Name:	RMP Locations
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	08/19/2008
Comments:	DTSC reviewed sampling proposals for the Risk Management Plan (RMP) Locations at Packages E-1 and E-2 emailed on 3/16/07. Package E-1 contains RMP Locations 71, 72, 73, 79, 81, and 92. Package E-2 contains RMP Location 90. DTSC provided verbal comments on the sampling strategy during the 7/3/07 Environmental Technical Team Meeting (meeting minutes #37). DTSC forwarded a concurrence to the Port of Oakland stating that the Packages E-1 and E-2 sampling proposals are consistent with the RMP (i.e., Appendix E of the 9/27/02 DTSC-approved Remedial Action Plan). The RMP itself is already a Remedial Design for all RMP Locations.
Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Well Decommissioning Workplan
Completed Date:	08/12/2008
Comments:	DTSC concurs with the well destruction proposal for the following 40 groundwater monitoring wells: BB-3, EMW1, EMW2, EMW3, ICFMW216, ITMW237, ITMW238, ITMW239, ITMW241, ITMW242, ITMW245, ITMW246, ITMW247, ITMW248, ITMW251, K738BM01, K738DW01, K99BM01 or B99BM01, K99DW01 or B99DW01, K99DW02 or B99DW02, OBMW01, OBMW02, SMW-21, SMW-48, SMW-53, SMW-55, SMW-56, SMW-65, SMW-66, SMW-69, SMW-70, SMW-71, SMW-72, SMW-73, SMW-74, SMW-75, SMW-88, SMW-89, SMW-90, and SMW-92. DTSC requests the City of Oakland to destroy the wells in accordance with the procedures outlined in Appendix B, Section 2.6 of the DTSC-approved Quality Assurance Program Plan dated April 8, 2005.
Completed Area Name:	USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedy Constructed: Operating Properly & Successfully
Completed Date:	04/22/2010
Comments:	On 4/22/10, DTSC approved the Technical Report for Implementation of Remedial Action at UST 11/12/13 and 11A/12A/13A RAP Site (Technical Report) dated April 2010. The Port of Oakland commenced remediation in August 2007 and completed field activities in October 2007. The Technical Report documents the cleanup activities pursuant to the DTSC-approved Remedial Design and Implementation Plan dated August 23, 2007.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Operations and Maintenance Plan
Completed Date:	11/25/2008
Comments:	On 11/25/08, DTSC approves the revised Operations and Maintenance Plan, Former ORP/Building 1 Area Remediation Project, Former Oakland Army Base Economic Development Conveyance Area (O&M Plan). The O&M Plan proposes (a) groundwater monitoring at the Building 1 Remedial Action Plan Site and (b) compliance reporting pursuant to the 8/8/03 Covenant to Restrict Use of Property, Environmental Restriction. The City of Oakland has satisfactorily responded to DTSC s 5/12/08 comments and revised the O&M Plan accordingly.

Completed Area Name:	RMP Location - Building 99 Debris Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	12/12/2007
Comments:	The investigation work plan presents a general approach to performing exploratory investigation activities and collecting soil samples to further define the extent of the debris containing layer and fill data gaps from prior investigations. The plan addresses the Building 99 Debris Area as a Risk Management Plan Location to be remediated in accordance with the DTSC-approved 2002 Final Remedial Action Plan / Risk Management Plan.

Completed Area Name:	RMP Location - Building 99 Debris Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	01/19/2011
Comments:	The Phase II Report concludes that further investigation and remediation are necessary, both within and outside of the EDC Area. The Port of Oakland and City of Oakland own separate portions of off-site areas potentially contaminated with hazardous substances from the Debris Area. DTSC has requested the Port and City to provide a schedule for subsequent investigation and remediation for the Debris Area within the EDC Area and adjacent off-site areas.

Completed Area Name:	RMP Location - Building 99 Debris Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	04/13/2011
Comments:	The Investigation Report confirms the presence of contamination within the EDC Area. This contamination is likely impacting off-site areas west of the Debris Area.

Completed Area Name:	RMP Locations 3, 4, 5, and 6
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	04/29/2009
Comments:	The City of Oakland (a) has adequately investigated Risk Management Plan (RMP) Locations 3, 4, 5, and 6, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name:	Package E-1
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Date:	06/14/2010
Comments:	On June 14, 2010, DTSC approved the June 2010 Completion Report for the Package E-1 Area. Based on the information presented in the Completion Report, DTSC concluded that the Port of Oakland (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package E-1 Area in accordance with the Remedial Action Plan and Risk Management Plan.
Completed Area Name:	Package E-2
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/29/2010
Comments:	On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of remedial action objectives, and (c) had implemented the required remedies for the Package E-2 Area in accordance with the RAP and RMP.
Completed Area Name:	RMP Location 96
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	02/09/2011
Comments:	On February 9, 2011, DTSC issued the Remedial Action Certification for Risk Management Plan (RMP) Location 96. On February 2, 2011, DTSC approved the Request for Completion and concluded that the City of Oakland (a) had documented the removal of impacted-soil from RMP Location 96, (d) had presented investigation results to demonstrate the achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the project site including RMP Location 96.
Completed Area Name:	RMP Locations 27, 28, and 89
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/07/2011
Comments:	On 6/1/2011, DTSC issued a Remedial Action Certification for RMP Locations 27, 28, and 89 attesting that the Port of Oakland (a) had adequately investigated RMP Locations 27, 28, and 89, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.
Completed Area Name:	RMP Locations 7, 22, and 29

Completed Document Type: Certification
Completed Date: 07/19/2010
Comments: On July 19, 2010, DTSC determined that all appropriate removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123 by November 2010.

Completed Area Name: Bldg 808 and 823
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/18/2009
Comments: On October 24, 2005, DTSC approved the Pre-Design Investigation Memorandum (PDIM) for additional four quarters of groundwater monitoring to better define the plume boundary and to aid preparation of the remedial design document. Vinyl chloride is the only COC for the Buildings 808 and 823 RAP Site. The maximum detected concentration of vinyl chloride in groundwater from four recent quarterly monitoring events was 26 g/L, which is below the remediation goal of 32 g/L. All other VOCs were below the respective remediation goals. On March 20, 2009, DTSC issued the Risk Management Plan Modification letter specifying new language for RMP, Section 6.2 regarding vapor intrusion mitigation measures. This RMP Modification requires additional evaluation and consultation with DTSC if new buildings were to be constructed at the Buildings 808 and 823 RAP Site and vicinity areas. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for the Buildings 808 and 823 RAP Site. The trigger date for a statutory five-year review was the mobilization date of first remedy implementation for the Oakland Gateway Development Area project (i.e., Building 1 RAP Site on November 28, 2005). Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. As a result, DTSC shall receive the

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

first Draft Five-Year Review Report in May 2010.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/18/2009
Comments: On February 14, 2006, DTSC approved the Remedial Design and Implementation Plan (RDIP) for the Building 1 RAP Site. The RDIP detailed cleanup procedures for contaminated soil and treatment for the Building 1 remediation waste. The City of Oakland commenced site preparatory activities on November 28, 2005, excavated soils and treated hazardous wastes on-site in 2006, and completed site restoration in early 2007. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for this site. The trigger date for a statutory five-year review was the mobilization date of the Building 1 remedy implementation, November 28, 2005. Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. As a result, DTSC shall receive the first Draft Five-Year Review Report in May 2010.

Completed Area Name: RMP Locations 8, 10, 19/107, and 97
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/28/2011
Comments: On 6/28/2011, DTSC issued a Remedial Action Certification for RMP Locations 8, 10, 19, 97, and 107 attesting that the City of Oakland (a) had adequately investigated RMP Locations 8, 10, 19, 97, and 107, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/29/2010
Comments:	On March 4, 2008, DTSC determined that all appropriate removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 20, 99, and 100. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 20, 99, and 100 by November 2010.

Completed Area Name:	Package E-2
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/29/2010
Comments:	On June 29, 2010, DTSC issued the Remedial Action Certification for the Package E-2 Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of remedial action objectives, and (c) had implemented the required remedies for the Package E-2 Area in accordance with the RAP and RMP.

Completed Area Name:	Bldg 99 Soil
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/25/2009
Comments:	On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Soil Remedial Action Plan (RAP) Site, and four adjacent Risk Management Plan (RMP) Locations listed below: Potential Lead-Based Paint Impacted Soils outside of Building 99 (NAD83 Northing and Easting Coordinates: 2125825, 6039940), Hydraulic Lift Cylinders inside Building 99 (NAD83 Northing and Easting Coordinates: 2125712, 6039884), Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125570, 6039966), and Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent RMP Locations.

Completed Area Name:	Bldg 807

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Sub Area Name: Not reported
Completed Document Type: Remedy Constructed: Operating Properly & Successfully
Completed Date: 10/14/2010
Comments: On 10/14/10, DTSC approved the Remedial Action Implementation Report for the Building 807 RAP Site. DTSC concurred that the Port of Oakland had successfully constructed the remedy which included injecting Hydrogen Releasing Compound at 76 locations at the Building 807 RAP Site. The Port of Oakland will begin groundwater monitoring program as scheduled.

Completed Area Name: RMP Locations 7, 22, and 29
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 03/15/2011
Comments: DTSC approved the Request for Completion and concluded that the City of Oakland (a) had adequately investigated RMP Locations 7, 22, and 29, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name: Bldg 991
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 01/26/2011
Comments: DTSC approved the Tech Memo proposing the soil remediation goals for dieldrin, endrin, and lindane to be 0.13, 0.021, and 0.10 mg/kg, respectively, for the Building 991 RAP Site only.

Completed Area Name: Package D-1/C-1
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/14/2011
Comments: DTSC approved the Completion Report and concluded that the Port of Oakland (a) had adequately investigated and remediated the Package D-1/C-1 Area, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject areas.

Completed Area Name: Sites With No Operable Unit

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Comments:	On 10/10/2008, DTSC approved the City of Oakland s request allowing Anka Behavioral to use the interior of Building 821 as an emergency winter shelter for homeless individuals from November 1, 2008 through April 30, 2009.
Completed Area Name:	Sites With No Operable Unit
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence - Received
Completed Date:	10/31/2006
Comments:	On 10/31/06, DTSC approved the Interim Land Use Waiver request allowing Operation Dignity to use the interior of Building 821 as an emergency winter shelter for homeless individuals from November 2006 through April 2007, and from November 2007 through April 2008.
Completed Area Name:	Sites With No Operable Unit
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence - Received
Completed Date:	03/27/2007
Comments:	On 3/27/07, DTSC approved an Interim Land Use Waiver request allowing CEDA to use the Building 821 Lot as a winter encampment area as specified in CEDA s February 8, 2007 request letter. This Interim Land Use Waiver allows CEDA to operate the Building 821 Lot from April through August 2007. The wavier does not apply to any date not specified. This Interim Land Use Waiver expires on August 31, 2007.
Completed Area Name:	Sites With No Operable Unit
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence - Received
Completed Date:	07/11/2007
Comments:	On 7/11/07, DTSC approved an extension request allowing CEDA to use the Building 821 Lot from September 1, 2007 through April 30, 2008.
Completed Area Name:	RMP Location 96
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	02/02/2011
Comments:	On February 2, 2011, DTSC approved the Request for Completion and concluded that the City of Oakland (a) had documented the removal of impacted-soil from RMP Location 96, (d) had presented investigation results to demonstrate the achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the project site including RMP Location 96.
Completed Area Name:	Bldg 807
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	11/15/2010
Comments:	DTSC acknowledged the receipt of the September 2010 Quarterly Groundwater Monitoring Data Report. Formal regulatory review on the data report is not necessary at this time. A completion report with data interpretation is forth coming at an appropriate time.
Completed Area Name:	Package B
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/29/2010
Comments:	On 6/29/10, DTSC approved the Completion Report for the Package B

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Area and concluded that the Port of Oakland (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package B Area in accordance with the RAP and RMP.

Completed Area Name: RMP Locations 11, 75, 86, 93, 105, 106, 108,
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 10/20/2009
Comments: Based on the information presented in the Completion Request, DTSC concludes that environmental data do not suggest evidence of contamination. DTSC hereby concurs that the City of Oakland (a) has adequately investigated RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required institutional control remedy for the subject RMP Locations. DTSC requested the City of Oakland to collect a grab groundwater sample at RMP Location 107 (UST-19) to fill a data gap. The City of Oakland has agreed to collect additional groundwater data at RMP Location 107 and defer the completion request for this location.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 04/20/2010
Comments: On March 22, 2010 DTSC, City of Oakland, and Port of Oakland inspected the Oakland Gateway Development Area. DTSC found site activities consistent with the land use covenant.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 03/01/2011
Comments: DTSC reviewed the Annual Certification letters for the Oakland Gateway Development Area covering the Gateway Development Area (GDA) and Port Development Area (PDA), dated 2/4/11 and 1/6/11, respectively. DTSC has no comment.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 10/22/2009
Comments: The City of Oakland conducted quarterly monitoring events in August 2008, November 2008, February 2009, and May 2009 at five monitoring wells B1MW001 through B1MW005. The results of four quarters of groundwater monitoring at the Building 1 Area indicate that the groundwater monitoring objectives have been met. No volatile COCs are present in groundwater at concentrations above remediation goals, and no significant increases in concentrations of metals or other non-volatile COCs are occurring. Based on the information presented in the July 24, 2009 Report, DTSC concurs with the City of Oakland s request to terminate groundwater monitoring at the Building 1 Area.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 11/16/2009

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Comments: DTSC has received the Port of Oakland s September 23, 2009 letter proposing Risk Management Plan (RMP) implementation protocols for storm drains and sanitary sewers (SD/SS). The September 27, 2002 DTSC-approved RMP includes SD/SS within the RMP Implementation Area. However, the RMP does not address implementation for "SD/SS without suspected or known contamination." DTSC issued a letter on 11/16/09 clarifying Section 2.2.2.7 of the RMP and specifying implementation protocols for "SD/SS without suspected or known contamination."

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Workplan
Completed Date: 05/11/2010
Comments: On 5/11/10, DTSC completed initial review of a draft section from the draft Five-Year Review Report regarding remediation goals (RGs) for lead and total petroleum hydrocarbons (TPHs) at the Oakland Gateway Development Area (aka: Former OARB - EDC Area). DTSC agrees with the lead RG but disagrees with the TPH RGs.

Completed Area Name: RMP Locations 20, 99, and 100
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 03/04/2008
Comments: Based on the information presented in the 4/10/07 letter report, DTSC concluded that environmental data do not suggest potential of contamination. On 3/4/08, DTSC concurred that the City of Oakland (a) has adequately investigated RMP Locations 20, 99, and 100, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required remedies for the subject RMP Locations. In addition, DTSC agreed with decommission of well ITMW241 associated with RMP Location 20.

Completed Area Name: RMP Locations 23, 24, 25, 87, 88, 113, 114, a
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 07/19/2010
Comments: On July 19, 2010, DTSC approved the City of Oakland s Completion Request and concluded that the City of Oakland (a) had investigated RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123 adequately, (b) had removed 842 cubic yards of impacted-soil from RMP Locations 23, 113, and 123, (c) had demonstrated achievement of the remedial action objectives, and (d) had implemented the required institutional control remedy for the subject RMP Locations. DTSC also approved the identification of RMP Location 159 to be addressed during future site redevelopment.

Completed Area Name: RMP Locations 8, 10, 19/107, and 97
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 07/15/2010
Comments: DTSC reviewed the Site Health and Safety Plan and concurred that the City of Oakland may proceed with field investigation at RMP Locations 8, 10, 19, 97, and 107 as schedule pursuant to the DTSC-approved Risk Management Plan.

Completed Area Name: RMP Locations 27, 28, and 89
Completed Sub Area Name: Not reported

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 02/02/2011
Comments: DTSC concurred with the sampling proposal for RMP Locations 27, 28, and 89.

Completed Area Name: RMP Locations 48-51, 83, 115, 116, 119, and 1
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/01/2011
Comments: DTSC approved the Completion Report and concluded that the Port of Oakland (a) had adequately investigated RMP Locations 48, 49, 50, 51, 83, 115, 116, 119, and 120, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name: RMP Locations 8, 10, 19/107, and 97
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/28/2011
Comments: DTSC approved the Completion Request and concluded that the City of Oakland (a) had adequately investigated RMP Locations 8, 10, 19, 97, and 107, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name: Outfalls 8 through 11
Completed Sub Area Name: Not reported
Completed Document Type: Ecological Risk Assessment Report
Completed Date: 01/26/2011
Comments: Instead of re-reviewing the 2002/2003 documents, DTSC believes that a supplemental marine sediment investigation and new risk evaluation are necessary. Depending on the results, DTSC may require a feasibility study and Remedial Action Plan Amendment to select the final remedy for Outfalls 8 through 11.

Completed Area Name: Bldg 807
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 01/26/2011
Comments: DTSC acknowledged the receipt of the December 2010 Quarterly Groundwater Monitoring Data Report. Formal regulatory review on the data report is not necessary at this time. A completion report with data interpretation is forth coming at an appropriate time.

Completed Area Name: RMP Locations 15, 91, and 98

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	07/03/1995
Comments:	Two underground storage tanks (1,800-gallon fuel oil and 10,000-gallon gasoline) were removed in 1988. Gasoline and petroleum related compounds were detected in either the soil or groundwater. Sampling done in 1992 still detected petroleum related contamination.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Plan
Completed Date:	08/14/1995
Comments:	Recommended that a concrete trench and surrounding soil containing petroleum hydrocarbons be excavated and removed from the site.

Completed Area Name:	PROJECT WIDE

VACANT BUILDING ON 5TH STREET (Continued) **S102423862**

Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/14/1995
Comments: The PEA recommended that a concrete trench and surrounding soil containing petroleum hydrocarbons be excavated and removed from the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 08/15/2002
Comments: Amendment to the 5/10/1994 VCA to amend Section 3.16, "Payment" and Section 3.35, "Time Periods".

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 05/10/1994
Comments: VCA signed with Caltrans. This project is part of the Cypress Reconstruction Project. In entering into this Agreement, it is the objective of the Parties to conduct Preliminary Endangerment Assessments, removal actions, necessary implementation, risk assessment, design review and/or a Remedial Action Plan as required on a site by site evaluation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 01/07/1999
Comments: Amendment to the May 10, 1994 VCA, which allows work to continue under Chapter 6.5 of the Health and Safety Code.

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Potential Contaminants of Concern: Gasoline
Site History: In November 1991, one 5,000-gallon gasoline UST, two 10,000-gallon diesel USTs, one 750-gallon waste-oil UST, dispensers, and associated piping were removed from the site and replaced with two diesel USTs

UNITED STATES POSTAL SERVICE, OAKLAND P&DC (Continued) **S100947861**

and one aboveground WOT. Elevated petroleum hydrocarbons were reported in soil collected from the excavation sidewalls. In June 1992, one 10,000-gallon diesel UST was removed. Groundwater contained 72,000 |g/L TPHd. Monitoring wells were installed in 1994. Free product was observed in MW-4 in the June 2002 monitoring event. Free product bailing and adsorbent socks were deployed. Groundwater monitoring discontinued in 2003.

Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	08/31/1998
Comments:	PEA - PASI - A Field Sampling Plan was prepared to conduct limited sampling at the site on June 24, 1998 as part of the Site Reconnaissance Visit. The site had contaminants above US EPA Region 9's Residential Preliminary Remedial Goals (PRG). Substances found were arsenic (5.78 mg/kg), cadmium (12.4 mg/kg), lead (589 mg/kg) and molybdenum (1130 mg/kg) comparing to the PRG's limits of arsenic (0.38 mg/kg), cadmium (9 mg/kg), lead (400 mg/kg) and molybdenum (370 mg/kg) respectively.

Background Info:	Oakland Army Base (OARB) is situated near the eastern terminus of the San Francisco-Oakland Bay Bridge. OARB occupies approx- ima tely 422 acres and is bounded by the Southern Pacific Trans- port

OAKLAND ARMY BASE (Continued) **S105481917**

ation Company railroad tracks on the east, the Port of Oakland Au
thority (formerly the Fleet and Industrial Supply Center Oakland)
on the south, the Bay Bridge on the north, and the Oaklnd Outer
Harbor on the west. From December 8, 1941 to September 30, 1999,
OARB carried out it's mission in support activites for the sea,
rail and land transportation of military personnel and material f
or the U.S. Army. These activities included operation and mainte
nance of facilities and equipment, industrial processes, preparat
ion of vehicles for overseas ship- ment, storage of fuels, manage
ment of wastes, cleaning operations, support of seagoing vessels,
railroad rolling stock and trackage, trucking, wharf, and wareho
using operations. In December 1995, OARB was placed on the BRAC
IV list and design- ated for closure. OARB is scheduled to be t
ransferred to the City of Oakland in 2001. The Oakland Base Reus
e Authority (OBRA) which is the Local Reuse Authority (LRA) for t
he base developed a reuse plan in July 1998. Environmental inve
stigation and cleanup of OARB is being perform- ed in accordance
with the BRAC Cleanup Plan (July 1996) which was revised and upda
ted in January 1999. The California Department of Toxic Substanc
es Control (DTSC) is the lead agency for the environmental restor
ation as described in the Defense State Memorandum of Understandi
ng (DSMOA). OARB is not on the U. S. Environmental Protection Ag
ency's National Priorities List (NPL). The 26 BRAC parcels were
grouped into 7 Operable Units (OU), initially identified accordi
ng to types of operation and geo- graphic location. OU1 included
Parcels 4 through 7 and 9 through 15, OU2 consisted entirely of P
arcel 8, OU3 included Parcels 16 through 26, OU4 included parcels
1 through 3 (shoreline, wharves, and submerged land), OU5 was re
served for no further action parcels, OU6 was for parcels that ha
d unexpected conditions, and OU7 was a small contaminated area at
the east end of Building 807 in Parcel 12. The Regional Water
Quality Control Board (RWQCB) is the lead regulatory agency for c
losure of underground fuel storage tanks (USTs) at OARB. USTs th
at contained used oils/fuels and oil/ water separators are not pa
rt of the UST program and are address- ed under the operable unit
cleanup program as described above. Based on Risk Based Correcti
ve Action (RBCA) evaluation, 4 of the 14 UST fuel sites have been
included in a program for further investigation and/or remediati
on. *** OPERABLE UNIT/SITE DESCRIPTION *** OU1 Operable Unit
1 covers 167 acres area with warehouses, a rail yard, open stora
ge area, parking lots, padre grounds administrative areas, wash p
latforms, maintenance shops, a printing plant and a plating shop.
OU1 consists of 11 parcels. OU2 Operable Unit 2 includes railr
oad engine maintenance, fueling and repair facilities. This is a
6.3 acres area at the northeastern border of the OARB. OU3 Oper
able Unit 3 is a 49.4 acres area at the southwestern end of OARB.
The area consists primarily of housing, housing support office
space, vehicle service areas and motor pool maintenance areas. O
U3 consists of 11 parcels. OU4 Operable Unit 4 consists of 127 a
cres with three parcels located at the northwestern end of OARB.
OU4 facilities include waterfronts, piers and cargo storage area
s. OU5 Operable Unit 5 is for three no further action parcels to
taling 35 acres. The area consists of support services, guest- h
ouse, child center, playground, theater, warehouses and Maritime
Street. OU6 Operable Unit 6 is reserved for funding any work rel
ated to basewide issues. The Army has not been using this operab
le unit for remedial and investigation activities. OU7 Operable

Completed Info:
Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Assessment
Completed Date: 08/01/2002
Comments: The proposed action is the approval and implementation of the OARB Final Reuse Plan, applicable to one of the three sub-districts of the OARB Area Redevelopment Plan, by the Oakland Base Reuse Authority. The Reuse Plan provides for property transfers, remediation of soil and groundwater contamination, installation of major infrastructure, and rehabilitation or demolition and re-construction of mixed use (Public Access, Public Open Space. Recreation, Office/R&D, Light industrial, Warehouse/Distribution, Commercial/Retail, and Live/Work), as well as industrial Port uses (maritime end rail) and ancillary maritime support uses at or near the former OARB site.

Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Environmental Assessment
Completed Date:	08/01/2002
Comments:	The City of Oakland prepared the final ENVIRONMENTAL ASSESSMENT for the Oakland Army Base (OARB) Area Redevelopment Plan. The ENVIRONMENTAL ASSESSMENT includes environmental impact analysis for remedial alternatives proposed in the OARB's Remedial Action Plan. DTSC was a responsible agency for the ENVIRONMENTAL ASSESSMENT decision.

Completed Area Name:	OU2 - Offsite Wetland
Completed Sub Area Name:	Not reported
Completed Document Type:	Environmental Assessment
Completed Date:	08/15/2001
Comments:	DTSC completed the ENVIRONMENTAL ASSESSMENT necessary for the approval of the OU2 Removal Action Workplan for the removal of pesticide contaminated soil at a wetland soil in OU2.

Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Consent Order
Completed Date:	05/19/2003
Comments:	DTSC, the Oakland Base Reuse Authority, and the City of Oakland acting by and through the Oakland Redevelopment Agency executed the Consent Agreement on May 19, 2003. The Consent Agreement binds the City to enter into environmental restrictions for the Site as necessary to protect human health and the environment, and to require the remediation of the site by the City in accordance with the Oakland Army Base Remedial Action Plan and associated Risk Management Plan approved by DTSC on September 26, 2002.

Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction
Completed Date:	08/08/2003
Comments:	On August 6, 2003, Governor Davis approved early transfer of the former Oakland Army Base to the City of Oakland. The U.S. Army requested that the State of California approve the deferral of remediation of hazardous substance contamination and approve the transfer 363.5 acre of Army property to the Oakland Base Reuse Authority and the City of Oakland acting by and through the Oakland Redevelopment Agency. The transferred acreages are about 85% of the original 425 acres of the former base area.

Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Finding of Suitability for Early Transfer
Completed Date:	08/06/2003
Comments:	On August 6, 2003, Governor Davis approved early transfer of the former Oakland Army Base to the City of Oakland. The U.S. Army requested that the State of California approve the deferral of remediation of hazardous substance contamination and approve the transfer 363.5 acre of Army property to the Oakland Base Reuse Authority and the City of Oakland acting by and through the Oakland Redevelopment Agency. The transferred acreages are about 85% of the original 425 acres of the former base area.

Completed Area Name: Parcel 1
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 06/28/2005
Comments: On June 28, 2005, DTSC approved the Remedial Investigation Report for Parcel 1 at the former Oakland Army Base. Parcel 1 consists of approximately 19.97 acres, including approximately 14 acres (nominally 14.08 acres, more or less) of upland and approximately 6 acres (5.89 acres, more or less) of submerged sediments in the intertidal and subtidal zones. The Remedial Investigation Report presents a summary of all previous and supplemental investigations. The overall objective of the Remedial Investigation Report was to collect sufficient data to assess the nature and extent of the site-related chemicals in soil, sediment, and groundwater, and to complete a baseline human health and ecological risk assessment.

Completed Area Name: OU2 - Offsite Wetland
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/26/2005
Comments: Department of Toxic Substances Control (DTSC) has reviewed the Closure Report and determined that the Army has removed the pesticide contaminated soil at the wetland area pursuant to the DTSC-approved Operable Unit 2 Soil Removal Action Work Plan dated July 2001. The Army removed 1,204 tons of non-Resource Conservation and Recovery Act hazardous waste soil to achieve residential cleanup goals.

Completed Date: 01/23/2003
Comments: The Department of Toxic Substances Control (DTSC) has received the final Environmental Baseline Survey for Transfer (EBS-T) dated December 2002. The EBS-T provides a description of environmental conditions and presents data from previously prepared documents for BRAC Parcels 1 through 5, 8 through 17, 19 (partial), 20, 21 (partial), and 22 through 26 at the former Oakland Army Base (OARB). DTSC has reviewed the final EBS-T and has no further comments.

Completed Area Name: OU5
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 12/12/2000
Comments: The Department of Toxic Substances Control (DTSC) has received the final Technical Report of Findings (Report) for Operable Unit 5, Revision 2, dated November 2000 for the Oakland Army Base (OARB). The Report contains information supporting the Army s request of no further action for Parcels 22, 23 and 26 at OARB. DTSC has reviewed the Report and has no further comments.

Completed Area Name: BASEWIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment/Site Inspection Report (PA/SI)
Completed Date: 06/30/1998
Comments: DTSC Completed the review of the Basewide Preliminary Assessment/Site Inspection (PA/SI), also called Preliminary Endangerment Assessment (PEA) activity for Oakland Army Base. Twenty-six (26) parcels were evaluated in the PA/SI. Twenty (20) parcels are recommended for further action while six (6) parcels are recommended for no further action.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Feasibility Study Report
Completed Date: 09/26/2002
Comments: The elements of Remedial Investigation and Feasibility Study for Operable Units 1, 2, 3, and 7 have been incorporated into the Remedial Action Plan and Risk Management Plan. These Operable Units are located within the Economic Development Conveyance Area. Upon approval of the Remedial Action Plan on September 26, 2002, the Remedial Investigation and Feasibility Study for Operable Units 1, 2, 3, and 7 are deemed completed.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported

OAKLAND ARMY BASE (Continued) **S105481917**

Completed Document Type:	Remedial Action Plan
Completed Date:	09/26/2002
Comments:	On 9/26/02, DTSC approved the Remedial Action Plan (RAP) for the Economic Development Conveyance (EDC) Area. The EDC Area consists of 363.5 out of 425 acres of the base property. The Army will transfer the EDC Area to the City of Oakland shortly. The RAP requires cleanup of seven sites with soil and groundwater contaminated with metals, volatile and semi-volatile organic compounds, and total petroleum hydrocarbons. The RAP also requires cleanup of numerous locations where storage tanks, incidental vehicular maintenance, railroad tracks, and other activities involving the handling of hazardous materials occurred, and where hazardous substances or petroleum have been or may be discovered and will be remediated in accordance with the Risk Management Plan, an appendix to the RAP.
Completed Area Name:	OU2 - Offsite Wetland
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	08/15/2001
Comments:	DTSC approved the Soil Removal Action Work Plan for Operable Unit 2 (OU2) dated April 23, 2001 for the Oakland Army Base. The work plan proposes excavation and off-site disposal of pesticide contaminated soil at OU2. OU2 is a .5-acre low quality wetland offsite of the northeast end of Oakland Army Base.
Completed Area Name:	Parcel 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Feasibility Study Report
Completed Date:	04/19/2006
Comments:	On 4/19/06, DTSC approved the final "Uplands Areas of Concern, Feasibility Study, BRAC Parcel 1" dated April 2006. The Feasibility Study evaluates remedial alternatives for the upland Areas of Concern (AOCs) (i.e., AOC 1-1, AOC 1-2, AOC 1-3, and AOC 1-4) at Parcel 1 of the former Oakland Army Base. Parcel 1 includes the former landfill and part of the spit on which the eastern approach to the Bay Bridge is located. Constituents of concern include VOCs, pesticides, metals, and other typical waste constituents.

Completed Info:

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Assessment
Completed Date: 08/01/2002
Comments: The proposed action is the approval and implementation of the OARB Final Reuse Plan, applicable to one of the three sub-districts of the OARB Area Redevelopment Plan, by the Oakland Base Reuse Authority. The Reuse Plan provides for property transfers, remediation of soil and groundwater contamination, installation of major infrastructure, and rehabilitation or demolition and re-construction of mixed use (Public Access, Public Open Space. Recreation, Office/R&D, Light industrial, Warehouse/Distribution, Commercial/Retail, and Live/Work), as well as industrial Port uses (maritime end rail) and ancillary maritime support uses at or near the former OARB site.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Assessment
Completed Date: 08/01/2002
Comments: The City of Oakland prepared the final ENVIRONMENTAL ASSESSMENT for the Oakland Army Base (OARB) Area Redevelopment Plan. The ENVIRONMENTAL ASSESSMENT includes environmental impact analysis for remedial alternatives proposed in the OARB’s Remedial Action Plan. DTSC was a responsible agency for the ENVIRONMENTAL ASSESSMENT decision.

Completed Area Name: OU2 - Offsite Wetland
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Assessment

OAKLAND ARMY BASE (Continued) **S105481917**

Completed Date: 08/15/2001
Comments: DTSC completed the ENVIRONMENTAL ASSESSMENT necessary for the approval of the OU2 Removal Action Workplan for the removal of pesticide contaminated soil at a wetland soil in OU2.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 05/19/2003
Comments: DTSC, the Oakland Base Reuse Authority, and the City of Oakland acting by and through the Oakland Redevelopment Agency executed the Consent Agreement on May 19, 2003. The Consent Agreement binds the City to enter into environmental restrictions for the Site as necessary to protect human health and the environment, and to require the remediation of the site by the City in accordance with the Oakland Army Base Remedial Action Plan and associated Risk Management Plan approved by DTSC on September 26, 2002.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 08/08/2003
Comments: On August 6, 2003, Governor Davis approved early transfer of the former Oakland Army Base to the City of Oakland. The U.S. Army requested that the State of California approve the deferral of remediation of hazardous substance contamination and approve the transfer 363.5 acre of Army property to the Oakland Base Reuse Authority and the City of Oakland acting by and through the Oakland Redevelopment Agency. The transferred acreages are about 85% of the original 425 acres of the former base area.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability for Early Transfer
Completed Date: 08/06/2003

Completed Document Type:	Remedial Investigation Report
Completed Date:	06/28/2005
Comments:	On June 28, 2005, DTSC approved the Remedial Investigation Report for Parcel 1 at the former Oakland Army Base. Parcel 1 consists of approximately 19.97 acres, including approximately 14 acres (nominally 14.08 acres, more or less) of upland and approximately 6 acres (5.89 acres, more or less) of submerged sediments in the intertidal and subtidal zones. The Remedial Investigation Report

OAKLAND ARMY BASE (Continued) **S105481917**

presents a summary of all previous and supplemental investigations. The overall objective of the Remedial Investigation Report was to collect sufficient data to assess the nature and extent of the site-related chemicals in soil, sediment, and groundwater, and to complete a baseline human health and ecological risk assessment.

Completed Area Name:	OU2 - Offsite Wetland
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	07/26/2005
Comments:	Department of Toxic Substances Control (DTSC) has reviewed the Closure Report and determined that the Army has removed the pesticide contaminated soil at the wetland area pursuant to the DTSC-approved Operable Unit 2 Soil Removal Action Work Plan dated July 2001. The Army removed 1,204 tons of non-Resource Conservation and Recovery Act hazardous waste soil to achieve residential cleanup goals.

Completed Document Type:	Environmental Baseline Survey
Completed Date:	01/23/2003

OAKLAND ARMY BASE (Continued) **S105481917**

Comments: The Department of Toxic Substances Control (DTSC) has received the final Environmental Baseline Survey for Transfer (EBS-T) dated December 2002. The EBS-T provides a description of environmental conditions and presents data from previously prepared documents for BRAC Parcels 1 through 5, 8 through 17, 19 (partial), 20, 21 (partial), and 22 through 26 at the former Oakland Army Base (OARB). DTSC has reviewed the final EBS-T and has no further comments.

Completed Area Name: OU5
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 12/12/2000
Comments: The Department of Toxic Substances Control (DTSC) has received the final Technical Report of Findings (Report) for Operable Unit 5, Revision 2, dated November 2000 for the Oakland Army Base (OARB). The Report contains information supporting the Army s request of no further action for Parcels 22, 23 and 26 at OARB. DTSC has reviewed the Report and has no further comments.

Completed Area Name: BASEWIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment/Site Inspection Report (PA/SI)
Completed Date: 06/30/1998
Comments: DTSC Completed the review of the Basewide Preliminary Assessment/Site Inspection (PA/SI), also called Preliminary Endangerment Assessment (PEA) activity for Oakland Army Base. Twenty-six (26) parcels were evaluated in the PA/SI. Twenty (20) parcels are recommended for further action while six (6) parcels are recommended for no further action.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Feasibility Study Report
Completed Date: 09/26/2002
Comments: The elements of Remedial Investigation and Feasibility Study for Operable Units 1, 2, 3, and 7 have been incorporated into the Remedial Action Plan and Risk Management Plan. These Operable Units are located within the Economic Development Conveyance Area. Upon approval of the Remedial Action Plan on September 26, 2002, the Remedial Investigation and Feasibility Study for Operable Units 1, 2, 3, and 7 are deemed completed.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 09/26/2002
Comments: On 9/26/02, DTSC approved the Remedial Action Plan (RAP) for the Economic Development Conveyance (EDC) Area. The EDC Area consists of 363.5 out of 425 acres of the base property. The Army will transfer the EDC Area to the City of Oakland shortly. The RAP requires cleanup of seven sites with soil and groundwater contaminated with metals, volatile and semi-volatile organic compounds, and total petroleum hydrocarbons. The RAP also requires cleanup of numerous locations where storage tanks, incidental vehicular maintenance, railroad tracks, and other activities involving the handling of hazardous materials occurred, and where hazardous substances or petroleum have been or may be discovered and will be remediated in accordance with

OAKLAND ARMY BASE (Continued) **S105481917**

the Risk Management Plan, an appendix to the RAP.

Completed Area Name:	OU2 - Offsite Wetland
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	08/15/2001
Comments:	DTSC approved the Soil Removal Action Work Plan for Operable Unit 2 (OU2) dated April 23, 2001 for the Oakland Army Base. The work plan proposes excavation and off-site disposal of pesticide contaminated soil at OU2. OU2 is a .5-acre low quality wetland offsite of the northeast end of Oakland Army Base.

Completed Area Name:	Parcel 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Feasibility Study Report
Completed Date:	04/19/2006
Comments:	On 4/19/06, DTSC approved the final "Uplands Areas of Concern, Feasibility Study, BRAC Parcel 1" dated April 2006. The Feasibility Study evaluates remedial alternatives for the upland Areas of Concern (AOCs) (i.e., AOC 1-1, AOC 1-2, AOC 1-3, and AOC 1-4) at Parcel 1 of the former Oakland Army Base. Parcel 1 includes the former landfill and part of the spit on which the eastern approach to the Bay Bridge is located. Constituents of concern include VOCs, pesticides, metals, and other typical waste constituents.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LOC Case Number:	RO0000019
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel
Site History:	Three USTs and approximately 120 linear feet of piping were removed from the site on February 16, 1989. The tank pit was over-excavated with approximately 1,500 cubic yards of soil treated onsite removed from the excavation. One groundwater monitoring well was installed at the site in July 1996. Additional site investigations were in conducted in 2007 and 2008.

CA BOND EXP. PLAN:

Reponsible Party:	RWQCB REFERRAL SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The responsible parties will pay all costs associated with remedial investigations and cleanup activities under RWQCB oversight. There are no plans to utilize Bond funds for this site.
Site Description:	Southern Pacific, Oakland, is a large railyard, switching and maintenance facility located between the Outer Harbor and Inner Harbor of San Francisco Bay. The site includes two surface impoundments which are separated by approximately a one-half mile distance: an oil/water separator system for waste waters from the cleaning of rail cars and an inactive waste pond for wash waters from the interiors of tank cars (referred to as polychlorinated biphenyl (PCB) sludge pond). There is soil and groundwater contamination at each of the surface impoundment areas.
Hazardous Waste Desc:	This site has been contaminated by PCBs, polynuclear aromatics (PNAs), benzene, toluene, xylene, ethylbenzene, waste oils, solvents such as trichloroethylene (TCE) and dichloroethylene (DCE) and heavy metals such as lead and arsenic. Shallow ground water is contaminated by solvents.
Threat To Public Health & Env:	The waste impoundment area is fenced; however, direct contact would present a potential health threat. This site is located within one mile of the San Francisco Bay; a drainage ditch is underneath the site. Potential for migration of contaminants tothe Bay is low. Solvents are known to have migrated offsite (at least 200 feet from the site at 3-foot depth) and to shallow ground water. There are no known domestic wells within three miles of the site.
Site Activity Status:	Southern Pacific submitted a draft RAP to the RWQCB and DHS in April, 1988. The RWQCB has determined the RAP to be unacceptable and is requiring additional hydrogeologic and site characterization.

Completed Date: 04/11/2008
Comments: Remedy remains protective of human health and the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/26/2003
Comments: Completed PEA. A Site Screening was prepared in 2001 under contract with the United States Environmental Protection Agency (U.S. EPA). The site screening consisted of a drive-by and review of available

A. BERCOVICH 18TH STREET (Continued) **S103983450**

regulatory files, historical information, and ownership information. In 1989, elevated levels of lead were detected beneath paved areas of the Site. The site screening recommended further action based on the fact that elevated levels of lead and possibly other hazardous contaminants existed in the soil at the Site, and that the Site was adjacent to residences. DTSC is currently working with the Site owner to explore remedial options for the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 07/11/2005
Comments: PEA recommends - A land use covenant (LUC or deed restriction) should be placed on the property, since the contamination is not at the surface (1-3 feet bgs), the area will be completely paved. There is no onsite risk to workers or the nearby residents. Lead has been detected up to 1,100 mg/kg at 1-3 feet bgs in soils beneath the asphalt at the Site. Using LeadSpread (the lead risk assessment spreadsheet) developed by the DTSC, the screening level for lead at the PRG 99th percent level is 260 ug/g. Analytical testing of soil and ground water for TPHg, TPHd, total lead, BTEX, MTBE, metals, and VOCs on site did not identify any other contaminants above residential or drinking water standards. An Operation and Maintenance Plan and Agreement with the property owner will ensure that the pavement is maintained and that financial assurance is in place.

Comments:	Remedy remains protective of human health and the environment.

A. BERCOVICH 18TH STREET (Continued) **S103983450**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/26/2003
Comments: Completed PEA. A Site Screening was prepared in 2001 under contract with the United States Environmental Protection Agency (U.S. EPA). The site screening consisted of a drive-by and review of available regulatory files, historical information, and ownership information.
In 1989, elevated levels of lead were detected beneath paved areas of the Site. The site screening recommended further action based on the fact that elevated levels of lead and possibly other hazardous contaminants existed in the soil at the Site, and that the Site was adjacent to residences. DTSC is currently working with the Site owner to explore remedial options for the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 07/11/2005
Comments: PEA recommends - A land use covenant (LUC or deed restriction) should be placed on the property, since the contamination is not at the surface (1-3 feet bgs), the area will be completely paved. There is no onsite risk to workers or the nearby residents. Lead has been detected up to 1,100 mg/kg at 1-3 feet bgs in soils beneath the asphalt at the Site. Using LeadSpread (the lead risk assessment spreadsheet) developed by the DTSC, the screening level for lead at the PRG 99th percent level is 260 ug/g. Analytical testing of soil and ground water for TPHg, TPHd, total lead, BTEX, MTBE, metals, and VOCs on site did not identify any other contaminants above residential or drinking water standards. An Operation and Maintenance Plan and Agreement with the property owner will ensure that the pavement is maintained and that financial assurance is in place.

Background Info: Alexander’s Ragtime Auto Wreckers operated an auto wrecking facility at the 0.3 acre Site from approximately 1966 to 1987. Meyer Goldberg and Miriam Goldberg were owners of the Site during Alexander’s Ragtime Auto Wrecker’s operation at the Site. The Goldbergs sold the Site to the San Francisco Bay Area Rapid Transit District (BART) in 1987. The Site is located in an industrial neighborhood with residences and other commercial areas located less than one block away. Business activities in the area include manufacturing, food processing, warehousing and

BOBO'S JUNKYARD (Continued) **S102008217**

Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	12/23/1996
Comments:	RAWs approved. Soil and groundwater investigations were conducted by both CalTrans and Southern Pacific Transportation Company (SPTCo) in the eastern portion of the site. Soil was found to be contaminated with petroleum compounds, pesticides, arsenic, lead, benzo(a)pyrene and volatile organic compounds. Groundwater was found to contain low-boiling petroleum hydrocarbons and volatile organic compounds. Both CalTrans and SPTCo were required to prepare a Removal Action Workplan (RAW) for the Eastern Portion of the site. The CalTrans RAW addressed the site during construction of the freeway whereas the SPTCo RAW describes post-construction actions. Both RAWs were approved in December 1996. The CalTrans RAW required a design change to the construction of Bent CR23. Three proposed footings were redesigned and located at ground level, and piles were redesigned so that no soil coring was required. In addition, a fourth footing was added to ensure stability in the event of an earthquake. Disposal of groundwater was not required as no excavation occurred. The remaining footings were constructed according to the existing design. Sealed shoring was installed at these footing locations to limit the amount of groundwater infiltration during construction excavations. Excavated groundwater was treated onsite and then either reused onsite or properly disposed off-site. The SPTCo RAW concluded that the site (soil and groundwater) does not pose a risk to human health and the environment under the exposure scenarios identified in the risk assessment (child trespasser and future construction worker). The alternative selected in the RAW requires an asphalt cap (or equivalent) with institutional controls and groundwater monitoring. This alternative was selected as SPTCo desired a useable surface at the site after freeway construction is completed. Two monitoring wells were installed downgradient of where cis-1,2-DCE was detected in groundwater. The purpose of the monitoring wells are to verify that cis-1,2-DCE is not migrating off the site. The Department will re-evaluate the need for additional remediation following the implementation of the U.S. EPA's investigation associated with an upgradient source, and in the event that groundwater concentrations rise significantly at the site. A five-year review of the removal action at the site will also be conducted.

Completed Document Type:	Removal Action Workplan
Completed Date:	12/23/1996
Comments:	RAWs approved. Soil and groundwater investigations were conducted by both CalTrans and Southern Pacific Transportation Company (SPTCo) in the eastern portion of the site. Soil was found to be contaminated with petroleum compounds, pesticides, arsenic, lead, benzo(a)pyrene and volatile organic compounds. Groundwater was found to contain low-boiling petroleum hydrocarbons and volatile organic compounds. Both CalTrans and SPTCo were required to prepare a Removal Action Workplan (RAW) for the Eastern Portion of the site. The CalTrans RAW addressed the site during construction of the freeway whereas the SPTCo RAW describes post-construction actions. Both RAWs were approved in December 1996. The CalTrans RAW required a design change to the construction of Bent CR23. Three proposed footings were redesigned and located at ground level, and piles were redesigned so that no soil coring was required. In addition, a fourth footing was added to ensure stability in the event of an earthquake. Disposal of groundwater was not required as no excavation occurred. The remaining footings were constructed according to the existing design. Sealed shoring was installed at these footing locations to limit the amount of groundwater infiltration during construction excavations. Excavated groundwater was treated onsite and then either reused onsite or properly disposed off-site. The SPTCo RAW concluded that the site (soil and groundwater) does not pose a risk to human health and the environment under the exposure scenarios identified in the risk assessment (child trespasser and future construction worker).

BOBO'S JUNKYARD (Continued) **S102008217**

The alternative selected in the RAW requires an asphalt cap (or equivalent) with institutional controls and groundwater monitoring. This alternative was selected as SPTCo desired a useable surface at the site after freeway construction is completed. Two monitoring wells were installed downgradient of where cis-1,2-DCE was detected in groundwater. The purpose of the monitoring wells are to verify that cis-1,2-DCE is not migrating off the site. The Department will re-evaluate the need for additional remediation following the implementation of the U.S. EPA's investigation associated with an upgradient source, and in the event that groundwater concentrations rise significantly at the site. A five-year review of the removal action at the site will also be conducted.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/13/1996
Comments: Remedial Action completed. Approximately 4,700 cubic yards of soil was excavated to six feet below ground surface. The site was paved for use as a training area for postal vehicles. Caltrans has installed groundwater monitoring wells and is conducting quarterly monitoring. Since the remediation goals contained in the approved RAP were for an industrial/commercial use, a deed restriction will be placed on the property restricting use.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	08/13/1996
Comments:	Remedial Action completed. Approximately 4,700 cubic yards of soil was excavated to six feet below ground surface. The site was paved for use as a training area for postal vehicles. Caltrans has installed groundwater monitoring wells and is conducting quarterly monitoring. Since the remediation goals contained in the approved RAP were for an industrial/commercial use, a deed restriction will be placed on the property restricting use.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	11/09/1995
Comments:	Approved Design.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Plan
Completed Date:	08/14/1995
Comments:	Approved RAP requiring soil removal, groundwater monitoring and deed restriction if levels left are above unrestricted use.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	07/03/1995
Comments:	Approved RIFS. Lead was the only contaminant found in excess of the acceptable concentrations.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	03/15/1995
Comments:	Completed PEA found the Site had elevated levels of petroleum hydrocarbons, PCBs, metals, semi-and volatile organic compounds.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	03/14/2005
Comments:	Confirmation samples indicated that chlordane and lead were not found above their site cleanup goals (370 ug/kg and 261 mg/kg, respectively). East Bay Habitat had removed approximately 1,025 tons of excavated soil and disposed of it at an offsite Class I disposal facility. Approximately 1,755 tons of excavated soil was excavated and disposed of at an offsite Class II disposal facility.

