## Handling Kitchen Oil in 3 Easy Steps

### ① Pour. ② Scrape or Wipe. ③ Toss.

Prevent sewer line clogs by using these tips instead of pouring grease down the drain:

① Pour cooled cooking oils and grease into a compostable container (paper carton), and toss into your yard trimmings cart, or pour oils and grease directly into the cart, preferably over leaves or grass clippings.

② Scrape or wipe remaining grease from pans and dishes with a scraper\* or paper towel, and toss into your yard trimmings cart.

③ Absorb small spills with a paper towel, and toss into your yard trimmings cart.

*If no yard trimmings cart is available, please use trash cart.*