Alternate City,St,Zip:	OAKLAND, CA 94607
Background Info:	The site is located along the edge of the Port of Oakland’s Outer Harbor. From 1958 to 1974, the site was occupied by the McGuire Chemical Company. McGurie blended, packaged and stored chemicals such as anti-freeze and various volatile organic chemicals (VOCs), including aromatic and chlorinated compounds. Potential contaminants at the site include: total petroleum hydrocarbons (TPH) as gasoline, diesel, and motor oil, tetrachloroethylene (PCE), trichloroethene (TCE), polynuclear aromatic hydrocarbons (PAHs), arsenic, and metals such as copper, nickel and lead. The chemicals were stored in above ground tanks. Investigations have found aromatic and chlorinated solvents in soil and groundwater in the former area of the above ground tanks. The site currently operates as a marine container terminal.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Comments:	Approved RAP.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	07/03/1995
Comments:	Completed RIFS. Site investigation was conducted by Caltrans consultants in June 1992. Soil and groundwater samples were collected as part of the investigation. Groundwater was encountered at a depth of 6-7 feet. Soil samples revealed the following contaminants: total recoverable petroleum hydrocarbons (TRPH) as high as 6,700 ppm; TPH as diesel as high as 3,800 ppm; acetone-150 ppb; di-n-butylphthalate 0.9 ppm; bis (2-ethylhexyl)phthalate 0.9 ppm; pyrene 0.3 ppm; benzo-a-pyrene 0.3 ppm; lead (840 ppm). The following contaminants were detected in groundwater: arsenic (0.22 ppm); barium (1.1 ppm); and cadmium (0.02 ppm).

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	12/28/1992
Comments:	Completed Site Screening. It is a RCRA facility with five underground storage tanks. Of these, two are 10,000-gallon capacity diesel tanks, one is a waste oil tank, one is a fresh oil tank, and one is an abandoned solvent tank. The solvent tank is reportedly filled with water. All the tanks are reported to have tested leak-free in 1988, and recently.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 01/07/1999
Comments: Amendment to the May 10, 1994 VCA, which allows work to continue under Chapter 6.5 of the Health and Safety Code.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 07/07/2008

LDS TRUCKING (Continued) **S102008225**

Comments: DTSC has determined that the site does not pose a significant threat to public health or the environment, therefore no further investigation or cleanup is required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/07/1996
Comments: Approved PEA which confirm extent of contamination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 08/14/1995
Comments: Approved Remedial Action Plan required that contaminated site soils be excavated and disposed at an off-site facility and groundwater monitoring be conducted pending removal of the underground tank. Groundwater monitoring to be conducted.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 07/03/1995
Comments: Investigation noted presence of underground storage tank. Soil and groundwater impacted with TPH.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 05/24/1993
Comments: Approval of investigation and remedial action options report, dated March 29, 1993. Site investigation noted debris and surface soil staining across site. Diesel tank present and soil sampling detected lead and gasoline.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 05/01/2007
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/08/2007
Comments: Soil sampling was perfomed by 6/8/2007.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 12/09/2007
Comments: The RI report approval letter specifies that existing wells should be properly closed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Workplan

LDS TRUCKING (Continued) **S102008225**

Completed Date:	04/08/2008
Comments:	Wells will be closed by the end of April 2008.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Other Report
Completed Date:	05/15/2008
Comments:	This report describes the tasks performed and methods utilized for decommissioning four groundwater monitoring wells at the former LDS Trucking facility.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Amendment - Order/Agreement
Completed Date:	08/15/2002
Comments:	Amendment to the 5/10/1994 VCA to amend Section 3.16, "Payment" and Section 3.35, "Time Periods".
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Voluntary Cleanup Agreement
Completed Date:	05/10/1994
Comments:	VCA signed with Caltrans. This project is part of the Cypress Reconstruction Project. In entering into this Agreement, it is the objective of the Parties to conduct Preliminary Endangerment Assessments, removal actions, necessary implementation, risk assessment, design review and/or a Remedial Action Plan as required on a site by site evaluation.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

City: OAKLAND
State: CA
EPA Region: 9
County: ALAMEDA
Congressional District: 09
US Army District: Sacramento District (SPK)
Fiscal Year: 2009
Telephone: 916-557-7461
NPL Status: Not Listed
RAB: Not reported
CTC: 1.99346
Current Owner: PRIVATE

FUDS Description Details:

The site is 3.08 acres and is located in the City of Oakland in
Alameda County, CA. Two 10,000-gallon underground storage tanks
(USTs), a pumping station, a diesel fuel dispenser, and two fill pipes
were installed and used by the Santa Fe Land and Im
mprovement Company prior to and after Department of Defense leased the
property. The USTs were last used in June 1962 for diesel fuel storage
and dispensing. A private individual currently owns the property and
leases it to LDS Truck Lines and A.M. a
and S Transportation Company for use as a warehouse and truck
distributing center.

FUDS History Details:

On 15 October 1943, the War Department leased a total of 3.08 acres
from the Santa Fe Land and Improvement Company. The 9th District’s
Transportation Officer used the site for warehousing facilities,
trucking operations, and as a distribution center.
. The War Department terminated the lease on 15 June 1946 and the site
reverted back to the Santa Fe Land and Improvement Company. In 1982
the property was sold to a private individual. There are no potential
hazards related to previous DoD activitie
es currently identified at this site.

Background Info:	OAB Heroic War Dead USAR, also known as the United States Army Reserve Center, Oakland, is located near the eastern terminus of the San Francisco-Oakland Bay Bridge. Installation Restoration (IR) Site 1 is located at the northwestern portion of the USAR Center. The site consists of a wash rack (WR) which is a concrete pad, a below-grade oil water separator (OWS), and the surrounding soil. The WR/OWS is approximately 15-feet by 20-feet in dimension. The site immediately surrounding the WR/OWS is unpaved and covered with soil and gravel. The previous owner, Oakland Army Base, formerly used IR Site 1 to wash vehicles and engine components. Operations ceased sometime prior to the USAR occupying the property in early 1970s. The USAR did not know of the existence of the WR/OWS until they were uncovered in 1994 during a grading operation. The area has since been fenced to prevent unauthorized use. Investigations reveal tha the soil contains concentrations of petroleum hydrocarbons, metals, and volatile organic compounds (VOCs) above regulatory guidelines. The shallow groundwater is also impacted with VOCs. From these results, it is surmised that the best course of action is to remove the WR/OWS and surrounding soil to minimize any further contamination to the groundwater. DT

OAB HEROIC WAR DEAD USAR AKA: HEROIC W (Continued) **S105954429**

SC has approved a Risk Assessment Workplan (RAW) for the removal
impacted soil and WR/OWS. The interim removal action would preve
nt any further degradation to the environment while aditional inv
estigation is conducted.

Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 08/09/2010
Comments: DTSC prepared the Site Visit Summary for the 6/16/10 annual inspection of the Herioc War Dead EBMUD site.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Consent Agreement
Completed Date: 04/07/2009
Comments: EBMUD and DTSC entered into the Consent Agreement on 4/7/09. The purposes of this Agreement are (a) to bind EBMUD to comply with the

OAB HEROIC WAR DEAD USAR AKA: HEROIC W (Continued) **S105954429**

Operation and Maintenance Plan approved by DTSC on September 29, 2008, which specifies inspection, soil management, groundwater monitoring, annual reporting, and five-year review requirements at the Site, and (b) to provide for reimbursement of DTSC’s oversight costs from EBMUD.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Operations and Maintenance Plan
Completed Date:	09/29/2008
Comments:	DTSC approved the Operation and Maintenance (O&M) Plan on 9/29/08. The O&M Plan specifies procedures for operation, monitoring, and maintenance of remedial actions implemented at the Heroic War Dead EBMUD. The plan outlines O&M procedures for: the Building 1070 Yard engineered asphalt cap, the Building 1070 Yard lead-impacted soil area, groundwater monitoring at the Building 1070 Yard area, the Building 1064 Yard PV-18 PAH-impacted soil area, and site-wide soil and groundwater/liquid management. The O&M Plan also contains requirements for annual reporting and Five-Year Reviews.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	03/23/2009
Comments:	DTSC received the revised 2007 Annual Monitoring and Compliance Report (Annual Report) dated March 2008 for the Heroic War Dead East Bay Municipal Utility District (EBMUD) site, also known as the EBMUD West End Property. The Annual Report presents the results of the first bi-annual monitoring event conducted in July 2007, discusses soil disturbance activities, and serves as an annual report pursuant to Section 4.02(d) of the Covenant to Restrict Use of Property, Environmental Restriction. On October 30, 2008, DTSC provided comments on a previous draft report. DTSC has reviewed the revised Annual Report and the EBMUD s response letter dated March 17, 2009, and found the Annual Report and response letter satisfactory. DTSC hereby approves the 2007 Annual Report.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	10/08/2009
Comments:	DTSC concurs with the 2008 Annual Monitoring and Compliance Report.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Soils Management Plan
Completed Date:	07/02/2010
Comments:	On 7/2/10, DTSC approved EBMUD s request to import fill approximately 2,600 cubic yards of the soil from EBMUD s Main Waste Wastewater Treatment Plant to backfill the former Building 1101 area. DTSC has reviewed laboratory data and confirmed that chemical concentrations from the proposed fill are below hazardous waste levels and HWD EBMUD s remediation goals. DTSC has reiterated that the Covenant s provisions regarding soil excavation and disturbance continue to apply at the former Building 1101 area.

Completed Area Name:	Basewide

OAB HEROIC WAR DEAD USAR AKA: HEROIC W (Continued) **S105954429**

Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 05/13/2010
Comments: DTSC concurred with the 2009 annual report dated March 2010.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 04/01/2009
Comments: EBMUD plans to demolish Building 1101 and other related construction activities which will involve excavation and off-site disposal of approximately 6,850 cubic yards of soil. EBMUD also foresees dewatering of groundwater and accumulated liquid at the Building 1101 area. DTSC reviewed EBMUD s February 5, 2009 request letter and approved the request with the following reminder: 1.

Completed Document Type: Removal Action Completion Report
Completed Date: 08/18/2004
Comments: Installation Restoration Site 1 consists of a wash rack which is a concrete pad, a below-grade oil water separator, and the surrounding soil. The Army Reserve implemented the DTSC-approved Removal Action Workplan, removed approximately 900 cubic yards of debris and impacted soil, disposed the excavated material at appropriated permitted off-site land disposal facilities, collected confirmation soil samples, backfilled the excavation, and restored the ground surface with asphalt pavement. DTSC concurs that the Army Reserve has implemented the activities as specified in the Removal Action Workplan. DTSC approved the Removal Action Report on August 18, 2004.

Completed Area Name: IR01
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 04/15/2003
Comments: On 4/15/03, DTSC approved the Engineering Evaluation/Cost Analysis and Removal Action Workplan for Removal Action, Installation Restoration Site 1 (RAW) for the Heroic War Dead United States Army Reserve Center. The RAW proposes removal of the vehicle wash rack and oil water separator (WR/OWS) and adjacent contaminated soil at Installation Restoration Site 1. The Army Reserve will dispose the excavated soil and debris at off-site permitted disposal facilities. The removal action is an interim action for soil which may or may not serve as the final remedy. The Army Reserve should continue to characterize soil and groundwater contamination and to evaluate remedial alternatives at Installation Restoration Site 1.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 03/23/2009
Comments: On 3/23/09, DTSC approved the 2007 Annual Monitoring and Compliance Report (Annual Report) dated March 2008 for the Heroic War Dead East Bay Municipal Utility District (EBMUD) site, also known as the EBMUD West End Property. The Annual Report presents the results of the first bi-annual monitoring event conducted in July 2007, discusses soil disturbance activities, and serves as an annual report with site inspection summary pursuant to Section 4.02(d) of the Covenant to Restrict Use of Property, Environmental Restriction.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 09/24/2009
Comments: When conducting semi-annual groundwater monitoring pursuant to the 2008 Operation and Maintenance Plan at wells FMW-1, FMW-2, FMW-3, FMW-4, MW-5, MW-6, and EMW-4, EBMUD does not need to obtain DTSC s written approval before conducting groundwater monitoring activities.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 08/09/2010
Comments: DTSC prepared the Site Visit Summary for the 6/16/10 annual inspection of the Herioc War Dead EBMUD site.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported

OAB HEROIC WAR DEAD USAR AKA: HEROIC W (Continued) **S105954429**

Completed Document Type: Consent Agreement
Completed Date: 04/07/2009
Comments: EBMUD and DTSC entered into the Consent Agreement on 4/7/09. The purposes of this Agreement are (a) to bind EBMUD to comply with the Operation and Maintenance Plan approved by DTSC on September 29, 2008, which specifies inspection, soil management, groundwater monitoring, annual reporting, and five-year review requirements at the Site, and (b) to provide for reimbursement of DTSC’s oversight costs from EBMUD.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 09/29/2008
Comments: DTSC approved the Operation and Maintenance (O&M) Plan on 9/29/08. The O&M Plan specifies procedures for operation, monitoring, and maintenance of remedial actions implemented at the Heroic War Dead EBMUD. The plan outlines O&M procedures for: the Building 1070 Yard engineered asphalt cap, the Building 1070 Yard lead-impacted soil area, groundwater monitoring at the Building 1070 Yard area, the Building 1064 Yard PV-18 PAH-impacted soil area, and site-wide soil and groundwater/liquid management. The O&M Plan also contains requirements for annual reporting and Five-Year Reviews.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 03/23/2009
Comments: DTSC received the revised 2007 Annual Monitoring and Compliance Report (Annual Report) dated March 2008 for the Heroic War Dead East Bay Municipal Utility District (EBMUD) site, also known as the EBMUD West End Property. The Annual Report presents the results of the first bi-annual monitoring event conducted in July 2007, discusses soil disturbance activities, and serves as an annual report pursuant to Section 4.02(d) of the Covenant to Restrict Use of Property, Environmental Restriction. On October 30, 2008, DTSC provided comments on a previous draft report. DTSC has reviewed the revised Annual Report and the EBMUD s response letter dated March 17, 2009, and found the Annual Report and response letter satisfactory. DTSC hereby approves the 2007 Annual Report.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 10/08/2009
Comments: DTSC concurs with the 2008 Annual Monitoring and Compliance Report.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 07/02/2010
Comments: On 7/2/10, DTSC approved EBMUD s request to import fill approximately 2,600 cubic yards of the soil from EBMUD s Main Waste Wastewater Treatment Plant to backfill the former Building 1101 area. DTSC has reviewed laboratory data and confirmed that chemical concentrations from the proposed fill are below hazardous waste levels and HWD EBMUD s remediation goals. DTSC has reiterated that the Covenant s

OAB HEROIC WAR DEAD USAR AKA: HEROIC W (Continued) **S105954429**

provisions regarding soil excavation and disturbance continue to apply at the former Building 1101 area.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 05/13/2010
Comments: DTSC concurred with the 2009 annual report dated March 2010.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 04/01/2009
Comments: EBMUD plans to demolish Building 1101 and other related construction activities which will involve excavation and off-site disposal of approximately 6,850 cubic yards of soil. EBMUD also foresees dewatering of groundwater and accumulated liquid at the Building 1101 area. DTSC reviewed EBMUD s February 5, 2009 request letter and approved the request with the following reminder: 1.

Completed Document Type:	Removal Action Completion Report
Completed Date:	08/18/2004
Comments:	Installation Restoration Site 1 consists of a wash rack which is a concrete pad, a below-grade oil water separator, and the surrounding soil. The Army Reserve implemented the DTSC-approved Removal Action Workplan, removed approximately 900 cubic yards of debris and impacted soil, disposed the excavated material at appropriated permitted off-site land disposal facilities, collected confirmation soil samples, backfilled the excavation, and restored the ground surface with asphalt pavement. DTSC concurs that the Army Reserve has implemented the activities as specified in the Removal Action Workplan. DTSC approved the Removal Action Report on August 18, 2004.

Completed Area Name:	IR01
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	04/15/2003
Comments:	On 4/15/03, DTSC approved the Engineering Evaluation/Cost Analysis and Removal Action Workplan for Removal Action, Installation Restoration Site 1 (RAW) for the Heroic War Dead United States Army Reserve Center. The RAW proposes removal of the vehicle wash rack and oil water separator (WR/OWS) and adjacent contaminated soil at Installation Restoration Site 1. The Army Reserve will dispose the excavated soil and debris at off-site permitted disposal facilities. The removal action is an interim action for soil which may or may not serve as the final remedy. The Army Reserve should continue to characterize soil and groundwater contamination and to evaluate remedial alternatives at Installation Restoration Site 1.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2011
Date Data Arrived at EDR: 03/25/2011
Date Made Active in Reports: 06/14/2011
Number of Days to Update: 81

Source: Environmental Protection Agency

Last EDR Contact: 09/12/2011
Next Scheduled EDR Contact: 12/26/2011
Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011

Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 04/08/2011	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 06/16/2011	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program’s oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder’s office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

SUTTER COUNTY:

Underground Storage Tanks

Underground storage tank sites located in Sutter county.

Date of Government Version: 06/13/2011	Source: Sutter County Department of Agriculture
Date Data Arrived at EDR: 06/14/2011	Telephone: 530-822-7500
Date Made Active in Reports: 07/13/2011	Last EDR Contact: 09/12/2011
Number of Days to Update: 29	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Semi-Annually

VENTURA COUNTY:

Business Plan, Hazardous Waste Producers, and Operating Underground Tanks

The BWT list indicates by site address whether the Environmental Health Division has Business Plan (B), Waste Producer (W), and/or Underground Tank (T) information.

Date of Government Version: 07/26/2011	Source: Ventura County Environmental Health Division
Date Data Arrived at EDR: 08/26/2011	Telephone: 805-654-2813
Date Made Active in Reports: 09/19/2011	Last EDR Contact: 08/23/2011
Number of Days to Update: 24	Next Scheduled EDR Contact: 12/05/2011
	Data Release Frequency: Quarterly

Inventory of Illegal Abandoned and Inactive Sites

Ventura County Inventory of Closed, Illegal Abandoned, and Inactive Sites.

Date of Government Version: 04/01/2011	Source: Environmental Health Division
Date Data Arrived at EDR: 04/07/2011	Telephone: 805-654-2813
Date Made Active in Reports: 05/12/2011	Last EDR Contact: 08/22/2011
Number of Days to Update: 35	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Annually

Listing of Underground Tank Cleanup Sites

Ventura County Underground Storage Tank Cleanup Sites (LUST).

Date of Government Version: 05/29/2008	Source: Environmental Health Division
Date Data Arrived at EDR: 06/24/2008	Telephone: 805-654-2813
Date Made Active in Reports: 07/31/2008	Last EDR Contact: 08/23/2011
Number of Days to Update: 37	Next Scheduled EDR Contact: 12/05/2011
	Data Release Frequency: Quarterly

Medical Waste Program List

To protect public health and safety and the environment from potential exposure to disease causing agents, the Environmental Health Division Medical Waste Program regulates the generation, handling, storage, treatment and disposal of medical waste throughout the County.

Date of Government Version: 07/26/2011	Source: Ventura County Resource Management Agency
Date Data Arrived at EDR: 08/08/2011	Telephone: 805-654-2813
Date Made Active in Reports: 09/09/2011	Last EDR Contact: 08/01/2011
Number of Days to Update: 32	Next Scheduled EDR Contact: 11/14/2011
	Data Release Frequency: Quarterly

Underground Tank Closed Sites List

Ventura County Operating Underground Storage Tank Sites (UST)/Underground Tank Closed Sites List.

Date of Government Version: 05/25/2011	Source: Environmental Health Division
Date Data Arrived at EDR: 06/21/2011	Telephone: 805-654-2813
Date Made Active in Reports: 07/13/2011	Last EDR Contact: 09/20/2011
Number of Days to Update: 22	Next Scheduled EDR Contact: 01/02/2012
	Data Release Frequency: Quarterly

YOLO COUNTY:

Underground Storage Tank Comprehensive Facility Report
Underground storage tank sites located in Yolo county.

Date of Government Version: 08/15/2011
Date Data Arrived at EDR: 08/23/2011
Date Made Active in Reports: 09/16/2011
Number of Days to Update: 24

Next Scheduled EDR Contact: 11/21/2011
Data Release Frequency: Varies

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009
Date Made Active in Reports: 09/11/2009

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association’s annual survey of hospitals.
Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.
Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.
Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics’ primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.
Private Schools

800 CEDAR
800 CEDAR STREET
OAKLAND, CA 94607

TARGET PROPERTY COORDINATES

Latitude (North):	37.80980 - 37˚ 48’ 35.3’’
Longitude (West):	122.3033 - 122˚ 18’ 11.9’’
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	561327.9
UTM Y (Meters):	4184735.8
Elevation:	14 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	37122-G3 OAKLAND WEST, CA
Most Recent Revision:	1980

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

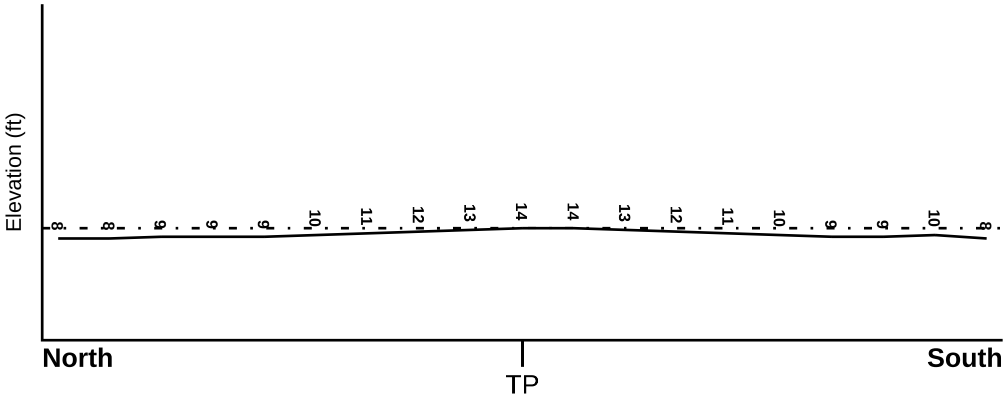
TOPOGRAPHIC INFORMATION

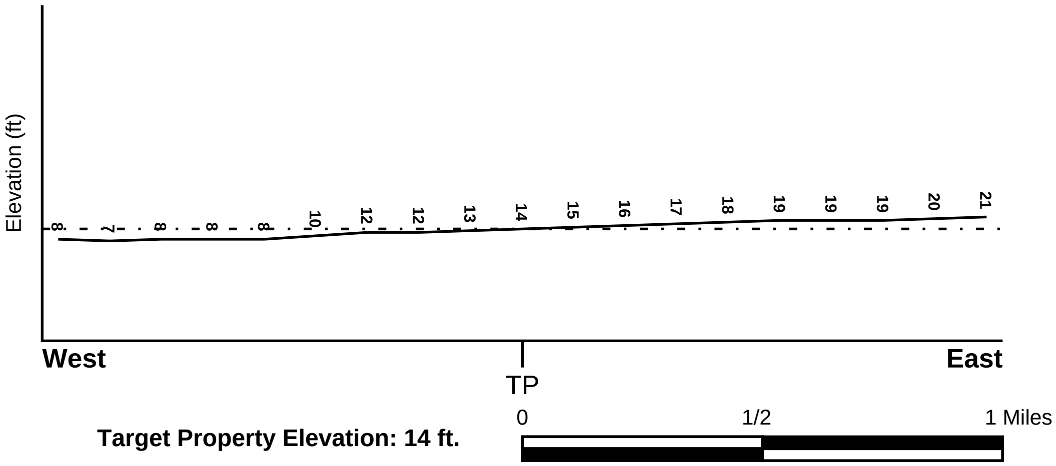
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 14 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
ALAMEDA, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06001C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OAKLAND WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT		**GEOLOGIC AGE IDENTIFICATION**

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name:	Urban land
Soil Surface Texture:	
Hydrologic Group:	Not reported
Soil Drainage Class:	
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name:	Urban land
Soil Surface Texture:	
Hydrologic Group:	Not reported
Soil Drainage Class:	
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5’ Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5’ Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5’ Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

APPENDIX G
ENVIRONMENTAL PROFESSIONAL QUALIFICATIONS

DENNIS LADUZINSKY, P.G., C.E.G., R.E.A.

PRINCIPAL

Mr. Laduzinsky has more than 20 years of professional experience providing direct oversight and management of a wide variety of environmental and geologic engineering projects. He has performed or managed hundreds of Phase I and II environmental site assessments. He has managed team efforts for remedial investigations, feasibility studies, and evaluation of remedial alternatives and implementation of remedial measures. Mr. Laduzinsky's background includes extensive project experience in environmental evaluation for commercial and residential real estate development, and includes substantial expertise in basic engineering geology and hydrogeologic evaluation. His redevelopment experience includes projects ranging from small industrial sites to mixed commercial and residential developments covering several city blocks. This experience includes EPA-funded Brownfields assessments for the City of Oakland, site assessments and cleanup plans for railway corridor sites for the Santa Clara Valley Transportation Authority and at private mixed-use redevelopments, and cleanup plan design and implementation at Brownfields Sites. This work has required generating the technical data required for the our clients to make effective site cleanup and development decisions.

REPRESENTATIVE EXPERIENCE

- *King's Court Shopping Center, Los Gatos, California* – Project manager for site characterization and remediation at a former dry cleaning facility located in an up-scale strip-mall. Implemented complete soil and groundwater cleanup programs including soil vapor extraction, air-sparging, and groundwater extraction and treatment. Performed indoor air quality evaluations and developed engineering controls to manage air quality issues.

- *Confidential Dry Cleaners, Santa Rosa, California* – Provided data compilation and evaluation services to develop plans for additional site characterization and cleanup at dry cleaner site involved in a co-mingled plume with two nearby gasoline service stations. Performed a detailed evaluation of historic site characterization data for the dry cleaner and adjacent service stations, produced by different consultants over a 15-year time frame and compiled the information into a single coherent document. Developed a scope of work to complete the site characterization studies, and evaluated alternative cleanup options for the dry cleaner, including soil vapor extraction, excavation and disposal, and chemical oxidation. Also provided evaluation of a planned regional groundwater cleanup program to address the co-mingled groundwater contamination plume. Negotiated work scopes and cleanup levels with the California RWQCB.

- *Scotts Valley Shopping Centers, Scotts Valley, California* – Project Manager for Phase I/Phase II evaluation at two shopping centers in Scotts Valley, an environmentally significant area in that the region is underlain by a sole-source aquifer, and municipal supply wells in the area have become increasingly contaminated with volatile organic compounds (VOCs). Site history evaluations revealed that both sites had been formerly occupied by dry-cleaning establishments and were surrounded by off-site potential contamination sources, including numerous CERCLIS sites. Provided field engineering services for focused evaluations of soil and groundwater quality, which determined that both sites were impacted by the former cleaning operations.

- Served as expert witness for two hydrocarbon contamination cases. Provided depositions and attended non-binding arbitration settlements. Both cases successfully resolved prior to court. Provided technical evaluation and consultation for several VOC and petroleum hydrocarbon contamination cases. Represented client in binding arbitration for cost recovery for facility closure and site cleanup at an automobile dealership.

- *Redevelopment Agency of the City of San Jose, San Jose, California* – Served as Project Manager for Phase I environmental assessments for eight separate downtown redevelopment projects. Projects ranged from high-rise hotels to mixed commercial and condominium projects covering square city blocks. Services included identification of previous land use histories, evaluations of existing contamination data, and detailed chain-of-title reviews to develop lists of potentially responsible parties. Services included preparation of estimates of site clean-up costs. Individual projects involved review or oversight of third party environmental consultant or remediation contractor work. Previous land use histories included service stations, automotive repair facilities, dry cleaners, paint and chemical manufacturing facilities, and coal gasification plants.
- *Former Union Pacific Railroad Yard, San Jose, California* – Mr. Laduzinsky served as a Project Manager for implementation of removal actions for managing pesticide- and metals-impacted soil during redevelopment of a 50-acre shopping center. Removal actions consisted of selective excavation, on-site encapsulation, and off-site disposal or reuse of over 250,000 cubic yards of pesticide-impacted soil, and off-site removal of more than 350,000 cubic yards of “clean” soil. The project success required careful management of large volumes of soil during full-scale site grading operations, requiring significant coordination with contractors, regulatory agencies, the general public, and other interested parties. The project also included third-party oversight of the regulatory cleanup and closure of an automobile dealership performed by others. Effective project management and coordination allowed the project to proceed without any construction or development delays related to the removal actions or other issues related to the presence of contamination at the site. The project is listed on the “Brownfields Success Stories” section of the DTSC web site.
- *Santana Row (former Town and Country Village), San Jose, California* – Project Manager for implementing removal actions for managing pesticide- and metals-impacted soil during redevelopment of a 50-acre shopping center. Removal actions consisted of selective excavation, on-site encapsulation, and off-site disposal or reuse of over 250,000 cubic yards of pesticide-impacted soil, and off-site removal of more than 350,000 cubic yards of “clean” soil. The project required careful management of large volumes of soil during full-scale site grading operations, requiring significant coordination with contractors, regulatory agencies, and the general public. The project also included third-party oversight of the regulatory cleanup and closure of an automobile dealership performed by others. Effective project management and coordination allowed the project to proceed without any construction or development delays related to the removal actions or other issues related to the presence of contamination at the site. The project is listed on the “Brownfields Success Stories” section of the DTSC web site.
- *Garin Vista Housing Development, Hayward, California* – Performed site characterization studies and subsequent air monitoring services for massive hillside grading program in an area underlain by naturally occurring asbestos. Developed and implemented an asbestos air monitoring plan and an asbestos dust mitigation plan in accordance with the California Air Resources Board Asbestos Toxic Control Measure for grading in areas underlain by naturally occurring asbestos.
- *Former Almaden Air Force Station at Mt. Umunhum, Sierra Azul Open Space Preserve, Santa Clara County, California* – Mr. Laduzinsky oversaw Phase I environmental site assessments and Phase II soil and groundwater investigations, as well as asbestos and lead pain investigations on this former Air Force Station currently owned by an Open Space District.
- *Bruener Property (former Murray and Davis Properties),Richmond, California* – Performed comprehensive due diligence evaluation of historic site conditions of bay margin property for proposed residential development. Investigation identified extensive areas of potentially contaminated fill materials, in-filled boat repair marina, petroleum pipeline releases, and other issues of potential concern. Developed work scopes for complete site characterization studies to

evaluate the vertical and lateral extent of soil and groundwater contamination at the site and developed preliminary site cleanup strategies and options.

- *Hearthstone Advisors, California* – Project Manager for third-party peer-review services reviewing Phase I/II assessments performed by others. Significant findings include presence of former fuel storage issues and skeet-shooting facilities overlooked by original consultants.
- *Phase I/II Assessment, Moitozo Property, San Jose, California* – Project Manager for a Phase I and Phase II assessment at the site of a former orchard in San Jose. Studies quantified the presence and distribution of elevated levels of DDT, lead, and arsenic in shallow soil, and identified the presence of a former easement for a waste discharge line originating from a solvent recycling firm. Performed detailed health risk assessment to evaluating acceptable risk levels associated with pesticide and metals contamination, and recommended implementation of simple on-site mitigation measures.
- *Livermore Senior Housing, Livermore, California* – Performed comprehensive Phase I and II site characterization studies and remedial actions on a 10-acre redevelopment site containing several abandoned railroad easements. Remedial actions performed under a Voluntary Cleanup Agreement with DTSC consisted of the on-site encapsulation of about 5,000 cubic yards of arsenic-impacted soil associated with one of the railroad embankments. Northgate currently provides annual operation and maintenance inspections in accordance with a land use restriction recorded at the site. The project is listed on the "Brownfields Success Stories" section of the DTSC web site.
- *Catalyst Project, Alameda, California* – Provided complete environmental assessment and management for a downtown redevelopment program that included demolition of existing structures, constructing a new theater and multi-level parking garage, and renovation of a historic art-deco movie theater. The investigation included a complete assessment of the site history, characterization of soil and groundwater contamination, and evaluation of asbestos, lead-paint, and mold in the existing buildings. The Phase I investigation indicated that a portion of the site had been historically occupied by a gasoline service station with eleven underground storage tanks for which no removal records were found. A Phase II site characterization study delineated the vertical and lateral extent of residual contamination. A baseline risk assessment demonstrated that residual contamination would not significantly impact the proposed redevelopment. Environmental management services included preparation of cost estimates for possible site mitigation alternatives, development of contingency plans and bid document specifications for dealing with hydrocarbon-impacted soil and groundwater encountered during construction, and managing potentially contaminated groundwater produced during construction dewatering activities at the site.
- *Former Auto Wrecking Yard, Parr Boulevard at Garden Track Road, Richmond*, *California* – Performed detailed site history review to identify potential soil and groundwater contamination conditions at a 20 acre Bay Margin site formerly used as an auto wrecking yard. Investigation included comprehensive review of BCDC project files, investigation of historic unpermitted in-filling, and delineation of wetlands areas within the site boundary.
- *Duc Housing Partners, Federal Realty Investment Trust, Palo Alto Medical Foundation, Edenbridge, Standard Pacific Homes, Cousins Properties, Brooks Street, Brookfield Homes, Davidon Homes, Delco Builders, Watson Land Company, and Other Residential and Commercial Developers, Northern and Southern California* – Performed and managed Phase I and Phase II assessments at over 100 sites throughout California for residential and commercial developers. Sites variously included former industrial properties, chemical manufacturers, food processing facilities, railroad yards, downtown redevelopment projects, strip malls, shopping centers, dry cleaners, schools, corporation yards, agricultural lands, cattle ranches, diary farms,

in-filled quarries, oil and gas fields, and other sites. Projects commonly included follow up site characterization studies for evaluation of potential indoor air quality impacts, evaluation of remedial alternatives, preparation of preliminary remediation costs and schedules. Contaminants of concern commonly included pesticides, petroleum hydrocarbons, metals, polynuclear aromatic hydrocarbons, volatile organic compounds, PCBs, asbestos, lead paint, mold, and other contamination issues.

- *Confidential VOC Project, Mountain View, California* – Performed detailed site characterization studies to evaluate the source and extent of VOC contamination in soil and groundwater at a bay-margin R&D business park. Identified RPs based on historic land use evaluation. Initial site characterization studies were used to negotiate a settlement agreement and obtain pollution legal liability insurance for the site. Continuing work consists of peer review and oversight of additional investigation and cleanup of VOC contamination by others on behalf of the property owner, including representing the property owner at regulatory meetings, presentations at the RWQCB, negotiations with RPs and other interested parties, discussions with insurance company representatives, and development of technical support strategies for subsequent legal actions to enforce the settlement agreement, when required.

- *301 Industrial Way, San Carlos, California* – Performed a comprehensive due diligence review for the proposed purchase of an 18-acre industrial facility used to manufacture vacuum tubes for over 50 years. Performed comprehensive review of historic environmental reports, detailed analysis of environmental documents and remedial action plans prepared by the seller, and performed an independent evaluation of existing site conditions and estimated site cleanup costs. Assisted the prospective purchaser in negotiating the sales agreement terms and conditions, liability transfer issues, and cleanup cost set-asides. Provided the client with a turnkey real estate transfer solution that included assumption of the site cleanup responsibilities and environmental insurance policies to manage liabilities.

- *Santa Clara Valley Water District* – Program manager for a multi-year environmental service contract that includes Phase I and II environmental site assessments for a variety of land transactions performed by the District, including leases, transfers, purchases and sales. Services include specific assessment of potential risk and liability associated with each transaction.

- *City of Oakland and City of San Francisco Public Works Agencies*—Served as Project Manager for Phase I and Phase II environmental assessments and other due diligence evaluation services on multi-year as-needed master service contracts. Services included evaluation and cleanup at the former Oakland Army Base, downtown redevelopment projects, tenant audit programs for hazardous materials management on city-owned properties, and storm water management and control programs.

- *Palo Alto Airport and City Refuse System Maintenance Yard*—Program manager for Phase I and Phase II ESAs on city-owned parcels, performed to assist the city in renegotiating leases for independent facility operators.

- *Facility Closure Review, San Francisco Bay Area, California*—Performed third-party oversight of facility closure programs on behalf of commercial property owners at a number of sites throughout the San Francisco Bay Area. Facilities include medical research facilities, light and heavy manufacturing facilities, medical offices, automotive repair facilities, automobile dealerships, and other sites. Worked to ensure compliance with local regulations and to evaluate potential soil and groundwater contamination and building contamination issues overlooked by local regulatory inspectors.

- *Jacques Gulch Investigation and Geologic Assessment, San Jose California* – Performed geologic assessments of two creek channels to define extent of mercury mill tailings and slope stability of creekbed slopes. Developed tailing extent and geologic field maps. Worked with the project team to develop an engineering report, CEQA input and project plans
- *Lower Silver Creek Realignment, San Jose, California* – Project Manager of a project to support land acquisition and to develop criteria for disposal of excess construction spoils. Supervised performance of a detailed environmental investigation of the first mile of Lower Silver Creek above its confluence with Coyote Creek, in suburban San Jose. Identified and evaluated potential sources of pollution along the creek realignment, evaluated remedial alternatives and relative costs for disposal of potentially contaminated soil.
- *Ontario Corporation Facility, San Carlos, California* – Senior Manager for site characterization and remediation of VOCs at a bay-margin metal-products manufacturing facility. Project included characterization of VOC plumes in bay-margin setting, including evaluation of former shorelines and tidal channels. Developed a hydrogeologic model to evaluate fate and transport of VOCs in tidally influenced shallow water zones overlying deeper aquifers separated by low-permeability Bay Muds. Implemented a remediation program consisting of a horizontal vapor extraction system beneath the former chemical storage area slab. Site closed by state and local agencies.
- *Unocal Bulk Transfer Terminals, Richmond and Eureka, California* – Project Manager responsible for performing evaluation and quarterly groundwater monitoring at two bulk transfer terminals. Services included hydrogeologic evaluation and monitoring following rupture of a large aboveground gasoline storage tank during the Loma Prieta Earthquake. Performed tidal influence studies in geologically complex in-filled former-shoreline environments using data-logger arrays measuring water elevation, temperature, and salinity.
- *Sinskey Winery, Yountville, California* – Performed hydrologic testing for water supply development at a proposed winery site. Investigation included constant discharge drawdown/ recovery tests, evaluation of local hydrologic resources, and projections of anticipated effects on neighboring wells related to peak demand pumping at the proposed winery
- *El Granada Groundwater Investigation, San Mateo County, California* – Project Hydrogeologist for basin-wide groundwater supply evaluation. Project performed for County of San Mateo Environmental Health Department for land use and well-permit allotment planning. Project included evaluation of the occurrence and movement of groundwater, and distribution of water quality indicators. Project resulted in recommendations for three optional levels of groundwater management planning. Services included formal public presentations at County Board of Supervisors meetings, and representing the County in basin-management meetings with the Regional Water Quality Control Board.
- *Eastern Alameda Disposal Site, Livermore, California* – Project geologist for investigations and compliance monitoring for an active Class III landfill. Investigations included site and facility investigation reports, hydrologic investigation reports, report of waste discharge investigations, and geologic investigation reports. Projects included active fault evaluation programs, geologic mapping, and hydrogeologic assessment to permit a new portion of the landfill, general compliance mapping, and managing quarterly groundwater and leachate monitoring programs.
- *Alameda Marina Area, Alameda, California* – Managed complete characterization and remediation of cyanide and heavy metal contaminated soil at the site of a former photochemical machine shop. Project involved coordination and negotiation of investigation scope and cleanup standards with County Health Department and the RWQCB. Project received agency sign-off following excavation of soil from beneath an existing building and presentation of evidence of no health risk.

- *Port of Oakland Galbraith Dredged Material Disposal Facility Project, Oakland, California* – Project Manager for air, surface water, and groundwater monitoring at the Galbraith Disposal Site. Responsible for ensuring compliance with the RWQCB NPDES permits for the site, where over 1 million cubic yards of sediment dredged from the Oakland Harbor were disposed and dried over a period of 7 years in containment lagoons constructed over a former landfill.

The EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

ALAMEDA COUNTY
OCT 10 1997
CLERK OF THE SUPERIOR COURT
By
DEPUTY

SUPERIOR COURT OF THE STATE OF CALIFORNIA

FOR THE COUNTY OF ALAMEDA

THE PEOPLE OF THE STATE OF CALIFORNIA, acting by and through the Department of Transportation, Plaintiff, v. PHOENIX PROPERTIES, a California General Partnership, et al., Defendants.	No. 731654-0 Parcels 1, 2 and 3 FINAL ORDER OF CONDEMNATION

It appearing to the court that plaintiff has compensated the defendants entitled thereto the sums of money assessed by the Judgments in Condemnation entered in this proceeding; and

It further appearing to the court that plaintiff was authorized to take possession on May 20, 1994.

NOW, THEREFORE, IT IS HEREBY ORDERED, ADJUDGED AND DECREED that the real property situated in the County of Alameda, State of California, and more particularly described as follows, be condemned to plaintiff for State highway purposes, in fee simple absolute, unless a lesser estate is described:

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

PARCEL 1 (50127-1):

For freeway purposes, that real property described as PARCEL A and PARCEL B below:

PARCEL A:

Being Lots 16 to 22 inclusive, Block 36, Map of Land on Oakland Point, [Rail-Road Ferry Landing] City of Oakland, Tract 406, filed May 24, 1864, Map Book 5, Page 33, Alameda County Records, described as follows:

COMMENCING at the point of intersection of the northern line of Goss Street with the eastern line of Cedar Street, as said streets are shown on the map herein referred to; thence easterly along said line of Goss Street, 105 feet 7 1/2 inches; thence northerly parallel with said line of Cedar Street, 100 feet 4 1/2 inches; thence westerly parallel with said line of Goss Street 25 feet; thence northerly parallel with said line of Cedar Street 50 feet; thence westerly parallel with said line of Goss Street 80 feet 7 1/2 inches to the eastern line of Cedar Street; thence southerly along said line of Cedar Street 150 feet 4 1/2 inches to the point of commencement.

//

//

//

//

//

//

//

PARCEL B:

Portion of Block 521, Boardman's Map of Oakland and Vicinity, filed April 23, 1883, Map Book 17, Page 14, Alameda County Records, described as follows:

Beginning at the southeasterly corner of Shorrey [Short] Streets and Cedar Street; thence easterly along the southerly line of Shorey [Short] Streets 80 feet and 7 1/2 inches; thence at right angles southerly 50 feet and 4 1/2 inches; thence at right angles westerly 80 feet and 7 1/2 inches to the easterly line of Cedar Street; thence at right angles northerly along the 1st named line 50 feet and 4 1/2 inches to the point of beginning.

//

//

//

//

//

//

//

//

//

//

//

//

//

//

//

PARCEL 2 (50106-1):

For freeway purposes, that real property described as follows:

The land referred to herein is situated in the State of California, County of Alameda, City of Oakland, and is described as follows:

That certain piece of Parcel of land bounded on the northeast by the southwest line of 9th Street, as said street now exists; bounded on the northwest by the southeast line of Cedar Street, as said street now exists; bounded on the southeast by the northwest line of Pine Street, as said street now exists; and bounded on the southwest by the northeast line of Shorey Street, as said street now exists.

//

//

//

//

//

//

//

//

//

//

//

//

//

//

PARCEL 3 (50109-1):

For freeway purposes, that real property described as follows:

Beginning at the intersection of the northeasterly line of Eighth Street with the northwesterly line of Cedar Street, in said City of Oakland; thence North 31° 58' 44" East along said northeasterly line of Cedar Street, 881.82 feet to a point which is 43.50 feet southeasterly measured at right angles from center line of eastward main tract of Southern Pacific Railroad Company, between Oakland and Martinez; thence South 46° 53' 29" West parallel with and distant 50 feet southeasterly measured at right angles from center line of said eastward main tract, 600.00 feet; thence leaving said parallel line South 43° 21' 26" West 155.07 feet; thence South 47° 37' 16" West, 155.77 feet to a point on the northeasterly line of said Eighth Street; thence South 58° 01' 16" East, along said northeasterly line of Eighth Street 227.00 feet to the point of beginning.

//

//

//

//

//

//

//

//

//

IT IS FURTHER ORDERED, ADJUDGED AND DECREED that a certified copy of this order be recorded in the office of the County Recorder of the County of Alameda, State of California, and thereupon title to said property described above shall vest in plaintiff and all interests of defendants PHOENIX PROPERTIES, a California General Partnership; LNB CORPORATION, SUCCESSOR IN INTEREST TO AM VAL FINANCIAL CORPORATION, as Trustee; COMMUNITY FIRST NATIONAL BANK, SUCCESSOR IN INTEREST TO AMADOR VALLEY SAVINGS AND LOAN ASSOCIATION; DREAM BUILDERS; ABRAMS, MILLIKAN & KENT; CYPRESS AUTO SALVAGE; STEVE HECK; RAMONA DOWNEY; PHOENIX PIANO WORKS; THE PIANO MOVERS; PHOENIX IRON WORKS, INC., a California corporation, sued and served as Doe One; and DUANE CASH, sued and served as Doe Two, in and to said real property shall be terminated.

DATED: 10-10-97

RICHARD A. HODGE
Judge of the Superior Court

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/31/2011 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
AMCO CHEMICAL	***1414 THIRD STREET***	***SE 1/2 - 1 (0.614 mi.)***	***0***	***16***

EXECUTIVE SUMMARY

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/25/2011 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
GAINES PROPERTY	***1795 11TH STREET***	***NE 1/8 - 1/4 (0.193 mi.)***	***J29***	***89***
USARMY OAKLAND ARMY BASE	***BLDG-1 ALASKA STREET***	***NW 1/4 - 1/2 (0.406 mi.)***	***X76***	***271***

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/25/2011 has revealed that there are 3 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 08/09/2011 has revealed that there are 46 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR Proprietary Records

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 2 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

A review of the EDR Historical Cleaners list, as provided by EDR, has revealed that there are 9 EDR Historical Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at Proposal April 30, 2003): The AMCO Chemical site AMCO) is part of a 0.83-acre property at 1414 Third Street in a mixed residential and light industrial area of Oakland, California. The property is bordered on the north by a vacant lot, on the west by residences, on the east by Nelson Mandela Parkway, and on the south by Third Street. A recently constructed elevated portion of the Interstate-880 I-880) freeway is located immediately across Third Street from the property.The property at 1401 Third Street) was historically occupied by Bobo s Junkyard. From the 1960s to 1989, the AMCO site was occupied by AMCO Chemical Company. AMCO operated a chemical distribution facility that included a warehouse, railroadspur, above-ground tanks, underground tanks, and drums used to transfer and store raw materials. In July 1988, the Oakland Fire Department observed leaking/rotting drums on the property. A subsequent emergency response investigation by AlamedaCounty and the U.S. Coast Guard revealed greater than 100 full and empty 5- and 55-gallon weathered drums in an open area behind AMCO Chemical s main building. Stenciled labels on the drums indicated that the contents included acetone; 1,1,1-trichloroethane 1,1,1-TCA); methyl ethyl ketone; and dry-cleaning solvent. From 1989 to November 1998, DC Metals operated a scrap metal yard on the site. Cable Moore, Inc., currently uses the site for cable storage. Structures remaining on site include an office building, warehouse, and two small storage buildings. In June 1995, a construction crew noted odors at the intersection of Third Street and Nelson Mandela Parkway, while excavating a trench needed to relocate an underground electrical line in preparation for a freeway project. Subsequent subsurface investigation by California Department of Transportation Caltrans), DC Metals, and EPA revealed the presence of volatile organic compounds VOCs) including vinyl chloride in soil, soilgas, and shallow ground water at the AMCO site, beneath Third Street, and at the 1401 Third Street property former Bobo s Junkyard). On December 5, 1996, the EPA Emergency Response Office initiated a removal action at the AMCO site that involved the construction of a ground water and soil vapor extraction

AMCO CHEMICAL (Continued) **1001115054**

SVE) treatment system. The EPA treatment system collection trench was excavated from December 5 through December 20, 1996. By December 23, 1996, the trench had been lined with a silt curtain, filled with gravel, and covered with a tarp. Cement was poured to permanently cover the trench on January 8, 1997. The treatment system operated from January 1997 through July 1998 and extracted approximately 7,000 pounds of VOCs, approximately 40 pounds of which were vinyl chloride. Operation of the system ceased in July 1998, due to community concern over the potential for a release of dioxins from the thermal oxidation unit. On December 5 and 14, 1996, during construction of the treatment system collection trench, the EPA On-Scene Coordinator observed shimmering vapors emanating from the open trench. SUMMA tm) canister sampling indicated the presence of vinyl chloride; methylene chloride; 1,1,1-trichloroethane TCA); and trichloroethene TCE) in the immediate area of the trench. In addition, one SUMMA canister sample collected from in front of a residence adjacent to the site contained TCE. The EPA conducted several sampling events on and adjacentto the AMCO site between 1997 and 2000. VOCs continued to be detected in soil, soil gas, and ground water on site. In September 1999, SUMMA canister samples were collected from the crawl spaces of three residences located adjacent to the site. Vinyl chloride was detected in the three crawl spaces at 0.02 to 0.045 parts per billion by volume ppbv). There are 626 people living within a quarter of a mile of the source. There are also approximately three workers on site. Status September 2003):EPA is considering various alternatives for this site. The description of the site release) is based on information available at the time the site was evaluated with the HRS. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991, or subsequent FR notices. For more information about the ha ardous substances identified in this narrative summary, including general information regarding the effects of exposure to these substances on human health, please see the Agency for Toxic Substances and Disease Registry ATSDR) ToxFAQs. ATSDR ToxFAQs can be found on the Internet at http://www.atsdr.cdc.gov/toxfaq.html or by telephone at 1-888-42-ATSDR or 1-888-422-8737.

Primary Responsibility: EPA Fund-Financed
Planning Status: Primary
Urgency Indicator: Not reported
Action Anomaly: Not reported

Action Code: 001
Action: INFORMATION REPOSITORY ESTABLISHED
Date Started: Not reported
Date Completed: 01/27/1997
Priority Level: Not reported
Operable Unit: OPERABLE UNIT 001
Primary Responsibility: EPA Fund-Financed
Planning Status: Not reported
Urgency Indicator: Not reported
Action Anomaly: Not reported

Action Code: 001
Action: REMOVAL
Date Started: 12/02/1996
Date Completed: 07/31/1998
Priority Level: Cleaned up
Operable Unit: SITEWIDE
Primary Responsibility: EPA Fund-Financed
Planning Status: Primary

Alternate Address: 1414 THIRD STREET
Alternate City,St,Zip: OAKLAND, CA 94607
Background Info: The site was occupied by AMCO Chemical Corp. until December 1989. DTSC inspected the site on August 4, 1988. An order to Fence and Post the site was issued on August 8, 1988. On February 24, 1989 a Report of Violation was issued to correct violations related to leakage of hazardous waste from piping and containers; storage of hazardous waste in deteriorated or otherwise corroded conditions; and unlabeled waste containers. Soil and groundwater located outside of the site boundary were sampled by Caltrans and Southern Pacific Railroad. Elevated levels of VOC’s (vinyl chloride,1,1-DCE,PCE,1,1,1-TCA, 1,2-DCE), acetone, toluene and xylene have been found in soil and/or groundwater.
Comments Date: 04261996
Comments: DTSC issued an I or SE Order and RAO to the previous and current
Comments Date: 04261996
Comments: owner, and operator.
Comments Date: 04302003
Comments: US EPA proposed to list site on the National Priotrities List
Comments Date: 04302003
Comments: (NPL). US EPA implemented a removal action in 1997 to address
Comments Date: 04302003
Comments: high concentrations of vinyl chloride at or near the AMCO site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 01/01/1997
Comments: US EPA implemented a removal action in 1997 to address high concentrations of vinyl chloride at or near the AMCO site. A groundwater extraction and treatment system and a soil vapor extraction system were installed to address the vinyl chloride and other contaminants found in shallow groundwater and soils. Operation of this system ceased in July 1998 due to community concerns. US EPA conducted several sampling events on and adjacent to the site between 1997 and 2002.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Date: 07/03/1995
Comments: Completed RIFS.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/04/1993
Comments: Completed Site Screening. The site is a currently operating wrecking yard and is fully occupied by abandoned cars, parts, and debris. Earlier site investigation indicated surface soil contamination. Subsequent field investigation conducted in October 1992 in conjunction with CalTrans activities revealed the presence of total recoverable petroleum hydrocarbons (TPRH) as high as 138,000 ppm. Approximate volume of contaminated soil is 950 cubic yards. Additional site characterization is necessary.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 10/17/1997
Comments: Certified Site. Remediation goals were met for all contaminants. After remediation activities were completed, the site was further excavated by Caltrans to a minimum of 15 feet for the construction of the 7th Street undercrossing.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 05/10/1994
Comments: Signed VCA.

Completed Document Type: Remedial Action Plan
Completed Date: 08/14/1995
Comments: RAP required hotspot soil removed and groundwater monitored.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 12/07/1994
Comments: Approval of Remedial Action Options Report, dated December 27, 1994.The purpose of this investigation was to address the DTSC concerns regarding the November 1993 PEA which include: (1) confirmation of the removal of 5 underground storage tanks and associated piping; (2) assessment of the presence of contaminants in the soils in the area of the former waste oil tank; and (3) assessment of contaminants in the ground water beneath the site. Additional soil and groundwater samples confirmed similar levels and types of contaminants.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 11/22/1993
Comments: Aproval of PEA, dated May 1993. Soil and groundwater contamination found.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 07/03/1995
Comments: RIFS approved. Site investigation activities, performed prior to the 5/10/1994 VCA, were reported in the Site Investigation Report Area 2 dated August 1992. The RI/FS was approved on July 3, 1995 when the Remedial Action Plan Was approved for public review.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/02/2001
Comments: The removal action consisted of excavation and off-site disposal of

CHURCH'S FRIED CHICKEN (Continued) **S102008249**

approximately 2,480 cubic yards of soil contaminated with petroleum hydrocarbons (as gasoline, diesel and total hydrocarbons),benzene, toluene, ethyl benzene, xylenes, lead, nickel and arsenic. The soil was excavated down to 10 feet below ground surface where groundwater was encountered and excavation was stopped.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Background Info: The Gaines Site is a vacant lot located in a mixed residential/commercial/industrial neighborhood. It has been used to store automobiles, drums, pressurized gas containers and other miscellaneous equipment. Surface samples collected found lead as high as 28,000 parts per million (ppm). No volatile or semivolatile organic compounds were detected at significant levels.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Plan
Completed Date:	08/14/1995
Comments:	Approved RAP requiring removal of contamination.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	07/21/1995
Comments:	Approved PEA to define extent of contamination.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	07/03/1995
Comments:	Approved RIFS noted presence of contamination.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	10/26/1992
Comments:	Site screening noted presence of two sumps. Soil and groundwater samples detected TPH, lead and copper above remediation goals.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Amendment - Order/Agreement
Completed Date:	01/07/1999
Comments:	Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Voluntary Cleanup Agreement
Completed Date:	08/15/2002
Comments:	Signed VCA amendment for time only. Amendment to the May 10, 1994 VCA
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Voluntary Cleanup Agreement
Completed Date:	05/10/1994
Comments:	Signed VCA with Caltrans for Cypress Reconstruction. This property is part of the project.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Alternate Address: 700 MURMANSK STREET, SUITE 3
Alternate City,St,Zip: OAKLAND, CA 94607
Background Info: ase which wil be redeveloped by the City of Oakland with a variet
y of commercial and industrial uses as part of the Gateway Develo
pment Area. Also, close to 185 acres (plus roughly 56 acres of s
ubmerged lands) will be developed by the Port of Oakland for mari
time, rail and other port activities as part of the Port Developm
ent Area. No residential uses will be allowed on the former Oakl
and Army Base property under the Amended Reuse Plan. The Amended
Reuse Plan, draft RAP, and draft RMP are analyzed in the former
Oakland Army Base Area Redevelopment Environmental Impact Report
pursuant to the California Environmental Quality Act. The Army h
as been conducting site environmental investigations and selected
remedial actions since 1989. DTSC is the primary agency oversee
ing the investigation and cleanup of the former Oakland Army Base
, and the Regional Water Qulaity Control Board, San Francisico Ba
y Region regulates the removal and closure of petroleum fuel tank
s. The Army’s remedial activities have included removal of above
ground petroleum storage tanks (ASTs) and underground petroleum s
torage tanks (USTs), excavation of contaminated soil and removed
petroleum hydrocarbons from monitoring wells at former tank locat
ions, excavation of pesticide-containing soil from the off-site w
etlands area, and replacement of many transformers and electrical
equipment containing polychlorinated biphenyls (PCBs).
On August 6, 2003, Governor Davis approved Early Transfer of the
former Oakland Army Base to the City of Oakland. The U.S. Army r
equested that the State of California approve the deferral of rem
ediation of hazardous substance contamination and approve the tra
nsfer of the 363.5 acre base to the Oakland Base Reuse Author- it
y and the City of Oakland acting by and through the Oakland Redev
elopment Agency via an Economic Development Conveyance process.
The City of Oakland will begin remediation of hazardous substance
s in soil and groundwater as required in the Remedial Action Play
(RAP). The early transfer advances economic development for Oak
land and the region by integrating redevelopment with remediation
. The RAP identifies preferred alternatives at seven sites which
have been fully investigated and characterized for release of haz
ardous substances and for which remediation would proceed upon fi
nal approval of the RAP. The Risk Management Plan (RMP), which is
an appendix to the RAP, addresses all other areas of known or po
tential contamination, which may not yet have been fully investig
ated or characterized. The RMP specifies health protective measur
es that must be follwed during and after redevelopment at these l
ocations. The RMP includes protocols for conducting inspections,
performing routine sampling, maintaining institutional and engine
ering controls, elevating RMP location to RAP sites as appropriat
e, and fulfilling reporting obligations. The former Oakland Arm
y Base comprises of approximately 425 acres. Much of the base pr
operty was originally tidal flats or shallow open water. During
the first half of 1900s, the area was filled to create the land s
ubsequently acquired by the Army 1941. The former Oakland Army B
ase served as a major Army cargo port and warehousing facility fr
om 1941 until it was closed under the Base Realignment and Closur
e program on September 30, 1999. Army activities supported the f
ormer Oakland Army Base’s primary military mission as a distribut
ion center and included maintaining and fueling railroad locomoti
ve engines and trucks that transported cargo, draining fluids fro

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

m vehicles for overseas shipment, and repairing and servicing veh
icles equipment, and base facilities. The Amended Draft final Reu
se Plan for the Oakland Army Base, Dated July 23, 2001 (Amended R
euse Plan), incoudes about 189 acres of the former Oakland Army B

Completed Info:

Completed Area Name:	RMP Locations 11, 75, 86, 93, 105, 106, 108,
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	04/05/2010
Comments:	On April 5, 2010, DTSC determined that all appropriate removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109 by November 2010.

Completed Area Name:	Package E-1
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/24/2010
Comments:	On June 24, 2010, DTSC issued the Remedial Action Certification for the Package E-1 Area. On June 14, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package E-1 Area in accordance with the RAP and RMP.

Completed Area Name:	Package B
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/29/2010
Comments:	On June 29, 2010, DTSC issued the Remedial Action Certification for the Package B Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package B Area in accordance with the RAP and RMP.

Completed Area Name:	USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/24/2010
Comments:	On June 24, 2010, DTSC issued the Remedial Action Certification for

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

the USTs 11/12/13 and 11A/12A/13A RAP Site. One June 24, 2010, DTSC approved the Completion Report and concluded that the Port of Oakland (a) had investigated the site adequately, (b) had implemented the required remedial action, (c) had monitored the groundwater for four quarters, and (d) had demonstrated achievement of the remedial action objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in accordance with the RAP, RMP, and RDIP.

Completed Area Name:	Bldg 99 GW
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/25/2009
Comments:	On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Groundwater Remedial Action Plan (RAP) Site (also known as the VOCs in Groundwater near Building 99 RAP Site). In 2005, the Port of Oakland installed five wells and monitored the groundwater for four quarters. Soil data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential industrial/commercial human receptors.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction - Site Inspection/Visit
Completed Date:	04/20/2010
Comments:	On March 22, 2010 DTSC, City of Oakland, and Port of Oakland inspected the Oakland Gateway Development Area. DTSC found site activities consistent with the land use covenant.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence
Completed Date:	08/11/2008
Comments:	The Port of Oakland and City of Oakland are requesting five years extension for the following RAP Sites:

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence
Completed Date:	08/12/2008
Comments:	DTSC issued a letter identifying that the trigger date for a statutory five-year review was the mobilization date of Building 1 remedy implementation (i.e., November 28, 2005). Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. The letter specifies that the first Draft Five-Year Review Report is due in May 2010.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction Monitoring Report
Completed Date:	01/28/2009
Comments:	The City of Oakland and the Port of Oakland provided their Annual Certification letters for the Gateway Development Area (GDA) and the Port Development Area (PDA), respectively on 1/13/09 and 1/22/09. These letters certify compliance with the environmental restrictions

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

of the Oakland Gateway Development Area (OGDA) as required by the Covenant to Restrict Use of Property, Environmental Restriction Section 4.01(e). DTSC has reviewed and concurred with the Annual Certification letters.

Completed Area Name:	Bldg 807
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	10/19/2009
Comments:	DTSC approved the Remedial Design and Implementation Plan for VOCs in Groundwater at Eastern End of Building 807 RAP Site on 10/19/09. The overall remedial action sequence is as follows: 1.

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	05/26/2006
Comments:	DTSC approved the Plan Modification Request Number 1 for Section 2.8 of the Soil Treatment Process Plan for the Building 1 Area. DTSC concurs that the City of Oakland may use pH indicator test strips in the field for the pre-treatment samples from Organic Residue.

Completed Area Name:	Bldg 99 GW
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	03/30/2005
Comments:	DTSC approved the Pre-Design Investigation Memorandum on 3/30/05 for the Building 99 Groundwater Remedial Action Plan Site.

Completed Area Name:	Bldg 99 Soil
Completed Sub Area Name:	Not reported
Completed Document Type:	* Remedial Action Completion or Implementation
Completed Date:	07/16/2007
Comments:	On 7/16/07, DTSC approved the Completion Report for the Building 99 Soil Remedial Action Plan (RAP) Site, and four adjacent Risk Management Plan (RMP) Locations listed below: Potential Lead-Based Paint Impacted Soils outside of Building 99 (NAD83 Northing and Easting Coordinates: 2125825, 6039940), Hydraulic Lift Cylinders inside Building 99 (NAD83 Northing and Easting Coordinates: 2125712, 6039884), Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125570, 6039966), and Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent RMP Locations.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Newsletter
Completed Date:	04/15/2005
Comments:	The Community Update presents the cleanup status of the portion of the former Oakland Army Base, now known as the Former Oakland Army Base Economic Development Conveyance Area. The update also transmits a survey to solicit community inputs regarding the cleanup project.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	06/14/2006
Comments:	DTSC concluded that there was no need for a formal draft final document.
Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Operations and Maintenance Plan
Completed Date:	08/01/2008
Comments:	DTSC confirmed that the City has responded and revised the Health and Safety Plan appropriately. DTSC s 7/29/08 letter serves as agency concurrence on the subject document.
Completed Area Name:	Bldg 99 GW
Completed Sub Area Name:	Not reported
Completed Document Type:	* Remedial Action Completion or Implementation
Completed Date:	07/16/2007
Comments:	On 7/16/07, DTSC approved the Completion Report, VOCs in Groundwater near Building 99 RAP Site. In 2005, the Port of Oakland installed five wells and monitored the groundwater for four quarters. Soil data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential industrial/commercial human receptors.
Completed Area Name:	Bldg 807
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	10/24/2005
Comments:	On 10/24/05, DTSC approved the Pre-Design Investigation Memorandum (PDIM) dated September 19, 2005 for volatile organic compounds in groundwater in the vicinity of Buildings 807, 808, and 823 at the Former Oakland Army Base Economic Development Conveyance Area. The PDIM proposes additional investigates to aid the Remedial Design and Implementation Plan preparation.
Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	02/14/2006
Comments:	DTSC approved the Remedial Design and Implementation Plan which proposes detailed cleanup actions at the Former Oil Reclaiming Plant/Building 1 Area. The City of Oakland will remediate soils and sludge contaminated with organic chemicals, neutralize corrosive soils, stabilize lead in soils, and dispose all wastes at permitted land disposal facilities.
Completed Area Name:	USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/24/2010
Comments:	On June 24, DTSC approved the June 2010 Completion Report for USTs 11/12/13 and 11A/12A/13A RAP Site and concluded that the Port of

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Oakland (a) had investigated the site adequately, (b) had implemented the required remedial action, (c) had monitored the groundwater for four quarters, and (d) had demonstrated achievement of the remedial action objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in accordance with the RAP, RMP, and RDIP.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 05/12/2009
Comments: On May 12, 2009, DTSC concluded that the City of Oakland has implemented the remedy pursuant to the Remedial Action Plan (RAP) and Remedial Design Implementation Plan (RDIP) at the Building 1 RAP Site and has demonstrated achievement of the remedial action objectives. Approximately 11,642 tons of treated Building 1 remediation waste was disposed of as non-RCRA hazardous waste at the Kettleman Hills Landfill. Approximately 578 tons of overburden soil, that was deemed unsuitable for on-site reuse, was disposed of as non-hazardous daily cover at the Altamont Facility. Approximately 10,000 gallons of wastewater, which included decontamination water and water from utility demolition was discharged to the City of Oakland sewer system in accordance with the East Bay Municipal Utility District Wastewater Discharge Permit and City of Oakland Building Inspection Sewer Permit. No excavation dewatering was conducted. Approximately 1 ton of sediment removed from the decontamination tank during cleaning was sampled and analyzed, and subsequently disposed of as non-hazardous daily cover at the Altamont Facility.

Completed Area Name: USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 08/23/2007
Comments: DTSC approved the Remedial Design and Implementation Plan for USTs 11/12/13 and 11A/12A/13A RAP Site (RDIP) dated August 2007. The RDIP describes the remedial activities at the USTs 11/12/13 AND 11A/12A/13A RAP Site. The Remedy includes re-excavating the backfill of the former USTs 11/12/13 excavation to one to two feet below the groundwater table (approximately 30 x 37 x 8 depth), pumping out groundwater that accumulates in the excavation, collecting confirmation soil samples on the sidewalls and floor, introducing oxygen release compound to the bottom of the excavation, backfilling excavation, and conducting quarterly groundwater monitoring at the site for at least one year.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 11/21/2003
Comments: DTSC approved the Pre-Design Investigation Memorandum on 11/21/03 for the Building 1 Area. The memorandum describes a focused, pre-design investigation to obtain additional visual descriptions of encountered soil and waste layers, soil physical parameter data, and limited chemical data that will be useful for finalizing design decisions and to provide information to bidding remediation contractors.

Completed Area Name: RMP Location - Building 99 Debris Area
Completed Sub Area Name: Not reported

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 02/14/2006
Comments: DTSC approved the Report on Phase I Investigation and Work Plan for Phase II Investigation of Debris Area near Building 99 on February 14, 2006. The Phase I Report summarizes findings on two test pits. The Phase II Work Plan proposes investigation to define the lateral and vertical extent of contamination at the Debris Area.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/22/2006
Comments: DTSC approved the Plan Modification Request Number 4 for a modification to the Soil Treatment Process Plan to include the use of the Caterpillar 330 excavator (as described in the plan Section 2.2), Front Loader (as described in the plan Section 2.2), and/or a Caterpillar D5 Dozer to mix the reagent with the Building 1 waste.

Completed Area Name: Bldg 808 and 823
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/08/2009
Comments: DTSC concludes that the City of Oakland (a) has implemented the selected remedy pursuant to the Remedial Action Plan and Pre-Design Investigation Memorandum and (b) has demonstrated achievement of the remedial action objectives for the Buildings 808 and 823 RAP Site. DTSC hereby approves the Completion Report. DTSC will change the status of the Buildings 808 and 823 RAP Site on its EnviroStor database to Certified with Ongoing Operation and Maintenance.

Completed Area Name: Bldg 99 Soil
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 04/27/2005
Comments: DTSC approved the Pre-Design Investigation Memorandum on 4/27/05 for the Building 99 Soil Remedial Action Plan Site. The memorandum is a sampling plan for additional soil investigation at the Building 99 area to supplement existing data.

Completed Area Name: Bldg 991
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/06/2005
Comments: DTSC approved the Pre-Design Investigation Memorandum on 6/6/05 for the Building 991 Remedial Action Plan Site.

Completed Area Name: RMP Locations
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 08/19/2008
Comments: DTSC reviewed sampling proposals for the Risk Management Plan (RMP) Locations at Packages E-1 and E-2 emailed on 3/16/07. Package E-1 contains RMP Locations 71, 72, 73, 79, 81, and 92. Package E-2 contains RMP Location 90. DTSC provided verbal comments on the sampling strategy during the 7/3/07 Environmental Technical Team Meeting (meeting minutes #37). DTSC forwarded a concurrence to the Port of Oakland stating that the Packages E-1 and E-2 sampling

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

proposals are consistent with the RMP (i.e., Appendix E of the 9/27/02 DTSC-approved Remedial Action Plan). The RMP itself is already a Remedial Design for all RMP Locations.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Workplan
Completed Date: 08/12/2008
Comments: DTSC concurs with the well destruction proposal for the following 40 groundwater monitoring wells: BB-3, EMW1, EMW2, EMW3, ICFMW216, ITMW237, ITMW238, ITMW239, ITMW241, ITMW242, ITMW245, ITMW246, ITMW247, ITMW248, ITMW251, K738BM01, K738DW01, K99BM01 or B99BM01, K99DW01 or B99DW01, K99DW02 or B99DW02, OBMW01, OBMW02, SMW-21, SMW-48, SMW-53, SMW-55, SMW-56, SMW-65, SMW-66, SMW-69, SMW-70, SMW-71, SMW-72, SMW-73, SMW-74, SMW-75, SMW-88, SMW-89, SMW-90, and SMW-92. DTSC requests the City of Oakland to destroy the wells in accordance with the procedures outlined in Appendix B, Section 2.6 of the DTSC-approved Quality Assurance Program Plan dated April 8, 2005.

Completed Area Name: USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name: Not reported
Completed Document Type: Remedy Constructed: Operating Properly & Successfully
Completed Date: 04/22/2010
Comments: On 4/22/10, DTSC approved the Technical Report for Implementation of Remedial Action at UST 11/12/13 and 11A/12A/13A RAP Site (Technical Report) dated April 2010. The Port of Oakland commenced remediation in August 2007 and completed field activities in October 2007. The Technical Report documents the cleanup activities pursuant to the DTSC-approved Remedial Design and Implementation Plan dated August 23, 2007.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 11/25/2008
Comments: On 11/25/08, DTSC approves the revised Operations and Maintenance Plan, Former ORP/Building 1 Area Remediation Project, Former Oakland Army Base Economic Development Conveyance Area (O&M Plan). The O&M Plan proposes (a) groundwater monitoring at the Building 1 Remedial Action Plan Site and (b) compliance reporting pursuant to the 8/8/03 Covenant to Restrict Use of Property, Environmental Restriction. The City of Oakland has satisfactorily responded to DTSC s 5/12/08 comments and revised the O&M Plan accordingly.

Completed Area Name: RMP Location - Building 99 Debris Area
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 12/12/2007
Comments: The investigation work plan presents a general approach to performing exploratory investigation activities and collecting soil samples to further define the extent of the debris containing layer and fill data gaps from prior investigations. The plan addresses the Building 99 Debris Area as a Risk Management Plan Location to be remediated in accordance with the DTSC-approved 2002 Final Remedial Action Plan / Risk Management Plan.

Completed Area Name: RMP Location - Building 99 Debris Area

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 01/19/2011
Comments: The Phase II Report concludes that further investigation and remediation are necessary, both within and outside of the EDC Area. The Port of Oakland and City of Oakland own separate portions of off-site areas potentially contaminated with hazardous substances from the Debris Area. DTSC has requested the Port and City to provide a schedule for subsequent investigation and remediation for the Debris Area within the EDC Area and adjacent off-site areas.

Completed Area Name: RMP Location - Building 99 Debris Area
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 04/13/2011
Comments: The Investigation Report confirms the presence of contamination within the EDC Area. This contamination is likely impacting off-site areas west of the Debris Area.

Completed Area Name: RMP Locations 3, 4, 5, and 6
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 04/29/2009
Comments: The City of Oakland (a) has adequately investigated Risk Management Plan (RMP) Locations 3, 4, 5, and 6, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name: Package E-1
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/14/2010
Comments: On June 14, 2010, DTSC approved the June 2010 Completion Report for the Package E-1 Area. Based on the information presented in the Completion Report, DTSC concluded that the Port of Oakland (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package E-1 Area in accordance with the Remedial Action Plan and Risk Management Plan.

Completed Area Name: Package E-2
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/29/2010
Comments: On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of remedial action objectives, and (c) had implemented the required remedies for the Package E-2 Area in accordance with the RAP and RMP.

Completed Area Name: RMP Location 96
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 02/09/2011
Comments: On February 9, 2011, DTSC issued the Remedial Action Certification for Risk Management Plan (RMP) Location 96. On February 2, 2011, DTSC approved the Request for Completion and concluded that the City of

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Oakland (a) had documented the removal of impacted-soil from RMP Location 96, (d) had presented investigation results to demonstrate the achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the project site including RMP Location 96.

Completed Area Name:	RMP Locations 27, 28, and 89
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/07/2011
Comments:	On 6/1/2011, DTSC issued a Remedial Action Certification for RMP Locations 27, 28, and 89 attesting that the Port of Oakland (a) had adequately investigated RMP Locations 27, 28, and 89, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name:	RMP Locations 7, 22, and 29
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	03/17/2011
Comments:	On March 17, 2011, DTSC issued the Remedial Action Certification for Risk Management Plan (RMP) Locations 7, 22, and 29. On March 15, 2011, DTSC approved the Request for Completion and concluded that the City of Oakland (a) had adequately investigated RMP Locations 7, 22, and 29, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name:	RMP Locations 48-51, 83, 115, 116, 119, and 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/01/2011
Comments:	On 6/1/2011, DTSC issued a Remedial Action Certification for RMP Locations 48, 49, 50, 51, 83, 115, 116, 119, and 120 attesting that the Port of Oakland (a) had adequately investigated RMP Locations 48, 49, 50, 51, 83, 115, 116, 119, and 120, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name:	RMP Locations 23, 24, 25, 87, 88, 113, 114, a
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	07/19/2010
Comments:	On July 19, 2010, DTSC determined that all appropriate removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123 by November 2010.

Completed Area Name:	Bldg 808 and 823
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/18/2009
Comments:	On October 24, 2005, DTSC approved the Pre-Design Investigation Memorandum (PDIM) for additional four quarters of groundwater monitoring to better define the plume boundary and to aid preparation of the remedial design document. Vinyl chloride is the only COC for the Buildings 808 and 823 RAP Site. The maximum detected concentration of vinyl chloride in groundwater from four recent quarterly monitoring events was 26 g/L, which is below the remediation goal of 32 g/L. All other VOCs were below the respective remediation goals. On March 20, 2009, DTSC issued the Risk Management Plan Modification letter specifying new language for RMP, Section 6.2 regarding vapor intrusion mitigation measures. This RMP Modification requires additional evaluation and consultation with DTSC if new buildings were to be constructed at the Buildings 808 and 823 RAP Site and vicinity areas. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for the Buildings 808 and 823 RAP Site. The trigger date for a statutory five-year review was the mobilization date of first remedy implementation for the Oakland Gateway Development Area project (i.e., Building 1 RAP Site on November 28, 2005). Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. As a result, DTSC shall receive the first Draft Five-Year Review Report in May 2010.

Completed Document Type:	Certification
Completed Date:	06/18/2009
Comments:	On February 14, 2006, DTSC approved the Remedial Design and Implementation Plan (RDIP) for the Building 1 RAP Site. The RDIP detailed cleanup procedures for contaminated soil and treatment for the Building 1 remediation waste. The City of Oakland commenced site preparatory activities on November 28, 2005, excavated soils and treated hazardous wastes on-site in 2006, and completed site restoration in early 2007. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for this site. The trigger date for a statutory five-year review was the mobilization date of the Building 1 remedy implementation, November 28, 2005. Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. As a result, DTSC shall receive the first Draft Five-Year Review Report in May 2010.

Completed Document Type:	Certification
Completed Date:	06/29/2010
Comments:	On June 29, 2010, DTSC issued the Remedial Action Certification for the Package E-2 Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of remedial action objectives, and (c) had implemented the required remedies for the Package E-2 Area in accordance with the RAP and RMP.
Completed Area Name:	Bldg 99 Soil
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/25/2009
Comments:	On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Soil Remedial Action Plan (RAP) Site, and four adjacent Risk Management Plan (RMP) Locations listed below: Potential Lead-Based Paint Impacted Soils outside of Building 99 (NAD83 Northing and Easting Coordinates: 2125825, 6039940), Hydraulic Lift Cylinders inside Building 99 (NAD83 Northing and Easting Coordinates: 2125712, 6039884), Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125570, 6039966), and Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent RMP Locations.
Completed Area Name:	Bldg 807
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedy Constructed: Operating Properly & Successfully
Completed Date:	10/14/2010
Comments:	On 10/14/10, DTSC approved the Remedial Action Implementation Report for the Building 807 RAP Site. DTSC concurred that the Port of Oakland had successfully constructed the remedy which included injecting Hydrogen Releasing Compound at 76 locations at the Building 807 RAP Site. The Port of Oakland will begin groundwater monitoring program as scheduled.
Completed Area Name:	RMP Locations 7, 22, and 29
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	03/15/2011
Comments:	DTSC approved the Request for Completion and concluded that the City of Oakland (a) had adequately investigated RMP Locations 7, 22, and 29, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.
Completed Area Name:	Bldg 991
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	01/26/2011
Comments:	DTSC approved the Tech Memo proposing the soil remediation goals for dieldrin, endrin, and lindane to be 0.13, 0.021, and 0.10 mg/kg,

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

respectively, for the Building 991 RAP Site only.

Completed Area Name: Package D-1/C-1

Completed Document Type: Correspondence - Received
Completed Date: 10/10/2008
Comments: On 10/10/2008, DTSC approved the City of Oakland s request allowing Anka Behavioral to use the interior of Building 821 as an emergency winter shelter for homeless individuals from November 1, 2008 through April 30, 2009.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence - Received
Completed Date: 10/31/2006
Comments: On 10/31/06, DTSC approved the Interim Land Use Waiver request allowing Operation Dignity to use the interior of Building 821 as an emergency winter shelter for homeless individuals from November 2006 through April 2007, and from November 2007 through April 2008.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence - Received
Completed Date: 03/27/2007
Comments: On 3/27/07, DTSC approved an Interim Land Use Waiver request allowing CEDA to use the Building 821 Lot as a winter encampment area as specified in CEDA s February 8, 2007 request letter. This Interim Land Use Waiver allows CEDA to operate the Building 821 Lot from April through August 2007. The wavier does not apply to any date not specified. This Interim Land Use Waiver expires on August 31, 2007.

Completed Area Name: Sites With No Operable Unit

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence - Received
Completed Date:	07/11/2007
Comments:	On 7/11/07, DTSC approved an extension request allowing CEDA to use the Building 821 Lot from September 1, 2007 through April 30, 2008.
Completed Area Name:	RMP Location 96
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	02/02/2011
Comments:	On February 2, 2011, DTSC approved the Request for Completion and concluded that the City of Oakland (a) had documented the removal of impacted-soil from RMP Location 96, (d) had presented investigation results to demonstrate the achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the project site including RMP Location 96.
Completed Area Name:	Bldg 807
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	11/15/2010
Comments:	DTSC acknowledged the receipt of the September 2010 Quarterly Groundwater Monitoring Data Report. Formal regulatory review on the data report is not necessary at this time. A completion report with data interpretation is forth coming at an appropriate time.
Completed Area Name:	Package B
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/29/2010
Comments:	On 6/29/10, DTSC approved the Completion Report for the Package B Area and concluded that the Port of Oakland (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package B Area in accordance with the RAP and RMP.
Completed Area Name:	RMP Locations 11, 75, 86, 93, 105, 106, 108,
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	10/20/2009
Comments:	Based on the information presented in the Completion Request, DTSC concludes that environmental data do not suggest evidence of contamination. DTSC hereby concurs that the City of Oakland (a) has adequately investigated RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required institutional control remedy for the subject RMP Locations. DTSC requested the City of Oakland to collect a grab groundwater sample at RMP Location 107 (UST-19) to fill a data gap. The City of Oakland has agreed to collect additional groundwater data at RMP Location 107 and defer the completion request for this location.
Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	04/20/2010
Comments:	On March 22, 2010 DTSC, City of Oakland, and Port of Oakland

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

inspected the Oakland Gateway Development Area. DTSC found site activities consistent with the land use covenant.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	03/01/2011
Comments:	DTSC reviewed the Annual Certification letters for the Oakland Gateway Development Area covering the Gateway Development Area (GDA) and Port Development Area (PDA), dated 2/4/11 and 1/6/11, respectively. DTSC has no comment.
Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	10/22/2009
Comments:	The City of Oakland conducted quarterly monitoring events in August 2008, November 2008, February 2009, and May 2009 at five monitoring wells B1MW001 through B1MW005. The results of four quarters of groundwater monitoring at the Building 1 Area indicate that the groundwater monitoring objectives have been met. No volatile COCs are present in groundwater at concentrations above remediation goals, and no significant increases in concentrations of metals or other non-volatile COCs are occurring. Based on the information presented in the July 24, 2009 Report, DTSC concurs with the City of Oakland s request to terminate groundwater monitoring at the Building 1 Area.
Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	11/16/2009
Comments:	DTSC has received the Port of Oakland s September 23, 2009 letter proposing Risk Management Plan (RMP) implementation protocols for storm drains and sanitary sewers (SD/SS). The September 27, 2002 DTSC-approved RMP includes SD/SS within the RMP Implementation Area. However, the RMP does not address implementation for "SD/SS without suspected or known contamination." DTSC issued a letter on 11/16/09 clarifying Section 2.2.2.7 of the RMP and specifying implementation protocols for "SD/SS without suspected or known contamination."
Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	5 Year Review Workplan
Completed Date:	05/11/2010
Comments:	On 5/11/10, DTSC completed initial review of a draft section from the draft Five-Year Review Report regarding remediation goals (RGs) for lead and total petroleum hydrocarbons (TPHs) at the Oakland Gateway Development Area (aka: Former OARB - EDC Area). DTSC agrees with the lead RG but disagrees with the TPH RGs.
Completed Area Name:	RMP Locations 20, 99, and 100
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	03/04/2008
Comments:	Based on the information presented in the 4/10/07 letter report, DTSC concluded that environmental data do not suggest potential of contamination. On 3/4/08, DTSC concurred that the City of Oakland (a)

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

has adequately investigated RMP Locations 20, 99, and 100, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required remedies for the subject RMP Locations. In addition, DTSC agreed with decommission of well ITMW241 associated with RMP Location 20.

Completed Area Name:	RMP Locations 23, 24, 25, 87, 88, 113, 114, a
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	07/19/2010
Comments:	On July 19, 2010, DTSC approved the City of Oakland s Completion Request and concluded that the City of Oakland (a) had investigated RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123 adequately, (b) had removed 842 cubic yards of impacted-soil from RMP Locations 23, 113, and 123, (c) had demonstrated achievement of the remedial action objectives, and (d) had implemented the required institutional control remedy for the subject RMP Locations. DTSC also approved the identification of RMP Location 159 to be addressed during future site redevelopment.

Completed Area Name:	RMP Locations 8, 10, 19/107, and 97
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	07/15/2010
Comments:	DTSC reviewed the Site Health and Safety Plan and concurred that the City of Oakland may proceed with field investigation at RMP Locations 8, 10, 19, 97, and 107 as schedule pursuant to the DTSC-approved Risk Management Plan.

Completed Area Name:	RMP Locations 27, 28, and 89
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	02/02/2011
Comments:	DTSC concurred with the sampling proposal for RMP Locations 27, 28, and 89.

Completed Area Name: RMP Locations 11, 75, 86, 93, 105, 106, 108,
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 04/05/2010
Comments: On April 5, 2010, DTSC determined that all appropriate removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109 by November 2010.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Area Name: Package E-1
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/24/2010
Comments: On June 24, 2010, DTSC issued the Remedial Action Certification for the Package E-1 Area. On June 14, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package E-1 Area in accordance with the RAP and RMP.

Completed Area Name: Package B
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/29/2010
Comments: On June 29, 2010, DTSC issued the Remedial Action Certification for the Package B Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package B Area in accordance with the RAP and RMP.

Completed Area Name: USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/24/2010
Comments: On June 24, 2010, DTSC issued the Remedial Action Certification for the USTs 11/12/13 and 11A/12A/13A RAP Site. One June 24, 2010, DTSC approved the Completion Report and concluded that the Port of Oakland (a) had investigated the site adequately, (b) had implemented the required remedial action, (c) had monitored the groundwater for four quarters, and (d) had demonstrated achievement of the remedial action objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in accordance with the RAP, RMP, and RDIP.

Completed Area Name: Bldg 99 GW
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/25/2009
Comments: On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Groundwater Remedial Action Plan (RAP) Site (also known as the VOCs in Groundwater near Building 99 RAP Site). In 2005, the Port of Oakland installed five wells and monitored the groundwater for four quarters. Soil data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential industrial/commercial human receptors.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 04/20/2010
Comments: On March 22, 2010 DTSC, City of Oakland, and Port of Oakland inspected the Oakland Gateway Development Area. DTSC found site activities consistent with the land use covenant.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 08/11/2008
Comments: The Port of Oakland and City of Oakland are requesting five years extension for the following RAP Sites:

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 08/12/2008
Comments: DTSC issued a letter identifying that the trigger date for a statutory five-year review was the mobilization date of Building 1 remedy implementation (i.e., November 28, 2005). Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. The letter specifies that the first Draft Five-Year Review Report is due in May 2010.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 01/28/2009
Comments: The City of Oakland and the Port of Oakland provided their Annual Certification letters for the Gateway Development Area (GDA) and the Port Development Area (PDA), respectively on 1/13/09 and 1/22/09. These letters certify compliance with the environmental restrictions of the Oakland Gateway Development Area (OGDA) as required by the Covenant to Restrict Use of Property, Environmental Restriction Section 4.01(e). DTSC has reviewed and concurred with the Annual Certification letters.

Completed Area Name: Bldg 807
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 10/19/2009
Comments: DTSC approved the Remedial Design and Implementation Plan for VOCs in Groundwater at Eastern End of Building 807 RAP Site on 10/19/09. The overall remedial action sequence is as follows: 1.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 05/26/2006
Comments: DTSC approved the Plan Modification Request Number 1 for Section 2.8 of the Soil Treatment Process Plan for the Building 1 Area. DTSC concurs that the City of Oakland may use pH indicator test strips in the field for the pre-treatment samples from Organic Residue.

Completed Area Name: Bldg 99 GW
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 03/30/2005
Comments: DTSC approved the Pre-Design Investigation Memorandum on 3/30/05 for the Building 99 Groundwater Remedial Action Plan Site.

Completed Area Name: Bldg 99 Soil
Completed Sub Area Name: Not reported

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Document Type:	* Remedial Action Completion or Implementation
Completed Date:	07/16/2007
Comments:	On 7/16/07, DTSC approved the Completion Report for the Building 99 Soil Remedial Action Plan (RAP) Site, and four adjacent Risk Management Plan (RMP) Locations listed below: Potential Lead-Based Paint Impacted Soils outside of Building 99 (NAD83 Northing and Easting Coordinates: 2125825, 6039940), Hydraulic Lift Cylinders inside Building 99 (NAD83 Northing and Easting Coordinates: 2125712, 6039884), Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125570, 6039966), and Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent RMP Locations.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Newsletter
Completed Date:	04/15/2005
Comments:	The Community Update presents the cleanup status of the portion of the former Oakland Army Base, now known as the Former Oakland Army Base Economic Development Conveyance Area. The update also transmits a survey to solicit community inputs regarding the cleanup project.

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	06/14/2006
Comments:	DTSC concluded that there was no need for a formal draft final document.

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Operations and Maintenance Plan
Completed Date:	08/01/2008
Comments:	DTSC confirmed that the City has responded and revised the Health and Safety Plan appropriately. DTSC s 7/29/08 letter serves as agency concurrence on the subject document.

Completed Area Name:	Bldg 99 GW
Completed Sub Area Name:	Not reported
Completed Document Type:	* Remedial Action Completion or Implementation
Completed Date:	07/16/2007
Comments:	On 7/16/07, DTSC approved the Completion Report, VOCs in Groundwater near Building 99 RAP Site. In 2005, the Port of Oakland installed five wells and monitored the groundwater for four quarters. Soil data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential industrial/commercial human receptors.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Document Type: Design/Implementation Workplan
Completed Date: 10/24/2005
Comments: On 10/24/05, DTSC approved the Pre-Design Investigation Memorandum (PDIM) dated September 19, 2005 for volatile organic compounds in groundwater in the vicinity of Buildings 807, 808, and 823 at the Former Oakland Army Base Economic Development Conveyance Area. The PDIM proposes additional investigates to aid the Remedial Design and Implementation Plan preparation.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 02/14/2006
Comments: DTSC approved the Remedial Design and Implementation Plan which proposes detailed cleanup actions at the Former Oil Reclaiming Plant/Building 1 Area. The City of Oakland will remediate soils and sludge contaminated with organic chemicals, neutralize corrosive soils, stabilize lead in soils, and dispose all wastes at permitted land disposal facilities.

Completed Area Name: USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/24/2010
Comments: On June 24, DTSC approved the June 2010 Completion Report for USTs 11/12/13 and 11A/12A/13A RAP Site and concluded that the Port of Oakland (a) had investigated the site adequately, (b) had implemented the required remedial action, (c) had monitored the groundwater for four quarters, and (d) had demonstrated achievement of the remedial action objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in accordance with the RAP, RMP, and RDIP.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 05/12/2009
Comments: On May 12, 2009, DTSC concluded that the City of Oakland has implemented the remedy pursuant to the Remedial Action Plan (RAP) and Remedial Design Implementation Plan (RDIP) at the Building 1 RAP Site and has demonstrated achievement of the remedial action objectives. Approximately 11,642 tons of treated Building 1 remediation waste was disposed of as non-RCRA hazardous waste at the Kettleman Hills Landfill. Approximately 578 tons of overburden soil, that was deemed unsuitable for on-site reuse, was disposed of as non-hazardous daily cover at the Altamont Facility. Approximately 10,000 gallons of wastewater, which included decontamination water and water from utility demolition was discharged to the City of Oakland sewer system in accordance with the East Bay Municipal Utility District Wastewater Discharge Permit and City of Oakland Building Inspection Sewer Permit. No excavation dewatering was conducted. Approximately 1 ton of sediment removed from the decontamination tank during cleaning was sampled and analyzed, and subsequently disposed of as non-hazardous daily cover at the Altamont Facility.

Completed Area Name: USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Date: 08/23/2007
Comments: DTSC approved the Remedial Design and Implementation Plan for USTs 11/12/13 and 11A/12A/13A RAP Site (RDIP) dated August 2007. The RDIP describes the remedial activities at the USTs 11/12/13 AND 11A/12A/13A RAP Site. The Remedy includes re-excavating the backfill of the former USTs 11/12/13 excavation to one to two feet below the groundwater table (approximately 30 x 37 x 8 depth), pumping out groundwater that accumulates in the excavation, collecting confirmation soil samples on the sidewalls and floor, introducing oxygen release compound to the bottom of the excavation, backfilling excavation, and conducting quarterly groundwater monitoring at the site for at least one year.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 11/21/2003
Comments: DTSC approved the Pre-Design Investigation Memorandum on 11/21/03 for the Building 1 Area. The memorandum describes a focused, pre-design investigation to obtain additional visual descriptions of encountered soil and waste layers, soil physical parameter data, and limited chemical data that will be useful for finalizing design decisions and to provide information to bidding remediation contractors.

Completed Area Name: RMP Location - Building 99 Debris Area
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 02/14/2006
Comments: DTSC approved the Report on Phase I Investigation and Work Plan for Phase II Investigation of Debris Area near Building 99 on February 14, 2006. The Phase I Report summarizes findings on two test pits. The Phase II Work Plan proposes investigation to define the lateral and vertical extent of contamination at the Debris Area.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/22/2006
Comments: DTSC approved the Plan Modification Request Number 4 for a modification to the Soil Treatment Process Plan to include the use of the Caterpillar 330 excavator (as described in the plan Section 2.2), Front Loader (as described in the plan Section 2.2), and/or a Caterpillar D5 Dozer to mix the reagent with the Building 1 waste.

Completed Area Name: Bldg 808 and 823
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/08/2009
Comments: DTSC concludes that the City of Oakland (a) has implemented the selected remedy pursuant to the Remedial Action Plan and Pre-Design Investigation Memorandum and (b) has demonstrated achievement of the remedial action objectives for the Buildings 808 and 823 RAP Site. DTSC hereby approves the Completion Report. DTSC will change the status of the Buildings 808 and 823 RAP Site on its EnviroStor database to Certified with Ongoing Operation and Maintenance.

Completed Area Name: Bldg 99 Soil

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	04/27/2005
Comments:	DTSC approved the Pre-Design Investigation Memorandum on 4/27/05 for the Building 99 Soil Remedial Action Plan Site. The memorandum is a sampling plan for additional soil investigation at the Building 99 area to supplement existing data.
Completed Area Name:	Bldg 991
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	06/06/2005
Comments:	DTSC approved the Pre-Design Investigation Memorandum on 6/6/05 for the Building 991 Remedial Action Plan Site.
Completed Area Name:	RMP Locations
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	08/19/2008
Comments:	DTSC reviewed sampling proposals for the Risk Management Plan (RMP) Locations at Packages E-1 and E-2 emailed on 3/16/07. Package E-1 contains RMP Locations 71, 72, 73, 79, 81, and 92. Package E-2 contains RMP Location 90. DTSC provided verbal comments on the sampling strategy during the 7/3/07 Environmental Technical Team Meeting (meeting minutes #37). DTSC forwarded a concurrence to the Port of Oakland stating that the Packages E-1 and E-2 sampling proposals are consistent with the RMP (i.e., Appendix E of the 9/27/02 DTSC-approved Remedial Action Plan). The RMP itself is already a Remedial Design for all RMP Locations.
Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Well Decommissioning Workplan
Completed Date:	08/12/2008
Comments:	DTSC concurs with the well destruction proposal for the following 40 groundwater monitoring wells: BB-3, EMW1, EMW2, EMW3, ICFMW216, ITMW237, ITMW238, ITMW239, ITMW241, ITMW242, ITMW245, ITMW246, ITMW247, ITMW248, ITMW251, K738BM01, K738DW01, K99BM01 or B99BM01, K99DW01 or B99DW01, K99DW02 or B99DW02, OBMW01, OBMW02, SMW-21, SMW-48, SMW-53, SMW-55, SMW-56, SMW-65, SMW-66, SMW-69, SMW-70, SMW-71, SMW-72, SMW-73, SMW-74, SMW-75, SMW-88, SMW-89, SMW-90, and SMW-92. DTSC requests the City of Oakland to destroy the wells in accordance with the procedures outlined in Appendix B, Section 2.6 of the DTSC-approved Quality Assurance Program Plan dated April 8, 2005.
Completed Area Name:	USTs 11/12/13 & 11A/12A/13A
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedy Constructed: Operating Properly & Successfully
Completed Date:	04/22/2010
Comments:	On 4/22/10, DTSC approved the Technical Report for Implementation of Remedial Action at UST 11/12/13 and 11A/12A/13A RAP Site (Technical Report) dated April 2010. The Port of Oakland commenced remediation in August 2007 and completed field activities in October 2007. The Technical Report documents the cleanup activities pursuant to the DTSC-approved Remedial Design and Implementation Plan dated August 23, 2007.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Operations and Maintenance Plan
Completed Date:	11/25/2008
Comments:	On 11/25/08, DTSC approves the revised Operations and Maintenance Plan, Former ORP/Building 1 Area Remediation Project, Former Oakland Army Base Economic Development Conveyance Area (O&M Plan). The O&M Plan proposes (a) groundwater monitoring at the Building 1 Remedial Action Plan Site and (b) compliance reporting pursuant to the 8/8/03 Covenant to Restrict Use of Property, Environmental Restriction. The City of Oakland has satisfactorily responded to DTSC s 5/12/08 comments and revised the O&M Plan accordingly.

Completed Area Name:	RMP Location - Building 99 Debris Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	12/12/2007
Comments:	The investigation work plan presents a general approach to performing exploratory investigation activities and collecting soil samples to further define the extent of the debris containing layer and fill data gaps from prior investigations. The plan addresses the Building 99 Debris Area as a Risk Management Plan Location to be remediated in accordance with the DTSC-approved 2002 Final Remedial Action Plan / Risk Management Plan.

Completed Area Name:	RMP Location - Building 99 Debris Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	01/19/2011
Comments:	The Phase II Report concludes that further investigation and remediation are necessary, both within and outside of the EDC Area. The Port of Oakland and City of Oakland own separate portions of off-site areas potentially contaminated with hazardous substances from the Debris Area. DTSC has requested the Port and City to provide a schedule for subsequent investigation and remediation for the Debris Area within the EDC Area and adjacent off-site areas.

Completed Area Name:	RMP Location - Building 99 Debris Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	04/13/2011
Comments:	The Investigation Report confirms the presence of contamination within the EDC Area. This contamination is likely impacting off-site areas west of the Debris Area.

Completed Area Name:	RMP Locations 3, 4, 5, and 6
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	04/29/2009
Comments:	The City of Oakland (a) has adequately investigated Risk Management Plan (RMP) Locations 3, 4, 5, and 6, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name:	Package E-1
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Date:	06/14/2010
Comments:	On June 14, 2010, DTSC approved the June 2010 Completion Report for the Package E-1 Area. Based on the information presented in the Completion Report, DTSC concluded that the Port of Oakland (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package E-1 Area in accordance with the Remedial Action Plan and Risk Management Plan.
Completed Area Name:	Package E-2
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/29/2010
Comments:	On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of remedial action objectives, and (c) had implemented the required remedies for the Package E-2 Area in accordance with the RAP and RMP.
Completed Area Name:	RMP Location 96
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	02/09/2011
Comments:	On February 9, 2011, DTSC issued the Remedial Action Certification for Risk Management Plan (RMP) Location 96. On February 2, 2011, DTSC approved the Request for Completion and concluded that the City of Oakland (a) had documented the removal of impacted-soil from RMP Location 96, (d) had presented investigation results to demonstrate the achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the project site including RMP Location 96.
Completed Area Name:	RMP Locations 27, 28, and 89
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/07/2011
Comments:	On 6/1/2011, DTSC issued a Remedial Action Certification for RMP Locations 27, 28, and 89 attesting that the Port of Oakland (a) had adequately investigated RMP Locations 27, 28, and 89, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.
Completed Area Name:	RMP Locations 7, 22, and 29
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	03/17/2011
Comments:	On March 17, 2011, DTSC issued the Remedial Action Certification for Risk Management Plan (RMP) Locations 7, 22, and 29. On March 15, 2011, DTSC approved the Request for Completion and concluded that the City of Oakland (a) had adequately investigated RMP Locations 7, 22, and 29, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.
Completed Area Name:	RMP Locations 48-51, 83, 115, 116, 119, and 1
Completed Sub Area Name:	Not reported

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Document Type:	Certification
Completed Date:	06/01/2011
Comments:	On 6/1/2011, DTSC issued a Remedial Action Certification for RMP Locations 48, 49, 50, 51, 83, 115, 116, 119, and 120 attesting that the Port of Oakland (a) had adequately investigated RMP Locations 48, 49, 50, 51, 83, 115, 116, 119, and 120, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.
Completed Area Name:	RMP Locations 23, 24, 25, 87, 88, 113, 114, a
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	07/19/2010
Comments:	On July 19, 2010, DTSC determined that all appropriate removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123 by November 2010.
Completed Area Name:	Bldg 808 and 823
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	06/18/2009
Comments:	On October 24, 2005, DTSC approved the Pre-Design Investigation Memorandum (PDIM) for additional four quarters of groundwater monitoring to better define the plume boundary and to aid preparation of the remedial design document. Vinyl chloride is the only COC for the Buildings 808 and 823 RAP Site. The maximum detected concentration of vinyl chloride in groundwater from four recent quarterly monitoring events was 26 g/L, which is below the remediation goal of 32 g/L. All other VOCs were below the respective remediation goals. On March 20, 2009, DTSC issued the Risk Management Plan Modification letter specifying new language for RMP, Section 6.2 regarding vapor intrusion mitigation measures. This RMP Modification requires additional evaluation and consultation with DTSC if new buildings were to be constructed at the Buildings 808 and 823 RAP Site and vicinity areas. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for the Buildings 808 and 823 RAP Site. The trigger date for a statutory five-year review was the mobilization date of first remedy implementation for the Oakland Gateway Development Area project (i.e., Building 1 RAP Site on November 28, 2005). Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. As a result, DTSC shall receive the

first Draft Five-Year Review Report in May 2010.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/18/2009
Comments: On February 14, 2006, DTSC approved the Remedial Design and Implementation Plan (RDIP) for the Building 1 RAP Site. The RDIP detailed cleanup procedures for contaminated soil and treatment for the Building 1 remediation waste. The City of Oakland commenced site preparatory activities on November 28, 2005, excavated soils and treated hazardous wastes on-site in 2006, and completed site restoration in early 2007. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for this site. The trigger date for a statutory five-year review was the mobilization date of the Building 1 remedy implementation, November 28, 2005. Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. As a result, DTSC shall receive the first Draft Five-Year Review Report in May 2010.

Completed Area Name: RMP Locations 8, 10, 19/107, and 97
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/28/2011
Comments: On 6/28/2011, DTSC issued a Remedial Action Certification for RMP Locations 8, 10, 19, 97, and 107 attesting that the City of Oakland (a) had adequately investigated RMP Locations 8, 10, 19, 97, and 107, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 3, 4, 5, and 6 by November 2010.

Completed Area Name: RMP Locations 20, 99, and 100
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/29/2010
Comments: On March 4, 2008, DTSC determined that all appropriate removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 20, 99, and 100. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 20, 99, and 100 by November 2010.

Completed Area Name: Package E-2
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/29/2010
Comments: On June 29, 2010, DTSC issued the Remedial Action Certification for the Package E-2 Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of remedial action objectives, and (c) had implemented the required remedies for the Package E-2 Area in accordance with the RAP and RMP.

Completed Area Name: Bldg 99 Soil
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/25/2009
Comments: On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Soil Remedial Action Plan (RAP) Site, and four adjacent Risk Management Plan (RMP) Locations listed below: Potential Lead-Based Paint Impacted Soils outside of Building 99 (NAD83 Northing and Easting Coordinates: 2125825, 6039940), Hydraulic Lift Cylinders inside Building 99 (NAD83 Northing and Easting Coordinates: 2125712, 6039884), Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125570, 6039966), and Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent RMP Locations.

Completed Area Name: Bldg 807

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Sub Area Name:	Not reported
Completed Document Type:	Remedy Constructed: Operating Properly & Successfully
Completed Date:	10/14/2010
Comments:	On 10/14/10, DTSC approved the Remedial Action Implementation Report for the Building 807 RAP Site. DTSC concurred that the Port of Oakland had successfully constructed the remedy which included injecting Hydrogen Releasing Compound at 76 locations at the Building 807 RAP Site. The Port of Oakland will begin groundwater monitoring program as scheduled.
Completed Area Name:	RMP Locations 7, 22, and 29
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	03/15/2011
Comments:	DTSC approved the Request for Completion and concluded that the City of Oakland (a) had adequately investigated RMP Locations 7, 22, and 29, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.
Completed Area Name:	Bldg 991
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	01/26/2011
Comments:	DTSC approved the Tech Memo proposing the soil remediation goals for dieldrin, endrin, and lindane to be 0.13, 0.021, and 0.10 mg/kg, respectively, for the Building 991 RAP Site only.
Completed Area Name:	Package D-1/C-1
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/14/2011
Comments:	DTSC approved the Completion Report and concluded that the Port of Oakland (a) had adequately investigated and remediated the Package D-1/C-1 Area, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject areas.
Completed Area Name:	Sites With No Operable Unit
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence - Received
Completed Date:	10/27/2010
Comments:	On 10/27/10, DTSC approved the waiver request allowing the City of Oakland s sub-lessee, Anka Behavioral, to use the interior of Building 821 as an emergency winter shelter for homeless individuals from November 1, 2010 through April 30, 2011.

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Comments:	On 10/10/2008, DTSC approved the City of Oakland s request allowing Anka Behavioral to use the interior of Building 821 as an emergency winter shelter for homeless individuals from November 1, 2008 through April 30, 2009.
Completed Area Name:	Sites With No Operable Unit
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence - Received
Completed Date:	10/31/2006
Comments:	On 10/31/06, DTSC approved the Interim Land Use Waiver request allowing Operation Dignity to use the interior of Building 821 as an emergency winter shelter for homeless individuals from November 2006 through April 2007, and from November 2007 through April 2008.
Completed Area Name:	Sites With No Operable Unit
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence - Received
Completed Date:	03/27/2007
Comments:	On 3/27/07, DTSC approved an Interim Land Use Waiver request allowing CEDA to use the Building 821 Lot as a winter encampment area as specified in CEDA s February 8, 2007 request letter. This Interim Land Use Waiver allows CEDA to operate the Building 821 Lot from April through August 2007. The wavier does not apply to any date not specified. This Interim Land Use Waiver expires on August 31, 2007.
Completed Area Name:	Sites With No Operable Unit
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence - Received
Completed Date:	07/11/2007
Comments:	On 7/11/07, DTSC approved an extension request allowing CEDA to use the Building 821 Lot from September 1, 2007 through April 30, 2008.
Completed Area Name:	RMP Location 96
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	02/02/2011
Comments:	On February 2, 2011, DTSC approved the Request for Completion and concluded that the City of Oakland (a) had documented the removal of impacted-soil from RMP Location 96, (d) had presented investigation results to demonstrate the achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the project site including RMP Location 96.
Completed Area Name:	Bldg 807
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	11/15/2010
Comments:	DTSC acknowledged the receipt of the September 2010 Quarterly Groundwater Monitoring Data Report. Formal regulatory review on the data report is not necessary at this time. A completion report with data interpretation is forth coming at an appropriate time.
Completed Area Name:	Package B
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/29/2010
Comments:	On 6/29/10, DTSC approved the Completion Report for the Package B

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Area and concluded that the Port of Oakland (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the Package B Area in accordance with the RAP and RMP.

Completed Area Name:	RMP Locations 11, 75, 86, 93, 105, 106, 108,
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	10/20/2009
Comments:	Based on the information presented in the Completion Request, DTSC concludes that environmental data do not suggest evidence of contamination. DTSC hereby concurs that the City of Oakland (a) has adequately investigated RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required institutional control remedy for the subject RMP Locations. DTSC requested the City of Oakland to collect a grab groundwater sample at RMP Location 107 (UST-19) to fill a data gap. The City of Oakland has agreed to collect additional groundwater data at RMP Location 107 and defer the completion request for this location.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	04/20/2010
Comments:	On March 22, 2010 DTSC, City of Oakland, and Port of Oakland inspected the Oakland Gateway Development Area. DTSC found site activities consistent with the land use covenant.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	03/01/2011
Comments:	DTSC reviewed the Annual Certification letters for the Oakland Gateway Development Area covering the Gateway Development Area (GDA) and Port Development Area (PDA), dated 2/4/11 and 1/6/11, respectively. DTSC has no comment.

Completed Area Name:	Bldg 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	10/22/2009
Comments:	The City of Oakland conducted quarterly monitoring events in August 2008, November 2008, February 2009, and May 2009 at five monitoring wells B1MW001 through B1MW005. The results of four quarters of groundwater monitoring at the Building 1 Area indicate that the groundwater monitoring objectives have been met. No volatile COCs are present in groundwater at concentrations above remediation goals, and no significant increases in concentrations of metals or other non-volatile COCs are occurring. Based on the information presented in the July 24, 2009 Report, DTSC concurs with the City of Oakland s request to terminate groundwater monitoring at the Building 1 Area.

Completed Area Name:	Basewide
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	11/16/2009

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Comments: DTSC has received the Port of Oakland s September 23, 2009 letter proposing Risk Management Plan (RMP) implementation protocols for storm drains and sanitary sewers (SD/SS). The September 27, 2002 DTSC-approved RMP includes SD/SS within the RMP Implementation Area. However, the RMP does not address implementation for "SD/SS without suspected or known contamination." DTSC issued a letter on 11/16/09 clarifying Section 2.2.2.7 of the RMP and specifying implementation protocols for "SD/SS without suspected or known contamination."

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Workplan
Completed Date: 05/11/2010
Comments: On 5/11/10, DTSC completed initial review of a draft section from the draft Five-Year Review Report regarding remediation goals (RGs) for lead and total petroleum hydrocarbons (TPHs) at the Oakland Gateway Development Area (aka: Former OARB - EDC Area). DTSC agrees with the lead RG but disagrees with the TPH RGs.

Completed Area Name: RMP Locations 20, 99, and 100
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 03/04/2008
Comments: Based on the information presented in the 4/10/07 letter report, DTSC concluded that environmental data do not suggest potential of contamination. On 3/4/08, DTSC concurred that the City of Oakland (a) has adequately investigated RMP Locations 20, 99, and 100, (b) has demonstrated achievement of the remedial action objectives, and (c) has implemented the required remedies for the subject RMP Locations. In addition, DTSC agreed with decommission of well ITMW241 associated with RMP Location 20.

Completed Area Name: RMP Locations 23, 24, 25, 87, 88, 113, 114, a
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 07/19/2010
Comments: On July 19, 2010, DTSC approved the City of Oakland s Completion Request and concluded that the City of Oakland (a) had investigated RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123 adequately, (b) had removed 842 cubic yards of impacted-soil from RMP Locations 23, 113, and 123, (c) had demonstrated achievement of the remedial action objectives, and (d) had implemented the required institutional control remedy for the subject RMP Locations. DTSC also approved the identification of RMP Location 159 to be addressed during future site redevelopment.

Completed Area Name: RMP Locations 8, 10, 19/107, and 97
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Design - Preliminary/Intermediate
Completed Date: 07/15/2010
Comments: DTSC reviewed the Site Health and Safety Plan and concurred that the City of Oakland may proceed with field investigation at RMP Locations 8, 10, 19, 97, and 107 as schedule pursuant to the DTSC-approved Risk Management Plan.

Completed Area Name: RMP Locations 27, 28, and 89
Completed Sub Area Name: Not reported

OAKLAND ARMY BASE-EARLY TRANSFER (Continued) **S106568695**

Completed Document Type:	Remedial Design - Preliminary/Intermediate
Completed Date:	02/02/2011
Comments:	DTSC concurred with the sampling proposal for RMP Locations 27, 28, and 89.

Completed Area Name:	RMP Locations 48-51, 83, 115, 116, 119, and 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	06/01/2011
Comments:	DTSC approved the Completion Report and concluded that the Port of Oakland (a) had adequately investigated RMP Locations 48, 49, 50, 51, 83, 115, 116, 119, and 120, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the subject RMP Locations.

Completed Area Name:	RMP Locations 8, 10, 19/107, and 97

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 07/03/1995
Comments: Two underground storage tanks (1,800-gallon fuel oil and 10,000-gallon gasoline) were removed in 1988. Gasoline and petroleum related compounds were detected in either the soil or groundwater. Sampling done in 1992 still detected petroleum related contamination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 08/14/1995
Comments: Recommended that a concrete trench and surrounding soil containing petroleum hydrocarbons be excavated and removed from the site.

Completed Area Name: PROJECT WIDE

VACANT BUILDING ON 5TH STREET (Continued) **S102423862**

Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/14/1995
Comments: The PEA recommended that a concrete trench and surrounding soil containing petroleum hydrocarbons be excavated and removed from the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 08/15/2002
Comments: Amendment to the 5/10/1994 VCA to amend Section 3.16, "Payment" and Section 3.35, "Time Periods".

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 05/10/1994
Comments: VCA signed with Caltrans. This project is part of the Cypress Reconstruction Project. In entering into this Agreement, it is the objective of the Parties to conduct Preliminary Endangerment Assessments, removal actions, necessary implementation, risk assessment, design review and/or a Remedial Action Plan as required on a site by site evaluation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 01/07/1999
Comments: Amendment to the May 10, 1994 VCA, which allows work to continue under Chapter 6.5 of the Health and Safety Code.

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site History:	In November 1991, one 5,000-gallon gasoline UST, two 10,000-gallon diesel USTs, one 750-gallon waste-oil UST, dispensers, and associated piping were removed from the site and replaced with two diesel USTs

UNITED STATES POSTAL SERVICE, OAKLAND P&DC (Continued) **S100947861**

and one aboveground WOT. Elevated petroleum hydrocarbons were reported in soil collected from the excavation sidewalls. In June 1992, one 10,000-gallon diesel UST was removed. Groundwater contained 72,000 |g/L TPHd. Monitoring wells were installed in 1994. Free product was observed in MW-4 in the June 2002 monitoring event. Free product bailing and adsorbent socks were deployed. Groundwater monitoring discontinued in 2003.

Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	08/31/1998
Comments:	PEA - PASI - A Field Sampling Plan was prepared to conduct limited sampling at the site on June 24, 1998 as part of the Site Reconnaissance Visit. The site had contaminants above US EPA Region 9’s Residential Preliminary Remedial Goals (PRG). Substances found were arsenic (5.78 mg/kg), cadmium (12.4 mg/kg), lead (589 mg/kg) and molybdenum (1130 mg/kg) comparing to the PRG’s limits of arsenic (0.38 mg/kg), cadmium (9 mg/kg), lead (400 mg/kg) and molybdenum (370 mg/kg) respectively.

Background Info: Oakland Army Base (OARB) is situated near the eastern terminus of the San Francisco-Oakland Bay Bridge. OARB occupies approx- ima tely 422 acres and is bounded by the Southern Pacific Trans- port

OAKLAND ARMY BASE (Continued) **S105481917**

ation Company railroad tracks on the east, the Port of Oakland Au
thority (formerly the Fleet and Industrial Supply Center Oakland)
on the south, the Bay Bridge on the north, and the Oaklnd Outer
Harbor on the west. From December 8, 1941 to September 30, 1999,
OARB carried out it’s mission in support activites for the sea,
rail and land transportation of military personnel and material f
or the U.S. Army. These activities included operation and mainte
nance of facilities and equipment, industrial processes, preparat
ion of vehicles for overseas ship- ment, storage of fuels, manage
ment of wastes, cleaning operations, support of seagoing vessels,
railroad rolling stock and trackage, trucking, wharf, and wareho
using operations. In December 1995, OARB was placed on the BRAC
IV list and design- ated for closure. OARB is scheduled to be t
ransferred to the City of Oakland in 2001. The Oakland Base Reus
e Authority (OBRA) which is the Local Reuse Authority (LRA) for t
he base developed a reuse plan in July 1998. Environmental inve
stigation and cleanup of OARB is being perform- ed in accordance
with the BRAC Cleanup Plan (July 1996) which was revised and upda
ted in January 1999. The California Department of Toxic Substanc
es Control (DTSC) is the lead agency for the environmental restor
ation as described in the Defense State Memorandum of Understandi
ng (DSMOA). OARB is not on the U. S. Environmental Protection Ag
ency’s National Priorities List (NPL). The 26 BRAC parcels were
grouped into 7 Operable Units (OU), initially identified accordi
ng to types of operation and geo- graphic location. OU1 included
Parcels 4 through 7 and 9 through 15, OU2 consisted entirely of P
arcel 8, OU3 included Parcels 16 through 26, OU4 included parcels
1 through 3 (shoreline, wharves, and submerged land), OU5 was re
served for no further action parcels, OU6 was for parcels that ha
d unexpected conditions, and OU7 was a small contaminated area at
the east end of Building 807 in Parcel 12. The Regional Water
Quality Control Board (RWQCB) is the lead regulatory agency for c
losure of underground fuel storage tanks (USTs) at OARB. USTs th
at contained used oils/fuels and oil/ water separators are not pa
rt of the UST program and are address- ed under the operable unit
cleanup program as described above. Based on Risk Based Correcti
ve Action (RBCA) evaluation, 4 of the 14 UST fuel sites have been
included in a program for further investigation and/or remediati
on. *** OPERABLE UNIT/SITE DESCRIPTION *** OU1 Operable Unit
1 covers 167 acres area with warehouses, a rail yard, open stora
ge area, parking lots, padre grounds administrative areas, wash p
latforms, maintenance shops, a printing plant and a plating shop.
OU1 consists of 11 parcels. OU2 Operable Unit 2 includes railr
oad engine maintenance, fueling and repair facilities. This is a
6.3 acres area at the northeastern border of the OARB. OU3 Oper
able Unit 3 is a 49.4 acres area at the southwestern end of OARB.
The area consists primarily of housing, housing support office
space, vehicle service areas and motor pool maintenance areas. O
U3 consists of 11 parcels. OU4 Operable Unit 4 consists of 127 a
cres with three parcels located at the northwestern end of OARB.
OU4 facilities include waterfronts, piers and cargo storage area
s. OU5 Operable Unit 5 is for three no further action parcels to
taling 35 acres. The area consists of support services, guest- h
ouse, child center, playground, theater, warehouses and Maritime
Street. OU6 Operable Unit 6 is reserved for funding any work rel
ated to basewide issues. The Army has not been using this operab
le unit for remedial and investigation activities. OU7 Operable

Completed Document Type: Environmental Assessment
Completed Date: 08/01/2002
Comments: The proposed action is the approval and implementation of the OARB Final Reuse Plan, applicable to one of the three sub-districts of the OARB Area Redevelopment Plan, by the Oakland Base Reuse Authority. The Reuse Plan provides for property transfers, remediation of soil and groundwater contamination, installation of major infrastructure, and rehabilitation or demolition and re-construction of mixed use (Public Access, Public Open Space. Recreation, Office/R&D, Light industrial, Warehouse/Distribution, Commercial/Retail, and Live/Work), as well as industrial Port uses (maritime end rail) and ancillary maritime support uses at or near the former OARB site.

Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Environmental Assessment
Completed Date:	08/01/2002
Comments:	The City of Oakland prepared the final ENVIRONMENTAL ASSESSMENT for the Oakland Army Base (OARB) Area Redevelopment Plan. The ENVIRONMENTAL ASSESSMENT includes environmental impact analysis for remedial alternatives proposed in the OARB's Remedial Action Plan. DTSC was a responsible agency for the ENVIRONMENTAL ASSESSMENT decision.

Completed Area Name:	OU2 - Offsite Wetland
Completed Sub Area Name:	Not reported
Completed Document Type:	Environmental Assessment
Completed Date:	08/15/2001
Comments:	DTSC completed the ENVIRONMENTAL ASSESSMENT necessary for the approval of the OU2 Removal Action Workplan for the removal of pesticide contaminated soil at a wetland soil in OU2.

Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Consent Order
Completed Date:	05/19/2003
Comments:	DTSC, the Oakland Base Reuse Authority, and the City of Oakland acting by and through the Oakland Redevelopment Agency executed the Consent Agreement on May 19, 2003. The Consent Agreement binds the City to enter into environmental restrictions for the Site as necessary to protect human health and the environment, and to require the remediation of the site by the City in accordance with the Oakland Army Base Remedial Action Plan and associated Risk Management Plan approved by DTSC on September 26, 2002.

Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction
Completed Date:	08/08/2003
Comments:	On August 6, 2003, Governor Davis approved early transfer of the former Oakland Army Base to the City of Oakland. The U.S. Army requested that the State of California approve the deferral of remediation of hazardous substance contamination and approve the transfer 363.5 acre of Army property to the Oakland Base Reuse Authority and the City of Oakland acting by and through the Oakland Redevelopment Agency. The transferred acreages are about 85% of the original 425 acres of the former base area.

Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Finding of Suitability for Early Transfer
Completed Date:	08/06/2003

Completed Area Name:	Parcel 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	06/28/2005
Comments:	On June 28, 2005, DTSC approved the Remedial Investigation Report for Parcel 1 at the former Oakland Army Base. Parcel 1 consists of approximately 19.97 acres, including approximately 14 acres (nominally 14.08 acres, more or less) of upland and approximately 6 acres (5.89 acres, more or less) of submerged sediments in the intertidal and subtidal zones. The Remedial Investigation Report presents a summary of all previous and supplemental investigations. The overall objective of the Remedial Investigation Report was to collect sufficient data to assess the nature and extent of the site-related chemicals in soil, sediment, and groundwater, and to complete a baseline human health and ecological risk assessment.
Completed Area Name:	OU2 - Offsite Wetland
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	07/26/2005
Comments:	Department of Toxic Substances Control (DTSC) has reviewed the Closure Report and determined that the Army has removed the pesticide contaminated soil at the wetland area pursuant to the DTSC-approved Operable Unit 2 Soil Removal Action Work Plan dated July 2001. The Army removed 1,204 tons of non-Resource Conservation and Recovery Act hazardous waste soil to achieve residential cleanup goals.

Completed Document Type: Remedial Investigation Report
Completed Date: 12/12/2000
Comments: The Department of Toxic Substances Control (DTSC) has received the final Technical Report of Findings (Report) for Operable Unit 5, Revision 2, dated November 2000 for the Oakland Army Base (OARB). The Report contains information supporting the Army s request of no further action for Parcels 22, 23 and 26 at OARB. DTSC has reviewed the Report and has no further comments.

Completed Area Name: BASEWIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment/Site Inspection Report (PA/SI)
Completed Date: 06/30/1998
Comments: DTSC Completed the review of the Basewide Preliminary Assessment/Site Inspection (PA/SI), also called Preliminary Endangerment Assessment (PEA) activity for Oakland Army Base. Twenty-six (26) parcels were evaluated in the PA/SI. Twenty (20) parcels are recommended for further action while six (6) parcels are recommended for no further action.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Feasibility Study Report
Completed Date: 09/26/2002
Comments: The elements of Remedial Investigation and Feasibility Study for Operable Units 1, 2, 3, and 7 have been incorporated into the Remedial Action Plan and Risk Management Plan. These Operable Units are located within the Economic Development Conveyance Area. Upon approval of the Remedial Action Plan on September 26, 2002, the Remedial Investigation and Feasibility Study for Operable Units 1, 2, 3, and 7 are deemed completed.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported

OAKLAND ARMY BASE (Continued) **S105481917**

Completed Document Type:	Remedial Action Plan
Completed Date:	09/26/2002
Comments:	On 9/26/02, DTSC approved the Remedial Action Plan (RAP) for the Economic Development Conveyance (EDC) Area. The EDC Area consists of 363.5 out of 425 acres of the base property. The Army will transfer the EDC Area to the City of Oakland shortly. The RAP requires cleanup of seven sites with soil and groundwater contaminated with metals, volatile and semi-volatile organic compounds, and total petroleum hydrocarbons. The RAP also requires cleanup of numerous locations where storage tanks, incidental vehicular maintenance, railroad tracks, and other activities involving the handling of hazardous materials occurred, and where hazardous substances or petroleum have been or may be discovered and will be remediated in accordance with the Risk Management Plan, an appendix to the RAP.
Completed Area Name:	OU2 - Offsite Wetland
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	08/15/2001
Comments:	DTSC approved the Soil Removal Action Work Plan for Operable Unit 2 (OU2) dated April 23, 2001 for the Oakland Army Base. The work plan proposes excavation and off-site disposal of pesticide contaminated soil at OU2. OU2 is a .5-acre low quality wetland offsite of the northeast end of Oakland Army Base.
Completed Area Name:	Parcel 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Feasibility Study Report
Completed Date:	04/19/2006
Comments:	On 4/19/06, DTSC approved the final "Uplands Areas of Concern, Feasibility Study, BRAC Parcel 1" dated April 2006. The Feasibility Study evaluates remedial alternatives for the upland Areas of Concern (AOCs) (i.e., AOC 1-1, AOC 1-2, AOC 1-3, and AOC 1-4) at Parcel 1 of the former Oakland Army Base. Parcel 1 includes the former landfill and part of the spit on which the eastern approach to the Bay Bridge is located. Constituents of concern include VOCs, pesticides, metals, and other typical waste constituents.

Completed Info:

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Assessment
Completed Date: 08/01/2002
Comments: The proposed action is the approval and implementation of the OARB Final Reuse Plan, applicable to one of the three sub-districts of the OARB Area Redevelopment Plan, by the Oakland Base Reuse Authority. The Reuse Plan provides for property transfers, remediation of soil and groundwater contamination, installation of major infrastructure, and rehabilitation or demolition and re-construction of mixed use (Public Access, Public Open Space. Recreation, Office/R&D, Light industrial, Warehouse/Distribution, Commercial/Retail, and Live/Work), as well as industrial Port uses (maritime end rail) and ancillary maritime support uses at or near the former OARB site.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Assessment
Completed Date: 08/01/2002
Comments: The City of Oakland prepared the final ENVIRONMENTAL ASSESSMENT for the Oakland Army Base (OARB) Area Redevelopment Plan. The ENVIRONMENTAL ASSESSMENT includes environmental impact analysis for remedial alternatives proposed in the OARB’s Remedial Action Plan. DTSC was a responsible agency for the ENVIRONMENTAL ASSESSMENT decision.

Completed Area Name: OU2 - Offsite Wetland
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Assessment

OAKLAND ARMY BASE (Continued) **S105481917**

Completed Date:	08/15/2001
Comments:	DTSC completed the ENVIRONMENTAL ASSESSMENT necessary for the approval of the OU2 Removal Action Workplan for the removal of pesticide contaminated soil at a wetland soil in OU2.
Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Consent Order
Completed Date:	05/19/2003
Comments:	DTSC, the Oakland Base Reuse Authority, and the City of Oakland acting by and through the Oakland Redevelopment Agency executed the Consent Agreement on May 19, 2003. The Consent Agreement binds the City to enter into environmental restrictions for the Site as necessary to protect human health and the environment, and to require the remediation of the site by the City in accordance with the Oakland Army Base Remedial Action Plan and associated Risk Management Plan approved by DTSC on September 26, 2002.
Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction
Completed Date:	08/08/2003
Comments:	On August 6, 2003, Governor Davis approved early transfer of the former Oakland Army Base to the City of Oakland. The U.S. Army requested that the State of California approve the deferral of remediation of hazardous substance contamination and approve the transfer 363.5 acre of Army property to the Oakland Base Reuse Authority and the City of Oakland acting by and through the Oakland Redevelopment Agency. The transferred acreages are about 85% of the original 425 acres of the former base area.
Completed Area Name:	EDC Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Finding of Suitability for Early Transfer
Completed Date:	08/06/2003

Completed Document Type: Remedial Investigation Report
Completed Date: 06/28/2005
Comments: On June 28, 2005, DTSC approved the Remedial Investigation Report for Parcel 1 at the former Oakland Army Base. Parcel 1 consists of approximately 19.97 acres, including approximately 14 acres (nominally 14.08 acres, more or less) of upland and approximately 6 acres (5.89 acres, more or less) of submerged sediments in the intertidal and subtidal zones. The Remedial Investigation Report

OAKLAND ARMY BASE (Continued) **S105481917**

presents a summary of all previous and supplemental investigations. The overall objective of the Remedial Investigation Report was to collect sufficient data to assess the nature and extent of the site-related chemicals in soil, sediment, and groundwater, and to complete a baseline human health and ecological risk assessment.

Completed Area Name:	OU2 - Offsite Wetland
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	07/26/2005
Comments:	Department of Toxic Substances Control (DTSC) has reviewed the Closure Report and determined that the Army has removed the pesticide contaminated soil at the wetland area pursuant to the DTSC-approved Operable Unit 2 Soil Removal Action Work Plan dated July 2001. The Army removed 1,204 tons of non-Resource Conservation and Recovery Act hazardous waste soil to achieve residential cleanup goals.

Completed Document Type:	Environmental Baseline Survey
Completed Date:	01/23/2003

OAKLAND ARMY BASE (Continued) **S105481917**

Comments: The Department of Toxic Substances Control (DTSC) has received the final Environmental Baseline Survey for Transfer (EBS-T) dated December 2002. The EBS-T provides a description of environmental conditions and presents data from previously prepared documents for BRAC Parcels 1 through 5, 8 through 17, 19 (partial), 20, 21 (partial), and 22 through 26 at the former Oakland Army Base (OARB). DTSC has reviewed the final EBS-T and has no further comments.

Completed Area Name: OU5
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 12/12/2000
Comments: The Department of Toxic Substances Control (DTSC) has received the final Technical Report of Findings (Report) for Operable Unit 5, Revision 2, dated November 2000 for the Oakland Army Base (OARB). The Report contains information supporting the Army s request of no further action for Parcels 22, 23 and 26 at OARB. DTSC has reviewed the Report and has no further comments.

Completed Area Name: BASEWIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment/Site Inspection Report (PA/SI)
Completed Date: 06/30/1998
Comments: DTSC Completed the review of the Basewide Preliminary Assessment/Site Inspection (PA/SI), also called Preliminary Endangerment Assessment (PEA) activity for Oakland Army Base. Twenty-six (26) parcels were evaluated in the PA/SI. Twenty (20) parcels are recommended for further action while six (6) parcels are recommended for no further action.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Feasibility Study Report
Completed Date: 09/26/2002
Comments: The elements of Remedial Investigation and Feasibility Study for Operable Units 1, 2, 3, and 7 have been incorporated into the Remedial Action Plan and Risk Management Plan. These Operable Units are located within the Economic Development Conveyance Area. Upon approval of the Remedial Action Plan on September 26, 2002, the Remedial Investigation and Feasibility Study for Operable Units 1, 2, 3, and 7 are deemed completed.

Completed Area Name: EDC Area
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 09/26/2002
Comments: On 9/26/02, DTSC approved the Remedial Action Plan (RAP) for the Economic Development Conveyance (EDC) Area. The EDC Area consists of 363.5 out of 425 acres of the base property. The Army will transfer the EDC Area to the City of Oakland shortly. The RAP requires cleanup of seven sites with soil and groundwater contaminated with metals, volatile and semi-volatile organic compounds, and total petroleum hydrocarbons. The RAP also requires cleanup of numerous locations where storage tanks, incidental vehicular maintenance, railroad tracks, and other activities involving the handling of hazardous materials occurred, and where hazardous substances or petroleum have been or may be discovered and will be remediated in accordance with

OAKLAND ARMY BASE (Continued) **S105481917**

the Risk Management Plan, an appendix to the RAP.

Completed Area Name:	OU2 - Offsite Wetland
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	08/15/2001
Comments:	DTSC approved the Soil Removal Action Work Plan for Operable Unit 2 (OU2) dated April 23, 2001 for the Oakland Army Base. The work plan proposes excavation and off-site disposal of pesticide contaminated soil at OU2. OU2 is a .5-acre low quality wetland offsite of the northeast end of Oakland Army Base.

Completed Area Name:	Parcel 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Feasibility Study Report
Completed Date:	04/19/2006
Comments:	On 4/19/06, DTSC approved the final "Uplands Areas of Concern, Feasibility Study, BRAC Parcel 1" dated April 2006. The Feasibility Study evaluates remedial alternatives for the upland Areas of Concern (AOCs) (i.e., AOC 1-1, AOC 1-2, AOC 1-3, and AOC 1-4) at Parcel 1 of the former Oakland Army Base. Parcel 1 includes the former landfill and part of the spit on which the eastern approach to the Bay Bridge is located. Constituents of concern include VOCs, pesticides, metals, and other typical waste constituents.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LOC Case Number:	RO0000019
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel
Site History:	Three USTs and approximately 120 linear feet of piping were removed from the site on February 16, 1989. The tank pit was over-excavated with approximately 1,500 cubic yards of soil treated onsite removed from the excavation. One groundwater monitoring well was installed at the site in July 1996. Additional site investigations were in conducted in 2007 and 2008.

CA BOND EXP. PLAN:

Reponsible Party:	RWQCB REFERRAL SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The responsible parties will pay all costs associated with remedial investigations and cleanup activities under RWQCB oversight. There are no plans to utilize Bond funds for this site.
Site Description:	Southern Pacific, Oakland, is a large railyard, switching and maintenance facility located between the Outer Harbor and Inner Harbor of San Francisco Bay. The site includes two surface impoundments which are separated by approximately a one-half mile distance: an oil/water separator system for waste waters from the cleaning of rail cars and an inactive waste pond for wash waters from the interiors of tank cars (referred to as polychlorinated biphenyl (PCB) sludge pond). There is soil and groundwater contamination at each of the surface impoundment areas.
Hazardous Waste Desc:	This site has been contaminated by PCBs, polynuclear aromatics (PNAs), benzene, toluene, xylene, ethylbenzene, waste oils, solvents such as trichloroethylene (TCE) and dichloroethylene (DCE) and heavy metals such as lead and arsenic. Shallow ground water is contaminated by solvents.
Threat To Public Health & Env:	The waste impoundment area is fenced; however, direct contact would present a potential health threat. This site is located within one mile of the San Francisco Bay; a drainage ditch is underneath the site. Potential for migration of contaminants tothe Bay is low. Solvents are known to have migrated offsite (at least 200 feet from the site at 3-foot depth) and to shallow ground water. There are no known domestic wells within three miles of the site.
Site Activity Status:	Southern Pacific submitted a draft RAP to the RWQCB and DHS in April, 1988. The RWQCB has determined the RAP to be unacceptable and is requiring additional hydrogeologic and site characterization.

Comments:	Remedy remains protective of human health and the environment.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	06/26/2003
Comments:	Completed PEA. A Site Screening was prepared in 2001 under contract with the United States Environmental Protection Agency (U.S. EPA). The site screening consisted of a drive-by and review of available

A. BERCOVICH 18TH STREET (Continued) **S103983450**

regulatory files, historical information, and ownership information. In 1989, elevated levels of lead were detected beneath paved areas of the Site. The site screening recommended further action based on the fact that elevated levels of lead and possibly other hazardous contaminants existed in the soil at the Site, and that the Site was adjacent to residences. DTSC is currently working with the Site owner to explore remedial options for the Site.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	07/11/2005
Comments:	PEA recommends - A land use covenant (LUC or deed restriction) should be placed on the property, since the contamination is not at the surface (1-3 feet bgs), the area will be completely paved. There is no onsite risk to workers or the nearby residents. Lead has been detected up to 1,100 mg/kg at 1-3 feet bgs in soils beneath the asphalt at the Site. Using LeadSpread (the lead risk assessment spreadsheet) developed by the DTSC, the screening level for lead at the PRG 99th percent level is 260 ug/g. Analytical testing of soil and ground water for TPHg, TPHd, total lead, BTEX, MTBE, metals, and VOCs on site did not identify any other contaminants above residential or drinking water standards. An Operation and Maintenance Plan and Agreement with the property owner will ensure that the pavement is maintained and that financial assurance is in place.

A. BERCOVICH 18TH STREET (Continued) **S103983450**

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	06/26/2003
Comments:	Completed PEA. A Site Screening was prepared in 2001 under contract with the United States Environmental Protection Agency (U.S. EPA). The site screening consisted of a drive-by and review of available regulatory files, historical information, and ownership information. In 1989, elevated levels of lead were detected beneath paved areas of the Site. The site screening recommended further action based on the fact that elevated levels of lead and possibly other hazardous contaminants existed in the soil at the Site, and that the Site was adjacent to residences. DTSC is currently working with the Site owner to explore remedial options for the Site.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	07/11/2005
Comments:	PEA recommends - A land use covenant (LUC or deed restriction) should be placed on the property, since the contamination is not at the surface (1-3 feet bgs), the area will be completely paved. There is no onsite risk to workers or the nearby residents. Lead has been detected up to 1,100 mg/kg at 1-3 feet bgs in soils beneath the asphalt at the Site. Using LeadSpread (the lead risk assessment spreadsheet) developed by the DTSC, the screening level for lead at the PRG 99th percent level is 260 ug/g. Analytical testing of soil and ground water for TPHg, TPHd, total lead, BTEX, MTBE, metals, and VOCs on site did not identify any other contaminants above residential or drinking water standards. An Operation and Maintenance Plan and Agreement with the property owner will ensure that the pavement is maintained and that financial assurance is in place.

Background Info: Alexander’s Ragtime Auto Wreckers operated an auto wrecking facility at the 0.3 acre Site from approximately 1966 to 1987. Meyer Goldberg and Miriam Goldberg were owners of the Site during Alexander’s Ragtime Auto Wrecker’s operation at the Site. The Goldbergs sold the Site to the San Francisco Bay Area Rapid Transit District (BART) in 1987. The Site is located in an industrial neighborhood with residences and other commercial areas located less than one block away. Business activities in the area include manufacturing, food processing, warehousing and

BOBO'S JUNKYARD (Continued) **S102008217**

Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	12/23/1996
Comments:	RAWs approved. Soil and groundwater investigations were conducted by both CalTrans and Southern Pacific Transportation Company (SPTCo) in the eastern portion of the site. Soil was found to be contaminated with petroleum compounds, pesticides, arsenic, lead, benzo(a)pyrene and volatile organic compounds. Groundwater was found to contain low-boiling petroleum hydrocarbons and volatile organic compounds. Both CalTrans and SPTCo were required to prepare a Removal Action Workplan (RAW) for the Eastern Portion of the site. The CalTrans RAW addressed the site during construction of the freeway whereas the SPTCo RAW describes post-construction actions. Both RAWs were approved in December 1996. The CalTrans RAW required a design change to the construction of Bent CR23. Three proposed footings were redesigned and located at ground level, and piles were redesigned so that no soil coring was required. In addition, a fourth footing was added to ensure stability in the event of an earthquake. Disposal of groundwater was not required as no excavation occurred. The remaining footings were constructed according to the existing design. Sealed shoring was installed at these footing locations to limit the amount of groundwater infiltration during construction excavations. Excavated groundwater was treated onsite and then either reused onsite or properly disposed off-site. The SPTCo RAW concluded that the site (soil and groundwater) does not pose a risk to human health and the environment under the exposure scenarios identified in the risk assessment (child trespasser and future construction worker). The alternative selected in the RAW requires an asphalt cap (or equivalent) with institutional controls and groundwater monitoring. This alternative was selected as SPTCo desired a useable surface at the site after freeway construction is completed. Two monitoring wells were installed downgradient of where cis-1,2-DCE was detected in groundwater. The purpose of the monitoring wells are to verify that cis-1,2-DCE is not migrating off the site. The Department will re-evaluate the need for additional remediation following the implementation of the U.S. EPA's investigation associated with an upgradient source, and in the event that groundwater concentrations rise significantly at the site. A five-year review of the removal action at the site will also be conducted.

Completed Document Type:	Removal Action Workplan
Completed Date:	12/23/1996
Comments:	RAWs approved. Soil and groundwater investigations were conducted by both CalTrans and Southern Pacific Transportation Company (SPTCo) in the eastern portion of the site. Soil was found to be contaminated with petroleum compounds, pesticides, arsenic, lead, benzo(a)pyrene and volatile organic compounds. Groundwater was found to contain low-boiling petroleum hydrocarbons and volatile organic compounds. Both CalTrans and SPTCo were required to prepare a Removal Action Workplan (RAW) for the Eastern Portion of the site. The CalTrans RAW addressed the site during construction of the freeway whereas the SPTCo RAW describes post-construction actions. Both RAWs were approved in December 1996. The CalTrans RAW required a design change to the construction of Bent CR23. Three proposed footings were redesigned and located at ground level, and piles were redesigned so that no soil coring was required. In addition, a fourth footing was added to ensure stability in the event of an earthquake. Disposal of groundwater was not required as no excavation occurred. The remaining footings were constructed according to the existing design. Sealed shoring was installed at these footing locations to limit the amount of groundwater infiltration during construction excavations. Excavated groundwater was treated onsite and then either reused onsite or properly disposed off-site. The SPTCo RAW concluded that the site (soil and groundwater) does not pose a risk to human health and the environment under the exposure scenarios identified in the risk assessment (child trespasser and future construction worker).

BOBO'S JUNKYARD (Continued) **S102008217**

The alternative selected in the RAW requires an asphalt cap (or equivalent) with institutional controls and groundwater monitoring. This alternative was selected as SPTCo desired a useable surface at the site after freeway construction is completed. Two monitoring wells were installed downgradient of where cis-1,2-DCE was detected in groundwater. The purpose of the monitoring wells are to verify that cis-1,2-DCE is not migrating off the site. The Department will re-evaluate the need for additional remediation following the implementation of the U.S. EPA's investigation associated with an upgradient source, and in the event that groundwater concentrations rise significantly at the site. A five-year review of the removal action at the site will also be conducted.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/13/1996
Comments: Remedial Action completed. Approximately 4,700 cubic yards of soil was excavated to six feet below ground surface. The site was paved for use as a training area for postal vehicles. Caltrans has installed groundwater monitoring wells and is conducting quarterly monitoring. Since the remediation goals contained in the approved RAP were for an industrial/commercial use, a deed restriction will be placed on the property restricting use.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/13/1996
Comments: Remedial Action completed. Approximately 4,700 cubic yards of soil was excavated to six feet below ground surface. The site was paved for use as a training area for postal vehicles. Caltrans has installed groundwater monitoring wells and is conducting quarterly monitoring. Since the remediation goals contained in the approved RAP were for an industrial/commercial use, a deed restriction will be placed on the property restricting use.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 11/09/1995
Comments: Approved Design.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 08/14/1995
Comments: Approved RAP requiring soil removal, groundwater monitoring and deed restriction if levels left are above unrestricted use.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 07/03/1995
Comments: Approved RIFS. Lead was the only contaminant found in excess of the acceptable concentrations.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 03/15/1995
Comments: Completed PEA found the Site had elevated levels of petroleum hydrocarbons, PCBs, metals, semi-and volatile organic compounds.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	03/14/2005
Comments:	Confirmation samples indicated that chlordane and lead were not found above their site cleanup goals (370 ug/kg and 261 mg/kg, respectively). East Bay Habitat had removed approximately 1,025 tons of excavated soil and disposed of it at an offsite Class I disposal facility. Approximately 1,755 tons of excavated soil was excavated and disposed of at an offsite Class II disposal facility.

Alternate City,St,Zip:	OAKLAND, CA 94607
Background Info:	The site is located along the edge of the Port of Oakland’s Outer Harbor. From 1958 to 1974, the site was occupied by the McGuire Chemical Company. McGurie blended, packaged and stored chemicals such as anti-freeze and various volatile organic chemicals (VOCs), including aromatic and chlorinated compounds. Potential contaminants at the site include: total petroleum hydrocarbons (TPH) as gasoline, diesel, and motor oil, tetrachloroethylene (PCE), trichloroethene (TCE), polynuclear aromatic hydrocarbons (PAHs), arsenic, and metals such as copper, nickel and lead. The chemicals were stored in above ground tanks. Investigations have found aromatic and chlorinated solvents in soil and groundwater in the former area of the above ground tanks. The site currently operates as a marine container terminal.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Comments: Approved RAP.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 07/03/1995
Comments: Completed RIFS. Site investigation was conducted by Caltrans consultants in June 1992. Soil and groundwater samples were collected as part of the investigation. Groundwater was encountered at a depth of 6-7 feet. Soil samples revealed the following contaminants: total recoverable petroleum hydrocarbons (TRPH) as high as 6,700 ppm; TPH as diesel as high as 3,800 ppm; acetone-150 ppb; di-n-butylphthalate 0.9 ppm; bis (2-ethylhexyl)phthalate 0.9 ppm; pyrene 0.3 ppm; benzo-a-pyrene 0.3 ppm; lead (840 ppm). The following contaminants were detected in groundwater: arsenic (0.22 ppm); barium (1.1 ppm); and cadmium (0.02 ppm).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 12/28/1992
Comments: Completed Site Screening. It is a RCRA facility with five underground storage tanks. Of these, two are 10,000-gallon capacity diesel tanks, one is a waste oil tank, one is a fresh oil tank, and one is an abandoned solvent tank. The solvent tank is reportedly filled with water. All the tanks are reported to have tested leak-free in 1988, and recently.

Completed Area Name: PROJECT WIDE

Comments: DTSC has determined that the site does not pose a significant threat to public health or the environment, therefore no further investigation or cleanup is required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/07/1996
Comments: Approved PEA which confirm extent of contamination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 08/14/1995
Comments: Approved Remedial Action Plan required that contaminated site soils be excavated and disposed at an off-site facility and groundwater monitoring be conducted pending removal of the underground tank. Groundwater monitoring to be conducted.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 07/03/1995
Comments: Investigation noted presence of underground storage tank. Soil and groundwater impacted with TPH.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 05/24/1993
Comments: Approval of investigation and remedial action options report, dated March 29, 1993. Site investigation noted debris and surface soil staining across site. Diesel tank present and soil sampling detected lead and gasoline.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Current Owner: PRIVATE

FUDS Description Details:

The site is 3.08 acres and is located in the City of Oakland in
Alameda County, CA. Two 10,000-gallon underground storage tanks
(USTs), a pumping station, a diesel fuel dispenser, and two fill pipes
were installed and used by the Santa Fe Land and Im
mprovement Company prior to and after Department of Defense leased the
property. The USTs were last used in June 1962 for diesel fuel storage
and dispensing. A private individual currently owns the property and
leases it to LDS Truck Lines and A.M. a
and S Transportation Company for use as a warehouse and truck
distributing center.

FUDS History Details:

On 15 October 1943, the War Department leased a total of 3.08 acres
from the Santa Fe Land and Improvement Company. The 9th District’s
Transportation Officer used the site for warehousing facilities,
trucking operations, and as a distribution center.
. The War Department terminated the lease on 15 June 1946 and the site
reverted back to the Santa Fe Land and Improvement Company. In 1982
the property was sold to a private individual. There are no potential
hazards related to previous DoD activitie
es currently identified at this site.

Background Info: OAB Heroic War Dead USAR, also known as the United States Army Reserve Center, Oakland, is located near the eastern terminus of the San Francisco-Oakland Bay Bridge. Installation Restoration (IR) Site 1 is located at the northwestern portion of the USAR Center. The site consists of a wash rack (WR) which is a concrete pad, a below-grade oil water separator (OWS), and the surrounding soil. The WR/OWS is approximately 15-feet by 20-feet in dimension. The site immediately surrounding the WR/OWS is unpaved and covered with soil and gravel. The previous owner, Oakland Army Base, formerly used IR Site 1 to wash vehicles and engine components. Operations ceased sometime prior to the USAR occupying the property in early 1970s. The USAR did not know of the existence of the WR/OWS until they were uncovered in 1994 during a grading operation. The area has since been fenced to prevent unauthorized use. Investigations reveal tha the soil contains concentrations of petroleum hydrocarbons, metals, and volatile organic compounds (VOCs) above regulatory guidelines. The shallow groundwater is also impacted with VOCs. From these results, it is surmised that the best course of action is to remove the WR/OWS and surrounding soil to minimize any further contamination to the groundwater. DT

OAB HEROIC WAR DEAD USAR AKA: HEROIC W (Continued) **S105954429**

SC has approved a Risk Assessment Workplan (RAW) for the removal
impacted soil and WR/OWS. The interim removal action would preve
nt any further degradation to the environment while aditional inv
estigation is conducted.
